In addition, with respect to charter and special service, we are recommending a fitness only standard for entry. Because of extremely small capital requirements, we believe that charter and special service operations of bus companies represent potentially the most competitive segment of the industry and the segment least in need of any economic restrictions on entry other than fitness.

Several issues have been raised in legislative proposals or with respect to legislative proposals to deregulate or reregulate the motor bus industry. While we have chosen not to address these concerns directly in our legislative proposal, we do believe they warrant further discussion and, perhaps, consideration. The issues involve concerns about uniform state regulations, safety fitness, subsidies, and competition beween subsidized and nonsubsidized carriers.

First, with regard to the issue of uniform State regulations, we believe the issue has been adequately addressed in the Motor Carrier Act of 1980. Section 19 of that Act directs the Commission and the Secretary of Transportation, in consultation with the States and industry, to develop legislative or other recommendations regarding licensing, registration, and filings for interstate motor carriers (both carriers of property and carriers of passengers). We recognize that the laws and regulations of the States are often changing and frequently are quite different. This patchwork quilt of different State laws and regulations impedes effective operations and acts as a deterrent to competition. However, as Congress has already recognized this problem and mandated action, we feel it would be inappropriate at this time to address this concern in our proposal.

S. 2895 and H.R. 7677, identical bills introduced in the 96th Congress at the request of one of the major interstate bus company trade associations, call for a determination, by the Secretary of Transportation in cases where a carrier's safety fitness has been challenged, that a carrier is fit, before a certification may be issued by the Commission. We concur with the view that carriers should be fit with respect to safety and that the Secretary, in instances where a carrier's safety fitness is suspect, should make the ultimate decision. Further, the bills require that certificates issued to carriers not holding authority from the Commission shall be limited to terms not to exceed three years. We oppose the imposition of limited terms on authorities issued to "new" companies as this would deter competition without any benefit accruing to the public. Law today provides that a carrier must be fit to operate, and that a carrier's authority may be revoked or suspended if it is found to be unsafe. In light of present law and pending legislation,[2] we do not believe the language in S. 2895 and H.R. 7677 is necessary.

Many parties have suggested that an increased amount of subsidies will be necessary to ensure service to rural communities if carriers are permitted to freely exit unprofitable routes. While enactment of our proposal could lead to a disruption in service to some small communities, disruptions which we believe in some instances would only be temporary, we believe the subject of subsidies should more appropriately be addressed by the United States Department of Transportation and State and local authorities. The Commission is prepared to cooperate fully in the design and implementation of these studies if they are deemed desirable. Should the Congress consider employing a program of Federal subsidies to insure service to particular areas, the Commission recommends that the cost of these programs be explicitly balanced against the anticipated benefits and in every case reasonable alternatives to Federal subsidies be fully evaluated.

Another issue raised in the industry bill and by private carriers involves competition between subsidized carriers and nonsubsidized carriers. We are sympathetic with the concerns of those companies providing nonsubsidized service who allege that public transit authorities and Federally subsidized private carriers are competing with them. At a recently held Intercity Bus Transportation Conference, it was often said that public transit authorities and regular route private carriers are competing with nonsubsidized private carriers for charter and special service passengers. We have no hard evidence to either support or deny this allegation. Nevertheless, it is a valid concern which could become a reality or more of a reality if present subsidy programs are increased or not properly enforced. The Urban Mass Transportation Act and regulations promulgated under it provide sufficient safeguards, at the Federal level, if enforced, to prevent this unfair competition. Therefore, we are not inclined to suggest any language in our proposal directed to this concern.

---

[2] Legislation passed by the Senate and pending House action (S. 1390) further addresses the issue of safety fitness with respect to motor carriers. We support efforts which would require the Secretary to make a safety fitness determination on all applications for permanent operating authority, and we support the view that such determinations should be binding on the Commission. Finally, we support the provisions contained in this legislation which would, in instances where there is sufficient evidence to question a carrier's safety fitness, require an investigation by the DOT, and, where necessary, appropriate action by the DOT, the Commission or both.

In summary, we believe that the most valid approach to bus entry policy at this time is to conform it to the entry policy of the Motor Carrier Act. While clearly the situation of the bus industry is not identical to that of the trucking industry, we do not believe that other more restrictive or more complicated entry schemes are justified at present. At a minimum, we believe that the approach of the Motor Carrier Act is a sound and progressive course for Congress to take at this time and should be tried before other courses are adopted. Such a course will give necessary protection to the carriers while at the same time expand the opportunity to compete.

Section 6. Removal of Certain Restrictions on Bus Operations.—

We propose here to apply the restriction removal provisions of Section 6 of the Motor Carrier Act to bus operations, and to add a new subsection prohibiting "closed-door" restrictions by the states which apply to carriers operating under interstate certificates.

In general, we believe that the policies behind the restriction removal section of the Motor Carrier Act apply with equal logic and force to bus carriers. Prominently in this category are such matters as gateway, circuitous route, and intermediate point restrictions.[3]

However, there is one type of restriction which is not dealt with by the Motor Carrier Act, and that is the closed-door restriction imposed by some states on interstate bus traffic. Under a typical closed-door restriction, a carrier is prohibited from picking up or dropping off passengers moving between intermediate points within a single state when the operation as a whole is conducted interstate pursuant to a certificate granted by the Commission. Thus, for example, a carrier moving from Columbus, Ohio, to St. Louis, Mo. via Indianapolis and Terre Haute might be prohibited from picking up passengers at Indianapolis to be dropped off at Terre Haute. Such schemes are generally designed to protect carriers from competition. Using the same example, the closed-door restriction described would assist intrastate carriers or other carriers authorized to transport passengers between Indianapolis and Terre Haute.

While we recognize that our recommendation relating to state closed-door restrictions represents an incursion into an area traditionally left to state regulation, we believe that these restrictions cause an undue burden on interstate commerce and can no longer be justified. The viability of interstate operations authorized by the Commission is at stake—interstate carriers often need intrastate passengers along the way to make their overall routes profitable. These restrictions should be viewed in light of the historically declining financial position of the bus industry. Nor can closed-door policies be justified in the light of policies favoring both increased competition among interstate carriers, and improved operational and energy efficiency in an era of diminishing resources.

It is important to note that our recommendation is not intended to reach beyond the point necessary to enhance the competitiveness of interstate carriers moving pursuant to interstate certificates. While the states might justifiably consider removing closed-door restrictions on solely intrastate traffic, we believe that this is a matter best left to them, and for that reason we are not suggesting a total preemption of closed-door restrictions.

In addition, we propose to add a new Section (d)(5) to Section 10922 which would clarify the scope of operating rights certificates. Carriers with authority will be able to transport passengers in one way charter or special operations. This clarification of the scope of operating rights certificates eliminates the perceived need by some carriers to apply for separate one way authority.

Closely associated with the elimination of operating restrictions contained in bus carrier certificates, we are proposing in Subsection (b) of Section 6 of this bill, that the Commission implement procedures to allow carriers to broaden the scope of existing regular route operating certificates with respect to charter and package express operations.

Prior to this bill, package express authority was awarded incidental to regular route operations. Charter authority prior to 1967 was most often awarded as incidental to regular route operations. Presently, most carriers still hold certificates that limit charter originations to regular route authority areas, and all regular route certificates limit package express service to the regular route authority.

Our concern is that in the more liberal entry environment that currently exists for the bus industry and in light of the flexibility offered by this bill with respect to new carrier entry into charter, special operations, or package express operations, existing carriers with restrictive certificates should be able to broaden their authority. We could suggest that these carriers merely apply for new charter, special operations, and package express authority and terminate older certificates. However, due to the volume of existing certificates, a more efficient approach would be for the Commission to establish a procedure to allow carriers to reasonably broaden their charter, special operations, and package express authorities conferred by their regular route certificates.

This policy would result in a more equitable treatment of existing carriers and new carriers in that existing carriers could broaden their restricted regular outer certificates just as a new carrier could apply for new charter or package express authority. The overall outcome of this proposed procedure is to eliminate in an evenhanded manner the restrictions caused by the concept of incidental authority.

Section 7. Zone of Rate Freedom for Motor Carriers of Passengers.—

We propose to extend the zone of rate freedom established by Section 11 of the Motor Carrier Act to motor carriers of passengers. We believe that the arguments in support of rate flexibility for motor carriers of property and freight forwarders are generally applicable to motor carriers of passengers as well. Allowing price flexibility to the bus industry will enable a balanced plan for regulatory reform to come about in conjunction with entry and exit flexibility.

While we believe that the zone of flexibility in the Motor Carrier Act is appropriate for buses, we would be reluctant to allow a greater margin of upward rate freedom in the initial years after regulatory reform. It is clear that the bus industry needs more competition before greater upward rate flexibility should be allowed—competition which, it is hoped, the bus reform bill taken as a whole will provide over a period of time. However, some upward flexibility in the zone is justified by intermodal competition.

In terms of downward rate flexibility, we believe that the bus industry needs as much freedom as possible to enhance competition. This includes regular, charter, special operations, and package express services. Greater rate flexibility should lead to more unrestrained use of peak-load pricing and discount fares. While the Commission has encouraged the use of such initiatives in the past, we believe that the extension of the zone of rate freedom to motor carriers of passengers would have a beneficial effect in this regard.

Section 8. Rule of Ratemaking.—

We propose to extend the rule of ratemaking contained in Section 13 of the Motor Carrier Act to the motor bus industry. In our view, the justifications for the changes in the Motor Carrier Act are equally applicable to the bus industry.

Section 9. Rate Bureaus.—

We propose to adapt the provisions of Section 14 of the Motor Carrier Act with joint rate antitrust immunity patterned after the Staggers Rail Act, but to advance the schedule of elimination of discussion and collective voting on single-line rates to January 1, 1982, for bus carriers, as opposed to January 1, 1984, as provided in the Motor Carrier Act for motor carriers of property.

In general, we believe that the justifications for changes in the rate bureau system applicable to motor carriers of property apply as well to motor carriers of passengers. However, the reasons for the substantial delay in implementation of the provisions of Section 14 of the Motor Carrier Act do not appear to apply to passenger carriers. This is so for several reasons. First, it is clear there is a more immediate need to foster and enhance competition in the bus industry than in the trucking industry. The bus industry has one rate bureau which is significantly controlled, if not dominated, by Greyhound and Trailways, and the market as a whole is dominated by those two carriers—Greyhound having approximately 60 percent of the Class 1 intercity revenues, and Trailways another 24 percent. We do not believe there is any public purpose served by allowing Greyhound and Trailways to mutually decide on rates they charge between points where they compete with each other on single-line traffic. Moreover, the uncertainties caused by the multiplicity of rate bureaus and the vast number of carriers, which are potential problems in the trucking area, are simply not present in the bus industry. On balance, the relative simplicity of the situation and the dominance of one or two carriers in the industry, together, provide a substantial justification for prohibiting discussion and voting on single-line rates as soon as possible. Nor does it appear that the study mandated by the Motor Carrier Act is necessary in the area of bus regulation—the problem is simpler, the answer is clearer, and the need for more rapid action is evident.

However, the same cannot be said for joint-line immunity in the bus area—because of the need for interline services, there may be a justification for antitrust immunity for joint-line ratemaking. The Interstate Commerce Act presently requires that through routes and joint rates be established between and among bus companies, a requirement which has existed since 1935—unlike the trucking industry, where the requirement did not exist at all until the recent Act was passed and now exists in a limited form. This evidences a longstanding Congressional concern for through routes and joint rates between and among bus companies, and antitrust immunity may be appropriate on a continuing basis to assist the development of such routes and rates in a freer competitive environment. Bus compa-

[3] Vice Chairman Gresham notes that the gateway elimination proposal, insofar as it applies to regular-route passenger operations, may clash with Section 10922(d)(3) of the Act, which the Commission's bill leaves undisturbed. He believes that a better approach might be to liberalize the Commission's passenger super-highway and deviation rules, while retaining reasonable and adequate service over the authorized regular route. See 49 C.F.R. 1042 and Ex Parte No. MC-65 (Sub-No. 6), *Petition to Revise Passenger Motor Carrier Superhighway and Deviation Rules*, 44 Fed. Reg. 6580-83, February 1, 1979.

nies should receive antitrust immunity to set joint rates.[4] However, the immunity granted should apply only to the making of a specific joint rate between or among carriers with end-to-end routes. There is no compelling need to grant antitrust immunity to carriers that could be competitors (for example, two competing through routes) or to an entire rate bureau consisting of a few hundred carriers (who are not involved in a specific route or determining a rate) to intervene, facilitate, and get the concurrence of carriers on particular joint rates. In addition, there is no demonstrated need or value for collective determination of nationwide general increases. Inflation affects different carriers in different regions in different ways. Collective procedures to request rate increases based on the average costs of a study group of carriers may seriously understate or possibly overstate actual carrier costs. The rate freedom allowed by the zone of reasonableness provides individual carriers the simplest means and greatest flexibility to raise rates to levels carriers consider reasonable. Moreover, the rule of ratemaking requires the Commission to establish regulatory policies which permit fully compensatory rates further diminishing the need for collective development of general rate increases.

Joint rates between bus carriers which are mandatory under Section 10703(a)(3) can be best developed by individual carriers taking into account all relevant factors to develop mutually acceptable rates. This will be particularly true in the more competitive environment envisioned in this bill. Should agreement on an acceptable level of a joint rate not occur between carriers, an alternative is to develop a joint rate based on the sum of each carrier's local rate for its segment of the through route in question. Another alternative means of developing a joint rate would be for individual carriers to set combination rates which would only be available to interline passengers. They could be lower than local rates to reflect economies of through bus operations.

In addition, although the number of individual joint rates required nationwide is quite large, the numbers of carriers involved is relatively small and agreements between individual carriers about blocks of joint rates could be easily accomplished. We are recommending that rate bureau immunity for collective discussion and voting on joint rates and general rate increases for bus companies end after December 31, 1981.

The provisions of this bill do not preclude an organization such as the present rate bureau from acting as a tariff agent or a clearinghouse for joint rate settlements.

Section 10. Motor Carrier Brokers of Passengers.—

The provisions of this bill do not preclude 17 of the Motor Carrier Act to motor carrier brokers of passengers, thus bringing about a uniform standard for all motor carrier brokers. In this connection it should be noted that the Commission had decided to take this action previously, but this decision was set aside on appeal to the courts for procedural reasons. We believe there is no good reason why liberalized entry standards for motor carriers of property cannot be applied equally to motor carrier brokers of passengers.

Section 11. Temporary Authorities and Emergency Temporary Authorities.—

Our legislative proposal on Temporary Authorities and Emergency Temporary Authorities is different than the changes brought about for motor carriers of property by the Motor Carrier Act of 1980. Differences between property and passenger carriers make emergencies more likely and more damaging for passengers than for shippers and justify a departure from the guidance of the Motor Carrier Act. There are thousands of motor carriers of property but only a few hundred bus companies to provide service, and service requirements for passenger transportation are more specific and time-sensitive than for property transportation.

One goal in this proposal is: (1) to make carrier response as flexible as possible to emergencies, discontinuances of service by other carriers, or changing market demands and (2) to minimize needless filings for emergency temporary authority and temporary authority by carriers interested in permanent authority. We are recommending an emergency temporary authority provision which would be based only on a showing of immediate need. There will be no requirement for a written application. Oral requests will be sufficient. This procedure would allow fit, willing and able carriers to respond quickly to serve areas in need of immediate service and to respond to opportunities to provide specialized service. Grants would be given only to carriers who are fit, willing and able but it is not anticipated that a new finding of fitness would be required for each case. For existing carriers, this requirement is met by their continuing fitness. For new entrants, one finding of fitness would be required. However, the duration of the ETA grant would only be for as many as 60 days, even if renewed. This procedure would allow for quick response to consumers, legitimate needs, and because of the short duration of ETA grants, existing carriers could not be substantially harmed. Should the carrier use predatory practices during the initial grant, the Commission would deny the extension.

Our proposed temporary authority provisions are consistent with the requirements of the emergency temporary authority process, a carrier must show that the proposed service will meet an immediate need. This provision should facilitate and speed up entry by bus companies into new markets and promotes the National Transportation Policy goal of a more competitive and efficient bus transportation system.

Section 12. Merger Procedure.—

We propose to apply the changes of the Motor Carrier Act to passenger carriers. Here again, there appears to be no reason why the law should not be uniform in this respect for carriers of property and passengers.

Section 13. Minimum Financial Responsibility.—

We propose to apply the provisions of Section 30 of the Motor Carrier Act of 1980 to motor carriers of passengers with slight modification.

The Commission expressed certain reservations about the scheme adopted by Congress when it transferred jurisdiction over minimum financial responsibility for motor carriers of property to the Department of Transportation, and set new limits which were substantially in excess of those provided by previous law. Nonetheless, it is clear that something needs to be done in the area of financial responsibility of motor carriers of passengers, and we think that a scheme similar to that Congress provided for motor carriers of property should be adopted for bus companies. However, we believe that especially in the area of financial responsibility, bus carriers are different from motor carriers of property in terms of the potential liability from accidents. In order to insure that the public is adequately protected, we included provisions in Section 13 of this bill which raise the minimum liability limits for motor carriers of passengers well above the minimum level for motor carriers of property.[5] There is sufficient discretion provided by the bill for the Secretary of Transportation to require different limits for passenger carriers as well as property carriers should that be appropriate.

Section 14. Exit Policy.—

A balanced regulatory reform proposal must consider the interaction of entry, rates, and exit regulation. The economic check on greater price flexibility is eased entry regulation. However, exit regulation is also an extremely important element of current restrictions of intercity bus regulation and should be a key element in any regulatory reform proposal.

ICC restrictions on exit from this industry have had a minimal effect in the past. The more severe check on exit comes from individual state regulatory authorities. Federal reform proposals for exit have to deal with the potential problems that could result from divergent federal and state policies. For example, a bus carrier that seeks to abandon an unprofitable interstate route may still be forced to serve the similarly unprofitable intrastate portion of the route if the state denies the carrier the abandonment of the route. Faced with this, a carrier might be forced to maintain the interstate route to minimize overall losses even though this will place a burden on the carrier's interstate service as a whole.

The exit provisions of the proposed Motor Bus Act of 1981 set up a procedure that allows interstate carriers to exit from unprofitable routes. This procedure gives all regulatory authorities and affected communities adequate notice of the proposed service discontinuance and prevents States from requiring the carrier to continue intrastate service that is part of proposed interstate discontinuance. Communities have the right to protest a service discontinuance and time is allowed for information to flow from the carrier to the ICC and protestants regarding the level of required subsidy and traffic characteristics. This procedure gives protestants the opportunity to seek a subsidy for the service or encourage alternative service. Deadlines are established that insure no undue delay in the ultimate decision to discontinue the route.

The value of this procedure is that it gives passengers and communities adequate notice of discontinuance and gives carriers more assurance about being able to exit from or being compensated for unprofitable routes. The Commission would have the power to enjoin the discountinuance if a bus carrier did not comply with the discontinuance procedure of Section 14 of this bill. With flexible entry, rates, and exit it is quite possible that new carriers will enter abandoned routes and provide the same basic service and earn a profit. The present federal and state regulation of exit may effectively preclude new entrants because of the fear by carriers of the inability to exist from the route.

Section 15. Discriminatory State Regulation of Passenger Fares and Express Rates.—

The Commission remains concerned that Federal reform initiatives to enhance competition and ease regulatory barriers could po-

[4] The Commission has previously investigated the scope of bus rate bureau operations and the continued need for immunity for the bus/rate bureau in Ex Parte 297 (Sub-No. 4) Reopening Of Section 5(a) Application Proceedings To Take Additional Evidence—Section 5(a) Application No. 9, National Bus Traffic Association, Inc. In general, the Commission voted to eliminate antitrust immunity for collective voting on rates for charter, special operations, and single line rates for regular route and package express service and to grant immunity for setting of joint rates. Action by the Commission to implement this decision was halted in November 1979 at the request of Senator Cannon. Copies of the individual Commissioner votes are attached as Appendix A.

[5] Vice Chairman Gresham notes that Section 11 of the American Bus Association's bill proposes a $2 million level of insurance coverage, while the Commission's bill suggests a lesser amount, ranging from $750,000 to $1.5 million. He believes that additional study is necessary to determine the insurance level which is high enough to honor claims, yet not so high as to create an artificial entry barrier.

tentially be nullified by State regulatory actions. Potential problems could result in the area of ratemaking. Carriers that have both interstate and intrastate authority and provide both services over the same route using the same equipment, cannot allocate the costs of the service between the interstate and intrastate portions with any degree of precision. There is always some question of what part of the joint costs of the service as a whole should be borne by each part of the traffic. If the ICC introduced a zone of reasonableness fare flexibility for the interstate traffic, while the intrastate fare remained more closely regulated by the states, then state commissions could hold down intrastate fares forcing carriers to take increases in interstate fares. Currently the ICC has no mechanism to counteract this kind of an effort by the State commission. The result could be a situation in which the low intrastate fares put a significant burden on interstate commerce. That should be avoided especially in view of air and rail competition on the longer interstate movements which would make it difficult for carriers to retain long haul interstate passengers if they were required to cross-subsidize intrastate passengers. It also would be unfair and unequitable to force interstate passengers to pay rates that cross-subsidize intrastate passengers.

Some States fear that Federal policies that promote competition and carrier flexibility could undermine State regulatory and subsidy programs based upon built-in cross-subsidies. However, a guiding purpose of this bill and the other Federal reform measures for the surface transportation industry is to promote greater carrier competition and move away from the more protective regulation of the original 1935 Motor Carrier Act. Based on this goal, we can neither act to further State programs based on the use of cross-subsidies which impact interstate commerce not restrict Federal reform proposals to take into account the existence of a policy of cross-subsidy at the State level. Our concern is that State rate regulation of intrastate portions of interstate routes may force interstate passengers to subsidize intrastate passengers. Such a cross-subsidy is a burden on interstate commerce and cannot continue. We believe that an intercity bus industry regulated to a greater extent by market forces than by strict government regulation is desirable. Such a system should provide benefits—benefits such as an intercity bus service that is more responsive to overall public demand—which outweigh any resultant difficulties imposed on the regulatory programs of individual States. While the Commission's position is very clear on this point, we recognize that States have a legitimate concern about the effects of these proposals on their regulations and policies. We recommend that Congress consult with the States during the legislative process concerning bus regulatory reform as the Commission has in developing these legislative recommendations.

Problems between Federal and State regulation will not always arise. However, in order to promote competition in the bus industry and facilitate the long run survival of the industry, legislative steps need to be taken to insure the availability of a mechanism to protect carriers' rights to price fairly, more efficiently utilize their vehicles, and avoid cross-subsidies of interstate and intrastate passengers. The provisions of Section 15 of the Act are meant to insure that carriers are fairly treated by Federal and State regulators and that competition is encouraged.

Historically, relief from unreasonably low intrastate rate decisions has been available only to rail carriers subject to the jurisdiction of the Commission. However, we believe that the problem with respect to motor carriers of passengers is essentially of the same nature. Since Congress has recently substantially revised the standards and procedures applicable to railroads (see Section 214 of the Staggers Rail Act of 1980), we have proposed to modify the sections of the Code amended by the Staggers Act to apply to motor passenger carriers as well as railroads. Since this is Congress' most recent expression of how it wishes to treat the relationship between interstate and intrastate regulation, this solution seems most appropriate.

The Commission has some experience with selective preemption in the intrastate rail rate area. The Commission's first preemptive powers for rail regulation were granted by Congress in 1920 (see former Sections 15a(2) and 13(4)). They have evolved ever since, especially in the 4R Act of 1976 and the Staggers Act. Another area where ICC preemption was more questionable was the regulation of adequate intercity rail passenger service. In the Adequacies case, 335 I.C.C. 415, 437 (1969), a divided Commission found that such regulatory jurisdiction rests with the States, but then sought preemption powers from Congress. The Congressional response was Section 801 of the Rail Passenger Service Act of 1970 (45 U.S.C. 641). The Commission ultimately adopted regulations to enforce the Act. See Ex Parte No. 277 (Sub-No. 1), 344 I.C.C. 758, and 49 C.F.R. 1124, effective in June 1976. Finally, the Amtrak Reorganization Act of 1979 repealed Section 801, and the Commission repealed its adequacy regulations in February 1980. See Ex Parte No. 277 (Sub-No. 4). At the request of Congress, the Commission will prepare a summary of our past experience with preemption in rail regulation.

Section 16. Motor Carriers of Passengers, Mixed Loads and Other Provisions.—

We propose that bus companies may mix charter and regular route passengers in the same buses. One of the chronic problems alleged by the regular route bus industry is a low utilization of available bus capacity. The airline industry had the same problem and allowed smaller groups to use blocks of scheduled service seats instead of chartering a full airplane. We think that opportunity should be available in the bus industry. The definition of a charter group can be flexibly defined by the Commission to be only a few persons much the same as it was defined by the Civil Aeronautics Board. We can appreciate the problem of carriers not being able to use this provision either because the regular route service offered is less desirable than full charter service or because travel time, due to intermediate stops, is too long to make the charter attractive. However, we believe that greater flexibility in this area can lead to attractive price/service options for small organized groups. This could be particularly attractive for smaller tour groups who can't charter a full bus and desire to stop off in a particular location for a few days prior to continuing or returning to the origination. Such a service could fill empty seats on regular scheduled runs, especially express trips. This would be attractive to the bus companies and allow smaller tour or charter groups lower rates than conventional charter.

The Commission is also concerned about more flexibility for bus package express operations. In Section 5 the Commission is proposing that the fitness only entry standards for small package carriers be applicable to bus companies. Basically, the provisions give bus companies the same flexibility to enter this business as motor carriers of property. To further enhance competition, we are proposing to allow bus package express shipments to be carried in the same motor vehicle with passengers or in a separate vehicle. In addition, in Section 6 we propose that bus carriers should be able to offer package express service to whatever areas they specify and not be constrained to the area surrounding their regular routes. In combination these proposals should interject needed competition into the small shipments market and eliminate the traditional restriction that package express operations be incidental to passenger operations.

Section 17. Improved Competition in Specified Markets.—

We stated earlier in our discussion of Section 5 that we did not believe it would be justified at this time to adopt an entry policy favoring a more liberalized regular route entry procedure in those instances where effective city pair or route competition does not presently exist. Basically, we believe this because, although the idea is attractive in many respects, we see no way that such a goal can be accomplished without imposing heavy evidentiary and administrative burdens on the Commission and the industry to determine where relief of this kind should be granted. As it now appears, it would be necessary to determine where such markets exist and what action should be taken in such cases. However, this is a matter which we believe may warrant attention, particularly if the liberalized entry which a bus reform bill would bring about does not substantially improve the level of competition in certain markets.

Section 18. Bus Terminal Study.—

We believe that a substantial issue may be raised as to the relationship between the ownership and location of bus terminals serving customers on regularly scheduled routes and the overall issue of competitiveness among bus carriers. However, we believe too little is known about the issue to warrant legislative action at this time. Yet a number of factors are involved, which relate closely to the need for improved interline service for the convenience of bus passengers and the ability of larger carriers with substantial market power to discourage or prevent meaningful competition. Also involved are important questions of intermodalism and urban development. We believe that this problem is sufficiently important to warrant further study, and for that reason we recommend that Congress authorize such a study.

Section 19. Tax Discrimination Against Bus Carrier Transportation Property.—

We propose to apply the changes of the Motor Carrier Act of 1980 to passenger carriers. There appears to be no reason why the law should not be uniform in this respect for carriers of property and passengers.●

By Mr. STAFFORD:

S. 928. A bill to amend the Elementary and Secondary Education Act of 1965 to provide comprehensive elementary school guidance and counseling programs for elementary students through States and local educational agencies; to the Committee on Labor and Human Resources.

ELEMENTARY SCHOOL GUIDANCE AND COUNSELING INCENTIVE ACT

● Mr. STAFFORD. Mr. President, today I am introducing the Elementary School Guidance and Counseling Incentive Act. While there are voices in this Nation, in this Government, and indeed in this body which argue that now is not the time for new, additional initiatives in education, there is no time such as the present to begin planning for the future.

The Elementary School Guidance and Counseling Incentive Act is designed to deal with the needs and problems of elementary school children today so that these needs and problems will not be exacerbated tomorrow. By amending the Elementary and Secondary Education Act, this legislation would support the establishment and extension of comprehensive guidance and counseling programs in our Nation's elementary

schools. By enlarging the pool of trained professionals who guide and counsel our young, this act would contribute to the enhancement of educational quality and to the increase in personal potential for individual students.

Mr. President, I recognize, as do my colleagues, that the difficult economic times we are experiencing may preclude the enactment of this proposal in the immediate future. Simultaneously, I share the vision of our President that we shall traverse successfully this period into a brighter economic future. When that time arrives, there will be more budgetary flexibility to accommodate the scope and breadth of this act. In the meantime, the issues this legislation speaks to are so considerable that the discussion and debate over the goals of this act and the problems it hopes to solve must begin now. Therefore, I take pleasure in introducing this measure to further that purpose.●

By Mr. GOLDWATER (for himself, Mr. PACKWOOD, Mr. SCHMITT, Mr. PRESSLER, Mr. STEVENS, Mr. CANNON, Mr. HOLLINGS, and Mr. INOUYE):

S. 929. A bill to amend the Communications Act of 1934 to provide for improved administration of the Amateur Radio Service and Private Land Mobile and Fixed Services by the Federal Communications Commission, to address the problem of radio-frequency interference to certain electronic equipment, to permit volunteer assistance to the Federal Communications Commission in the area of examinations, licensing, and enforcement in the Amateur Radio Service, and for other purposes; to the Committee on Commerce, Science, and Transportation.

AMATEUR RADIO SERVICE AND PRIVATE LAND MOBILE AND FIXED SERVICES ACT OF 1981

● Mr. GOLDWATER. Mr. President, the bill I am introducing today, the Amateur Radio Service and Private Land Mobile and Fixed Services Act of 1981, takes significant and much needed steps to improve these two services.

The purpose of the amateur radio portions of this bill is to provide the Federal Communications Commission (FCC) with the authority to implement various programs which will result in improvements in administration of the Amateur Radio Service and to cut the costs thereof. It would further allow the Amateur Radio Service to continue its tradition as the most self-regulated radio service in the United States.

In the face of an expanding electronic age, with radio frequency energy fields present everywhere and increasing all the time, home electronic equipment (such as television receivers, burglar alarms, and the like) have suffered interference due to inability to reject unwanted signals. The solution to the problem consists of incorporation of inexpensive filtering methods into the design of such equipment. This bill would allow the FCC to require that radio frequency interference suppression techniques be incorporated into electronic home entertainment devices by the manufacturers. In the case of low-cost items which could not profitably incorporate such filtering methods, a simple warning to the consumer as to the susceptibility of that device to radio frequency interference could suffice. Devices manufactured prior to the executive date of the act would be exempt from this requirement. I am reluctant to take this step to extend FCC jurisdiction over a matter that has been left to the marketplace. But after repeated unsuccessful efforts to obtain the electronics industries' voluntary cooperation, I believe we must rely on the FCC for guidance on a resolution of this issue.

The matter of unlicensed radio operation in or adjacent to the radio frequencies allocated to the Amateur Radio Service has become a severe problem. This often blatant, illegal activity interferes with legitimate citizen's band and amateur radio transmissions. Use of high power, amateur transmitting equipment is a constant factor in such illegal operation. This bill would permit the FCC to prohibit delivery of radio transmitters or amplifiers to any person unless that person first exhibits a valid license, thus establishing that such person is authorized to use that equipment legally.

Amateur radio, long known as the best radio service in the United States in terms of self regulation, must be allowed to continue to keep its own house in order, since the FCC does not have the manpower to do so. Amateurs, to do this, must work together. Recent Federal court decisions, due to a lack of legislative history, have held amateur radio to be included in the secrecy provisions of section 605 of the Communications Act, thus prohibiting amateurs from disclosing among themselves the content of transmissions heard on the amateur bands. This bill would exempt amateurs from this burden, thus allowing them to continue to self regulate.

There is no purpose served by a 5-year amateur license term, except to allow the FCC to delete from the rolls those amatur licensees who have died or chosen not to renew licenses. This bill provides for a 10-year license term which would decrease administrative costs in issuing amateur licenses.

The FCC's Field Operations Bureau is now operating at below minimum efficiency levels due to budget and manpower cutbacks. At the same time, interference complaints within the amateur radio bands are constantly increasing. While we expect the Commission to correct this matter, it would be beneficial to the FCC to utilize the voluntary services of licensed amateurs to prepare and administer amateur examinations, and to monitor illegal activity in the amateur bands. This bill would allow amateurs to detect, locate, and monitor illegal operators, interference problems, and the like, to save FCC field personnel huge amounts of time and expense in locating rule violators. Armed with the information obtained from amateur volunteers, FCC personnel can proceed right to the source of the problem, monitor at the predicted times, and gather evidence much faster than would otherwise be possible.

Preparation and administration of amateur examinations by amateur volunteers under FCC supervision is another time-saving matter that could cut FCC administrative costs immensely while improving service to the public. Volunteer activity by amateurs under the terms of this bill is specifically stated not to constitute Federal employment for any purpose.

The purpose of the Land Mobile section of the bill is to provide the FCC with guidance in managing the spectrum made available to the Private Land Mobile and Fixed Services. Licensees in these services include those public safety, industrial, business, and land transportation entities which operate their own private land mobile and microwave systems in providing a multitude of goods and services to the public. It does not include common carrier operations such as the new cellular systems.

The first provision will insure that the FCC will follow certain fundamental criteria in managing the spectrum available to these services in the most efficient manner and consistent with the basic goals of the act. It specifically encourages interservice sharing and other actions to improve spectrum efficiency and reduce the regulatory burden on these licensees. It prohibits the use of auctions and similar economic methods.

As a constructive, deregulatory move, the second provision encourages the Commission to rely upon the private sector for the initial frequency selection process in these services through Frequency Coordination Committees, thus relieving the Commission of a substantial manpower requirement.

Lastly, as with the amateur radio service, the license term for private land mobile and fixed services stations is extended from 5 to 10 years.

This bill quite simply contains provisions oriented toward improving the efficiency of FCC operations with regard to the Amateur Radio Service and the Private Land Mobile and Fixed Services.

Mr. President, I would welcome my colleagues to join in cosponsoring this bill. I ask that this bill, and a factsheet describing it, be printed in its entirety in the RECORD, following my remarks.

There being no objection, the bill and factsheet were ordered to be printed in the RECORD, as follows:

S. 929

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Amateur Radio Service and Private Land Mobile and Fixed Services Act of 1981".

SEC. 2. (a) Section 302 of the Communications Act of 1934 (47 U.S.C. 302) is amended by—

(1) inserting "(1)" immediately after "governing" in the first sentence of subsection (a);

(2) striking out the period at the end of the first sentence of subscriber (a) and substituting ", and (2) establishing minimum performance standards for audio and visual electronic equipment to reduce their susceptibility to interference from radio frequency energy."; and

(3) striking out "shipment, or use of such devices" in the second sentence and substituting "or shipment of such devices and

electronic equipment or the use of such devices".

(b) Subsection (b) of such section is amended by striking out "ship, or use devices" and substituting "or ship devices and electronic equipment or use devices".

(c) Subsection (c) of such section is amended by—

(1) inserting "or electronic equipment" immediately after "devices" wherever such term appears in the first sentence;

(2) inserting "and electronic equipment" immediately after "Devices" in the second sentence; and

(3) striking out "the common objective of reducing interference to radio reception," in the second sentence and substituting "the objectives of reducing interference to radio reception and to electronic equipment.".

(d) The heading for section 302 of such Act is amended to read as follows:

"INTERFERENCE WITH RADIO COMMUNICATIONS AND ELECTRONIC EQUIPMENT".

SEC. 3. Any minimum standard established by the Federal Communications Commission under section 302(a)(2) of the Communications Act of 1934, as amended by section 2 of this Act, shall not apply to any audio or visual electronic equipment manufactured before the date of the enactment of this Act.

SEC. 4. Section 373 of the Communications Act of 1934 (47 U.S.C. 373) is amended by adding at the end thereof the following:

"(t) Have authority to regulate or prohibit delivery by sale, lease, gift or otherwise of radio frequency transmitters, radio frequency power amplifiers, or component kits thereof to a person not then possessing a valid authorization or license for operation of such transmitters, amplifiers, or kits.".

SEC. 5. Section 605 of the Communications Act of 1934 (47 U.S.C. 605) is amended by striking out the last sentence thereof and substituting the following: "This section shall not apply to the receiving, divulging, publishing, or utilizing the contents of any radio communication which is transmitted by any amateur station, or by any station for the use of the general public, or which refers to ships, aircraft, vehicles, or persons in distress.".

SEC. 6. Subsection (d) of section 307 of the 1934 Act is amended by striking "five" wherever it appears and substituting "ten".

SEC. 7. Part I of title III of the Communications Act of 1934 is amended by adding at the end thereof the following new section:

"PRIVATE LAND MOBILE AND FIXED SERVICES

"SEC. 332. (a) In managing the spectrum to be made available for use by the private land mobile and fixed services the Commission shall consider and make findings, consistent with section 1, as to—

"(1) whether present and proposed use of various allocated bands by these and other services promotes safety of life and property, provides services to large numbers of the public and promotes competition;

"(2) the existence of interservice sharing opportunities between these and other services; and

"(3) actions which will improve the efficiency of spectrum use and reduce the regulatory burden on spectrum users which are based upon sound engineering principles, user operational requirements, marketplace demands, desirable social impacts and appropriate legal considerations.

Nothing in this paragraph shall be construed to authorize the Commission to employ auctions or similar economic methods.

"(b) The Commission, for the purpose of facilitating the expeditious granting of licenses, may delegate to non-Federal Government coordinating committees the function of coordinating the assignment of frequencies above 30 megahertz to stations in the private land mobile and fixed services.".

SEC. 8. Section 4(f) of the Communications Act of 1934 is amended by adding at the end thereof the following new paragraph:

"(4)(A) For purposes of monitoring any violation of any provision of this Act, and of any regulation made by the Commission pursuant to this Act, relating to amateur station transmissions, the Commission, without regard to part III of title 5, United States Code, may (i) recruit and train any individual licensed by the Commission to operate an amateur station; and (ii) accept and employ voluntary and uncompensated services of such individual. For purposes of recruiting and training such individual, the Commission, without regard to part III of title 5, United States Code, may accept and employ voluntary and uncompensated services of any amateur station operator organization.

"(B) For purposes of monitoring any violation of any provision of this Act, and of any regulation made by the Commission pursuant to this Act, relating to transmissions of any citizens band radio service station, the Commission, without regard to part III of title 5, United States Code, may (i) recruit and train any individual licensed by the Commission to operate a citizens band radio service station; and (ii) accept and employ voluntary and uncompensated services of such individual. For purposes of recruiting and training such individual, the Commission, without regard to part III of title 5, United States Code, may accent and employ voluntary and uncompensated services of any citizens band radio service station operator organization.

"(C) For purposes of preparing or administering any examination for the least privileged class of amateur station operator license, the Commission, without regard to part III of title 5, United States Code, may accept and employ voluntary and uncompensated services of any individual who is licensed by the Commission to operate an amateur station and whose license is not of such class.

"(D) Any person who provides voluntary and uncompensated services under this paragraph shall not be considered, by reason of having provided such services, a Federal employee for any purpose.".

FACT SHEET—AMATEUR RADIO SERVICE AND PRIVATE LAND MOBILE AND FIXED SERVICES ACT OF 1981

1. The Federal Communications Commission (FCC) is granted the authority to establish minimum radio frequency rejection standards for electronic equipment, including television receivers, to make such equipment less susceptible to interference from other electronic equipment such as CB radio, amateur radio, etc.

2. The radio-frequency rejection standards will not apply to electronic equipment manufactured prior to the enactment of the bill.

3. The FCC is granted the power to regulate or prohibit the delivery of radio frequency transmitting equipment to one not possessing a license to operate that equipment.

4. Amateur radio transmissions are exempt from the secrecy provisions of Section 605 of the Communications Act to allow self-regulation of amateur stations.

5. Amateur radio license terms are increased from 5 to 10 years.

6. The FCC is permitted to utilize volunteer licensed amateur radio operators for the purpose of monitoring unlicensed amateur radio stations, or amateur stations operating in violation of the rules.

7. The FCC is permitted to utilize volunteer licensed citizen band radio service operators for the purpose of monitoring unlicensed citizen band radio stations, or citizen band radio stations operating in violation of the rules.

8. Allow the FCC to utilize volunteer licensed amateur radio operators for the purpose of preparing and administering amateur examinations to applicants for entry-level amateur licenses, provided that the volunteer test administrator possesses a higher class of amateur license than the entry-level class of license.

9. Private land mobile and fixed services license terms are increased from 5 to 10 years.

10. In managing the spectrum to be made available for use by the private land mobile and fixed services, the FCC shall consider whether such use promotes safety, service, competition, and interservice sharing; improves the efficiency of spectrum use; and reduces the regulatory burden on spectrum users.

11. The FCC may delegate to non-Federal Government coordinating committees the frequency coordination function for frequencies above 30 megahertz to stations in the private land mobile and fixed services.●

By Mr. HAYAKAWA:

S. 930. A bill to amend the Immigration and Nationality Act to establish a program providing for the issuance of visas to nationals of Mexico seeking temporary employment in the United States; to the Committee on the Judiciary.

LEGISLATION RELATING TO ILLEGAL ALIENS

Mr. HAYAKAWA. Mr. President, I am introducing a bill today which will relieve the growing problem that our country and Mexico are continuing to face. I am referring to the massive influx of Mexican nationals who leave their homes to cross illegally our southern border hoping to find temporary jobs here in the United States. My program will replace this currently unregulated flow of undocumented workers with a system of legal temporary admissions. It is entitled the Guest Worker Act of 1981 and will provide a means for the United States and Mexico to work together to establish mutually acceptable solutions to this situation.

So long as there is a wide economic disparity between these bordering nations, there will be a migration of workers to the United States. Men and women, young and old, are paying hundreds of dollars to smugglers—people they call coyotes—who load them into vans, hide them under vehicles or bring them across the river into the United States. These highly motivated workers often endure great physical hardships with only the possibility, not the certainty, of getting a job. Some never make it.

For a solution to be successful, it must address both the immediate situation as well as the bigger picture; it must be an international approach that is mutually beneficial to Mexico and the United States. By working out ways to assist Mexico with the development of her rich, vast natural resources, the economic disparity between the two countries will be reduced over a period of time. Eventually, Mexican nationals, attracted by the development in their own country, will prefer to remain in Mexico where they can work near their families.

During this period of development in Mexico, however, we will continue to be an attractive job market for many Mexican laborers, and our current policy of not officially addressing the situation is clearly inadequate. Fortunately, at this

time, our American labor market needs this supply of foreign workers. Like most economically advanced nations, there is a shortage of laborers in the United States who are willing to take physically demanding jobs with low pay, little job security, and virtually no opportunity for advancement. Most people in this country want indoor work, with no heavy lifting. Recognizing this economic relationship between the United States and Mexico, I strongly believe that our national policy must be realistic; it must acknowledge the existence of the labor supply and demand needs of both the Mexican nationals and the American farmers and businessmen.

A successful program must improve the existing "unofficial" system. To insure that the needs of both our countries are met, the Guest Worker Act of 1981 sets up a Bilateral Advisory Commission, composed of Mexican and American officials, that would consult with and advise the Attorney General—and perhaps the Secretary of Labor—in establishing the regulations for the temporary worker visa program.

During the next 5 years, Mexico will be making many economic advancements. As the current economic disparity lessens we need a legal, organized program to regulate and humanize the existing "underground" system of undocumented worker migration. I am proposing that each year, for 5 years, temporary worker visas be issued for up to 1 million qualified Mexican national applicants who post a $500 bond or the equivalent undertaking. Since the bond will be redeemable with interest at the expiration of 180 days, it will serve as an additional incentive to return to Mexico.

One of the lessons to be learned from past programs is that, by limiting the worker to one prearranged place of employment, there was the temptation to abuse fundamental human and financial rights. My program will remove the temptation to exploit because, as it limits the time that a worker may reside and work in the United States to 180 days, it does not restrict the worker to a particular type of work, as under the "bracero" program, nor to a specific location or a particular employer. This opportunity for mobility gives the workers bargaining power.

On the other hand, I should like to stress one very important provision concerning the limits, or lack of them, restricting employment. This program protects American laborers. At no time is it legal to hire temporary workers if available, qualified, and willing domestic workers are displaced. Furthermore, specific penalties are provided in the event that an employer knowingly violates the terms of the guest worker program.

I do not think there exists any panacea to the issue of undocumented workers entering or living in our country. Nor do I believe that any one person can provide an overall solution for all time. I believe, however, that I can suggest a tentative—let me repeat, tentative—solution to the daily problem of Mexican immigration. In this regard, it seems useful to remember that this situation is not a new one, but that while Mexico continues to develop and the economic disparity between our two countries lessens, we need a legal, humane system that mutually benefits both ourselves and Mexico.

By Mr. BAUCUS:

S. 931. A bill to restore fair and effective enforcement of the antitrust laws; to the Committee on the Judiciary.

SMALL BUSINESS ANTITRUST ACCESS ACT

● Mr. BAUCUS. Mr. President, enhancing the economic development of Montana is, of course, one of my top priorities. Today I am introducing legislation that will permit small businessmen in my State, and in other States, to fight off anticompetitive practices by those who sell their products.

Mr. President, our bill, the Small Business Antitrust Access Act, would allow small businessmen who can prove that they have been injured by price fixing to recover damages from retailers who violate our Nation's antitrust laws. This recourse would be available to small businessmen who have dealt indirectly with the violator.

Today, small businesses that suffer injuries from price fixers cannot sue and collect damages if any are one level removed on the distribution chain. In other words, if a farmer sells his grain to a warehouser, who in turn sells the grain to a huge corporate retailer, the farmer is not permitted to sue the retailer. The farmer is said to lack a direct relationship or "privity" with the retailer. Even if the farmer knows that the retailer has conspired to offer unfairly low prices for his products, the farmer cannot seek redress of his grievances in the courts.

Mr. President, our bill would amend section 4 of the Clayton Act to remove this judicial bar. Indirect sellers who lack direct privity with a defendant corporation would not be restricted from recovering damages in a lawsuit for injuries sustained because of the corporation's unlawful practices. Our bill will help protect cattlemen and farmers from retailers who have the market power to force farmers to sell their goods at the only price available.

It is important to keep in mind that the Small Business Antitrust Access Act, while providing access to indirect sellers of products, will not provide the same access to the courts for indirect purchasers. Therefore, arguments that this measure will open the floodgate of litigation cannot reasonably be made. After all, the number of indirect sellers in our Nation's marketplace is dramatically smaller than the number of indirect buyers.

It is my feeling that farmers and cattlemen need protection from price fixing. Consumers, when faced with high prices fixed on steak, for example, can opt to buy chicken and pork or not buy any meat at all. The cattleman, on the other hand, when faced with a powerful corporate buyer who fixes a low price on steak is left with no choice. When a cow is ready for market, the cattleman has no alternative but to sell the cow. The large corporation that has attained an intermediate position in the chain of distribution holds all the cards.

Several recent lawsuits reflect the problematic trend of large, powerful purchasers of goods dominating the prices paid to much smaller businessmen who are producers of these goods. For example, in the early 1970's, several hundred farmers who were mint growers filed an antitrust class action against large purchasers of mint oil, claiming that large corporations controlled the purchasers of mint oil and had fixed low prices paid to the growers of mint oil. The case was settled in 1975. This case could not have been brought under current law. Other actions have been filed in recent years for similar activities in the grain industry, the beef industry, the sugar industry, and in several other industries involving staple agricultural products.

Mr. President, an important point in some of these cases is that the party between the seller and the ultimate purchaser often has no incentive to sue the price-fixer. The price-fixer can discourage the middleman from suing by threats of economic reprisal. Cattlemen and farmers who are one step removed on the distribution chain from the powerful price-fixer are less vulnerable to economic reprisal and are more likely to be willing to sue to enforce our price-fixing laws. Thus, these cattlemen can act as a powerful deterrent to illegal price fixing.

If these cattlemen and farmers are not permitted standing to sue, and large corporations continue to fix low prices paid to the producers and sellers of products, the existence of small businessmen in these markets is imperiled. Unfortunately, small producers may be forced to sell out and the result will be development of large producers of products, thus accelerating the demise of the small family-owned farm. These probable occurrences raise the spectre of more monopolies and will result in more anticompetitive pricing.

These reasons, Mr. President, suggest the need for our amendment, the Small Business Antitrust Act, which revitalizes the ability of indirect sellers to bring actions against anticompetitive and monopolistic corporations. Our bill will help protect small businesses, slow the demise of the small family farm and encourage them to help enforce our Nation's antitrust laws. Mr. President, I ask unanimous consent that a copy of our bill be printed in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 931

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Small Business Antitrust Access Act".

SEC. 2. The Clayton Act is amended by inserting immediately after section 4H the following new section:

"SEC. 4I. Any seller, either in direct privity or not in direct privity with the defendant, shall not be barred or otherwise limited in recovery in any pending or future action under section 4, 4A or 4C of this Act.".

By Mr. BAUCUS:

S. 932. A bill to amend title 18 of the United States Code in order to promote the effective investigation and prosecution of livestock fraud; to the Committee on the Judiciary.

LIVESTOCK FRAUD PROTECTION ACT

● Mr. BAUCUS. Mr. President, maintaining the economic development of Montana is one of my top priorities. Combating crime is an essential part of protecting the economy of my State. The economy of my State and the economy of many other States in the Union includes as one of its chief components the livestock industry. Livestock transactions in this Nation generate well over $50 billion in commerce each year. Unfortunately, however, the industry has become an easy mark for embezzlers, counterfeiters and unscrupulous dealers who perpetrate fraud.

Today I am introducing legislation, the Livestock Fraud Protection Act, that will address this problem. Last year the Senate and House Judiciary Committees passed a provision similar to this bill in the Criminal Code Reform Act. The provision was an amendment that I sponsored which addressed livestock fraud.

It is my understanding that when the Code is reintroduced in this Congress, the livestock provision will remain in it. Nevertheless, I feel that this problem is so critical that a separate bill is warranted. A separate bill addressing the problem of livestock fraud will add attention to this important issue and act as a safety net in case Congress does not move to enact the Criminal Code Reform Act and the livestock provision amended to it.

Mr. President, cattle rustlers have always preyed on the livestock industry. In years gone by, the rustling was accomplished in different ways. Usually, all that rustling required was a good horse, a strong rope, and a thief who had no respect for the property rights of honest, hard-working men. Today there are still thieves who have no respect for the rights of honest men, but the modern tools they use to steal are a counterfeit check and the stop-payment notice.

The methods are less dramatic, but the resulting damage is not. For example, in 1 week in my State in four separate transactions, ranchers lost 1,500 head of cattle worth nearly $500,000. The victims were well established Montana ranchers and livestock dealers. The buyers were all unlicensed dealers from other States who either issued bad checks or stopped payment on them.

Similar crimes are occurring nationally. I received testimony before the Senate Judiciary Committee about one individual, operating out of Colorado, who defrauded ranchers in Colorado, Oklahoma, Texas, and Nebraska of $2.5 million. In another case, a counterfeiting ring, operating in several States in the South, swindled banks out of at least $50,000. They were selling livestock at a local auction, requesting payment by a check, then forging the check to a much higher figure and cashing it in at local banks.

Often, local law enforcement officials cannot keep up with these criminals that operate interstate and roam over several State boundaries. Testimony before the Judiciary Committee suggested that existing laws are inadequate for controlling livestock crime. Prosecution is complex, involving interstate commerce and various financial instruments. Most of the individuals who act scrupulously are not registered dealers and escape the jurisdiction of the Department of Agriculture's Packers and Stockyards Administration. Under existing law many of these criminals are shielded from strong Federal response.

Another major problem with Federal enforcement is that language in the Federal statute only mentions that theft of cattle is punishable. Fraud involving other types of livestock is not covered under this old 1948 statute.

Mr. President, our bill would correct this inadequacy. The Livestock Fraud Protection Act would update present Federal law in two ways.

First, the language in the law that specifies cattle would be replaced with the word livestock. Therefore, theft involving domestic stock other than cattle, such as sheep, goats, and pigs would also be covered by Federal law.

Second, our bill changes existing law by providing tougher penalties for thieves convicted of livestock fraud. Currently, a 5-year sentence and a fine of $5,000 is the only penalty for receiving or trafficking stolen cattle. Under our bill, harsher penalties would be allowed if the value of the livestock stolen was great.

For example, where the value of the livestock at issue was over $100,000, then a 10-year sentence would be justified rather than imposition of a 5-year jail term. Conversely, where the value of the livestock was low, under $10,000, then no Federal jurisdiction would apply to the crime.

These penalties that vary according to the severity of the crime make more sense and are more just. Minor thefts of livestock would be left to local law enforcement agencies. Major thefts would bring in the Federal law enforcement agencies. Therefore, where the value of the property at issue was over $10,000 and if the livestock was marketed in interstate commerce, then Federal jurisdiction would be triggered.

Combating modern livestock crime requires Federal enforcement. Cattle rustling in this day and age is extremely complex; it involves several States and a variety of financial instruments. Our bill would give local police Federal help in fighting crime. The U.S. attorneys and the FBI would be given the authority they need to pursue crimes that cannot be prosecuted under State law.

Mr. President, our bill will reduce criminal activity in the livestock industry. This will be accomplished by assuring a strong Federal response to interstate livestock crimes. In so doing, our Nation's livestock industry will be enhanced, ranchers will be given added protection and consumers will be assured an adequate supply of fairly priced meat products.

Mr. President, I ask unanimous consent that our bill be printed in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 932

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Livestock Fraud Protection Act".

SEC. 2. Chapter 31 of title 18, United States Code, is amended by adding after section 665 a new section 666 to read as follows:

"§ 636. Theft of livestock

"Whoever obtains or uses the property of another which has a value of $10,000 or more in connection with the marketing of livestock in interstate or foreign commerce with intent to deprive the other of a right to the property or a benefit to the property or to appropriate the property to his own use or the use of another shall be fined not more than $10,000 or imprisoned not more than five years or both.".

SEC. 3. The analysis of chapter 31 of title 18, United States Code, is amended by inserting at the end thereof the following new item:

"666. Theft of livestock.".

SEC. 4. Section 2316 of title 18, United States Code, is amended by striking out "cattle" each place it appears in the section heading and in the text and inserting in lieu thereof in such instance "livestock".

SEC. 5. Section 2317 of title 18, United States Code, is amended by striking "cattle" each place it appears in the section heading and in the text and inserting in lieu thereof in such instance "livestock".

SEC. 6. The analysis of chapter 113 of title 18, United States Code, is amended by striking out "cattle" in sections 2316 and 2317 and inserting in lieu thereof "livestock".

By Mr. ABDNOR (for himself and Mr. PRESSLER):

S. 933. A bill to authorize rehabilitation of the Belle Fourche irrigation project, and for other purposes; to the Committee on Energy and Natural Resources.

REAUTHORIZATION OF BELLE FOURCHE PROJECT IN SOUTH DAKOTA

● Mr. ABDNOR. Mr. President, today Senator PRESSLER and I are introducing legislation to reauthorize the Belle Fourche project in South Dakota as a unit of the Pick-Sloan Missouri Basin program.

The Belle Fourche project went into operation in 1908, and 73 years later most of the structures in the irrigation project have reached their design life and are badly in need of repair. In fact, there have been five accidental deaths in the last 5 years that might have been averted with the project improvements to be provided through this legislation. For example, because of the absence of handrails district employees have actually slipped from the structures and fallen into the canals.

Modernization and improvements of the 57,000-acre project will produce significant benefits according to a January 1981, Water and Power Resources Service draft report. Reliability will be restored to the system and annual operations and maintenance costs will be reduced by $30,000. Reduced seepage and operational waste will save approxi-

mately 20,000 acre-feet of water annually and will result in the reclaiming of agriculture lands affected by the seepage.

The proposed changes would provide safety features for the protection of human life and would insure the continued social and economic welfare of the people in Butte and Meade Counties who depend upon the project for their livelihood.

Finally, because of uncertainty surrounding the Federal Government's position on reclamation acreage limitations, we have included a section in the legislation that addresses that issue. The specific limitations we provide in section 6 are both reasonable in the absence of a national policy and acceptable to the users in the Belle Fourche irrigation district.

Since many States have similar problems involving the need for better utilization of water resources, I am hopeful my colleagues will see the need and agree that we ought to act promptly to provide for the modernization of the Belle Fourche irrigation project.●

By Mr. GARN:

S. 935. A bill to dissolve the National Consumer Cooperative Bank, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

TERMINATION OF NATIONAL CONSUMER COOPERATIVE BANK

● Mr. GARN. Mr. President, at the request of the administration, I am introducing a bill to dissolve the National Consumer Cooperative Bank and terminate its activities. By introducing the bill, Members will have the opportunity to review and discuss the need for the NCCB in light of the administration's economic program.

The administration believes that passage of the bill is necessary and consistent with its economic plan to restrict Federal budgetary support to programs of fundamental national priority. Furthermore, the administration is of the opinion that the special tax treatment generally enjoyed by cooperatives is sufficient to insure the viability of those cooperatives which serve an economic purpose and are effectively managed. Although over $50 million had been appropriated for NCCB activities in fiscal year 1980, only $5.2 million in loans were actually disbursed.

Accordingly, the administration's bill would provide for the termination of the NCCB effective September 30, 1981. In the interim, the Secretary of the Treasury would assume control of the Bank to manage the liquidation of the Bank's assets and the servicing of its loan portfolio.

Mr. President, I ask unanimous consent that the text of the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 935

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Consumer Cooperative Bank Liquidation Act."

TERMINATION OF THE BANK

SEC. 2. The National Consumer Cooperative Bank Act (92 Stat. 499, et seq.; 12 U.S.C. 3001, et seq.) is repealed effective September 30, 1981.

TRANSFER OF FUNCTIONS POWERS AND DUTIES

SEC. 3. (a) Effective immediately, the Board of Directors established by section 103 of the National Consumer Cooperative Bank Act is abolished.

(b) Effective immediately, the functions, powers, duties, assets, and liabilities of the National Consumer Cooperative Bank (Bank), the Board of Directors, and the Office of Self-Help Development and Technical Assistance are transferred to the Secretary of the Treasury (Secretary). There is authorized to be established a fund for this purpose. Loan repayment and other proceeds may be credited to this fund and used to cover expenses associated with the liquidation of the Bank. Amounts in excess of these requirements, as determined by the Secretary, shall be returned to general fund of the Treasury as miscellaneous receipts. The Secretary or his designee shall take such action as necessary, in accordance with applicable laws and regulations, to conclude the outstanding affairs of the Bank, including matters affecting personnel, contracts, assets, liabilities, property, and records of the Bank. Bank employees shall not be deemed Federal employees for any purpose.

(c) Effective immediately, the Secretary:

(1) shall not enter into any new loan or loan guarantee commitments on behalf of the Bank or under the National Consumer Cooperative Bank Act;

(2) may transfer loans to other Federal agencies or enter into contractual arrangements for loan servicing; and

(3) may sell or otherwise dispose of any outstanding loans.

REDEMPTION OF OUTSTANDING STOCK

SEC. 4. In exercising the transferred functions, powers, and duties, the Secretary shall liquidate the outstanding class A, class B, and class C capital stock in a manner consistent with the requirements of section 104 of the National Consumer Cooperative Bank Act. The Secretary may, in his discretion, redeem class B and class C stock owned by borrowers from the Bank either by payment of an amount equal to the value of the respective stocks at redemption, as determined by the Secretary, or reduction of the outstanding balance of the borrower's loan by the amount so determined.

MISCELLANEOUS AMENDMENT

SEC. 5. Any provision of the National Consumer Cooperative Bank Act which is inconsistent with the provisions of this Act, is repealed.

SECTION-BY-SECTION ANALYSIS

Section 1—This section contains the short title of the bill, which is cited as the "National Consumer Cooperative Bank Liquidation Act."

Section 2—This section repeals, effective September 30, 1981, the National Consumer Cooperative Bank Act, which establishes the National Consumer Cooperative Bank (Bank) and the Office of Self-Help Development and Technical Assistance (Office).

Section 3—Upon enactment of the National Consumer Cooperative Bank Liquidation Act (Act), this section would immediately transfer to the Secretary of the Treasury (Secretary) all the functions, powers, duties, assets, and liabilities of the Bank, the Bank Board of Directors, and the Office. It is intended that the Secretary take the action necessary to conclude the activities of the Bank and the Office, and to arrange for servicing of the remaining loan portfolio after liquidation of the Bank. The section also authorizes the establishment of a fund for the receipt of loan repayment and other proceeds. The fund is intended to cover liquidation expenses, and any funds in excess of those needed to carry out the liquidation shall be returned to the general fund of the Treasury. The bill would enable the Secretary to exercise his discretion as to which Department or agency is best suited to service the loan portfolio.

Additionally, this section clearly states that Bank employees shall not be deemed Federal employees for any purposes. This is to avoid the contention that, upon the transfer of functions, powers and duties to the Secretary the employment status of the Bank employees would be changed thereby.

Finally, the section would prohibit any further loan or loan guarantee commitments on behalf of the Bank. However, the Secretary would be authorized to arrange for loan servicing and to sell or otherwise dispose of any outstanding loans.

Section 4—This section provides for the liquidation of outstanding Bank stock in accordance with the requirements of section 104 of the National Consumer Cooperative Bank Act. Under section 104, the class A stock outstanding, issued entirely to the Federal Government, would be given priority in the liquidation process over the remaining stock outstanding. In liquidating the remaining stock outstanding (class B and C), the Secretary is authorized to exercise discretion in determining whether redemption of the stock should be by payment or by reduction of a borrower's loan balance. In exercising discretion, it is anticipated that the method of redemption most beneficial to the borrower will be given due consideration, provided that the interests of the Federal Government are not adversely affected thereby.

Section 5—This section would repeal as necessary provisions of the National Consumer Cooperative Bank Act which would be inconsistent with the Secretary's orderly exercise of the transferred functions, powers, and duties pending total repeal of the statute.

By Mr. ROTH (for himself, Mr. BENTSEN, and Mr. KASTEN):

S. 936. A bill entitled the "Savings Expansion Act of 1981"; to the Committee on Finance.

SAVINGS EXPANSION ACT OF 1981

● Mr. ROTH. Mr. President, I am today introducing legislation to encourage the savings necessary to expand economic growth in the United States.

My distinguished colleagues LLOYD BENTSEN and BOB KASTEN are joining with me as original cosponsors of the measure.

We must expand economic growth, and increased savings is critical to economic growth.

Nothing is more important than growth. The basic choice facing the economy is to grow or not to grow. If we had put a modest but sustained growth policy in place in 1950, the results would by now be enormous. Consider the period 1950 to 1979. In 1979, U.S. GNP reached $2⅓ trillion. It would have been $3½ trillion.

Between 1950 and 1979, the average annual growth of the U.S. economy in real terms was 3.6 percent. Many other major industrialized countries grew at annual real rates averaging in excess of 5.5 percent. If the United States had grown an average 1.5-percent faster

each year since 1950 at a rate of just over 5 percent its GNP in 1979 would have been $3½ trillion.

With a $3½ trillion economy, incomes would have been 50 percent higher than they were in 1979. Jobs would have been plentiful. Federal revenues in 1979 would have been $250 billion higher, enough to have provided for a balanced budget, welfare reform, national health insurance, and unquestioned military preeminence, with enough left over to have let us reduce payroll and income taxes instead of raising them. Of course, price stability would have been another spinoff of the growth of real output and the balanced budget.

Faster growth, higher incomes, and plentiful jobs are exactly what the unemployed, underprivileged, and the minorities of this country have been seeking for many years. It is no accident that the greatest gains in income, jobs, and dignity for minority workers have come during periods of rapid expansion.

Savings is the key to increased economic growth. Saving, basically, is the amount of each year's GNP left over after immediate consumption. Only the amount saved provides the resources for investing in long-term capital goods, the plant and equipment that expands capacity, increases productivity, and stabilizes prices.

The United States has the lowest rate of saving in the Western World, resulting in the lowest rate of productivity growth, investment, and real wage increases among the major industrialized nations. Personal savings is falling because inflation and high tax rates reduce the real rate of return on savings. As people are pushed into higher tax brackets, they get to keep less of each additional dollar of savings income. Since income from savings is added to earned income, the highest tax rate each taxpayer pays is imposed on his or her savings income. The higher the tax rate individuals face on the additional income from savings, the less likely they are to save. Thus, the present high tax rates discourage new savings, encourage consumption, and force savings away from productive investments into tax-exempt bonds and tax shelters.

The total amount of savings in the United States—personal savings, retained earnings, and depreciation set asides— has already fallen so low that we are not providing enough investment to keep pace with replacing wornout machinery and equipping a growing labor force. This is leading to falling productivity, lower real wages, and reduced job opportunities. Unless action is taken, we face a decade of stagnation.

Furthermore, millions of taxpayers have purchased bonds and made deposits at low-interest rates in years past, only to find these rates overwhelmed by inflation. Their real rate of return on most stocks and bonds is now less than zero, yet is considered to be income and is taxed as such. This is particularly hard on retirees.

In order to encourage additional savings, the tax rates at which additional savings income is taxed must be reduced.

The legislation I am introducing today is identical to a measure I proposed last year.

The proposal would reduce the tax rate on additional savings by treating interest and dividend income more equally with earned income.

Specifically, the bill reduces the top marginal tax rate to 50 percent from its current level of 70 percent.

It further provides that earned income and savings income shall be taxed separately, after allowable deductions and exemptions, with the first dollars of each type of income starting in the lowest tax brackets. A limit on eligibility is imposed for those upper income taxpayers with more than $10,000 in certain sheltered preference income.

The bill equalizes tax rates for both earned and unearned income at rates ranging from 14 to 50 percent. This ends the discrimination against saving which has been in the Code since 1969. Currently, "personal service income" faces a maximum tax rate of 50 percent, while savings income faces a top rate of 70 percent. The change will ultimately lead to more Federal revenue, because of a sharp drop in the use of tax shelters as the top rate is reduced.

Furthermore, lower and middle-income tax rates on savings income are reduced by an income-splitting provision, in current law, after exemptions, earned and unearned income are added together to obtain taxable income, stacking one on top of the other to reach the higher brackets. Under this proposal, each taxpayer would compute a tax on earned income alone, and on unearned income alone, and then add the taxes together. In this way, the first dollar of each type of income would start in the 14-percent tax bracket.

Each type of income would rise only through as many brackets as its own size would warrant. The result would be lower tax rates on added income of both types. Specifically, the tax rate on additional interest and dividends from added savings would be in a lower tax bracket than at present for most taxpayers, resulting in more incentive to add to savings.

Currently, individuals with more than $10,000 in preference income—income from tax-sheltered activities—are subject to the minimum tax. As a further inducement for such individuals to return to more productive, ordinary investment, the bill limits the participation of those upper income individuals who continue to use tax shelters. Individuals with more than $10,000 in preference income—other than capital gains—are prohibited from using this income-splitting provision.

Mr. President, for most working-age taxpayers, the bulk of income is earned with only a few hundred or a few thousand in savings income added on the top. This bill would bring this income down from the taxpayer's top tax bracket, where it may face rates of 24, 36, or even 70 percent, and puts it into the 14- or 16-percent brackets, producing increased savings incentives at relatively low cost.

Outside of completely exempting all interest and dividend income from taxation, the most effective way to encourage increased savings is to reduce the marginal tax rates on interest and dividend income.

On equity grounds, and as a key first step, I supported and voted for the legislation to provide a tax exemption of up to $400 for interest and dividend income.

This legislation is designed to build on the savings exemption. For in order to encourage additional savings the tax rates at which additional savings income is taxed must be reduced. By starting both earned and unearned income off in the lowest tax bracket and at the lowest tax rates, and by applying the 50-percent maximum earned income tax rate to unearned income, the Savings Expansion Act reduces the marginal tax rates on additional interest and dividend income—increasing the rate of return on saving and encouraging the additional savings needed to increase productivity, restrain inflation, and expand real economic growth.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 936

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT OF 1954 CODE, ETC.

(a) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

(b) TECHNICAL AND CONFORMING AMENDMENTS.—The Secretary of the Treasury or his delegate shall, not later than 90 days after the date of the enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives a draft of the technical and conforming amendments which are necessary to reflect throughout the Internal Revenue Code of 1954 the substantive amendments made by this Act.

SEC. 2. 50-PERCENT MAXIMUM RATE FOR INDIVIDUALS; SEPARATE COMPUTATION OF TAX.

(a) GENERAL RULE.—Section 1 (relating to tax imposed on individuals) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) GENERAL RULE.—

"(1) INDIVIDUALS.—Except as provided in paragraph (2), there is hereby imposed on the income of every individual a tax equal to the sum of—

"(A) the tax on personal service taxable income determined under the applicable rate schedule, plus

"(B) the tax on nonpersonal service taxable income determined under the applicable rate schedule.

"(2) CERTAIN INDIVIDUALS WITH ITEMS OF TAX PREFERENCE, ESTATES, AND TRUSTS.—There is hereby imposed on the income of—

"(A) every individual who has items of tax preference described in section 57(a) (other than paragraph (9) thereof) for the taxable year in excess of $10,000 ($5,000 in the case of a separate return by a married individual (as defined in section 143)), and

"(B) every estate or trust taxable under this section,

a tax equal to the tax on taxable income determined under the applicable rate schedule.

"(b) APPLICABLE RATE SCHEDULE FOR MARRIED INDIVIDUALS FILING JOINT RETURNS.—In the case of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

the following is the applicable rate schedule:

"If the amount of which the tax is to be determined is:	The tax is:
Not over $2,100	14% of taxable income.
Over $2,100 but not over $4,200.	$294, plus 16% of excess over $2,100.
Over $4,200 but not over $8,500.	$630, plus 18% of excess over $4,200.
Over $8,500 but not over $12,600.	$1,404, plus 21% of excess over $8,500.
Over $12,600 but not over $16,800.	$2,265, plus 24% of excess over $12,600.
Over $16,800 but not over $21,200.	$3,273, plus 28% of excess over $16,800.
Over $21,200 but not over $26,500.	$4,505, plus 32% of excess over $21,200.
Over $26,500 but not over $31,800.	$6,201, plus 37% of excess over $26,500.
Over $31,800 but not over $42,400.	$8,162, plus 43% of excess over $31,800.
Over $42,400 but not over $56,600.	$12,720, plus 49% of excess over $42,400.
Over $56,600	$19,678, plus 50% of excess over $56,600.

"(c) HEADS OF HOUSEHOLDS.—In the case of every individual who is the head of a household (as defined in section 2(b)), the following is the applicable rate schedule:

"If the amount on which the tax is to be determined is:	The tax is:
Not over $2,100	14% of taxable income.
Over $2,100 but not over $4,200.	$294, plus 16% of excess over $2,100.
Over $4,200 but not over $6,400.	$630, plus 18% of excess over $4,200.
Over $6,400 but not over $9,500.	$1,026, plus 22% of excess over $6,400.
Over $9,500 but not over $12,700.	$1,708, plus 24% of excess over $9,500.
Over $12,700 but not over $15,900.	$2,476, plus 26% of excess over $12,700.
Over $15,900 but not over $21,200.	$3,308, plus 31% of excess over $15,900.
Over $21,200 but not over $26,500.	$4,951, plus 36% of e cess over $21,200.
Over $26,500 but not over $31,800.	$6,859, plus 42% of excess over $26,500.
Over $31,800 but not over $42,400.	$9,085, plus 46% of excess over $31,800.
Over $42,400	$13,961, plus 50% of excess over $42,400.

"(d) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—In the case of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) the following is the applicable rate schedule:

"If the amount on which the tax is to be determined is:	The tax is:
Not over $1,100	14% of taxable income.
Over $1,100 but not over $2,100.	$154, plus 16% of excess over $1,100.
Over $2,100 but not over $4,200.	$314, plus 18% of excess over $2,100.
Over $4,200 but not over $6,200.	$692, plus 19% of excess over $4,200.
Over $6,200 but not over $8,500.	$1,072, plus 21% of excess over $6,200.
Over $8,500 but not over $10,600.	$1,555, plus 24% of excess over $8,500.
Over $10,600 but not over $12,700.	$2,059, plus 26% of excess over $10,600.
Over $12,700 but not over $15,900.	$2,605, plus 30% of excess over $12 700.
Over $15,900 but not over $21,200.	$3,565, plus 34% of excess over $15,900.
Over $21,200 but not over $26,500.	$5,367, plus 39% of excess over $21,200.
Over $26,500 but not over $31,800.	$7,434, plus 44% of excess over $26,500.
Over $31,800 but not over $39,200.	$9,766, plus 49% of excess over $31,800.
Over $39,200	$13,392, plus 50% of excess over $39,200.

"(e) SEPARATE RETURNS BY MARRIED INDIVIDUALS; ESTATES AND TRUSTS.—In the case of—

"(1) every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013, and

"(2) every estate and trust taxable under this subsection,

the following is the applicable rate schedule:

"If the amount on which the tax is to be determined is:	The tax is:
Not over $1,050	14% of taxable income.
Over $1,050 but not over $2,100	$147, plus 16% of excess over $1,050.
Over $2,100 but not over $4,250.	$315, plus 18% of excess over $2,100.
Over $4,250 but not over $6,300.	$702, plus 21% of excess over $4,250.
Over $6,300 but not over $8,400.	$1 132.50, plus 24% of excess over $6,300.
Over $8,400 but not over $10,600.	$1,636.50, plus 28% of excess over $8,400.
Over $10,600 but not over $13,250.	$2,252.50, plus 32% of excess over $10,600.
Over $13,250 but not over $15,900.	$3,100.50, plus 37% of excess over $13,250.
Over $15,900 but not over $21,200.	$4,081, plus 43% of excess over $15,900.
Over $21,200 but not over $28,300.	$6,360, plus 49% of excess over $21,200.
Over $28,300	$9,839, plus 50% of excess over $28,300."

(b) DETERMINATION OF INCOME.—Section 63 (defining taxable income) is amended to read as follows:

"SEC. 63. TAXABLE INCOME DEFINED.

"(a) CORPORATIONS.—For purposes of this subtitle, in the case of a corporation, the term 'taxable income' means gross income minus the deductions allowed by this chapter.

"(b) INDIVIDUALS.—For purposes of this subtitle, in the case of an individual—

"(1) PERSONAL SERVICE TAXABLE INCOME.—The term 'personal service taxable income' means personal service income reduced by so much of the allowable deductions as the individual elects to allocate against such income.

"(2) NONPERSONAL SERVICE TAXABLE INCOME.—The term 'nonpersonal service taxable income' means gross income reduced by the sum of—

"(A) personal service income, plus

"(B) so much of the allowable deductions as are not allocated against personal service income under paragraph (1).

"(3) TAXABLE INCOME.—The term 'taxable income' means gross income minus the allowable deductions.

"(4) ALLOWABLE DEDUCTIONS.—The term 'allowable deductions' means—

"(A) in the case of an individual who elects to itemize his deductions, the deductions allowed by this chapter, or

"(B) in the case of any other individual, the sum of—

"(i) the deductions allowable in arriving at adjusted gross income,

"(ii) the deductions for personal exemptions provided by section 151, and

"(iii) the standard amount.

"(c) STANDARD AMOUNT.—For purposes of this subtitle—

"(1) IN GENERAL.—Except as provided in paragraph (2), the term 'standard amount' means—

"(A) $3,400 in the case of—

"(i) a joint return under section 6013, or

"(ii) a surviving spouse (as defined in section 2(a)),

"(B) $2,300 in the case of an individual who is not married and who is not a surviving spouse (as so defined),

"(C) $1,700 in the case of a married individual filing a separate return, or

"(D) zero in any other case.

"(2) SPECIAL RULE FOR CERTAIN DEPENDENTS.—In the case of an individual with respect to whom a deduction under section 151 (e) is allowable to another taxpayer for a taxable year beginning in the calendar year in which the individual's taxable year begins, the terms 'standard amount' shall not exceed such individual's earned income (as defined in section 911(b)) for such taxable year.

"(d) PERSONAL SERVICE INCOME.—For purposes of this section—

"(1) IN GENERAL.—The term 'personal service income' means any income which is earned income within the meaning of section 401(c)(2)(C) or section 911(b) or which is an amount received as a pension or annuity which arises from an employer-employee relationship or from tax-deductible contributions to a retirement plan. For purposes of this paragraph, section 911(b) shall be applied without regard to the phrase ', not in excess of 30 percent of his share of net profits of such trade or business,'.

"(2) EXCEPTIONS.—The term 'personal service income' does not include amount—

"(A) to which section 72(m)(5), 402(a)(2), 402(e), 403(a)(2), 408(e)(2), 408(e)(3), 408(e)(4), 408(e)(5), 408(f), or 409(c) applies; or

"(B) which is includible in gross income under section 409(b) because of the redemption of a bond which was not tendered before the close of the taxable year in which the registered owner attained age 70½.

"(e) ITEMIZED DEDUCTIONS.—For purposes of this subtitle, the term 'itemized deductions' means the deductions allowable by this chapter other than—

"(1) the deductions allowable in arriving at adjusted gross income, and

"(2) the deductions for personal exemptions provided by section 151.

"(f) ELECTION TO ITEMIZE.—

"(1) IN GENERAL.—Unless an individual makes an election under this subsection for the taxable year, no itemized deduction shall be allowed for the taxable year. For purposes of this subtitle, the determination of whether a deduction is allowable under this chapter shall be made without regard to the preceding sentence.

"(2) WHO MAY ELECT.—Except as provided in paragraph (3), an individual may make an election under this subsection for the taxable year only if such individual's itemized deductions exceed the standard amount.

"(3) CERTAIN INDIVIDUALS TREATED AS ELECTING TO ITEMIZE.—The following individuals shall be treated as having made an election under this subsection for the taxable year:

"(A) a married individual filing a separate return where either spouse itemizes deductions,

"(B) a nonresident alien individual, and

"(C) a citizen of the United States entitled to the benefits of section 931 (relating to income from sources within possessions of the United States).

"(4) TIME AND MANNER OF ELECTION.—Any election under this subsection shall be made on the taxpayer's return, and the Secretary shall prescribe the manner of signifying such election on the return.

"(5) CHANGE OF TREATMENT.—Under regulations prescribed by the Secretary, a change of treatment with respect to the standard amount and itemized deductions for any taxable year may be made after the filing of the return for such year. If the spouse of the taxpayer filed a separate return for any taxable year corresponding to the taxable year of the taxpayer, the change shall not be allowed unless, in accordance with such regulations—

"(A) the spouse makes a change of treatment with respect to the standard amount and itemized deductions, for the taxable year covered in such separate return, consistent with the change of treatment sought by the taxpayer, and

"(B) the taxpayer and his spouse consent in writing to the assessment, within such period as may be agreed on with the Secretary, of any deficiency, to the extent attributable to such change of treatment, even though at the time of the filing of such consent the assessment of such deficiency would otherwise be prevented by the operation of any law or rule of law.

This paragraph shall not apply if the tax liability of the taxpayer's spouse, for the taxable year corresponding to the taxable year of the taxpayer, has been compromised under section 7122.

"(g) MARITAL STATUS.—For purposes of this section, marital status shall be determined under section 143."

(c) REPEAL OF MAXIMUM RATE ON PERSONAL SERVICE INCOME.—Part VI of subchapter Q of chapter 1 is hereby repealed.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1980.●

● Mr. KASTEN. Mr. President, the American people now save less than any other people in the Western World. Astonishing, but true.

From 1960 to 1973, U.S. investment as a percentage of GNP was just 17.5 percent, compared with 35 percent in Japan. Since 1977, the U.S. savings rate has continued to drop, falling below 4 percent in the first quarter of 1980. And not surprisingly, the United States has experienced actual declines in both productivity and real disposable income over the same period.

Why is our savings rate so low? Have the American people suddenly given up in providing for the future? Clearly not. We have a savings crisis in this country because savers respond to economic incentives, and the incentives for saving have been eroded by a combination of inflation and high marginal tax rates. The rate of return on savings has been declining, year after year.

To make money by saving, you have to get a nominal rate of return that is sufficient not only to overcome inflation, but to overcome the tax rate on that nominal income. Suppose inflation is 20 percent, and you are lucky enough to get a 11-percent return on your money. In the 30-percent income tax bracket, your aftertax return is only 7.7 percent—which means a 2.3-percent loss of real income.

Under current law, earned and unearned income are added together to obtain taxable income, stacking one on top of the other to reach the higher tax brackets. So interest and dividends are the highest taxed income an individual can receive.

Instead of wondering why our savings rate is so low, maybe we should be asking why anyone is saving at all.

Today I am pleased to join with Senator ROTH and Senator BENTSEN in introducing the Savings Expansion Act of 1981. Our bill would cut these high marginal tax rates on saving, and give every American an incentive to save more of his or her income, to pull a substantial amount of savings out of tax shelters and into more productive investments, and to encourage capital formation and economic growth.

The Savings Expansion Act would stimulate saving by allowing each taxpayer to compute a tax on earned income alone, and on unearned income alone, and then add the taxes together. Each type of income would rise only through as many brackets as the amount would warrant. The result would be a dramatic reduction in the marginal tax rate on increased saving and investment.

The average family of four making $25,000 a year now pays 24 cents in taxes for every extra dollar of savings interest earned. Our bill would reduce that tax immediately to 14 cents for every dollar of savings income, and when the Reagan tax-cut package goes into effect, the tax on savings will be even lower—10 cents on each additional dollar.

That means the marginal tax on savings for the average family of four would be more than cut in half.

The best way to increase the rate of savings in this country is to reduce the marginal tax rate on the next dollar of interest or dividend income an individual earns. The Savings Expansion Act would do just that.

Mr. President, saving and investment are the keys to economic growth, and we need economic growth to see the kind of job creation, social gains, and rising standard of living that used to be commonplace in America.

I am proud to join today in introducing this legislation, which will go a long way toward restoring a high U.S. savings rate, toward boosting American productivity, and toward strengthening our ability to compete both at home and abroad.●

By Mr. ROTH:

S. 938. A bill to amend section 304 of the Congressional Budget and Impoundment Control Act of 1974 to require a two-thirds vote for the adoption of any concurrent resolution on the budget for a fiscal year which revises the concurrent resolution on the budget most recently agreed to for such fiscal year if the appropriate level of total budget authority or total budget outlays or the recommended level of Federal revenues set forth in the concurrent resolution on the budget making such revisions exceeds the appropriate level of total budget authority or total budget outlays or the recommended level of Federal revenues, as the case may be, set forth in the first concurrent resolution on the budget for such fiscal year; to the Committee on the Budget and the Committee on Governmental Affairs, jointly, pursuant to the order of August 4, 1977.

LEGISLATION TO AMEND THE CONGRESSIONAL BUDGET ACT OF 1974

Mr. ROTH. Mr. President, today, I am introducing legislation to amend the Congressional Budget Act of 1974 to give the Congress better control over the growth of the Federal budget. After Congress passes the first budget resolution each year, this legislation would require a two-thirds vote to pass subsequent budget resolutions which contain budget increases. For the first time since the budget process was put into effect, the Congress will be forced to take seriously the spending and revenues ceilings set in the first budget passed.

This bill is very similar to an amendment I offered when the Budget Act was considered in 1974. I believed then, as now, that the focus of the Congress should be on passing a first budget resolution and sticking to it. Without a process designed to restrain the Congress from ignoring budget ceilings set in the first budget resolution, those ceilings will be forgotten.

In fact, in the past 2 years in particular the totals set have been ignored. In fiscal year 1980, the Congress passed a first budget resolution with outlay totals of $532 billion. Actual spending for fiscal 1981 increased to $579 billion. Last year, the deterioration of the process was fully exposed. The Congress passed a budget last May with spending at $614 billion. Projections of actual spending now range from $655 to $660 billion.

The erosion of the ceilings set in the first budget resolution raises the fundamental question of whether Congress should even bother to pass a budget each year. I emphatically believe we should. But the practice of ignoring the totals in the first budget resolution reduces the budget process to a simple matter of adding up spending programs each year, then printing enough money or allowing taxes to rise sufficiently to fund them. Congress should instead determine overall budget ceilings on the basis of sound fiscal policy and only then determine spending priorities.

The Congress is desparately in need of a budget process which encourages and facilitates fiscal discipline. Without a first budget resolution with teeth the budget process could become nothing more than a time schedule for passing irrelevant resolutions.

The legislation I am introducing today is a vital first step in restoring the discipline to the budget process which it rightfully should have. When the first budget process targets for budget authority, spending and revenues are set, they will be adhered to unless two-thirds of the Senate or House present and voting believe they should be changed. This will preclude the passing of a politically attractive budget in the first budget resolution and casting it aside a few short months later. This bill will introduce some much needed discipline and certainly into the budget process and will greatly improve the heretofore negligible ability of the Congress to control the Federal budget.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 938

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 304 of the Congressional Budget and Impoundment Control Act is amended by inserting "(a) Revisions Permitted.—" before "At" and by adding at the end thereof the following new subsection:

"(b) TWO-THIRDS VOTE REQUIRED.—Beginning with the fiscal year ending on September 30, 1982, if any concurrent resolution on the budget for a fiscal year which revises the concurrent resolution on the budget most recently agreed to for such fiscal year, or the conference report on any such concurrent resolution on the budget, sets forth for such fiscal year an appropriate level of total budget authority or total budget outlays or a recommended level of Federal revenues which is greater than the appropriate level of total budget authority or total budget authority or total budget outlays or the recommended level of Federal revenues, as the case may be, set forth in the concurrent resolution on the budget for such fiscal year adopted under section 301, the question of agreeing to the concurrent resolution on the budget making such revisions or any conference report thereon, in either the

House of Representatives or the Senate, shall be determined by the affirmative vote of two-thirds of the Members present and voting (a quorum being present), by roll-call vote.".

By Mr. EAGLETON (for himself, Mr. BIDEN, Mr. CRANSTON, Mr. DANFORTH, Mr. KENNEDY, Mr. MATHIAS, Mr. METZENBAUM, Mr. RANDOLPH, Mr. RIEGLE, Mr. WEICKER, and Mr. WILLIAMS):

S. 939. A bill to authorize the appropriations for the Legal Services Corporation for fiscal years 1982, 1983, and 1984, and to encourage the use of private attorneys in the provision of legal services under that act, and for other purposes; to the Committee on Labor and Human Resources.

REAUTHORIZATION OF THE LEGAL SERVICES CORPORATION

● Mr. EAGLETON. Mr. President, today, on behalf of myself and Senators BIDEN, CRANSTON, DANFORTH, KENNEDY, MATHIAS, METZENBAUM, RANDOLPH, RIEGLE, WEICKER, and WILLIAMS, I am introducing legislation to extend the authorization for appropriations for the Legal Services Corporation for 3 additional years, and also to expand emphasis on the private bar in delivering local legal services programs.

If the very concept of equal justice under the law, upon which our Nation was founded, is to have any meaning in our adversary system of legal representation, then every individual must be provided the means whereby he can enforce his rights and redress his grievances.

The federally funded legal services program began modestly in 1965 as a $600,000 pilot program under title II of the Economic Opportunity Act. From its earliest days, it has been an embattled program by its very nature. Much of the litigation handled by legal services lawyers has placed it in direct conflict with government and thus it has been threatened by interference within the executive branch, by Governors' vetoes, and by congressional efforts to restrict the ability of an attorney to represent his client.

Recognizing the inherent conflict between legal services programs, and other government entities, in May 1971, President Nixon, following recommendations by the American Bar Association and his own Commission on Executive Organization, proposed legislation to have the program transferred to a new independent nonprofit corporation.

At the time an independent corporation was proposed, then Director of OEO Frank Carlucci highlighted the controversy as follows:

> It is an act of great self-confidence for a government to make resources available for testing the legality of government practices. We have written laws and created government agencies that provide food for people who are hungry, homes for people who are homeless, and jobs for people who are unemployed.
>
> Consequently, a lawyer who is going to represent poor people is inevitably going to be an advocate for them against governmental agencies. It is to shield legal services from the repercussions generated by suits of this kind as well as those generated by action against private interests that the President proposes creation of an independent legal services corporation.

I can remember no other measure in my years in the Senate which was so hotly contested, deliberated upon for so long, and which finally won the support of so many with widely divergent political and ideological points of view.

Now this administration wishes to set the clock back 8 years by wiping out the Corporation and including legal services as an authorized activity within the social services block grant. The administration's budget document goes on to say that "increased pro bono efforts by private attorneys, as part of their professional responsibility, are a major way of augmenting legal services activities financed by the block grant."

Mr. President, stated quite simply, this approach will not and cannot work.

It is totally unrealistic to expect that the States will move forward to provide an effective civil legal services program for their poor. Only about 1 percent of the funding for such services is now being provided by the States. The inherent conflicts of interest, combined with the States' historical nonrole in civil legal services, gives no indication that the States are willing or able to assume the role of provider of legal services to the poor.

As for the pro bono efforts of the private bar, this administration knows well that those efforts, while growing steadily, are simply inadequate. Private attorneys have attempted to address the obstacles to equal justice for the economically disadvantaged since 1876, when the first formal private legal services program was established in New York. Numerous legal aid and public defender programs developed in the early 1900's, and have grown tremendously during this century. Despite these activities, it was and is apparent to everyone that this voluntary effort to provide the poor access to our justice system, while significant, was meeting only a small percentage of the legal needs of the poor.

For these reasons, Mr. President, 10 of my colleagues and I believe that anything short of reauthorization of an independent Corporation is repugnant to the constitutional requirement of equal justice under law.

I am very much aware of the concerns many of my colleagues may have about certain aspects of the Corporation's activities, and quite frankly, I have been distressed with the Corporation's activities in the areas of lobbying and political activity. I understand that my colleague from Missouri, Senator DANFORTH, has similar concerns, and I look forward to working with him in modifying the existing restrictions and safeguards in the statute to insure that all of the resources of the Corporation are focused squarely on the provision of civil legal assistance to eligible clients.

Further, I am concerned that the existing language relating to abortion in the act does not prohibit all litigation that is related to abortion. It is my strong belief that taxpayers' funds should not be used in any instance to promote abortion, and more specifically in this case, that taxpayers dollars should not be employed in litigating to permit life to be taken. I intend to introduce an amendment to this bill to replace the current abortion restriction in the statute with a flat prohibition that Corporation funds cannot be used "to provide legal assistance with respect to any proceeding or litigation which relates to abortion," and ask that the amendment be held at the desk until such time as the reauthorization of the Corporation is considered by the full Senate.

The concerns outlined above are, to my mind, real abuses in the legal services process, but I believe there is an overriding importance that the mechanism for attempting to achieve equal justice under law continue.●

● Mr. MATHIAS. Mr. President, I join Senator EAGLETON in introducing legislation to reauthorize the Legal Services Corporation for the next 3 years. I am taking this step despite the administration's apparent intention to eliminate funding for the Corporation entirely from next year's budget because I believe legal services for the poor play an indispensable role in affirming our Nation's constitutional ideal of equal justice for all. For this reason, I urge all my colleagues to support this important measure for insuring continued access to our country's system of justice for low-income individuals and families.

Seven years ago Congress created this private, nonprofit organization to provide legal assistance to the poor. Since then, the Corporation has worked to build an effective network of legal services programs for poor persons who before had all too often been unable to obtain legal assistance. It now funds and monitors 325 local programs working through 1,450 offices located around the country, and it has achieved its initial goal for a minimum access quota of two attorneys for every 10,000 poor persons. In 1980, programs funded by the Legal Services Corporation served more than 1.2 million indigent clients in the panoply of legal problems facing the needy nationwide, including unwarranted utility cut-offs, eviction cases, consumer fraud matters, and employment problems.

At a time when eliminating Government waste is the order of the day, it is important to note that the Corporation has been a model of efficiency, spending less than 2 percent of its budget on management and administration, with all the rest going to the provision, support, and monitoring of its legal service programs. Despite the progress that has been made, the need for legal services remains far greater than the capacity of the Corporation to accommodate, and every field office is compelled to make hard, painful choices within the large range of legitimate appeals they receive for help. In keeping with the need for strict fiscal austerity, the modest reauthorization bill we are submitting today merely maintains legal services funding at its current fiscal year 1981 level for next year, and does not specify in advance the levels for the following 2 years.

The record shows that legal services have born fruit throughout the country. I am particularly proud of what Mary-

land has been able to accomplish with the help of the Legal Services Corporation. I ask that a recent Baltimore Sun article on this subject, written by the Attorney General of Maryland, Stephen H. Sachs, be printed in the RECORD following my remarks.

Since its beginning, our Nation has consistently been dedicated to the cause of equal justice for all. In the past few years, the Legal Services Corporation has been an integral part in helping us maintain that commitment. It must be reauthorized.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LEGAL AID IS ESSENTIAL TO OUR SYSTEM

(By Stephen H. Sachs)

President Reagan's budget cutters want to kill the federally funded Legal Services Corporation, whose 5,000 lawyers serve the legal needs of nearly 30 million citizens who live in poverty.

The attorney general of a state that has frequently been sued by the corporation's local outpost, Legal Aid, might be expected to anticipate the last rites more in satisfaction than in sorrow. As my mother-in-law would put it, I need additional costly legal challenges like I need "water in my shoes," especially when Maryland's legislative axes are busily biting into the sinew and bone of an already lean state budget.

But the truth of the matter is that we all need the Legal Services Corporation very much. In fact, of all the trumpeted economies of the new team in Washington, I can't think of any that is more wrong-headed—and mean-spirited—than the plan to scuttle Legal Services.

For many, it is a matter of fundamental fairness. Government at all levels has armies of lawyers on public payrolls to counsel, to sue and to defend against suit. Corporations have found it increasingly necessary to rely on expensive legal advice, which is recognized as a legitimate business expense and subsidized through substantial tax deductions.

The poor have legal problems, too. Big ones. Even their "routine" encounters with the law—injury at work, eviction, divorce—are aggravated by the unremitting bleakness of poverty. Most of us will never know what it is like to fight an unlawful eviction notice—alone.

But the poor also live in symbiotic relation to a faceless bureaucracy that administers a complex web of regulations governing welfare, Medicaid, unemployment insurance and all the other support services, that even the new administration regards as a "safety net" for the poor. For such citizens, a bureaucratic error or an administrator's carelessness can produce a life crisis.

Imagine, for example, the effect on a family when a father is injured on the job and is mistakenly denied his application for a $375 monthly disability allowance. It happens. Few of us would think of facing such a judgment uncounseled, or of suffering it quietly if grounds for challenge exist.

Many of the poor, however, not only have no way of knowing that an error was committed; they don't know where and by whom the decision was made. Comprehending the forces that control your life is a bit of a luxury at $8,200 a year, Legal Services' poverty line for a family of four.

For the poor, living with the possibility of a shattering and incomprehensible injustice is the badge of their condition. Legal Services is an attempt to alleviate that condition. The program's simple credo is that a nation that professes a belief in "equal justice" should not permit poverty to weigh so heavily on the scales of justice.

When Legal Services lawyers serve their clients they also help to enforce the law. The criminal law, of course, is enforced by federal and state prosecutors and police. But most laws are civil statutes that create legal rights and protections owed to citizens by government. Thus, just as the law protects a local business from a takeover by a foreign corporation or confers on an oil company rights to a depletion allowance to encourage exploration, so too, does the law give citizens living in poverty certain rights and entitlements to medical treatment, rent supplements and food.

In a perfect world, all of these laws and regulations would be models of clarity perfectly administered. In fact, however, because of the increasing complexity of the law, fiscal pressures on public officials and the occasional inattention or ignorance of administrators, the civil law frequently depends for its administration and implementation—its enforcement, in other words—on the administrative claims or lawsuits pressed by the affected parties themselves.

Our legal system expects and depends upon this sort of private law enforcement. For corporations and most citizens, such claims are pressed by corporate lawyers and the private bar. For the poor, that enforcement role has been played—quite successfully—by Legal Services Corporation lawyers. Here in Maryland, for example, suits by Legal Aid lawyers have:

Regained unemployment compensation for 24,000 Marylanders whose benefits were reduced because of an erroneous interpretation of law by a state agency.

Restored Medicaid services to 188,000 Marylanders, mostly elderly and children, whose aid was improperly terminated.

Guaranteed indigent veterans and their widows a right to be heard before termination or suspension of monthly veterans' or widows' benefits.

Established the right of all citizens to a hearing before involuntary commitment to state mental hospitals.

These are only some of Legal Aid's victories in Maryland courts. Legal Services lawyers have prevailed in scores of similar suits around the country. They also, of course, press claims and file suits that do not, and should not, prevail. When they do, my office, and my local and federal counterparts, vigorously oppose them. Legal Services' lawsuits, in other words, are sometimes "wrong." It may also be that some of the corporation's practices, like its aggressive and indiscriminate pursuit of attorney's fees in every civil rights case, need rethinking.

But as we have seen, Legal Services lawyers are often "right." And when they are "right" they have not only won dollars or services or protection for their clients, they have enforced the law, and they have made our proud boast about "the rule of law" a reality for millions of Americans.

Many of these enforcement successes have seriously antagonized some of Legal Services' critics, most notably Mr. Reagan. These critics resist and resent the notion that Legal Services lawyers rattle establishment cages—especially when they win, as they often did in California when Mr. Reagan was governor. To the extent that these successes have endangered Legal Services' survival, it might be said that the organization sued "not wisely but too well."

The critics believe that Legal Services' attention should be limited to the specific legal problems of the individual indigent client who seeks advice—a divorce, a Social Security claim, a dispute with a landlord. They appear to view poverty law as a kind of charitable calling whose practitioners, like some medieval friars, wonder among the poor dispensing legal alms. The view is not ungenerous. It is, however, a form of noblesse oblige—American style. "Oh, look dear, the poor have divorce lawyers just like us!".

But this narrow view of the Legal Services program overlooks the fact that with one attorney for every 6,000 poor people, filing class action lawsuits is good lawyering and often the only way in which Legal Services lawyers can represent their clients. In so doing, these lawyers play exactly the same role as that quite properly played by counsel for industry, labor, trade associations and special interest groups of all kinds when they seek to enforce the civil law for the benefit of their clients.

Finally, Legal Services lawyers ensure that the adversary process—the engine that drives our judicial system—runs well. The root premise of the adversary system is that "the truth," or its closest approximation, is most likely to emerge from the clash of competing courtroom forces, the forceful presentation of opposing views of the law and the facts and the testing of witnesses by vigorous cross-examination. It resembles familiar economic models in its assumption that competitors, each acting in its own self-interest, will produce the most socially desirable result.

But for the system to work, the fight must be fair. Only if both sides are ably represented by lawyers who have the time and the energy to research and investigate and prepare can we be confident that the decision-makers, judges and juries, will do—or approximate—justice.

The sound working of the adversary system is uniquely important in the United States. Due no doubt to our federal structure and our written Constitution, almost every great cause eventually becomes a legal issue to be decided finally by the courts.

Lawyers, some feel, are too much with us in America. An Englishman once called us a race of lawyers. We undoubtedly litigate too often about too little and misuse the courts to resolve disputes best handled by mediation and arbitration.

But it surely is little exaggeration to say that a reader of the Supreme Court Reports is as well informed about the nature and quality of life in America as is a reader of the New York Times or the Sun. It is difficult to disagree with the notion that courts—which decide almost every issue of public concern, from busing and abortion to prison overcrowding and prayers in schools—have as much to do with governing this country as do presidents, governors and legislators.

Access to the judicial system in this country, then, is access to government itself. Denial of access amounts to a special kind of disenfranchisement. Such a thing would not only cheapen our claims to be a democratic society. It would invite the fatal flaw of every closed society—creation of a bitter underclass with no confidence or stake in the system, ready to abandon rational discourse and to settle its mounting grievances in the streets. And it would come at the worst possible time—when the summary dismantlement of federal programs places the poor in greatest need of legal counsel.

It hasn't been so long ago that we sanctified the sweatshop in the name of "liberty of contract" and perpetuated badges of slavery in the name of "separate but equal." Goldsmith's observation that "Laws grind the poor and rich men rule the law" has, unfortunately, more than a little modern application. But many lawyers, in public and private practice, work very hard all their professional lives to blunt what truth there is in that statement.

Legal Services lawyers are among them. They shou'd be permitted to continue their valuable work. They help make "equal justice under law" more than an empty phrase.

● Mr. KENNEDY. Mr. President, I am pleased to be able to join today with the

distinguished Senator from Missouri (Mr. EAGLETON) and a bipartisan group of Senators to introduce legislation to maintain federally funded legal services to the poor through the Legal Services Corporation.

This measure would authorize the Legal Services Corporation for another 3 years. It would maintain the current $321 million level of funding. And it would keep faith with the principle of equal access to our system of justice for all Americans.

Too often, in the past, there has been a double standard of justice, one for those able to afford lawyers to explain their rights and defend them in the courts and another for the poor who neither knew their rights nor had anyone to defend them.

As a result, the poor have been evicted, swindled, and exploited in the past. The Legal Services Corporation has broken this past pattern. It has extended the protection of law to the poor in countless areas of daily life. It has helped the elderly to secure social security benefits. It has enabled families to keep their homes.

It has enabled children to avoid being forced into programs for the mentally retarded without any evaluation of their intelligence. It has protected mothers left without money to feed their families when a benefit check stopped.

It has given to poor Americans the means to achieve a hearing and a legal remedy when their rights have been threatened.

Legal Services began with the Economic Opportunity Act in 1965. It had the thoughtful leadership and support of Supreme Court Justice Lewis Powell, then president of the American Bar Association.

It demonstrated a remarkable capacity to respond to local needs and to local concerns.

Inevitably, there was concern that, as the program grew, political pressures might be exerted on attorneys, pressures which might inhibit their ability to fully represent their clients. The underlying importance of an attorney complying with the canon of ethics was understood and accepted by all concerned.

It was in that context that the proposal was put forward to make the legal services program independent, governed by a separate board of directors. It was adopted with bipartisan support and signed into law by a Republican President in July 1974.

Since 1975, the Corporation has sought to respond to its mandate to provide legal assistance to the poor. It has achieved a national coverage, assuring an average of 2 attorneys for each 10,000 poor people. For the first time, the poor in every section of this land can find legal counsel.

A year ago, it was able to serve some 1.2 million persons. And in its administration of the funds appropriated by the Congress, it has avoided any extensive overhead, limited the actual administration to some 3 percent of the total funds. In fact, 93 percent of its funds go directly to provide legal services at the local level.

The programs operating in different parts of the country are governed by locally selected boards. Sixty percent of the board members also have to be local attorneys. In this way, priorities for each program are established at the local level.

Contrary to the unfounded allegations put forth by its critics, the overall distribution of legal services activities turns out to be on basic issues of survival—food, shelter, health, and income. "Family" issues spanning adoption, divorce, supports, spouse abuse, and custody constituted 30 percent of legal matters handled by legal services attorneys. Income maintenance and housing constituted the next largest category of legal problems, followed by consumer protection.

The bill we are presenting encourages the Corporation to work even more closely with the local bar in achieving their participation in meeting the legal needs of the poor.

But for any who believe that turning this responsibility over to the private sector is acceptable, I would emphasize that the private bar emphatically supports this measure to extend the life of the Legal Services Corporation.

The current president of the American Bar Association has written to oppose efforts to eliminate the Legal Services Corporation.

Every president of the ABA since 1965 has endorsed the legal services program. They recognize that the private bar alone cannot fulfill this need.

In my own State of Massachusetts, I am proud that the extension of the Legal Services Corporation has been endorsed by the organized bar, by judges, and by the highest judicial court in the Commonwealth.

Frequently opponents of legal services argue that the program is an agent of social or political change. They overlook the reality of how the law works. They disregard the fundamental truth that legal services attorneys represent actual people—poor Americans with critical legal problems. They win only when the courts find that their clients are being treated improperly, unfairly, and illegally.

If, as a matter of law, individuals are being denied their rights, then the act of exposing that denial through legal action may produce change, but only change that is in accordance with the law.

If this legislation is not adopted, the vast majority of the legal services offices—many of them in storefronts in major cities or scattered through the poorest rural counties in America—would have to close their doors.

The underpinning that the Legal Services Corporation provides to the principle of equal access to justice would come tumbling down.

And we would return to a time when a double standard of justice existed, one that protected only those who could afford it.

In 1981, this Nation cannot step back into the past. Instead, we must take even more vigorous steps to assure that this Nation continues to move closer to the ideal of equal access and equal justice for every American citizen.●

By Mr. THURMOND (for himself and Mr. HOLLINGS):

S. 940. A bill to encourage corporations to donate certain historical film to educational organizations by increasing the limit on the charitable contribution deduction of such corporations; to the Committee on Finance.

CORPORATE CONTRIBUTIONS OF HISTORIC FILMS

Mr. THURMOND. Mr. President, I am pleased to introduce today legislation to encourage corporations to donate certain historical newsreel film to qualified educational organizations by increasing the limit on the charitable contribution tax deduction available to such donor corporations. The distinguished junior Senator from South Carolina (Mr. HOLLINGS) joins with me in this sponsorship. Similar legislation was introduced last year in the Senate by me, and in the House by Congressman HOLLAND of South Carolina's Fifth Congressional District, but there was insufficient time for the bills to be considered prior to the adjournment of the 96th Congress.

This bill is motivated by the commendable decision of the Twentieth Century-Fox Corp. to donate its library of historic newsreel film to the University of South Carolina, and also by the announced intention of the Hearst Corp. of New York to make a similar gift of its newsreel film library to another major university within the near future. Out of a concern that the national interest would be served by an amendment to the tax code designed to encourage and facilitate these generous donations of film depicting actual historical events as they happened, we have authored this legislation.

Mr. President, the Fox film library, presently in the custody of the wholly owned subsidiary, Movietonews, Inc., is truly a magnificent, priceless collection of historical records. It is by far the largest and most complete newsreel library in the world, consisting of some 50 million feet of both silent and sound film which depicts U.S. and world history for the years 1919 through 1963 The film in this collection takes the viewer back almost to the beginning of the motion picture era. It will be prepared and exhibited at the University of South Carolina in a $45 million fine arts center which the university is constructing to, among other purposes, house the collection. In the setting of this new arts center, students and researchers will be able to relive momentous historical events.

This generous gift will enable millions of Americans in years to come to gain knowledge and enjoyment from a truly remarkable historical collection. While the Movietonews library has been appraised at some $115 million, in reality it is a priceless gift unequaled by any other collection in the world. Needless to say, the outstanding president of the University of South Carolina, Dr. James B. Holderman, and the citizenry of our State feel honored and privileged to be the recipients of this wonderful donation.

The Hearst Corp. Metrotone News film library consists of approximately 25 to 30 million feet of film. While not as voluminous as the Fox gift, this library is

outstanding and of great historic value in its own right. Included in the collection are film clips covering the period 1895 to 1967, with footage of such powerful historical figures as Presidents William McKinley and Theodore Roosevelt, Buffalo Bill Cody, and others. The eventual donee of the entire Hearst Metrotone News film library will be the proud recipient of a comprehensive, noteworthy collection.

Mr. President, this legislation is designed to encourage, facilitate, and expedite these two phenomenal donations by a limited, temporary liberalization of certain provisions of the Internal Revenue Code. Under current Federal corporate income tax law, a corporation may take a deduction against taxable income for charitable gifts to an organization qualified under section 170(b) of the Internal Revenue Code, such as a university. This deduction is limited to 5 percent of the corporate taxpayer's taxable income in 1 year, and any excess charitable contribution may be carried forward for 5 years. This bill would amend section 170 of the Code in a carefully limited manner to extend the present limit of 5 percent to 30 percent for the years 1981 through 1987, and only in the case of corporate contributions of historical film to educational organizations.

There may be a need at some future time to increase the charitable deduction for all corporate taxpayers, but this bill is deliberately narrowly drawn to facilitate these two gifts of great historic value. While this change may have a small, short-term effect on tax revenues, in the long term, there would be no revenue effect, since the proposed change merely represents a timing difference in the making of a series of film stock gifts to the University of South Carolina—in the case of the Fox Movietonews donation—and to another qualified educational institution—in the case of the Hearst Metrotone Library.

Mr. President, the donor corporations, joined by the University of South Carolina as recipient of the movietonews gift, have requested this limited change in the Tax Code in order that the donations can be completed as soon as practicable, rather than being delayed over many years in order for the corporate donors to "fit" the gifts within the narrow limitations of the present provisions of the Code.

Furthermore, in the case of both film libraries, a substantial amount of footage is on explosive, deteriorating nitrate film stock, which the corporate donees are willing to convert at their own expense to safety film stock.

Approximately half of the Fox Movietonews library, including much of the important World War II footage, is on explosive nitrate stock. Fox plans to expend $5 to $6 million over the next 6 years to convert this fragile, dangerous nitrate film to safety stock, in order to assure safe preservation of the entire library for the educational and scholarship purposes contemplated by the University of South Carolina. Fox is both wise and generous in its decision to perform this conversion at its own expense.

The corporation wants to do everything it can to avoid the possible loss of this invaluable library, as occurred at the National Archives' Suitland, Md., film vault in 1978, when a fire destroyed about 12.5 million feet of newsreel film previously donated by Universal Studios. This limited change in the Tax Code will make it more economically feasible for Fox to undertake this conversion project as rapidly as possible in order to preserve the library for posterity and complete the series of gifts as soon as practicable.

Mr. President, I believe this very limited, temporary change in the Federal income tax laws would promote an important national goal—the preservation for posterity of historic resources. It is my understanding that these two film libraries are the only remaining significant collections of historic newsreel stock held today by American corporations. Preservation of these historic treasures in the setting of major educational institutions as proposed certainly serves the national interest.

I, therefore, hope this bill can receive prompt, favorable consideration in order to facilitate these outstanding gifts and thus insure the safe, effective preservation of this historic material for the benefit of present and future generations.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 940

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INCREASE IN LIMIT ON CHARITABLE CONTRIBUTION DEDUCTION.

(a) IN GENERAL.—In the case of any qualified film contribution, paragraph (2) of section 170(b) of the Internal Revenue Code of 1954 (relating to percentage limitation on charitable contributions of corporations) shall be applied by substituting "30 percent" for "5 percent".

(b) ORDER OF APPLICATION.—For purposes of applying subsections (b)(2) and (d)(2) of section 170 of such Code, contributions other than qualified film contributions for all taxable years shall be taken into account before qualified film contributions.

(c) QUALIFIED FILM CONTRIBUTION DEFINED.—

(1) IN GENERAL.—For purposes of this section, the term "qualified film contribution" means any charitable contribution (within the meaning of section 170(c) of such Code)—

(A) by a corporation,

(B) to an organization described in section 501(c)(3) of such Code (exclusively for the purposes of such organization),

(C) of—

(i) motion picture film of actual events which were taking place at the time of the filming, and

(ii) library materials directly related to such film.

(2) FILM MUST HAVE BEEN HELD FOR 9 YEARS; DONOR MUST CONTRIBUTE ENTIRE INTEREST.—This section shall apply with respect to any film only if—

(A) the donor held the film for the 9-year period ending on the date of making the contribution, and

(B) the donor contributes its entire interest in such film.

(d) EFFECTIVE DATE.—This Act shall apply only to contributions made in taxable years beginning in 1981, 1982, 1983, 1984, 1985, 1986, or 1987.

● Mr. HOLLINGS. Mr. President, I am pleased to join with Senator THURMOND in sponsoring legislation to make a limited change in the tax law to increase the limit on corporate charitable contributions for corporations that donate certain historical films to educational institutions. These provisions would be effective from 1981 through 1987.

Movietonews, Inc., a wholly owned subsidiary of 20th Century-Fox Film Corp., is donating in a series of gifts all of its Movietonews Newsreel Library to the University of South Carolina. The Hearst Corp. owns similar property, the Hearst Metrotone News Film Library, which it intends to donate to a major university. It is my understanding that these are the only two remaining film news libraries that could benefit from the increased charitable contribution deduction.

The Movietonews Newsreel Library will be used by the University of South Carolina solely for educational and scholarship purposes. This library consists of approximately 50 million feet of film containing both silent and sound material of United States and world history for the years 1919 through 1963. Approximately 25 million feet of the library is on explosive nitrate stock; the use of "safety" film only came into use about 1952

In order to assure preservation of the library for the university's educational and scholarship purposes, Fox will expend approximately $5–$6 million in converting the nitrate film onto safety film stock. This conversion process will be effected as portions of the library are contributed to the university.

Fox is performing this conversion in order to preserve the library for posterity and to avoid a loss of the library as occurred at the National Archives' film vault building in Suitland, Md., on December 7, 1978. On that day, fire destroyed about 12.5 million feet of newsreel film which was previously donated to the National Archives by Universal Studios. At a conversion rate of 3–4 million feet of nitrate film per year, Fox's conversion plans will take 6–7 years.

In connection with this gift of the library, the university is in process of constructing a $45 million "Carolina Arts Center"; a significant portion of this new fine arts center will be used to house the library collection. The university presently plans to complete construction of the fine arts center in August 1984. The American Appraisal Co. has recently indicated a preliminary value of the library of approximately $115 million.

This limited change in the tax law would allow 20th Century-Fox an increased charitable gift deduction in the tax years 1981 through 1987. It would also accelerate converting the nitrate film, which is rapidly deteriorating, into safety film stock. Accordingly, it is vital that the series of gifts be completed as

soon as possible. Furthermore, this proposed change in present tax law would be in conformity with an important national goal, that is, the preservation of historic treasures such as the library.

Mr. President, I urge my colleagues to support this legislation.●

By Mr. THURMOND (for himself, Mr. GOLDWATER, Mr. CANNON, and Mr. HEINZ):

S. 941. A bill to authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, District of Columbia, in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II; to the Committee on Rules and Administration.

AMERICAN AIRMEN RESCUED BY GENERAL MIHAILOVICH

Mr. THURMOND. Mr. President, I send to the desk a bill to authorize the National Committee of American Airmen Rescued by Gen. Draza Mihailovich to erect a monument in Washington, with funds raised by the committee through a public subscription, dedicated to "General Draza Mihailovich, Savior of American Airmen."

The reason for having such a monument so designated stems back to World War II. During that war the United States and Great Britain initially supported the nationalist resistance movement in Yugoslavia, led by Gen. Draza Mihailovich. Due to a tragic combination of errors and mistaken information, the Allies withdrew their support from Mihailovich at the end of 1943 and backed the Communist resistance movement of Marshall Tito.

Despite his abandonment by the Allies and despite the merciless war waged against him by both the Communists and the Nazis during 1944, General Mihailovich and his forces, known as the Chetniks, succeeded in rescuing some 500 American airmen who were shot down over Yugoslavia. Most of these men were safely evacuated from Nazi-occupied Yugoslavia to Italy.

In 1948, President Harry S. Truman awarded posthumously the Legion of Merit to General Mihailovich for his heroics in rescuing American airmen and for his larger services to the Allied cause. Unfortunately, the American public was unaware of this award since the State Department, fearful of offending the sensitivities of the Yugoslavia Communist Government, made the award to Mihailovich "secret" for almost 20 years.

Since that time, a group of American airmen have organized themselves into a National Committee of American Airmen Rescued by Gen. Mihailovich and have launched a movement to build a memorial in Washington, D.C., dedicated in gratitude to the man who saved their lives. This effort has been ongoing for some time now, with the support of many Members of Congress, and I can think of no better way to discharge this debt than to authorize these airmen to erect the monument they have in mind.

Mr. President, in voicing my support for this effort, I want to emphasize the fact that this project is to be financed, not by the American taxpayers, but through the fundraising efforts of the airmen's group. All costs for construction and maintenance of this memorial will be borne by the private sector.

This legislation is virtually identical to previous measures that have been approved overwhelmingly in the Senate by both the 94th and 95th Congresses. The bill also enjoyed wide support in the 96th Congress, but unfortunately, none of the previous bills achieved passage in the House.

Mr. President, the airmen who seek authority to have this monument erected do not wish to make political noises that would offend the present Government of Yugoslavia. They seek only to acknowledge their deep sense of gratitude to a man who was instrumental in rescuing nearly 500 downed American flyers during World War II. They merely want the simple recognition that would be imparted by the erection of the Gen. Mihailovich Monument.

Mr. President, I ask unanimous consent that the attached excerpt from the original petition which was presented to me by a contingent of airmen saved by Gen. Mihailovich along with the text of the bill be printed in the RECORD.

There being no objection, the bill and the petition were ordered to be printed in the RECORD, as follows:

S. 941

To authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, District of Columbia, in recognition of the role he played in saving the lives of approximately five hundred United States airmen in Yugoslavia during World War II

Whereas during World War II more than five hundred American airmen who were shot down over Yugoslavia were rescued and returned to active duty by the nationalist resistance forces of General Draza Mihailovich; and

Whereas, for these services and other services to the Allied cause, General Mihailovich was, in 1948, on the recommendation of General Eisenhower, awarded the Legion of Merit in the Degree of Supreme Commander by President Truman; and

Whereas the National Committee of American Airmen Rescued by General Mihailovich has petitioned Congress for permission to erect in the District of Columbia or environs, with publicly subscribed funds, a simple memorial as an enduring expression of their gratitude to the man who saved their lives; and

Whereas such an expression of gratitude would be in keeping with the American tradition of honor and has been specifically endorsed by major national organizations, including an endorsement by the American Legion Convention of 1977 and the American Federation of Labor and Congress of Industrial Organizations;

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, pursuant to Section 2 of this Act, the Secretary of the Interior shall permit the National Committee of American Airmen Rescued by General Mihailovich to construct and maintain a monument to General Draza Mihailovich, in recognition of the role he played in saving the lives of approximately five hundred United States airmen in Yugoslavia during World War II, as described in such committee's petition to Congress concerning the authorization of such monument. Such monument shall be of appropriate design and shall be located on Federal public land within the District of Columbia or environs. The design and location of the monument shall be subject to approval by the National Capital Planning Commission, the Fine Arts Commission, and the Secretary of the Interior.

SEC. 2. The National Committee of American Airmen Rescued by General Mihailovich shall accept private funds which shall be the sole source for the construction and maintenance of such monument. The Secretary of the Interior shall only permit such committee to begin the construction of such monument when he determines that such committee has sufficient funds to complete such construction and to provide for such maintenance; except that such committee must have such funds no later than two years after the date of enactment of this Act.

PETITION TO THE CONGRESS OF THE UNITED STATES FOR LEGISLATION PERMITTING THE ERECTION IN WASHINGTON, D.C. OF A MONUMENT TO "GENERAL DRAZA MIHAILOVICH, SAVIOR OF AMERICAN AIRMEN"

To say that General Mihailovich and his men saved our lives tells only a very small part of the story. Frequently they had to fight off the Germans in order to rescue us. Because of Mihailovich's commitment to protect us at all costs, scores of innocent hostages were executed by the Nazis; the Nazis always knew when an American crew bailed out, and when they could find no trace of the crew, they assumed, quite correctly, that they were being sheltered by the Chetniks. Those of us who were wounded received the best medical attention available, sometimes in underground hospitals. Desperately short of supplies, Mihailovich's men frequently went hungry themselves in order to feed us.

All this we can never forget.

Our ranks have begun to thin with the passage of years. But the years have no way diminished the admiration, affection and gratitude which we hold in our hearts for General Mihailovich and his gallant forces.

Having consulted with each other, and confident that we speak for all of the 500 airmen who were rescued by the forces of General Mihailovich, the undersigned airmen have decided that it would be proper to give enduring expression to this gratitude by erecting a monument in Washington, D.C. with funds contributed by ourselves and by members of the American public, to "General Mihailovich, Saviour of American Airmen." This concrete expression of gratitude, we feel, would also be in complete harmony with American tradition.

We respectfully petition the Congress of the United States to enact legislation permitting the erection of such a monument; so that we may appropriately discharge what all of us regard as a sacred debt of honor—a debt of honor all the more compelling because Mihailovich in his lifetime received no recognition and no reward for the many services to the Allied cause of which President Truman spoke in his citation.

By Mr. JACKSON:

S. 942. A bill for the relief of Asha; to the Committee on the Judiciary.

THE RELIEF OF ASHA

Mr. JACKSON. Mr. President, today I am introducing a private bill for the relief of an abandoned child in India, Asha, so that she may be adopted by Mr. and Mrs. Ross Sicilia of Vancouver, Wash.

I do not normally introduce private legislation; however, I am doing so in this instance because of the hardship being experienced by the Sicilia family due to unusual circumstances.

Asha was born without a record of her birth. A doctor's examination determined her birthdate to be June 15, 1966. This means the child is over 14 years of age and therefore ineligible for a relative immigrant visa, because 14 years of age is the age limitation for such visas.

Prior to the discovery of Asha's age, the Sicilias had invested a considerable amount of time and effort in meeting the requirements for adopting an abandoned child from overseas. For the Sicilias to have invested so much of themselves and then to be so close to realizing their dream of sharing their love with Asha, only to be denied the unification and completion of their family at this point due to an estimation of the child's age, can only add immeasurably to the difficulties I understand the Sicilias are experiencing.

Congress has been sympathetic to circumstances such as this and has a history of approving private legislation which unites abandoned children overseas under the age of 16 years with adoptive families in the United States.

Indeed, legislation has been introduced in the 97th Congress which would amend the pertinent section of the Immigration and Naturalization Act to raise the age limitation to 16 years. However, until this legislation passes both Houses of Congress, private legislation will still be necessary to resolve these unfortunate and difficult circumstances.

By Mr. HELMS (by request):

S. 943. A bill to provide price support and production adjustment incentives for farmers in order to assure the availability of an abundance of food and fiber, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURE ACT OF 1981

Mr. HELMS. Mr. President, I am introducing today, at the request of the administration, a bill to provide price support and production adjustment incentives for farmers, commonly known as the farm bill. I ask unanimous consent that the bill and an accompanying request letter from the Secretary of Agriculture be printed in the RECORD, along with the section-by-section analysis.

There being no objection, the bill, letter, and analysis were ordered to be printed in the RECORD, as follows:

S. 943

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Act of 1981."

TABLE OF CONTENTS

TITLE I—DAIRY AND SOYBEAN PROGRAMS
Sec. 101. Milk and soybean price support.
Sec. 102. Transfer of dairy products to the military and veterans hospitals.
TITLE II—WHEAT
Sec. 201. Loan rates, land diversion, and payment yields for the 1982 through 1985 crops.
Sec. 202. Nonapplicability of certificate requirements.
Sec. 203. Suspension of marketing quotas and producer certificate provisions.
Sec. 204. Suspension of quota provisions.
Sec. 205. Nonapplicability of section 107 of the Agricultural Act of 1949 of the 1982 through 1985 crops of wheat.
TITLE III—FEED GRAINS
Sec. 301. Loan rates, land diversion, and payment yields for the 1982 through 1985 crops.
Sec. 302. Nonapplicability of section 105 of the Agricultural Act of 1949 to the 1982 through 1985 crops of feed grains.
TITLE IV—UPLAND COTTON
Sec. 401. Base acreage allotments, suspension of marketing quotas, and related provisions.
Sec. 402. Loan rates, land diversion, and payment yields for the 1982 through 1985 crops.
Sec. 403. Commodity Credit Corporation sales price restrictions.
Sec. 404. Skiprow practices.
TITLE V—RICE
Sec. 501. Loan rates, land diversion, and payment yields for the 1982 through 1985 crops.
Sec. 502. Suspension of marketing quotas and other provisions.
TITLE VI—PEANUTS
Sec. 601. Suspension of marketing quotas and acreage allotments.
Sec. 602. National poundage quota; farm poundage quota.
Sec. 603. Sale, lease, or transfer of farm base production poundage.
Sec. 604. Marketing penalties.
Sec. 605. Reports and records.
Sec. 606. Price support program.
TITLE VII—GRAIN RESERVE
Sec. 701. Producer storage program.
Sec. 702. International emergency food reserve.
Sec. 703. Disaster reserve.
Sec. 704. Farm storage loans.
TITLE VIII—WOOL AND MOHAIR
Sec. 801. Extension of Act; support price.
Sec. 802. Payments.
Sec. 803. Reimbursement.
TITLE IX—GENERAL AND MISCELLANEOUS PROVISIONS
Sec. 901. Finality of determinations.
Sec. 902. Commodity Credit Corporation sales price restrictions for wheat and feed grains.
Sec. 903. Application of terms in the Agricultural Act of 1949.
Sec. 904. Emergency feed program.
TITLE X—PUBLIC LAW 480
Sec. 1001. Technical amendment to section 101.
Sec. 1002. Technical amendment to section 103(b).
Sec. 1003. Technical amendment to section 103(d).
Sec. 1004. Technical amendments to section 103(l).
Sec. 1005. Technical amendments to section 104.
Sec. 1006. Consolidation of provisions regarding sales terms.
Sec. 1007. Repeal of obsolete section 108.
Sec. 1008. Repeal of obsolete section 109(b).
Sec. 1009. Repeal of obsolete section 110.
Sec. 1010. Clarification of applicability of Title I procurement procedures.
Sec. 1011. Repeal of obsolete provision in section 204.
Sec. 1012. Authority for distilled spirits market development programs.
Sec. 1013. Change in date for annual report.
Sec. 1014. Extension of program.
TITLE XI—RURAL DEVELOPMENT AND CONSERVATION
Sec. 1101. Agricultural land resources.
Sec. 1102. Soil and water conservation policy.
TITLE XII—RESEARCH, EXTENSION, AND TEACHING IN THE FOOD AND AGRICULTURAL SCIENCES
Sec. 1201. Revised findings.
Sec. 1202. Amended purposes.
Sec. 1203. Amended definitions.
Sec. 1204. Responsibilities of the Secretary and Department of Agriculture.
Sec. 1205. Subcommittee on Food, Agricultural and Forestry Research.
Sec. 1206. Joint Council on Food and Agricultural Sciences.
Sec. 1207. National Agricultural Research and Extension Users Advisory Board.
Sec. 1208. Repeal of Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.
Sec. 1209. Libraries and information network.
Sec. 1210. Support for the Joint Council and Advisory Board.
Sec. 1211. Authorization of appropriations to support the Joint Council and Advisory Board.
Sec. 1212. Repeal of section 1413A of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.
Sec. 1213. Amendments to Program of Competitive, Special and Facilities Grants for Agricultural Research.
Sec. 1214. Authorization of appropriations for Research Facilities Act of 1963.
Sec. 1215. Authorization of appropriations for grants and fellowships for food and agricultural sciences education.
Sec. 1216. Repeal of authority for grants for research on the production of alcohols and industrial hydrocarbons.
Sec. 1217. Repeal of section 1424 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.
Sec. 1218. Nutrition education program.
Sec. 1219. Repeal of sections 1426 through 1428 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.
Sec. 1220. Conforming amendment.
Sec. 1221. Eligible institutions of animal health and disease research funds.
Sec. 1222. Animal Health Science Research Advisory Board.
Sec. 1223. Continuing animal health and disease research.
Sec. 1224. Appropriations of research on national or regional problems.
Sec. 1225. Technical amendment—extension at 1890 land-grant colleges, including Tuskegee Institute.
Sec. 1226. Technical amendment—agricultural research at 1890 land-grant colleges, including Tuskegee Institute.
Sec. 1227. Repeal of miscellaneous authorities relating to solar energy research and development.
Sec. 1228. International Agricultural Research and Extension.
Sec. 1229. Studies.
Sec. 1230. Authorization of appropriations for agricultural research programs.
Sec. 1231. Authorization of appropriations for extension programs.
Sec. 1232. Miscellaneous provisions.
Sec. 1233. Forestry research.
Sec. 1234. Excess federal property.

TITLE XIII—AGRICULTURAL MARKETING AGREEMENT OF 1937

Sec. 1301. Seasonal incentive plans in federal milk marketing order.

TITLE XIV—DEPARTMENT OF AGRICULTURE ADVISORY COMMITTEES

Sec. 1401. Repeal.

TITLE I—DAIRY AND SOYBEAN PROGRAMS

MILK AND SOYBEAN PRICE SUPPORT

SEC. 101. Section 201 of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 201. The Secretary is authorized and directed to make price support available (without regard to the provisions of title III) to producers of milk and soybeans as follows:

"(a) The price of milk shall be supported at such level not in excess of 90 per centum nor less than 70 per centum of the parity price therefor as the Secretary determines necessary in order to assure an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production, and assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs: *Provided,* That notwithstanding the foregoing or any other provision of law, the Secretary is authorized to support the price of milk at a level less than 70 per centum of the parity price therefor, if the Secretary determines that the Commodity Credit Corporation is accumulating, or has accumulated, excessive quantities of milk or milk products: *Provided, further,* That the support price effective on October 1, 1981 shall be not less than $13.10 per hundredweight of milk containing 3.67 per centum milkfat. Such price support shall be provided through purchases of milk and the products of milk.

"(b) The price of the 1982 through 1985 crops of soybeans shall be supported through loans and purchases at such levels as the Secretary determines appropriate in relation to competing commodities and taking into consideration domestic and foreign supply and demand factors.".

TRANSFER OF DAIRY PRODUCTS TO THE MILITARY AND VETERANS HOSPITALS

SEC. 102. Section 202 of the Agricultural Act of 1949 is amended by striking out "1981" in subsections (a) and (b) and inserting in lieu thereof "1985".

TITLE II—WHEAT

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 201. Effective only for the 1982 through 1985 crops of wheat, Section 107A of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 107A. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of wheat at such level as the Secretary determines to be appropriate taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(b)(1) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of wheat if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of wheat. If a land diversion program is in effect under this subsection, the Secretary is also authorized to require that producers participate in such program as a condition of eligibility for loans and purchases authorized by subsection (a). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(2) The farm program payment yield for each crop of wheat for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was previously established for the farm the Secretary is authorized to determine such yield as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(3) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(f) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 202. Sections 379d, 379e, 379f, 379g, 379h, 379l, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1982, through May 31, 1986.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 203. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 204. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 205. Section 107 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of wheat.

TITLE III—FEED GRAINS

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 301. Effective only for the 1982 through 1985 crops of feed grains, Section 105A of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 105A. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of corn at such level as the Secretary determines to be appropriate taking into consideration the cost of producing corn, supply and demand conditions, and world market prices for corn.

"(2) The Secretary shall make available to producers loans and purchases on each of the 1982 through 1985 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(b)(1) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of one or more of the crops of corn, barley, oats, rye, and grain sorghums if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of any of these feed grains. If a land diversion program is in effect for one or more of the crops of corn, barley, oats, rye, and grain sorghums, the Secretary is also authorized to require that producers participate in any such program as a condition of eligibility for loans nad purchases authorized by subsection (a). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(2) The farm program payment yield for each crop of corn, barley, oats, rye, and grain sorghums for which a land diversion pro-

gram is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for any of such feed grains was previously established for the farm, the Secretary is authorized to determine such yields as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(3) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(f) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 302. Section 105 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of feed grains.

TITLE IV—UPLAND COTTON

BASE ACREAGE ALLOTMENTS; SUSPENSIONS OF MARKETING QUOTAS, AND RELATED PROVISIONS

SEC. 401. Sections 342, 343, 344, 345, 346 and 377 of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of upland cotton.

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 402. Effective only for the 1982 through 1985 crops of upland cotton, section 103(f) of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 103(f). Notwithstanding any other provision of law—

"(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1982 through 1985 crops of upland cotton to producers nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (i) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during the three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (ii) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths of the growths determined for Middling one and three-thirty seconds inch cotton C.I.F. Northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average Northern Europe price determination of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9)): *Provided*, That in no event shall such loan level be less than 48 cents per pound. If for any crop the average Northern Europe price determined under clause (ii) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (i) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate not in excess of the average United States spot market price determined under clause (i) of the first sentence of this paragraph. The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection shall, upon request of the producer during the tenth month of the loan period for the cotton, be made available for an additional term of eight months: *Provided*, That such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six month period: *Provided, further*, That whenever the Secretary determines that the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated United States spot markets for such cotton for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available;

"(B) If a special quota has been established under this subsection during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in clause (A) of this subsection or the amount required to increase the supply to 130 per centum of the demand;

"(C) As used in clause (B) of this paragraph, the term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four hundred and eighty-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established; and

"(D) When a special quota is established under the provisions of this subsection, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

"(2) Notwithstanding the foregoing provisions of this subsection, a special quota period shall not be established that overlaps an existing special quota period.

"(3)(A) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of upland cotton if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of upland cotton. If a land diversion program is in effect under this subsection, the Secretary is also authorized to require that producers participate in such program as a condition of eligibility for loans authorized by subsection (1). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall undertake into consideration the extent of the diversion to be taken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(B) The farm program payment yield for each crop of upland cotton for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for upland cotton was previously established for the farm, the Secretary is authorized to determine such yield as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment

yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State or county program payment yields are established, the farm program payment yields shall balance to the national, State or county program payment yields.

"(C) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall file an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to alleviate a shortage in the supply of agricultural commodities.

"(4) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this subsection precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(5) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(6) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(7) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 403. Effective only with respect to the period beginning August 1, 1982, and ending July 31, 1983, the tenth sentence of section 407 of the Agricultural Act of 1949 is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells cotton for export, in no event, however, at less than 115 per centum of the loan rate of Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

SKIPROW PRACTICES

SEC. 404. Section 374(a) of the Agricultural Adjustment Act of 1938, as amended, is amended by striking out "1981" in the last sentence and inserting in lieu thereof "1985".

TITLE V—RICE

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 501. Effective only with respect to the 1982 through 1985 crops of rice, section 101(f) of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 101(f). Notwithstanding any other provision of law—

"(1) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of rice at such level as the Secretary determines to be appropriate taking into consideration the cost of producing rice, supply and demand conditions, and world market prices for rice.

"(2)(A) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of rice if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of rice. If a land diversion program is in effect under this subsection, the Secretary is also authorized to require that producers participate in such program as a condition of eligibility for loans and purchases authorized by subsection (1). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(B) The farm program payment yield for each crop of rice for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for rice was previously established for the farm, the Secretary is authorized to determine such yield as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(C) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disasters or to alleviate a shortage in the supply of agricultural commodities.

"(3) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this subsection precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(4) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(5) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(6) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

SUSPENSION OF MARKETING QUOTAS AND OTHER PROVISIONS

SEC. 502. Sections 351, 352, 353, 354, 355, 356, and 377 of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of rice.

TITLE VI—PEANUTS

SUSPENSION OF MARKETING QUOTAS AND ACREAGE ALLOTMENTS

SEC. 601. Sections 358, 358a, 359, 371, and part of subtitle C of title III of the Agricultural Adjustment Act of 1938 are amended as follows:

(a) Subsections (a) through (j) of section 358 shall not be applicable to the 1982 through 1985 crops of peanuts.

(b) Subsections (a) through (h) of section 358a shall not be applicable to the 1982 through 1985 crops of peanuts.

(c) Subsections (a), (b), (d), and (e) of section 359 shall not be applicable to the 1982 through 1985 crops of peanuts.

(d) Section 371 shall not be applicable to the 1982 through 1985 crops of peanuts.

(e) Part I of subtitle C of title III shall not be applicable to the 1982 through 1985 crops of peanuts.

NATIONAL POUNDAGE QUOTA; FARM POUNDAGE QUOTA

SEC. 602. Effective for the 1982 through 1985 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (k) through (m) as follows:

"(k) There is hereby established a national poundage quota for peanuts for the following marketing years in the following amounts: 1982, 1,296,000 tons; 1983, 1,166,400 tons; 1984, 1,049,760 tons; 1985, 944,784 tons.

"(l) A farm base production poundage shall be established for each farm for the 1982 marketing year equal to the farm base production poundage established for such farm for the 1981 marketing year. Such farm base production poundage shall remain the same for such farm for the 1983 through 1985 marketing years: *Provided, however,* That if the farm base production poundage, or any part thereof, is permanently transferred in accordance with section 358a of this Act, the receiving farm shall be considered as possessing the farm base production poundage (or portion thereof), of the transferring farm for all subsequent marketing years.

"(m) A farm poundage quota shall be established by the Secretary for each marketing year for each farm equal to the farm base production poundage multiplied by the factor determined by dividing the national poundage quota established in subsection (k) of this section by the sum total of all farm base production poundages in effect for the 1981 marketing year. If any part of the farm poundage quota is allotted to a farm on which there is inadequate cropland available to produce the amount of the farm poundage quota on such farm, such farm poundage quota or a portion thereof shall be surrendered to the county committee for reapportionment to other farms within the country in accordance with regulations prescribed by the Secretary.

"(n) For the purposes of this Act and

Title I of the Agricultural Act of 1949, as amended—

"(1) 'Quota peanuts' means, for any marketing year, any peanuts which are eligible for domestic edible use as determined by the Secretary which are marketed or considered marketed from a farm, and which do not exceed the farm poundage quota of such farm for such year;

"(2) 'Additional peanuts' means, for any marketing year, any peanuts which are: (i) marketed from a farm and which are in excess of the marketings of quota peanuts from such farm or such year; or (ii) marketed from a farm without a farm poundage quota.

"(3) 'Crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or otherwise when authorized by the Secretary; and

"(4) 'Domestic edible use' means use for milling to produce domestic food peanuts and seed and use on a farm.".

SALE, LEASE, OR TRANSFER OF FARM BASE PRODUCTION POUNDAGE

SEC. 603. Effective for the 1982 through 1985 crops of peanuts, section 358a of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (i) and (j) as follows:

"(i) The owner or operator of any farm for which a farm base production poundage has been established under this Act may, subject to such terms, conditions, or limitations as the Secretary may prescribe, sell or lease any part of the right to all or any part of such farm base production poundage to any other owner or operator of a farm within a State for transfer to such farm. The owner of a farm shall be permitted to transfer all or any part of such farm's farm base production poundage to any other farm owned or controlled by him.

"(j) Transfers (including transfers by sale or lease) of farm base production poundage under this section shall be subject to the following conditions: (1) no transfer of farm base production poundage from a farm subject to a mortgage or other lien shall be permitted unless the transfer is agreed to by the lienholders; (2) no transfer of farm base production poundage shall be permitted if the county committee determines that the receiving farm does not have adequate cropland to produce the farm poundage quota; (3) no transfer of farm base production poundage shall be effective until a record thereof is filed with the county committee of the county to which such transfer is made and such committee determines that the transfer complies with the provisions of this section; and (4) such other terms and conditions which the Secretary may by regulations prescribe.".

MARKETING PENALTIES

SEC. 604. Effective for the 1982 through 1985 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 is amended by adding at the end thereof new subsections (f) through (q).

"(f) The marketing of any peanuts for domestic edible use in excess of the farm poundage quota for the farm on which such peanuts are produced shall be subject to penalty at a rate equal to 120 per centum of the support price for quota peanuts for the marketing year (August 1 through July 31) in which such marketing occurs. The marketing of any additional peanuts from a farm anywhere in the United States shall be subject to the same penalty unless such peanuts, in accordance with regulations established by the Secretary, are either: (1) placed under price support loan at the additional loan rate under the loan program made available under section 108A(b) of the Agricultural Act of 1949, as amended, and not redeemed by the producers; or (2) marketed for export or crushing pursuant to the provisions of subsection (j) of this section. Such penalty shall be paid by the person who buys or otherwise acquires the peanuts from the producer, or if the peanuts are marketed by the producer through an agent, the penalty shall be paid by such agent, and such person or agent may deduct an amount equivalent to the penalty from the price paid to the producer. If the person required to collect the penalty fails to collect such penalty, such person and all persons entitled to share in the peanuts marketed from the farm or the proceeds thereof shall be jointly and severally liable for the amount of the penalty. Peanuts produced in a calendar year in which farm poundage quotas are in effect for the marketing year beginning therein shall be subject to such quotas even though the peanuts are marketed prior to the date on which such marketing year begins. If any producer falsely identifies or fails to certify planted acres or fails to account for the disposition of any peanuts produced on such planted acres, an amount of peanuts equal to the national average yield for 1981, as determined by the Secretary, times the planted acres, shall be deemed to have been marketed in violation of permissible uses of quota and additional peanuts and the penalty in respect thereof shall be paid and remitted by the producer.

"(g) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use: *Provided, however,* that additional peanuts may be purchased and marketed for domestic edible use by handlers in accordance with the provisions of subsection (k) of this section. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(h) Upon a finding by the Secretary that a handler has failed to account for the proper disposition of additional peanuts which such handler has acquired during the marketing year, such handler shall be subject to a penalty at a rate equal to 120 per centum of the loan level for quota peanuts on the amount of the additional peanuts for which the handler has failed to account.

"(i) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108A(c) of the Agricultural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(j) Handlers may, in accordance with subsection (k) of this section and regulations prescribed by the Secretary, contract with producers for the purchase of: (1) a producer's additional peanuts for crushing or for export; or (2) a producer's additional peanuts from the additional loan pool for domestic edible use upon the delivery of such peanuts by such producers to the handler.

"(k) Subject to the provisions of section 407 of the Agricultural Act of 1949 any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with sales policies established by the Secretary. Handlers may contract with producers to purchase such producers' additional peanuts for domestic edible use from the additional loan pool upon delivery by the producer of such peanuts to the handler. The purchase price of the additional peanuts under such contracts may not be less than 100 per centum of the loan value of quota peanuts plus all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses. The producer shall receive the additional price support advance and the handler shall remit to the Commodity Credit Corporation for inclusion in the additional loan pool an amount equal to the minimum purchase price specified in the previous sentence. The difference between the purchase price and the minimum purchase price, if any, shall be paid by the handler directly to the producer. Additional peanuts received under loan and which are not subject to contracts between producers and handlers as described above may be offered for sale by the Commodity Credit Corporation or the designated producer associations for domestic edible use at a total price which is not less than that required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus: (1) 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer but not later than December 31 of the marketing year; or (2) 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year.

"(l) Notwithstanding any other provision of law, the Secretary is authorized to promulgate such regulations as the Secretary determines appropriate and necessary to prevent peanuts which are unsuitable for human consumption because of quality defects from being marketed or utilized for purposes for which such peanuts are determined by the Secretary to be unsafe or otherwise unfit to be used. Such regulations may include, but are not limited to, provisions regulating the sale, handling, shelling and ultimate disposition of such peanuts.

"(m) Upon a finding by the Secretary that peanuts which are unsuitable for human consumption have been sold, handled, shelled, or otherwise disposed of in a manner contrary to the regulations issued under subsection (l) of this section, the Secretary shall assess against the person responsible for such violation a penalty as provided in this subsection. The amount of the penalty shall be equal to 120 per centum of the loan rate for quota peanuts times the amount of peanuts involved in such violations. The Secretary is authorized to issue such regulations as he determines are appropriate to carry out the purpose of this subsection.

"(n) The person liable for payment or collection of any penalty provided for in this section shall be liable also for interest thereon at a rate per annum equal to 120 per centum of the rate of interest which was charged the Commodity Credit Corporation by the Treasury of the United States on the date such penalty became due.

"(o) Notwithstanding any other provision of law, the liability for and the amount of any penalty assessed under this section shall be determined in accordance with such procedures as the Secretary by regulations may prescribe. The facts constituting the basis for determining the liability for or amount of any penalty assessed under this section, when officially determined in conformity with the applicable regulations prescribed by the Secretary, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government or any court of law. Nothing in this subsection shall be construed as prohibiting any court of competent jurisdiction from reviewing any determination made by the Secretary with respect to whether such determination was made in conformity with the applicable law and regulations.

"(p) Notwithstanding any other provision of this section, the amount of any penalty

assessed under this section may be reduced, in accordance with regulations issued by the Secretary, if the Secretary determines that the violation subject to the penalty was committed unintentionally or unknowingly and that a reduction in the amount of the penalty would not impair the effective operation of the price support program for peanuts.

"(q) The Secretary is authorized to issue such regulations as are determined to be necessary and appropriate to carry out the purposes of this section. Such regulations may include, but are not limited to, regulations: (1) requiring certification of acreage planted to peanuts; and (2) prescribing the manner in which producers and handlers may account for the disposition of peanuts.".

REPORTS AND RECORDS

SEC. 605. Effective for the 1982 through 1985 crops of peanuts, the first sentence of section 373(a) of the Agricultural Adjustment Act of 1938 is amended by inserting immediately before "all brokers and dealers in peanuts" the following: "all farmers engaged in the production of peanuts,".

PRICE SUPPORT PROGRAM

SEC. 606. Effective for the 1982 through 1985 crops of peanuts, title I of the Agricultural Act of 1949 is amended by adding a new section 108A as follows:

"SEC. 108A. Notwithstanding any other provision of law—

"(a) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1982 through 1985 crops at such levels as the Secretary finds appropriate, taking into consideration the eight factors specified in section 401(b) of this Act, cost of production, and any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the marketing year for which the level of support is being determined, but not less than $420 per ton. The levels of support so announced shall not be reduced by any deductions for inspection, handling, or storage: *Provided*, That the Secretary may make adjustments for location of peanuts and such other adjustments as are authorized by section 403 of this Act.

"(b) The Secretary shall make price support available to producers through loans, purchases, or other operations on additional peanuts for each of the 1982 through 1985 crops. In determining support levels, the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets. The Secretary shall announce the level of support for additional peanuts for each crop not later than February 15 preceding the marketing year for which the level of support is being determined.

"(c)(1) In carrying out subsections (a) and (b) of this section, the Secretary may make warehouse storage loans available in each of the three producing areas (described in 7 CFR § 1446.4 (1977)) to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily for the purpose of conducting such loan activities. Such association may be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Such loans shall include, in addition to the price support value of the peanuts, such costs as such association reasonably may incur in carrying out such responsibilities in its operations and activities under this section and section 359 of the Agricultural Adjustment Act of 1938.

"(2) The Secretary may require that each such association establish pools and maintain complete and accurate records by type for quota peanuts and additional peanuts placed under loan. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each grower. Net gains for peanuts in each pool shall consist of (A) for quota peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts and (B) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (A) of this paragraph. Notwithstanding any other provision of this subsection, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such grower.".

SEC. 607. Subsections 101(a), 101(b), and 408(c) of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of peanuts.

TITLE VII—GRAIN RESERVES

PRODUCER STORAGE PROGRAM

SEC. 701. Section 110 of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 110. (a) The Secretary is authorized to formulate and administer a program under which producers of wheat and producers of feed grains will be able to store wheat and feed grains when such commodities are in abundant supply and extend the time period for their orderly marketing. The Secretary shall establish safeguards to assure that wheat and feed grains held under the program shall not be utilized in any manner to unduly depress, manipulate, or curtail the free market. The authority provided by this section shall be in addition to other authorities available to the Secretary for carrying out producer loan and storage operations.

"(b) In carrying out the producer storage program, the Secretary may provide original or extended price support loans for wheat and feed grains under terms and conditions designed to encourage producers to store wheat and feed grains for extended periods of time in order to promote orderly marketing when wheat or feed grains are in abundant supply. Loans made under this section shall be made at the same level of support as provided for by this Act or at such higher level as the Secretary may deem appropriate. Among such other terms and conditions as the Secretary may prescribe by regulation, the program may provide for (1) repayment of such loans in not less than three years nor more than five years; (2) payments to producers for storage in such amounts and under such condition as the Secretary determines appropriate to encourage producers to participate in the program; (3) a rate of interest as determined under subsection (c) of this section; (4) recovery of amounts paid for storage, and for the payment of additional interest or other charges in the event such loans are repaid by producers before the market price for wheat or feed grains has reached the price levels specified in clause (5) of this subsection; (5) conditions designed to induce producers to redeem and market the wheat or feed grains securing such loans without regard to the maturity dates thereof whenever the Secretary determines that the market price for the commodity has attained a specified level, as determined by the Secretary.

"(c) The rate of interest charged participants in the program authorized by this section shall be not less than the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Secretary may waive or adjust such interest as he deems appropriate to effectuate the purposes of this section. Notwithstanding the foregoing, the Secretary is authorized to increase the applicable rate of interest in such amounts and at such intervals as the Secretary determines is appropriate to encourage the orderly marketing of wheat and feed grains securing loans made under this section after the market price for the commodity has attained the level determined under clause 5 of subsection (b).

"(d) Notwithstanding any other provision of law, the Secretary may require producers to repay loans made under this section plus accrued interest and such other charges as may be required by regulation prior to the maturity date thereof if the Secretary determines that emergency conditions exist which require that such commodity be made available in the market to meet urgent domestic or international needs.

"(e) The Secretary shall announce the terms and conditions of the producer storage program as far in advance of making loans as practicable. In such announcement, the Secretary shall specify the quantity of wheat or feed grains to be stored under the program which the Secretary determines appropriate to promote the orderly marketing of such commodities.

"(f) Notwithstanding any other provision of law, except as otherwise provided under section 302 of the Food Security Wheat Reserve Act of 1980 and section 208 of the Agricultural Trade Suspension Adjustment Act of 1980, whenever the original or extended loan program authorized by this section is in effect, the Commodity Credit Corporation may not sell any of its stocks of wheat or feed grains at less than 105 per centum of the then current price level at which the Secretary may encourage repayment of producer storage loans on the commodity prior to the maturity dates of the loans, as determined under clause (5) of the second sentence of subsection (b) of this section: *Provided*, That such restriction shall not apply to—

(1) sales of such commodities which have substantially deteriorated in quality or as to which there is a danger of loss or waste through deterioration or spoilage; and

(2) sales or other disposals of such commodities under the Act of September 21, 1959 (73 Stat. 574, as amended; 7 U.S.C. 1427 note).

"(g) The Secretary may, with the concurrence of the owner of grain stored under the program authorized by this section, reconcentrate all such grain stored in commercial warehouses at such points as the Secretary deems to be in the public interest, taking into account such factors as transportation and normal marketing patterns. The Secretary shall permit rotation of stocks and facilitate maintenance of quality under regulations which assure that the holding producer or warehouseman shall, at all times, have available for delivery at the designated place of storage both the quantity and quality of grain covered by his commitment.

"(h) Whenever grain is stored under the provisions of this section, the Secretary may buy and sell at an equivalent price, allowing for the customary location and grade differentials, substantially equivalent quantities of grain in different locations or warehouses to the extent needed to properly handle, rotate, distribute, and locate such

commodities which the Commodity Credit Corporation owns or controls. Such purchases to offset sales shall be made within two market days following the sales. The Secretary shall make a daily list available showing the price, location, and quantity of the transactions.

"(i) The Secretary may use the Commodity Credit Corporation, to the extent feasible, to fulfill the purposes of this section. To the maximum extent practicable consistent with the fulfillment of the purposes of this section and the effective and efficient administration of this section, the Secretary shall utilize the usual and customary channels, facilities, and arrangements of trade and commerce.".

INTERNATIONAL EMERGENCY FOOD RESERVE

SEC. 702. Section 111 of the Agricultural Act of 1949 (91 Stat. 953; 7 U.S.C. 1445f) is hereby repealed.

DISASTER RESERVE

SEC. 703. Section 813 of the Agricultural Act of 1970 (87 Stat. 239, as amended; 7 U.S.C. 1427a) is hereby repealed.

FARM STORAGE FACILITY LOANS

SEC. 704. Section 4(h) of the Commodity Credit Corporation Charter Act (62 Stat. 1070, as amended; 15 U.S.C. 714b(h)) is amended by deleting from the fourth proviso of the second sentence the phrase "shall make loans" and inserting in lieu thereof the phrase "may make loans".

TITLE VIII—WOOL AND MOHAIR

EXTENSION OF ACT; SUPPORT PRICE

SEC. 801. Section 703 of the National Wool Act of 1954 is amended by—

(1) striking out "1981" in subsection (a) and inserting in lieu thereof "1985"; and

(2) striking out all the words following the comma in subsection (b) after the word "*Provided*" and inserting "That for the marketing years beginning January 1, 1982, and ending December 31, 1985, the support price for shorn wool shall be at a level not in excess of 90 per centum (rounded to the nearest full cent) nor less than 60 per centum (rounded to the nearest full cent) of the amount calculated according to the foregoing formula: *Provided, however,* That the Secretary is authorized to support the price of shorn wool at less than 60 per centum if the Secretary determines that such lower level is appropriate because of exceptional circumstances affecting the cost or availability of shorn wool.".

PAYMENTS

SEC. 802. The first sentence of section 704 of the National Wool Act of 1954 is amended by striking out the colon after the word "therefor" inserting a period in lieu thereof and striking out the remainder of the sentence.

REIMBURSEMENT

SEC. 803. Section 705 of the Wool Act of 1954 is hereby repealed.

TITLE IX—GENERAL AND MISCELLANEOUS PROVISIONS

FINALITY OF DETERMINATIONS

SEC. 901. The first sentence of section 385 of the Agricultural Adjustment Act of 1938 is amended to read as follows: "The facts constituting the basis for any Soil Conservation Act payment, any payment under the wheat, feed grain, upland cotton, and rice program authorized by the Agricultural Act of 1949 and this Act, any loan, or price support operation, or the amount thereof, when officially determined in conformity with the applicable regulations prescribed by the Commodity Credit Corporation, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR WHEAT AND FEED GRAINS

SEC. 902. Effective only with respect to the marketing years for the 1982 through 1985 crops, section 407 of the Agricultural Act of 1949 is amended by—

(1) amending the third proviso of the third sentence to read as follows: "*Provided,* That the Corporation shall not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye respectively at less than 115 per centum of the current national average loan rate for the commodity, adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate, plus reasonable carrying charges.";

(2) striking out in the fifth sentence "current basic county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and inserting in lieu thereof the following: "current basic county loan rate (or a comparable price if there is no current basic county loan rate)"; and

(3) striking out in the seventh sentence ", but in no event shall the purchase price exceed the then current support price for such commodities" and inserting in lieu thereof the following: "but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 903. Effective only for the 1982 through 1985 crops of wheat, feed grains, upland cotton, and rice, section 408(k) of the Agricultural Act of 1949 is amended to read as follows:

"REFERENCES TO TERMS MADE APPLICABLE TO WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

"(k) References made in sections 402, 403, 406, and 416 to the terms 'support price', 'level of support', and 'level of price support' shall be considered to apply as well as to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under this Act; and references made to the terms 'price support,' 'price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to the loan and purchase operations for wheat, feed grains, upland cotton, and rice under this Act.".

EMERGENCY FEED PROGRAM

SEC. 904. Section 1105 of the Food and Agriculture Act of 1977 (91 Stat. 955; 7 U.S.C. 2267) is hereby repealed.

TITLE X—PUBLIC LAW 480

MISCELLANEOUS AMENDMENTS

SEC. 1001. Section 101 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "for foreign currencies" before the period at the end of the section and inserting in lieu thereof "to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement".

SEC. 1002. Section 103(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended to read as follows:

"(b) Except where he determines that it would be inconsistent with the objects of the Act, determine the amount of foreign currencies needed for the uses specified in subsections (a), (b), (e), and (h) of section 104 and in title III, and the agreements for credit sales shall provide for payment of such amounts in dollars or in foreign currencies upon delivery of the agricultural commodities. Such payment may be considered as an advance payment of the earliest installment;".

SEC. 1003. Subsection 103(d) of the Agricultural Trade Development and Assistance Act of 1954 is amended by revising the first full sentence to read as follows:

"As used in this Act, 'friendly country' shall not include any country or area dominated or controlled by a foreign government or organization controlling a world Communist movement.".

SEC. 1004. Section 103(1) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out after "1" the words beginning with "obtain commitments from friendly purchasing countries" through "United States of America, and".

SEC. 1005. Section 104 of the Agricultural Trade Development and Assistance Act of 1954 is amended by—

(1) striking out in the first sentence "under this title" and inserting in lieu thereof "under the agreements for such sales entered into prior to January 1, 1972";

(2) striking out in subsection (d) "$5,000,000" and inserting in lieu thereof "10,000,000; and

(3) striking out in clause (3) of the proviso following subsection (k) "(except as provided in subsection (c) of this section),".

SEC. 1006. Section 106(a) of the Agricultural Trade and Development and Assistance Act of 1954 is amended by adding at the end thereof the following sentence: "Payment by any friendly country for commodities purchased for foreign currencies on credit terms and on terms which permit conversion to dollars shall be upon terms no less favorable to the United States than those for development loans made under Section 122 of the Foreign Assistance Act of 1931, as amended.".

SEC. 1007. Section 108 of the Agricultural Trade Development and Assistance Act of 1954 is hereby repealed.

SEC. 1008. Section 109(b) of the Agricultural Trade Development and Assistance Act of 1954 is hereby repealed.

SEC. 1009. Section 110 of the Agricultural Trade Development and Assistance Act of 1954 is hereby repealed.

SEC. 1010. Section 115(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting in the first sentence after the words "food commodities" the words "from private stocks".

SEC. 1011. Section 204 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out the first sentence thereof.

SEC. 1012. Section 402 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out in the second sentence "or beer" after "wine" and inserting in lieu thereof, ", beer, or distilled spirits".

SEC. 1013. Section 408(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "April 1" and inserting in lieu thereof "July 1".

EXTENSION OF PROGRAM

SEC. 1014. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by—

(1) striking out in the first sentence "1981" and inserting in lieu thereof "1985"; and

(2) striking out in the second sentence "Food and Agriculture Act of 1977" and inserting in lieu thereof "Agricultural Act of 1981".

TITLE XI—RURAL DEVELOPMENT AND CONSERVATION

AGRICULTURAL LAND RESOURCES

SEC. 1101. (a). Congress hereby reaffirms that agricultural land is an important natural resource because it provides a livelihood

for farm families and for those in agricultural-related industries; that agricultural land is a strategic resource that ensures the nation's self-sufficiency for food and fiber at a reasonable cost; and that agricultural products are instrumental in the area of export and foreign exchange thereby improving the balance of payments of the United States.

(b) The Secretary of Agriculture is encouraged to cooperate with and provide technical assistance to those States and/or localities which desire to develop programs which emphasize the importance of agricultural land and resources to our national economy.

(c) The Secretary of Agriculture is also encouraged to cooperate with the State Cooperative Extension Services in the preparation of educational materials emphasizing the importance of agricultural land to the nation's well-being and distribute such educational materials through the mass media, schools, groups, and other Federal agencies.

(d) The Secretary is authorized to carry out this section with existing facilities through the use of grants, contracts, or such other means as the Secretary deems appropriate.

SOIL AND WATER CONSERVATION POLICY

SEC. 1102. (a) Congress hereby reaffirms its policy to promote soil and water conservation, improve the quality of the nation's waters, and preserve and protect natural resources through the use of effective conservation and pollution abatement programs.

(b) The Secretary of Agriculture shall submit a report to Congress not later than December 31, 1981, setting forth a comprehensive oil and water conservation policy, including recommendations as to how the various soil and water conservation programs which are administered by agencies within the Department of Agriculture can be strengthened and improved.

TITLE XII—RESEARCH, EXTENSION, AND TEACHING IN THE FOOD AND AGRICULTURAL SCIENCES

REVISED FINDINGS

SEC. 1201. Section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 981; 7 U.S.C. 3101) is amended to read as follows:

"SEC. 1402. Congress finds that—

"(1) the Federal Government of the United States has provided funding support for agricultural research, extension, and teaching for many years in order to promote and protect the general health and welfare of the people of the United States, and this support has significantly contributed to the development of the Nation's agricultural system;

"(2) a unique partnership arrangement exists in agricultural research, extension, and teaching between the Federal Government and the Governments of the several States whereby the States have accepted and supported, through legislation and appropriations, the programs of agricultural and forestry research provided for under the Act of March 2, 1887 (24 Stat. 440, as amended), and the Act of October 10, 1962 (76 Stat. 806, as amended); extension provided for the Act of May 8, 1914 (38 Stat. 372, as amended); and teaching provided for under the Act of July 2, 1862 (12 Stat. 503, as amended) and the Act of August 30, 1890 (26 Stat. 417, as amended);

"(3) the existing agricultural research system consisting of the Federal Government, the land-grant colleges and universities, other colleges and universities engaged in agricultural research, extension, and teaching and the private sector constitute an essential national resource which must serve as the foundation for any further strengthening of agricultural research, extension, and teaching in the United States;

"(4) the partnership in publicly supported agricultural research, extension and teaching involving the programs of Federal agencies and the programs of the States has played a major role in the outstanding successes achieved in meeting the varied, dispersed and in many cases site-specific needs of American agriculture; and must be preserved; and

"(5) of major concern is the security of the future food supply and its costs due to declining rates of increase in productivity, rapidly escalating cost of petroleum and petro-chemicals, declining water tables, natural resource depletion, deterioration of environmental quality, and the ability of world agriculture to provide and maintain adequate diets for ever increasing population with rather fixed areas of cropland;

"(6) advances in food and agricultural sciences and technology have become increasingly limited by the concentration upon thorough development and exploitation of currently known scientific principles and technological approaches at the expense of more fundamental research, and strong research effort in the basic sciences is necessary to achieve breakthroughs in knowledge that can support new and innovative food and agricultural technologies;

"(7) reliable data and research based economic information are no longer sufficient to deal with the increasingly complex public and private decisions that are forced by the rapidly changing events in domestic world agriculture;

"(8) the land-grant colleges and universities, other colleges and universities, and the Department of Agriculture should have improved linkages with the international research centers and counterpart institutions and agencies in developed, transitional and developing countries; this would serve the purpose of U.S. agriculture and the U.S. economy and make a substantial contribution to the cause of improved progress throughout the world; and

"(9) long-range planning for research, extension, and teaching a key element in meeting the objectives of this title, and all of the elements in the food and agricultural service and education system are encouraged to expand their successful planning and coordination efforts."

AMENDED PURPOSES

SEC. 1202. Section 1403 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 983; 7 U.S.C. 3102) is amended):

(a) by revising subsection (2) to read:

"(2) undertake the special measures set forth in this title to improve the coordination and planning of agricultural research, extension, and teaching, identify needs and establish priorities for these programs, assure that national agricultural research, extension, and teaching objectives are fully achieved, and assure that the results of agricultural research are effectively communicated and demonstrated to farmers, processors, handlers, consumers, and all other users who can benefit therefrom;"

(b) In subsection (4) by deleting the comma after the word "programs" the first time it appears and by deleting the words "including the initiatives specified in section 1402(12) of this title";

(c) In subsection (5) by striking out the word "scientific"; and

(d) In subsection (7) by striking out the words "training and research" and inserting in lieu thereof the words "research, extension, and teaching".

AMENDED DEFINITIONS

SEC. 1203. Section 1404 of the National Agricultural Research, Extension and Teaching Policy Act of 1977 (91 Stat. 983; 7 U.S.C. 3103) is amended:

(a) By revising subsection (8) to read:

"(8) the term 'food and agricultural sciences' means basic, applied, and developmental research, and extension and teaching activities, in the food, agricultural, renewable natural resources, forestry, and social sciences, in the broadest sense of these terms, including but not limited to, activities relating to:

(A) Domestic and export market expansion for U.S. agricultural products;

(B) Production inputs, such as energy, to improve productivity;

(C) Animal health to protect man and the animal production base of the United States;

(D) Human nutrition;

(E) Home economics and family life;

(F) Rangeland management; and

(G) Aquaculture."

(b) By revising subsection (12) to read:

"(12) the term 'State' means any one of the fifty States, Puerto Rico, Guam, American Samoa, the Northern Marianas, Trust Territory of the Pacific Islands, the Virgin Islands of the United States and the District of Columbia;".

RESPONSIBILITIES OF THE SECRETARY AND DEPARTMENT OF AGRICULTURE

SEC. 1204. Section 1405 of the National Agriculture Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 985; 7 U.S.C. 3121) is amended:

(a) In subsection (1) by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Health and Human Services";

(b) In subsection (2) by striking out the words "teaching, and manpower development" and inserting in lieu thereof the words "and teaching";

(c) In subsection (5) by striking out the word "other";

(d) In subsection (6) by inserting the words "or proposed" after the words "actions taken";

(e) In subsection (8) by striking out the word "and" at the end thereof;

(f) In subsection (9) by striking out the period and inserting in lieu thereof a semicolon followed by the word "and"; and

(g) By adding at the end thereof the following new subsection:

"(10) coordinate all agricultural research, extension, and teaching activities conducted or financed by the Department of Agriculture with the periodic Renewable Resource Assessment and Program provided for in sections 3 and 4 of the Forest and Rangeland Resources Planning Act of 1974, as amended, and the appraisal and program provided for in sections 5 and 6 of the Soil and Water Resources Conservation Act of 1977,".

SUBCOMMITTEE ON FOOD, AGRICULTURAL AND FORESTRY RESEARCH

SEC. 1205. Section 401(h) of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (90 Stat. 471, as amended; 42 U.S.C. 6551(h)) is amended:

(a) By striking out the words "Subcommittee on Food and Renewable Resources" and inserting in lieu thereof the words "Subcommittee on Food, Agricultural, and Forestry Research";

(b) By striking out the words "Department of Health, Education and Welfare" and inserting in lieu thereof the words "Department of Health and Human Services"; and

(c) By striking out the words "Energy Research and Development Administration" and inserting in lieu thereof the words "Department of Energy".

JOINT COUNCIL ON FOOD AND AGRICULTURAL SCIENCES

SEC. 1206. Section 1407 of the National Agricultural Research, Extension, and Teach-

ing Policy Act of 1977 (91 Stat. 986; 7 U.S.C. 3122) is amended:

(a) In subsection (a) by striking out "five" and inserting in lieu thereof "ten";

(b) By revising subsection (b) to read as follows:

"(b) The Joint Council shall be composed of not fewer than 25 representatives of organizations or agencies which conduct or assist in conducting programs of research, extension, or teaching in the food and agricultural and forestry sciences, including landgrant colleges and universities; other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching; State agricultural experiment stations; State cooperative extension services; agencies within the Department of Agriculture which have significant research, extension, or teaching responsibilities; the Office of Science and Technology Policy; and other Federal agencies determined by the Secretary to be appropriate. Members shall be appointed for a term of three years by the Secretary from nominations made by the organizations and agencies described in the preceding sentence. The terms of members shall be staggered. To ensure that regional differences are properly considered, at least one-half of the members of the Joint Council shall be appointed by the Secretary from among distinguished persons engaged in agricultural research, extension, and teaching programs at land-grant colleges and universities and State agricultural experiment stations. To ensure that other agricultural institutional views are considered by the Joint Council, two of the members of the Joint Council shall be appointed by the Secretary from among persons who are distinguished representatives of other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, and teaching. The Joint Council shall be jointly chaired by the senior policy official of the Department of Agriculture responsible for research, extension, and teaching, and a person to be elected from among the non-Federal membership of the Joint Council."

(c) By amending subsection (d)(1) to read as follows:

"(1) The primary purpose of the Joint Council is to bring about more effective research, extension, and teaching in the food and agricultural sciencies in the United States by improving planning and coordination of publicly and privately supported food and agricultural science activities and by relating Federal budget development and program management to these processes."

(d) In subsection (d)(2)(E) by striking out "efforts" and all that follows through "planning," and inserting in lieu thereof "of the food and agricultural sciences, by using wherever possible the existing regional research, extension, and teaching organizations of State cooperative institutions to provide planning and coordination,";

(e) By amending subsection (d)(2)(G) to read as follows:

"(G) submit a report, not later than June 30 of each year—

"(i) specifying the Joint Council's recommendations on priorities for food and agricultural research, extension, and teaching programs; and

"(ii) delineating suggested areas of responsibility among Federal, State, and private organizations in carrying out such programs.

Each such report shall be submitted to the Secretary of Agriculture. Minority views, if timely submitted, shall be included in such report."

(f) By adding at the end thereof the following new subsection:

"(e)(1) The Federal Advisory Committee Act (5 U.S.C. app.) and subchapter II of chapter 5 of title 5 of the United States Code shall not apply to the Joint Council.

"(2) The meetings of the Joint Council shall be publicly announced in advance and shall be open to the public. Appropriate records of the activities of the Joint Council shall be kept and made available to the public on request.".

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

SEC. 1207. Section 1408 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 988; 7 U.S.C. 3123) is amended:

(a) In subsection (a) by striking out "five" and inserting in lieu thereof "ten";

(b) In subsection (b) as follows:

(1) By striking out "twenty-one" and inserting in lieu thereof "twenty-five";

(2) By amending paragraph (1) to read as follows:

"(1) eight producer members representing various geographical regions and production interests, including forestry and aquaculture,"

(3) By adding at the end thereof the following:

"Such members shall be appointed to serve staggered terms."

(c) In subsection (f) as follows:

(1) In subparagraph (E) by striking out "October 31" and inserting in lieu thereof "July 1"; and

(2) In subparagraph (F) by striking out "March 1 of" and inserting in lieu thereof "February 20 of".

REPEAL OF SECTION 1409 OF THE NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1977

SEC. 1208. Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 989; 7 U.S.C. 3124) is repealed.

LIBRARIES AND INFORMATION NETWORK

SEC. 1209. Section 1411 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 990; 7 U.S.C. 3126) is amended:

(a) In subsection (a)(5) by deleting the period and inserting in lieu thereof a semicolon and the word "and";

(b) By adding a new subsection (a)(6) to read:

"(6) the Department of Agriculture establish mutually valuable working relationships with international and foreign information and data programs."

(c) By revising subsection (b)(3) to read:

"(3) providing notification about these collections on a regular basis to the State cooperative extension services, State educational agencies and other interested persons."

SUPPORT FOR THE JOINT COUNCIL AND ADVISORY BOARD

SEC. 1210. Section 1412 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 991; 7 U.S.C. 3127) is amended by revising subsection (a) to read as follows:

"(a) To assist the Joint Council and Advisory Board in the performance of their duties, the Secretary is authorized to appoint not to exceed five full-time professional staff employees after consultation with the co-chairmen of the Joint Council and the Chairman of the Advisory Board. This staff is to consist of a full-time executive secretary for the Joint Council, a full-time executive secretary for the Advisory Board, not more than two other professional staff, and a full-time executive director for such staff. The executive director shall receive compensation at a rate not below the rate for GS-16 nor in excess of the rate for GS-18 in the General Schedule set out in section 5332 of title 5 of the United States Code. The executive director shall perform such duties as the co-chairmen of the Joint Council and the chairman of Advisory Board may direct.".

AUTHORIZATION OF APPROPRIATIONS TO SUPPORT THE JOINT COUNCIL AND ADVISORY BOARD

SEC. 1211. Section 1413 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 991; 7 U.S.C. 3128) is amended by adding a new subsection to read as follows:

"(c) There is hereby authorized to be appropriated annually such sums as the Congress may determine necessary for carrying out the provisions of sections 1412 and 1413 of this title.".

REPEAL OF SECTION 1413A OF THE NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1977

SEC. 1212. Section 1413A of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (94 Stat. 707) is repealed.

AMENDMENTS TO PROGRAM OF COMPETITIVE, SPECIAL AND FACILITIES GRANTS FOR AGRICULTURAL RESEARCH

SEC. 1213. Section 2 of the Act of August 4, 1965 (79 Stat. 431, as amended; 7 U.S.C. 4501), is amended:

(a) In subsection (b) by striking out the words "on Food and Agricultural Sciences" in the second sentence and inserting in lieu thereof "and the Users Advisory Board", and by striking out the last sentence and inserting in lieu thereof the following: "There are hereby authorized to be appropriated annually such sums as Congress may determine necessary for the purpose of carrying out the provisions of this subsection.";

(b) In subsection (c) as follows:

(1) In paragraph (1) by inserting "research foundations established by land-grant colleges and universities," after "land-grant colleges and universities,"; and

(2) By revising paragraph (2) to read as follows:

"(2) to State agricultural experiment stations, land-grant colleges and universities, research foundations established by landgrant colleges and universities, colleges and universities receiving funds under the Act of October 10, 1962 (76 Stat. 806-807, as amended; 16 U.S.C. 582a, 582a-1—582a-7), and accredited colleges of veterinary medicine, to facilitate or expand on-going State-Federal food and agricultural research programs that (A) promote excellence in research, (B) promote the development of regional research centers, (C) promote the research partnership between the Department of Agriculture and such colleges and universities, such as research foundations or State agricultural experiment stations, or (D) facilitate coordination and cooperation of research across state lines.".

(c) In subsection (d) as follows:

(1) By striking out all before "(1)" and inserting in lieu thereof the following:

"(d) The Secretary of Agriculture shall make annual grants to support the renovation and refurbishment, including energy retrofitting, of existing building space used or to be used for the conduct of food and agricultural research; the construction of auxiliary research facilities such as greenhouses, insectaries, and research farm structures and installations; and the purchase and installation of fixed equipment in such space and facilities, to—".

(2) In paragraph (1) by striking out "available; and" and inserting in lieu thereof "available:";

(3) In paragraph (2) by striking out the period and inserting in lieu thereof a semicolon, and

(4) By inserting after paragraph (2) the following new paragraphs:

"(3) each cooperating forestry school not

described in paragraph (1), in an amount which is equal to 10 per centum of the funds received by such school under the Act of October 10, 1962 (76 Stat. 806; 16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(4) each college eligible to receive funds under the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 321 et seq.), including Tuskegee Institute, in an amount which is equal to 10 per centum of the funds received by such college under section 1445 of this title."

AUTHORIZATION OF APPROPRIATIONS FOR RESEARCH FACILITIES ACT OF 1963

SEC. 1214. Section 4 of the Act of July 22, 1963 (77 Stat. 91, as amended; 7 U.S.C. 390c), is amended by striking out subsection (a) and inserting in lieu thereof the following:

"(a) There are hereby authorized to be appropriated annually such sums as Congress may determine necessary for allocation to eligible institutions under this Act to be used for the purpose set out in section 2 of this Act.".

AUTHORIZATION OF APPROPRIATIONS FOR GRANTS AND FELLOWSHIPS FOR FOOD AND AGRICULTURAL SCIENCES EDUCATION

SEC. 1215. Section 1417 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 996; 7 U.S.C. 3152) is amended by revising subsection (d) to read as follows:

"(d) There are hereby authorized to be appropriated annually such sums as Congress may determine necessary for the purpose of carrying out the provisions of this section.".

REPEAL OF AUTHORITY FOR GRANTS FOR RESEARCH ON THE PRODUCTION OF ALCOHOLS AND INDUSTRIAL HYDROCARBONS

SEC. 1216. Section 1419 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 997, as amended; 7 U.S.C. 3154) is repealed effective October 1, 1981.

REPEAL OF SECTION 1424 OF THE NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1977

SEC. 1217. Section 1424 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1000; 7 U.S.C. 3174) is repealed.

NUTRITION EDUCATION PROGRAM

SEC. 1218. Section 1425 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1000; 7 U.S.C. 3175) is amended:

(a) By revising subsection (b) to read:

"(b) In order to enable low-income individuals and families to engage in nutritionally sound food purchasing and preparation practices, the expanded food and nutrition education program conducted under section 3(d) of the Act of May 8, 1914 (38 Stat. 373, as amended; 7 U.S.C. 343(d)), shall provide for the employment and training of professional and para-professional aides to engage in direct nutrition education of low-income families and in other appropriate nutrition education programs. To the maximum extent practicable, such program aides shall be hired from the indigenous target population."

"(c) Beginning with the fiscal year ending September 30, 1982—

"(1) Any funds annually appropriated under section 3(d) of the Act of May 8, 1914, as amended, for the conduct of the expanded food and nutrition education program, up to the amount appropriated under such section for such program for the fiscal year ending September 30, 1981, shall be allocated to each State in the same proportion as funds appropriated under such section for the conduct of the program for the fiscal year ending September 30, 1981, are allocated among the States; with the exception that the Secretary may retain up to 2 per centum of said amount for the conduct of such program in States that did not participate in such program in the fiscal year ending September 30, 1981.

"(2) Any funds appropriated annually under section 3(d) of the Act of May 8, 1914, as amended, for the conduct of the expanded food and nutrition education program in excess of the amount appropriated under such section for the conduct of the program for the fiscal year ending September 30, 1981, shall be allocated as follows:

"A. Four per centum shall be available to the Secretary for administrative, technical and other services necessary for the administration of the program.

"B. The remainder shall be allocated among the States as follows:

"i. Ten per centum shall be distributed equally among all States; and

"ii. The remainder shall be allocated to each State in an amount which bears the same ratio to the total amount to be allocated under this subparagraph as the population of the state living at or below 125 per centum of the income poverty guidelines prescribed by the Office of Management and Budget (adjusted pursuant to Section 625 of the Economic Opportunity Act of 1964 (86 Stat. 697, as amended; 42 U.S.C. 2971(d)), bears to the total population of all the states living at or below 125 per centum of the income poverty guidelines as determined by the last preceding decennial census at the time each such additional amount is first appropriated. The provisions of this subparagraph shall not preclude the Secretary from developing educational materials and programs for persons in income ranges above the level designated in this subparagraph.".

REPEAL OF SECTIONS 1426 THROUGH 1428 OF THE NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT OF 1977

SEC. 1219. Sections 1426 through 1428 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1000–1001; 7 U.S.C. 3176–3178) are repealed.

CONFORMING AMENDMENT

SEC. 1220. Section 1429 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1001; 7 U.S.C. 3191) is amended by revising the last sentence thereof to read as follows:

"It is recognized that the total animal health and disease research and extension efforts of the several State colleges and universities and of the Federal Government would be more effective if there were close coordination between such programs, and it is further recognized that colleges and universities having accredited colleges of veterinary medicine and State agricultural experiment stations which conduct animal health and disease research are especially vital in training research workers in animal health."

ELIGIBLE INSTITUTIONS FOR ANIMAL HEALTH AND DISEASE RESEARCH FUNDS

SEC. 1221. Section 1430 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1002; 7 U.S.C. 3192) is amended:

(a) By revising subsection (1) to read:

"(1) the term 'eligible institution' means an accredited college of veterinary medicine or a State agricultural experiment station which conducts animal health and disease research."

(b) By revising subsection (2) to read:

"(2) the term 'dean' means the dean of an accredited college of veterinary medicine."

ANIMAL HEALTH SCIENCE RESEARCH ADVISORY BOARD

SEC. 1222. Section 1432 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1002; 7 U.S.C. 3194) is amended in subsection (a) by striking out "five" and inserting in lieu thereof "ten".

CONTINUING ANIMAL HEALTH AND DISEASE RESEARCH

SEC. 1223. Section 1433 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1003; 7 U.S.C. 3195) is amended:

(a) In subsection (a) by deleting the comma after the word "funds" and striking out "not to exceed $25,000,000 annually,"; and

(b) By adding at the end thereof a new subsection to read as follows:

"(g) Funds distributed under this section shall not be used for payment of indirect costs of research or for tuition remission. Compensation for personal services under payroll distribution shall require annual review and certification by the dean or director or their designees that charges made against Federal funds for each employee are consistent with each employee's annual workload. No additional certification of charges made for personal services shall be required.".

APPROPRIATIONS FOR RESEARCH ON NATIONAL OR REGIONAL PROBLEMS

SEC. 1224. Section 1434 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1004; 7 U.S.C. 3196) is amended:

(a) In subsection (a) by deleting the comma after the word "funds" and striking out "not to exceed $15,000,000 annually,"; and

(b) By adding at the end thereof the following new subsections:

"(c) In order to establish a rational allocation of funds appropriated under this section, the Secretary shall establish annually priority lists of animal health and disease problems of national or regional significance. Such lists shall be prepared after consultation with the Joint Council, the Advisory Board, and the Board. Any recommendations made in connection with such consultation shall not be controlling on the Secretary's determination of priorities. In establishing such priorities, the Secretary, the Joint Council, the Advisory Board, and the Board shall consider the following factors:

"(1) any health or disease problem which causes or may cause significant economic losses to any part of the livestock production industry;

"(2) whether current scientific knowledge necessary to prevent, cure, or abate such a health or disease problem is adequate; and

"(3) whether the status of scientific research is such that accomplishments may be anticipated through the application of scientific effort to such health or disease problem.

"(d) Without regard to any consultation under subsection (c), the Secretary shall, to the extent feasible, award grants to eligible institutions on the basis of the priorities assigned through a peer review system. Grantees shall be selected on a competitive basis in accordance with such procedures as the Secretary may establish.

"(e) In the case of multi-year grants, the Secretary shall distribute funds to grant recipients on a schedule which is reasonably related to the timetable required for the orderly conduct of the research project involved.".

TECHNICAL AMENDMENT—EXTENSION AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1225. Section 144 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1007; 7 U.S.C. 3221) is amended:

(a) In subsection (b)(2)(B) by inserting

"current at the time each such additional sum is first appropriated" after "the last preceding decennial census" both times it appears; and

(b) In subsection (c) by striking "administrative head for extension" and inserting in lieu thereof "extension administrator", and by inserting "and each five years thereafter" before the period.

TECHNICAL AMENDMENT—AGRICULTURAL RESEARCH AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1226. Section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1009, as amended; 7 U.S.C. 3222) is amended:

(a) In subsection (b)(1) by adding at the end thereof a new sentence to read as follows: "These administrative funds may be used for transportation of scientists who are not officers or employees of the United States to research meetings convened for the purpose of assessing research opportunities or research planning.";

(b) In subsection (b)(2)(B) by inserting "current at the time each such additional sum is first appropriated" after "the last preceding decennial census" both time is appears; and

(c) In subsections (c) and (d) by striking out the words "chief administrative officer" each time they appear and inserting in lieu thereof "research director".

REPEAL OF MISCELLANEOUS AUTHORITIES RELATING TO SOLAR ENERGY RESEARCH AND DEVELOPMENT

SEC. 1227. Sections 1449 through 1457 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1012–1015; 7 U.S.C. 3241, 3251, 3252, 3261–3263, 3271, 3281, 3282) are hereby repealed.

INTERNATIONAL AGRICULTURAL RESEARCH AND EXTENSION

SEC. 1228. Section 1458 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1015; 7 U.S.C. 3291) is amended:

(a) In subsection (3) by striking the words "work with developed countries on agricultural" and inserting in lieu thereof the words "work with developed and transitional countries on food, agricultural and related";

(b) In subsection (4) by striking the word "and" at the end thereof;

(c) In subsection (5) by deleting the period and inserting in lieu thereof a semicolon and the word "and"; and

(d) By adding a new subsection to read as follows:

"(6) Provide specialized or technical services on an advance of funds or a reimbursable basis to United States colleges and universities carrying out international food, agricultural and related research and development projects and activities. All funds received in payment for furnishing specialized or technical services authorized under this subsection shall be deposited to the credit of the appropriation from which the cost of providing such services has been paid or is to be charged."

STUDIES

SEC. 1229. Subtitle J of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1016–1017; 7 U.S.C. 3301–3304) is hereby repealed.

AUTHORIZATION OF APPROPRIATIONS FOR AGRICULTURAL RESEARCH PROGRAMS

SEC. 1230. Section 1463 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1017; 7 U.S.C. 3311) is amended:

(a) By revising subsection (a) to read as follows:

"(a) Notwithstanding any authorization for appropriations for agricultural research in any Act enacted prior to the date of enactment of this title, there are hereby authorized to be appropriated annually for the purposes of carrying out the provisions of this title, except sections 1413, 1416, 1417, 1433, 1434, 1441, 1445, and 1471 of this title, the competitive grants program provided for in section 2 of the Act of August 4, 1965 (79 Stat. 431, as amended), and the cooperative research programs provided for under the Act of March 2, 1887 (24 Stat. 440–442, as amended), such sums annually as Congress may determine necessary."

(b) In subsection (b) by striking out all after "the Act of March 2, 1887 (24 Stat. 440–442, as amended; 7 U.S.C. 361a–361l)," and inserting in lieu thereof the following: "such sums annually as Congress may determine necessary.".

(c) By adding at the end thereof a new subsection to read as follows:

"(c) Notwithstanding any authorization for appropriations for agricultural research in any Act enacted before the effective date of this subsection, not less than 25 per centum of the total funds appropriated to the Secretary in any fiscal year for the conduct of the cooperative research program provided for under the Act of March 2, 1887 (24 Stat. 440–442, as amended); the cooperative forestry research program provided for under the Act of October 10, 1962 (76 Stat. 806); the special and competitive grants program provided for in sections 2(b) and 2(c) of the Act of August 4, 1965 (79 Stat. 431, as amended); the animal health research program provided for under sections 1433 and 1434 of this title; the native latex research program provided for in the Native Latex Commercialization and Economic Development Act of 1978; and the research provided for under various statutes for which funds are appropriated under the Agricultural Research heading or a successor heading, shall be appropriated for agricultural research at State agricultural experiment stations pursuant to the provision of the Act of March 2, 1887 (24 Stat. 440–442, as amended).".

AUTHORIZATION OF APPROPRIATIONS FOR EXTENSION PROGRAMS

SEC. 1231. Section 1464 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1018; 7 U.S.C. 3312) is amended to read as follows:

"SEC. 1464. Notwithstanding any authorization for appropriations for the Cooperative Extension Service in any Act enacted prior to the date of enactment of this title, there are hereby authorized annually to be appropriated such sums as Congress may determine necessary for carrying out the extension programs of the Department of Agriculture.".

MISCELLANEOUS PROVISIONS

SEC. 1232. The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 981–1019, as amended) is amended by adding at the end thereof the following new sections:

"PROGRAM EVALUATION STUDIES

"SEC. 1471. (a) The Secretary shall regularly conduct program evaluations to meet the purposes of this title and the responsibilities assigned to the Secretary and the Department of Agricultural in this title. The Secretary may undertake such program evaluation studies by way of making contracts and cooperative agreements with or grants to public or private organizations or agencies. These studies should help to improve the administration and effectiveness of agricultural research, extension, and teaching programs in achieving their stated objectives. They should include the measurement and analysis of the economic, environmental, social, and other relevant impacts of those programs.

"(b) The Secretary is authorized to encourage and foster the regular evaluation of agricultural research, extension, and teaching programs within the State agricultural experiment stations, cooperative extension services, and colleges and universities, through the development and support of cooperative evaluation programs and program evaluation centers and institutes.

"(c) The Secretary shall make a report to the Congress not later than February 1 of each year on the program evaluation studies and activities conducted in the preceding fiscal year.

"(d) There are hereby authorized to be appropriated annually such funds as are necessary to carry out the provisions of this section."

"GENERAL AUTHORITY TO AWARD CONTRACTS, GRANTS AND COOPERATIVE AGREEMENTS

"SEC. 1472. (a) The purpose of this section is to confer upon the Secretary of Agriculture general authority to award contracts, grants or cooperative agreements to further the research, extension or teaching programs in the food and agricultural sciences of the Department of Agriculture. This authority supplements all other laws relating to the Department of Agriculture and is not to be construed as limiting or repealing any existing authorities.

"(b) The Secretary of Agriculture is authorized to make contracts, grants, or cooperative agreements, for periods not to exceed five years, to State agricultural experiment stations, State cooperative extension services, all colleges and universities, other research or education institutions and organizations, Federal and private agencies and organizations and individuals, and any other contractor or recipient either foreign or domestic, to further the research, extension or teaching programs in the food and agricultural sciences of the Department of Agriculture.

"(c) The Secretary of Agriculture may vest title to expendable and nonexpendable equipment and supplies and other tangible personal property in the contractor or recipient when the contractor or recipient purchases such equipment, supplies, and property with contract, grant, or cooperative agreement funds and the Secretary deems such vesting of title a furtherance of the agricultural research, extension or teaching objectives of the Department of Agriculture.

"(d) The Secretary of Agriculture may enter into contracts, grants, or cooperative agreements, as authorized by this section, without regard to any requirements for competition, the provisions of section 5 of Title 41, and the provisions of section 529 of Title 31."

"LIMITATION ON USE OF FUNDS

"SEC. 1473. Funds appropriated for carrying out the purposes of sections 1433, 1434, 1444 and 1445 of this title and funds appropriated for carrying out the purposes of the Act of March 2, 1887 (24 Stat. 440–442, as amended), the Act of May 8, 1914 (38 Stat. 373, as amended), and the Act of October 10, 1962 (76 Stat. 806–807, as amended) shall not be available for the payment of indirect costs or tuition remission."

FORESTRY RESEARCH

SEC. 1233. Section 5 of the Act of October 10, 1962 (76 Stat. 807; 16 U.S.C. 582a–4) is amended by adding at the end thereof a new sentence to read as follows: "Funds available to the Secretary for the administration of this program may be used for transportation of scientists who are not officers or employees of the United States to research meetings convened for the purposes of assessing research opportunities or research planning."

EXCESS FEDERAL PROPERTY

SEC. 1234. Section 202(d)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483) is amended by—

(1) striking out the word "or" at the end of subparagraph (C);

(2) striking out the period at the end of subparagraph (D) and inserting in lieu thereof a semicolon and the word "or"; and

(3) adding the following new subparagraph immediately after subparagraph (D):

"(E) property furnished by the Secretary of Agriculture to any State or county extension service engaged in cooperative agricultural extension work pursuant to the Act of May 8, 1914 (38 Stat. 372, as amended); any State experiment station engaged in cooperative agricultural research work pursuant to the Act of March 2, 1887 (24 Stat. 440, as amended), and any institution engaged in cooperative agricultural research and extension work pursuant to sections 1444 and 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (91 Stat. 1007, 1009), where title is retained in the United States.".

TITLE XIII—AGRICULTURAL MARKETING AGREEMENT ACT OF 1937

SEASONAL INCENTIVE PLANS IN FEDERAL MILK MARKETING ORDERS

SEC. 1301. Effective on January 1, 1982. section 8c(5)(B) of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, 7 U.S.C. 608c(5)(B), is further amended by striking all that follows the comma at the end of the clause (c) and inserting in lieu thereof the following: "(d) a further adjustment to encourage seasonal adjustments in the production of milk through equitable apportionment of the total value of the milk purchased by any handler, or by all handlers, among producers on the basis of their marketings of milk during a representative period of time, and (e) a provision for the accumulation and disbursement of a fund to encourage seasonal adjustments in the production of milk may be included in an order.".

TITLE XIV—DEPARTMENT OF AGRICULTURE ADVISORY COMMITTEES REPEAL

SEC. 1401. Title XVIII of the Food and Agriculture Act of 1977 (91 Stat. 1041–1044 as amended; 7 U.S.C. 2281–2289) is hereby repealed.

SECTION-BY-SECTION ANALYSIS

SHORT TITLE

The first section provides that this bill may be cited as the "Agricultural Act of 1981".

TITLE I—DAIRY AND SOYBEAN PROGRAMS

Milk Price Support:

Section 101 requires that the price of milk be supported at a level not less than 70 percent nor more than 90 percent of its parity price as the Secretary deems necessary to assure an adequate supply of milk to meet current needs, reflect changes in the cost of production, and assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs. The Secretary is authorized to support the price of milk at less than 70 percent of parity if it is determined that the Commodity Credit Corporation is accumulating, or has accumulated, excessive quantities of milk or milk products. However, the support price for milk on October 1, 1981, shall not be less than $13.10 per hundredweight. Price support would continue to be provided through purchases of milk and the products of milk.

Soybean Price Support:

Section 101 also extends price support for soybeans through the 1985 crop. The 1982 through 1985 crops of soybeans are required to be supported through loans and purchases at such levels as the Secretary determines appropriate in relation to competing commodities, taking into consideration domestic and foreign supply and demand factors.

Transfer of Dairy Products to the Military and Veterans Hospitals:

Section 102 extends for four years (1982–1985) the authority contained in section 202 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446a), which provides for making dairy products available to veterans hospitals and to the military to increase the utilization of such products.

TITLE II—WHEAT

Loan and Purchase Rates:

Section 201 amends section 107A of the Agricultural Act of 1949. The new section 107A provides that the Secretary shall make available for the 1982 through 1985 crops of wheat, loans and purchases at such level as the Secretary determines to be appropriate taking into consideration costs of production, supply and demand conditions, and world market prices for wheat.

Land Diversion Program:

Section 201 amends section 107A of the 1949 Act to authorize the Secretary to conduct a land diversion program. If such a program is implemented, the Secretary is authorized to make payments to producers who devote an acreage of cropland to conservation uses as determined by the Secretary in accordance with land diversion contracts taking into consideration the extent and the productivity of the acreage to be diverted. The Secretary is also authorized to require producers to participate in the program in order to be eligible for loans and purchases. The amounts payable under the contracts may be determined as the Secretary deems appropriate, which may be a bid procedure. Under a land diversion program, the Secretary shall limit the acreage to be diverted so as to not adversely affect the economy of a county or local community. The diverted acreage could be devoted to wildlife food plots or wildlife habitat.

Farm Program Payment Yield:

Section 201 amends section 107A of the 1949 Act to provide for a farm program payment yield when a land diversion program is in effect. The farm program payment yield shall be the last yield which had been previously established for the farm. If no payment yield has been previously established for the farm, the Secretary is authorized to determine such yield as the Secretary determines to be fair and equitable. In determining such yields, the Secretary shall take into consideration actual yields proved by the producer and such yields cannot be reduced in the determination of the farm program payment yields.

The Secretary can establish national, State, or county program payment yields based upon historical yields. Should the Secretary take this action, the farm program payment yields shall balance to the national, State or county payment yields.

Participation and Compliance:

Section 201 amends section 107A of the 1949 Act to provide that a farm operator desiring to participate in a diversion program shall execute a contract with the Secretary by a date and under terms prescribed by the Secretary. The contract may be modified or terminated by mutual agreement of the Secretary determines the action to be necessary because of drought or disaster conditions.

If a producer fails to comply fully with the conditions of the program and is precluded from receiving loans, purchases, and payments, the Secretary is nevertheless authorized to make such loans, purchases, and payments in such sums as the Secretary determines to be equitable in relation to the seriousness of the failure.

Regulations and Miscellaneous:

The Secretary may issue such regulations as deemed necessary to carry out the provisions of section 107A of the 1949 Act. The program shall be carried out through the Commodity Credit Corporation and the provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act relating to assignment of payments shall be applicable to the program.

Nonapplicability of Existing Law:

Section 202 provides that the processor and export certificate requirements as authorized by the Agricultural Adjustment Act of 1938 shall not be applicable to wheat through May 31, 1986; section 203 suspends marketing quotas and producer certificate provisions of the 1938 Act for the 1982 through 1985 crops of wheat; section 204 suspends the farm marketing quota provisions of P.L. 74, 77th Congress (55 Stat. 203, as amended) for the crops of wheat planted for harvest in the calendar years 1982 through 1985; and section 205 of the Agricultural Act of 1949 with respect to price supports shall not apply to the 1982 through 1985 crops of wheat.

TITLE III—FEED GRAINS

Loan and Purchase Rates:

Section 301 amends 105A of the Agricultural Adjustment Act of 1949. The new section 105A provides that the Secretary shall make available for the 1982 through 1985 crops of corn, loans and purchases at such level as the Secretary determines to be appropriate taking into consideration costs of production, supply and demand conditions, and world market prices for corn.

The Secretary shall also make available for the 1982 through 1985 crops of grain sorghums, barley, oats, and rye, loans and purchases as the Secretary determines to be fair and reasonable in relation to the level at which the loans and purchases are made available for corn taking into consideration the feeding value of the commodities in relation to corn and other factors set forth in section 401(b) of the 1949 Act.

Land Diversion Program:

Section 105A of the 1949 Act as amended by section 301 also authorizes the Secretary to conduct a land diversion program. If such a program is implemented, the Secretary is authorized to make payments to producers who devote an acreage of cropland to conservation uses as determined by the Secretary in accordance with land diversion contracts taking into consideration the extent and productivity of the acreage to be diverted. The Secretary is also authorized to require producers to participate in the program in order to be eligible for loans and purchases. The amounts payable under the contracts may be determined as the Secretary deems appropriate, which may be a bid procedure. Under a land diversion program, the Secretary shall limit the acreage to be diverted so as not to adversely affect the economy of a county or local community. The diverted acreage could be devoted to wildlife food plots or wildlife habitat.

Farm Program Payment Yield:

Section 201 amends section 105A of the 1949 Act to provide for a farm program payment yield when a land diversion program is in effect. The farm program payment yield shall be the last yield which had been previously established for the farm. If no payment yield has been previously established for the farm, the Secretary is authorized to determine such yield as the Secretary determines to be fair and equitable. In determining such yields, the Secretary shall take into consideration actual yields proved by the producer and such yields cannot be reduced in the determination of the farm program payment yields.

The Secretary can establish national, State or county program payment yields based upon historical yields. Should the Secretary take this action, the farm program payment yields shall balance to the national, State or county payment yields.

Participation and Compliance:

Section 201 amends section 105A of the 1949 Act to provide that a farm operator

desiring to participate in a diversion program shall execute a contract with the Secretary by a date and under terms prescribed by the Secretary. The contract may be modified or terminated by mutual agreement if the Secretary determines the action to be necessary because of drought or disaster conditions.

If the producer fails to comply fully with the conditions of the program and is precluded from receiving loans, purchases, or payments, the Secretary is nevertheless authorized to make such loans, purchases, and payments in such sums as the Secretary determines to be equitable in relation to the seriousness of the failure.

Regulations and Miscellaneous:

The Secretary may issue such regulations as deemed necessary to carry out the provisions of section 105A of the 1949 Act. The program shall be carried out through the Commodity Credit Corporation and the provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act relating to assignment of payments shall be applicable to the program.

Nonapplicability of Existing Law:

Section 302 provides that section 105 of the Agricultural Adjustment Act of 1949 with respect to price supports shall not apply to the 1982 through 1985 crops of feed grains.

TITLE IV—UPLAND COTTON

Suspension of Marketing Quotas:

Section 401 suspends for four years—the 1982 through 1985 crops of upland cotton—the cotton marketing quota and acreage allotment provisions contained in sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342 et seq.).

Loan Rates:

Section 402 amends section 103(f)(1) of the Agricultural Act of 1949 to provide that the Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than 60 days, make available for the 1982 through 1983 crops of upland cotton to cooperators ten-month nonrecourse loans at a level which will reflect for Strict Low Middling one and one-sixteenth inch upland cotton at average location in the United States, the smaller of (1) 85 percent of the average price of such quality of cotton as quoted in designated United States spot markets during the three years of the five-year period ending July 31 in the year in which the loan level is announced excluding the years in which the average price was the highest and lowest in such period, or (2) 90 percent of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths of the growths quoted for Strict Middling one and one-sixteenth inch cotton C.I.F. Northern Europe (adjusted downward by the average difference between April 15 and October 15 of the year in which the loan is announced between such average Northern Europe price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one and one-sixteenth inch cotton.

The loan level would be announced not later than November 1 of the calendar year preceding the marketing year for which the loan is to be effective, and such level shall not thereafter be changed. Such nonrecourse loans would, upon request of the cooperator, be made available for an additional eight months. Such request would not be approved if the average price in the designated spot markets for the preceding month exceeded 130 percent of the average price for the preceding thirty-six months. When the average price exceeds 130 percent for a month, the President would be required to immediately establish and proclaim a special conditional limited global import quota for upland cotton.

Section 103(f)(2) is amended by section 402 to provide that a special quota period shall not be established that overlaps an existing special quota.

Land Diversion Program:

Section 402 amends section 103(f)(3) of the 1949 Act to authorize the Secretary to make land diversion payments to producers of upland cotton if the Secretary determines that such payments are necessary to assist in adjusting the total acreage of upland cotton. If a land diversion program is in effect, the Secretary is also authorized to require producers to participate in order to be eligible for loans. Such land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved in accordance with land diversion contracts. The amounts payable under such contracts could be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe, or through other means. In determining the acceptability of such contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to adversely affect the economy of a county or local community.

Farm Program Payment Yield:

Section 103(f)(3) is amended by section 402 to provide for a farm program payment yield when a land diversion program is in effect. The farm program payment yield shall be the last yield previously established for the farm. If no payment yield has been previously established for the farm, the Secretary is authorized to determine such yield as the Secretary determines to be fair and equitable. In the determination of such yields, the Secretary shall take into account the actual yields proved by the producer and such yields cannot be reduced in the determination of the farm program payment yields. If determined necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields and the farm program payment yields shall balance to these yields if established.

Section 103(f)(3) authorizes that diverted acreage may be devoted to wildlife food plots or wildlife habitat.

Participation and Compliance:

Section 402 amends section 103(f)(3) of the 1949 Act to provide that a farm operator shall execute an agreement providing for the operator's participation in the program. The Secretary may terminate or modify any agreement if determined to be necessary because of an emergency created by drought or other disaster or to alleviate a shortage in supply of agricultural commodities.

If a producer fails to comply fully with the terms and conditions of the program, the Secretary may nevertheless make loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

Regulations and Miscellaneous:

Section 103(f), as amended by section 402, authorizes the Secretary to issue such regulations as the Secretary deems necessary to carry out the program. The program shall be carried out through the Commodity Credit Corporation and the provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act relating to assignment of payments shall be applicable to the program.

Commodity Credit Corporation Sales Price Restrictions:

Section 403 amends section 407 of the Agricultural Act of 1949 relating to sales by the Commodity Credit Corporation of its stocks of cotton.

Under section 403, CCC could not sell any of its stocks of upland cotton at less than 115 percent of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton (with adjustments as provided under existing law).

Skiprow Practices:

Section 404 suspends through the 1985 crop of upland cotton section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374(a)) which provides that the rules governing skiprow patterns which were in effect for the 1971 through 1973 crops shall also apply to the 1982 through 1985 crops.

TITLE V—RICE

Loan and Purchase Rates:

Section 401 amends section 101(f) of the Agricultural Act of 1949 to provide that the Secretary shall make available to producers for the 1982 through 1985 crops of rice, loans and purchases at such level as the Secretary determines to be appropriate taking into consideration the cost of production, supply and demand conditions, and the world market prices for rice.

Land Diversion Program:

Section 101(f)(2) of the 1949 Act is amended by section 501 to authorize the Secretary to conduct a land diversion program. If a program is implemented, the Secretary is authorized to make payments to producers who devote an acreage of cropland to conservation uses as determined by the Secretary in accordance with land diversion contracts taking into consideration the extent and the productivity of the acreage to be diverted. The Secretary is also authorized to require producers to participate in the diversion program as a condition of eligibility for loans and purchases. The amounts payable under the contracts may be determined as the Secretary deems appropriate, which may be a bid procedure. The diverted acreage could be devoted to wildlife food plots and wildlife habitat.

Farm Program Payment Yield:

Section 501 amends section 101(f)(3) of the 1949 Act to provide for a farm program payment yield when a land diversion program is in effect. The farm program payment yield shall be the last yield which had been previously established for the farm. If a payment yield has not been previously established for the farm, the Secretary is authorized to establish such yield as the Secretary determines to be fair and equitable. In determining such yields, the Secretary shall take into consideration the actual yields proved by the producer and neither such yield nor the farm program payment yield based upon such yields shall be reduced.

The Secretary may also establish national, State or county program payment yields based on historical yields. The Secretary may adjust the historical yields to correct abnormal factors which have affected such yields. In addition, if data on historical yields are not available, the Secretary is authorized to estimate the yields for the crop year in question. If national, State, or county program yields are established, the farm program payment yields are to balance to such yields.

Participation and Compliance:

Section 501 amends section 101(f) of the 1949 Act to require that a farm operator desiring to participate in a diversion program shall execute an agreement with the Secretary by the date and under terms prescribed by the Secretary.

If a producer fails to fully comply with the terms and conditions of the rice program, the Secretary is nevertheless authorized to make such loans, purchases, and payments to producers as the Secretary determines to be

equitable in relation to the seriousness of the failures.

Regulations and Miscellaneous:

The Secretary is authorized to issue such regulations as the Secretary determines to be necessary to carry out the program authorized by section 101(f) of the 1949 Act. The program shall be carried out through the Commodity Credit Corporation and the provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act relating to assignment of payments shall be applicable to the program.

Suspension of Marketing Quotas and Other Provisions:

Section 502 suspends for 1982 through 1985 crops of rice certain provisions of the Agricultural Adjustment Act of 1938.

TITLE VI—PEANUTS

Suspension of Marketing Quotas and Acreage Allotments:

Section 601 suspends, effective for the 1982 through 1985 crops of peanuts, certain provisions of sections 358, 358a, and 359 of the Agricultural Adjustment Act of 1938. This section suspends the permanent legislation relating to acreage allotments, marketing quotas, and marketing quota penalties.

National and Farm Poundage Quotas:

Section 602 establishes, effective for the 1982 through 1985 crops of peanuts, a national poundage quota for each marketing year. The national poundage quota is set at 1,290,000 tons for 1982 and is reduced by 10 percent for each subsequent year.

The national poundage quota is converted to a farm poundage quota by apportioning the national poundage quota to individual farms, based on each farm's farm base production poundage for the 1981 marketing year. Farms without a farm base production poundage for 1981 will receive no farm poundage quota.

This section also defines "quota peanuts" as peanuts which are marketed from a farm for domestic edible use and which do not exceed the farm poundage quota for such farm. "Additional peanuts" are defined as peanuts which are: (1) marketed from a farm and which are in excess of the marketings of quota peanuts from such farms; or (2) marketed from a farm without a farm poundage quota.

Sale, Lease, or Transfer of Farm Base Production Poundage:

Section 603 provides that the farm base production poundage may be sold, leased, or transferred to another farm within state lines.

Marketing penalties:

In general, section 604 establishes the manner in which quota peanuts and additional peanuts may be marketed. This section also prescribes the marketing penalties which are to be assessed for marketing violations.

Quota peanuts are eligible for domestic edible use or for use as seed. With one exception, additional peanuts may only be marketed for crushing or for export. Handlers may contract with a producer for the delivery of additional peanuts up until the time of delivery. Additional peanuts which are not covered by such contract must be placed in the additional loan pool operated by designated producer associations.

A handler may purchase additional peanuts from the additional loan pool for domestic edible use. This purchase may be executed in either of two ways. First, the handler may, at any time prior to delivery, contract with the producer to purchase such producer's additional peanuts from the additional loan pool for domestic edible use upon delivery of the peanuts to the handler by the producer. Under such contracts, the producer will receive the amount of the price support advance from the additional loan pool. The handler will remit to the Commodity Credit Corporation for inclusion in the additional loan pool proceeds 100 percent of the loan value of an equivalent amount of quota peanuts, plus an amount to cover all costs incurred with respect to such peanuts for items such as inspection, warehousing, shrinkage, and other expenses. The difference between the contract price and the amount remitted to the Commodity Credit Corporation shall be paid directly to the producer by the handler.

The second method of purchasing additional peanuts from the additional loan pool is to purchase such peanuts directly from the Commodity Credit Corporation or a designated producer association. Such sales may not be made at less than the price required to cover costs plus: (1) 105 percent of the loan value of quota peanuts if the sale occurs before December 31; or (2) 107 percent of the loan value of quota peanuts if the sale occurs after December 31 of the marketing year.

This section also provides that the Secretary may prescribe, by regulation, the manner in which peanuts which are unsuitable for human consumption may be marketed. Penalties may be assessed for any violations of such regulations.

The Secretary is also authorized to establish procedures by which the liability for and amount of penalties assessed under this section may be determined.

Reports and Records:

Section 605 amends section 373(A) of the Agricultural Adjustment Act of 1938 to authorize the Secretary to require producers of peanuts to make such reports and keep such records as the Secretary determines are necessary and appropriate.

Price Support Program:

Section 606 adds a new section 108A to title I of the Agricultural Act of 1949. Section 108A provides, effective for the 1982 through 1985 crops of peanuts, that price support shall be made available with respect to quota peanuts and additional peanuts. The level of support for quota peanuts shall not be less than $420 per ton, and may be adjusted upward by the Secretary on the basis of a consideration of certain enumerated factors. The support level for additional peanuts is to be determined by the Secretary, taking into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets.

The Secretary is further authorized to make warehouse storage loans to designated producer associations. Such associations may be required to establish pools by type for quota and additional peanuts. The section also provides for the manner in which net gains derived from such pools may be distributed to growers participating in those pools.

Inapplicability of Provisions of the Agricultural Act of 1949:

Section 607 suspends the applicability of permanent price support legislation for peanuts, effective for the 1982 through 1985 crops of peanuts.

TITLE VII—GRAIN RESERVE

Producer Storage Program:

Section 701 amends section 110 of the Agricultural Act of 1949. The Secretary of Agriculture is authorized to formulate and administer a program under which wheat and feed grain producers can store wheat and feed grains and extend the time period for their orderly marketing when such commodities are in abundant supply. The Secretary is required to establish safeguards to assure that wheat and feed grains held under the program will not be used to unduly depress, manipulate, or curtail the free market. The authority contained in section 110 supplements other authorities available to the Secretary for carrying out producer loan and storage operations.

The Secretary is authorized to provide original or extended price support loans to producers of wheat and feed grains under terms and conditions designed to achieve the program objectives. Such loans must be made at the same level of support as provided by this Act or such higher level as the Secretary may deem appropriate. The terms and conditions of the program may include, in addition to those the Secretary may prescribe by regulation; (1) repayment of such loans in not less than three nor more than five years; (2) storage payments to producers in such amounts and under such conditions as the Secretary determines appropriate to encourage producers to participate in the program; (3) an interest rate as set forth below; (4) recovery of storage payments, and for payment of additional interest or other charges in the event that producers repay such loans before the market price for wheat or feed grains reaches a level(s) determined by the Secretary in clause (5); and (5) conditions designed to induce producers to redeem and market the wheat and feed grains securing such loans regardless of their maturity dates, whenever the Secretary determines that the market price for the commodity has attained a specified level, as determined by the Secretary.

Participants in the program are to be charged an interest rate not less than the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Secretary may waive or adjust such interest as the Secretary deems appropriate. The Secretary may increase the applicable interest rate in such amounts and at such times as the Secretary determines appropriate to encourage the orderly marketing of a commodity securing loans made under this section after the market price for the commodity reaches the level determined under clause (5), as explained.

The Secretary may require producers to repay such loans prior to their maturity dates if the Secretary determines emergency conditions exist which require that the commodity be made available in the market to meet urgent domestic or international needs.

The Secretary is required to announce the program terms and conditions as far in advance of making loans as is practicable. The Secretary must specify the quantity of wheat or feed grains which will be covered under the program, as the Secretary determines appropriate to promote their orderly marketing.

Whenever the loan program authorized by this section is in effect, the Commodity Credit Corporation may not sell any of its stocks of wheat or feed grains at less than 110 percent of the then current price level at which the Secretary may encourage repayment of producer storage loans prior to the maturity dates of the loans, as determined under clause (5). Such restriction shall not apply to: (1) sales of commodities which have substantially deteriorated in quality or as to which there is a danger of loss or waste through deterioration or spoilage; and (2) sales or other disposals of such commodities under the Act of September 21, 1959.

The Secretary may, with the concurrence of the owner of grain stored under the program, reconcentrate grain commercially warehoused at such points as the Secretary deems to be in the public interest, accounting for factors such as transportation and normal marketing patterns. The Secretary shall permit rotation of stocks under regulations which assure that the producer or warehouseman shall always have available for delivery at the designated place of storage both the quantity and quality of grain covered by his commitment.

Whenever grain is stored under this sec-

tion, the Secretary may buy and sell substantially equivalent quantities of grain to the extent needed to properly handle, rotate, distribute, and locate commodities owned or controlled by the Commodity Credit Corporation. Purchases to offset sales must be made within two market days after the sales. The Secretary is required to make a daily list available showing the price, location, and quantity of such transactions.

The Secretary is authorized to use the Commodity Credit Corporation to fulfill the purposes of the producer storage program and shall utilize the usual and customary channels, facilities, and arrangements of trade and commerce to the maximum extent practicable.

International Emergency Food Reserve:

Section 702 repeals section 111 of the Agricultural Act of 1949 which encouraged the President to enter into negotiations to develop an international system of food reserves and to establish and maintain such reserves.

Disaster Reserve:

Section 703 repeals section 813 of the Agricultural Act of 1970 which provides that the Secretary of Agriculture shall establish a disaster reserve of not to exceed 75 million bushels of wheat, feed grains, and soybeans in order to alleviate distress as the result of a natural disaster. The commodities to be designated for the disaster reserve are to be acquired through the price support program or through purchase.

Farm Storage Facility Loans:

Section 704 amends section 4(h) of the Commodity Credit Corporation Charter Act to provide discretionary authority for the Secretary to make farm storage facility loans.

TITLE VIII—WOOL AND MOHAIR

Price Support:

Section 801 amends section 703 of the National Wool Act of 1954. Section 703(a) presently provides that the Secretary of Agriculture shall, through the Commodity Credit Corporation, support the prices of wool and mohair to producers by means of loans, purchases, payments, or other operations, with respect to such commodities marketed during the period ending December 31, 1981. Section 801 amends this provision to make it effective for wool and mohair marketed during the period ending December 31, 1985. Section 801 further amends subsection 703(b) by providing that the support price for shorn wool for the marketing years January 1, 1982, through December 31, 1985, shall be not more than 90 percent nor less than 60 percent of the amount calculated in accordance with the formula prescribed by subsection (b). However, the Secretary may establish a support price at less than 60 percent if the Secretary determines that a lower level is appropriate as a result of exceptional circumstances affecting the cost or availability of shorn wool.

Payments:

Section 802 amends section 704 of the National Wool Act by deleting from the first sentence the provision that the total of all price support payments made under the Act shall not exceed an amount equal to a percentage of the accumulated totals of gross receipts from duties collected on or after January 1, 1953, on all articles subject to duty under Schedule 11 of the Tariff Act of 1930, as amended.

Reimbursement:

Section 803 repeals section 705 of the National Wool Act which appropriates, for reimbursement of the Commodity Credit Corporation for any expenditures made in connection with payments to producers under the Act, amounts each fiscal year which may not exceed 70 percent of the gross receipts from duties collected during the preceding calendar year on all articles subject to duty under Schedule 11 of the Tariff Act of 1930, as amended.

TITLE IX—GENERAL AND MISCELLANEOUS PROVISIONS

Finality of Determinations:

Section 901 amends the first sentence of section 385 of the Agricultural Adjustment Act of 1938 to provide for a finality provision with respect to the facts constituting the basis for any Soil Conservation Act payment any payment under the wheat, feed grain, upland, and rice program authorized by the Agricultural Act of 1949 or the 1938 Act, or any loan, or price support operation.

Commodity Credit Corporation Sales Price Restrictions for Wheat and Feed Grains:

Section 902 amends section 407 of the Agricultural Act of 1949 by providing that effective only with respect to the marketing years for the 1982 through 1985 crops, the Commodity Credit Corporation shall not sell any of its stocks of wheat, corn, grain sorghums, barley, oats, and rye at less than 115 percent of the current national average loan rate.

Application of Terms in the Agricultural Act of 1949:

Section 903 amends section 408(k) of the Agricultural Act of 1949 to make certain terms in sections 402, 403, 406, and 416 of the Agricultural Act of 1949 applicable to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under that Act. Also, certain other terms in those sections and section 401(a) of the 1949 Act are made applicable to the loan and purchase operations for wheat, feed grains, upland cotton and rice under that Act.

Emergency Feed Program:

Section 904 would repeal section 1105 of the Food and Agriculture Act of 1977 which provides authority for the Secretary of Agriculture to provide assistance to livestock owners in the preservation and maintenance of livestock in any area when the Secretary determines an emergency exists as the result of a natural disaster. Under the program, livestock owners who (1) suffer a substantial loss of livestock feed, (2) have insufficient feed available for their livestock, and (3) necessarily purchase feed in larger quantities than normal, may be reimbursed for such purchases at a rate not in excess of 50 percent of the cost of the feed purchased.

TITLE X—PUBLIC LAW 480

Miscellaneous Amendments:

Section 1001 amends section 101 of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480) by deleting the reference to sales for foreign currencies which have not been authorized since 1971, and includes, in lieu thereof, reference to sales for foreign currencies on credit terms and on terms which permit conversion to dollars which presently appears in section 103(b) of Public Law 480. This amendment is merely intended to update the law and consolidate provisions rather than to make any substantive changes.

Section 1002 amends section 103(b) of Public Law 480 to update and clarify that section. The reference to authority to enter into convertible local currency credit sales presently appearing in section 103(b) is now included in section 101 (see section 1001 of this Act). The reference to the maximum credit terms for such sales presently included in section 103(b) is now included in section 106 (see section 1006 of this Act). The reference to section 104(c) relating to currency use payments is deleted since that section has been repealed.

Section 1003 amends section 103(d) of Public Law 480 by deleting the prohibition therein to sales for foreign currencies to any country or area dominated by a Communist Government. This specific prohibition is no longer required since sales for foreign currencies have not been authorized since 1971 to any country.

Section 1004 amends section 103(l) of Public Law 480 by deleting the provision that commitments be obtained from purchasing countries to the effect that commodities provided under sales for foreign currencies be specifically marked or identified as being supplied on a concessional basis. This provision is no longer required since sales for foreign currencies have not been authorized since 1971. However, the Committee understands that, as a matter of policy, in negotiating title I agreements on credit terms, similar commitments have been obtained from purchasing countries and expects this policy to be continued insofar as practicable.

Section 1005 amends section 104 of Public Law 480. Paragraph (1) updates the introductory portion of section 104 by making it clear that new sales for foreign currencies have not been authorized since 1971. Paragraph (2) increases the dollar equivalent limit in section 104(d) on the use of foreign currencies for emergency or extraordinary non-food relief requirements from $5 to $10 million. This change will permit the use of a greater amount of foreign currency, rather than dollars, to purchase items such as tents, bedding, tools, etc., for needy displaced populations overseas. Paragraph (3) deletes from clause (3) of the proviso following section 104(k) the reference to section 104(c) since section 104(c) has been repealed in previous legislation.

Section 1006 amends section 106(a) of Public Law 480 by adding the reference to the maximum terms authorized for convertible local currency credit which presently appears in section 103(b). This change is intended to bring together in one section all references to credit terms presently appearing in different sections of Public Law 480.

Section 1007 repeals section 108 of Public Law 480. Section 108, which limits the authority of Commodity Credit Corporation to finance ocean freight charges, is now obsolete since it only applies to new sales for foreign currencies which have not been authorized since 1971.

Section 1008 repeals section 109(b) of Public Law 480. Section 109(b), which applied to the uses of foreign currencies received under sales for foreign currencies, is now obsolete.

TITLE XI—RURAL DEVELOPMENT AND CONSERVATION

Agricultural Land Resources:

Section 1101 provides that the Secretary of Agriculture is encouraged to cooperate with and provide technical assistance to States and localities in the development of programs stressing the importance of agricultural land and resources to the nation's economy. Section 1101 further provides that the Secretary is also encouraged to cooperate with state agencies in the preparation and dissemination of information which emphasizes the importance of agricultural land and resources to the national economy.

Soil and Water Conservation Policy:

Section 1102 provides that the Secretary of Agriculture shall submit a report to Congress not later than December 31, 1981, setting forth recommendations as to how the various soil and water conservation programs administered by agencies within the Department can be strengthened and improved.

TITLE XII—RESEARCH, EXTENSION, AND TEACHING IN THE FOOD AND AGRICULTURAL SCIENCES

Revised Findings:

Section 1201 amends section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (hereinafter referred to as the 1977 Act) by revising the Congressional findings supporting the 1977 Act. The revisions emphasize the importance of the historical Federal-State partnership in the conduct of research, extension, and teaching in the food and agricultural sciences; and the need to strengthen the relationship through expanded planning and coordination efforts.

Amended Purposes:

Section 1202 amends section 1403 of the 1977 Act to clarify that among the purposes of the Act are the coordination and planning of extension and teaching activities as well as research in the food and agricultural sciences.

Amended Definitions:

Section 1203 broadens the definition of "food and agricultural sciences" contained in section 1404(8) of the 1977 Act by specifying that the term encompasses basic, applied and developmental research, extension and teaching in the food, agricultural, renewable natural resources, forestry and social sciences in the broadest sense of those terms. In addition, the definition of "States" is expanded to include American Samoa, the Northern Marianas, and the Trust Territory of the Pacific Islands.

Responsibilities of the Secretary of Agriculture:

Section 1204 amends section 1405 of the 1977 Act by making it the responsibility of the Secretary to report to concerned Congressional Committees (as a part of annual budget submissions) on the actions proposed to be taken as well as the actions taken to support the recommendations of the National Agricultural Research and Extension Users Advisory Board. Further, it requires the Secretary to coordinate all agricultural research, extension, and teaching activities with the periodic Renewable Resource Assessment and Program provided for in sections 3 and 4 of the Forest and Rangeland Resources Planning Act of 1974, as amended, and the appraisal and program provided for in sections 5 and 6 of the Soil and Water Resources Conservation Act of 1977.

Subcommittee on Food, Agricultural and Forestry Research:

Section 1205 amends section 401(h) of the National Science and Technology Policy, Organization, and Priorities Act of 1976, as amended, by changing the name of the Subcommittee on Food and Renewable Resources to the Subcommittee on Food, Agricultural, and Forestry Research. In addition, it changes the references to the Department of Health, Education, and Welfare and the Energy Research and Development Administration to the Department of Health and Human Services and the Department of Energy, respectively.

Joint Council on Food and Agricultural Sciences:

Section 1206 amends section 1407 of the 1977 Act, which provides for the establishment within the Department of Agriculture of a Joint Council on Food and Agricultural Research. The amendment lengthens the term of the Joint Council from five to ten years. Further, the amendment provides that the Joint Council shall be composed of at least 25 representatives of organizations or agencies which conduct or assist in conducting programs of research, extension, or teaching in the food and argicultural and forestry sciences, including appropriate Federal agencies. Members are to be appointed to staggered, three-year terms by the Secretary from nominations made by the organizations and agencies represented on the Joint Council. At least one-half of the members of the Joint Council must be appointed from among distinguished persons engaged in agricultural research, extension, and teaching programs at land-grant colleges and universities and State agricultural experiment stations to ensure that regional differences are properly considered. Also, to ensure that the views of other agricultural institutions are considered, two members must be appointed from among persons who are distinguished representatives of other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension and teaching. The Joint Council is to be jointly chaired by the senior policy official of the Department of Agriculture responsible for research, extension, and teaching and a person to be elected from the non-Federal membership of the Joint Council.

In addition, the amendment sets out the primary purpose of the Joint Council as that of bringing about more effective research, extension, and teaching in the food and agricultural sciences by improving planning and coordination of publicly and privately supported food and agricultural science activities and by relating Federal budget development and program management to these processes.

The amendment revises the responsibility of the Joint Council for assisting the Secretary in carrying out the Secretary's functions under the 1977 Act through planning and coordination of the food and agricultural sciences by providing that existing regional research, extension, and teaching organizations of State cooperative institutions be utilized wherever possible to provide planning and coordination.

Further, the amendment provides for the Joint Council to submit a report by June 30 of each year to the Secretary of Agriculture. The report is to (1) specify the Joint Council's recommendations on priorities for food and agricultural research, extension, and teaching programs; and (2) delineate suggested areas of responsibility among Federal, State, and private organizations in carrying out such programs.

Finally, the amendment exempts the Joint Council from the provisions of the Federal Advisory Committee Act and subchapter II of chapter 5 of title 5 of the United States Code; while providing that its meetings be publicly announced and open to the public, and requiring that appropriate records of the Joint Council's activities be kept and made available to the public on request.

National Agricultural Research and Extension Users Advisory Board:

Section 1207 amends section 1408 of the 1977 Act, which provides for the establishment within the Department of Agriculture of a National Agricultural Research and Extension Users Advisory Board. The amendment increases the term of the Advisory Board from five to ten years. Further, the amendment provides for increasing the membership of the Advisory Board from 21 to 25 members by including four additional producer members; and requires that the members be appointed to staggered terms.

In addition, the amendment changes the submission date for the Advisory Board's annual report to the Secretary from October 31 to July 1; and the submission date for its annual report to the President and Congressional Committees from March 1 to February 20.

Repeal of Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977:

Section 1208 repeals section 1409 of the 1977 Act.

Libraries and Information Network:

Section 1209 amends section 1411 of the 1977 Act to add to the existing declarations of Congressional policy a declaration that the Department of Agriculture establish mutually valuable working relationships with international and foreign information and data programs. Further, the amendment makes it the responsibility of the Food and Nutrition Information and Education Resources Center, established within the National Agricultural Library, to provide notification of its collections of food and nutrition education materials to the State cooperative extension services, State educational agencies and other interested persons.

Support for the Joint Council and Advisory Board:

Section 1210 amends section 1412 of the 1977 Act, which authorizes the Secretary to appoint up to five full-time professional staff employees to assist the Joint Council and the Advisory Board in the performance of their duties. The amendment provides for a staff consisting of a full-time executive secretary for the Joint Council, a full-time executive secretary for the Advisory Board, not more than two other professional staff, and a full-time executive director for such staff. The executive director is to receive compensation at a rate not less than the rate for GS–16 or more than the rate for GS–18; and is to perform such duties as the co-chairmen of the Joint Council and the Chairman of the Advisory Board may direct.

Authorization of Appropriations to Support the Joint Council and Advisory Board:

Section 1211 amends section 1413 of the 1977 Act to provide a specific authorization for appropriations to provide the support to the Joint Council and Advisory Board authorized by section 1412, as amended, and section 1413 of the 1977 Act.

Repeal of Section 1413A of the National Agricultural Research, Extension, and Teaching Policy Act of 1977:

Section 1212 repeals section 1413A of the 1977 Act, which was added by section 255 of the Biomass Energy and Alcohol Fuels Act of 1980 to provide for educational programs for producers of agricultural commodities, wood, and wood products. Most of the activities provided for in section 1413A can be conducted under existing extension programs.

Amendments to Program of Competitive, Special, and Facilities Grants for Agricultural Research:

Section 1213 amends section 2 of the Act of August 4, 1965, as amended by section 1414 of the 1977 Act. Section 2(b) authorizes a program of competitive grants for research to further the programs of the Department of Agriculture. It provides that to the greatest extent possible the Secretary should allocate such grants to high priority research taking into consideration the determinations of the Joint Council as to high priority research needs. The amendment adds that the determinations of the Advisory Board should also be taken into consideration. Further, the amendment extends the authorization for appropriations for the competitive grants program indefinitely and deletes any reference to specific dollar amounts; authorizing such sums to be appropriated annually as Congress may determine necessary.

As to section 2(c) which provides for special research grants, the amendment adds research foundations established by land-grant colleges as eligible recipients of grants awarded pursuant to sections 2(c)(1) and 2(c)(2); and cooperating forestry schools and accredited colleges of veterinary medicine as eligible recipients of grants awarded pursuant to section 2(c)(2).

Section 2(d) is amended to provide authority to the Secretary to conduct a program of annual grants to support the renovation and refurbishment, including energy retrofitting, of existing building space used or to be used for the conduct of food and agricultural research; the construction of auxiliary research facilities such as greenhouses, insectaries, and research farm structures and installations; and the purchase and installation of fixed equipment in such space and facilities. These grants are to be made to State agricultural experiment stations in an amount of $100,000 or in an amount equal to 10 per centum of the funds received by a station under the Hatch and McIntyre-Stennis Acts, whichever is greater. Any amounts over $50,000 are required to be matched. In addition, such grants are to be made to accredited colleges of veterinary medicine and State agricultural experiment stations receiving animal health research funds in an amount equal to ten per centum of such funds; to cooperating forestry schools not otherwise covered in an amount equal

to ten per centum of tne funds received by such school under the McIntyre-Stennis Act; and to the 1890 institutions including Tuskegee Institute in an amount which is equal to ten per centum of the funds received by such institutions under section 1445 of the 1977 Act.

Authorization of Appropriations for Research Facilities Act of 1963:

Section 1214 amends section 4 of the Act of July 22, 1963, as amended by section 1416 of the 1977 Act, to authorize annual appropriations in such amounts as Congress may deem necessary for carrying out the purposes of the Research Facilities Act of 1963.

Authorization of Appropriations for Grants and Fellowships for Food and Agricultural Sciences Education:

Section 1215 amends section 1417 of the 1977 Act to authorize annual appropriations in such amounts as Congress may deem necessary for conducting the program of grants and fellowships for food and agricultural sciences education provided for in section 1417.

Repeal of Authority for Grants for Research on the Production of Alcohols and Industrial Hydrocarbons:

Section 1216 repeals section 1419 of the 1977 Act, as amended by section 252 of the Biomass Energy and Alcohol Fuels Act of 1980, which provided for grants for research on the production and marketing of alcohols and industrial hydrocarbons from agricultural commodities and forest products, and agricultural chemicals and other products from coal derivatives. Most of the research to be supported with such grants can be supported under existing authorities such as sections 2(b) (Competitive Grants) and 2(c) (Special Grants) of the Act of August 4, 1965.

Repeal of Section 1424 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977:

Section 1217 repeals section 1424 of the 1977 Act, which required the Secretary to perform a study assessing the potential value and cost of establishing regional food and human nutrition research centers in the United States. Section 1424 is no longer necessary since the assessment has been performed and submitted to Congress.

Nutrition Education Program:

Section 1217 repeals section 1424 of the 1977 Act, which provides for the establishment of a national education program which includes the dissemination of the results of food and human nutrition research performed or funded by the Department of Agriculture. The amendment makes it clear that such program is currently and shall continue to be carried out under the provisions of section 3(d) of the Smith-Lever Act, as amended. In addition, the amendment provides that any funds appropriated annually for the conduct of the program under section 3(d), up to the amount appropriated under such section for the program in fiscal year 1981, shall be allocated to the States in the same proportion as the funds were allocated in fiscal year 1981, with the exception that the Secretary may retain up to two per centum of such funds for allocation to States that did not participate in the program in fiscal year 1981. The excepted amount would permit the initiation of the program in American Samoa, for example, which did not participate in the fiscal year 1981 program and, therefore, would not receive an allocation under the base allocation described above.

Further, the amendment provides that any funds appropriated annually under section 3(d) for the conduct of the program in excess of the amount appropriated for fiscal year 1981 shall be allocated as follows: (1) four per centum shall be available to the Secretary for administrative purposes; (2) ten per centum of the remainder shall be distributed equally among all the States; and the remainder shall be allocated to each State in an amount which bears the same ratio to the total amount to be allocated under this part of the formula as the population of the state living at or below 125 per centum of the income poverty guidelines prescribed by OMB bears to the total population of all the states living at or below 125 per centum of such guidelines as determined by the last preceding decennial census at the time each such additional amount is first appropriated.

Repeal of Sections 1426 through 1428 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977:

Section 1219 repeals sections 1426 through 1428 of the 1977 Act. Section 1426 provided for the development and distribution of educational materials on food and nutrition education to State departments of education for use in classrooms and lunchrooms. Section 1427 provided for the submission to Congress of a comprehensive plan for implementing the national food and human nutrition research and extension program authorized by the 1977 Act. Section 1428 provided for the submission to Congress of a proposal for a comprehensive nutritional status monitoring system.

Conforming Amendment:

Section 1220 amends section 1429 of the 1977 Act to revise the statement of purpose relating to the Animal Health and Disease Research Program to reflect the change in eligible recipients effected by the amendment of section 1430 of the 1977 Act by section 1222.

Eligible Institutions for Animal Health and Disease Research Funds:

Section 1221 amends section 1430 of the 1977 Act by redefining eligible institutions to limit animal health and research funding to State agricultural experiment stations and accredited colleges of veterinary medicine. By limiting the class of eligible institutions the Department will be able to concentrate funding and eliminate those distributions of funds which are too small to be used effectively.

Animal Health Science Research Advisory Board:

Section 1222 amends section 1432 of the 1977 Act by increasing the term of the Animal Health Science Research Advisory Board from five to ten years.

Continuing Animal Health and Disease Research:

Section 1223 amends section 1433 of the 1977 Act, which authorizes appropriations to support continuing animal health and disease research programs at eligible institutions, by deleting the specific dollar amount. Further, the amendment adds a new subsection to provide that funds for the program shall not be used for payment of indirect costs of research or for tuition remission and that compensation for personal services under payroll distribution shall require annual review and certification by the dean or director or their designees that charges against Federal funds for each employee are consistent with each employee's annual workload.

Appropriations for Research on National or Regional Problems:

Section 1224 amends section 1434 of the 1977 Act, which authorizes appropriations for research on specific national or regional animal health or disease problems, by deleting the specific dollar amount. The amendment also adds a new subsection providing that the Secretary shall establish annually priority lists of such problems of national or regional significance after consulting with the Joint Council, the National Agricultural Research and Extension Users Advisory Board, and the Animal Health Science Research Advisory Board, whose recommendations would not be controlling on the Secretary's determination of priorities. The new subsection sets out the factors to be considered in establishing such practices. It further provides that the Secretary, without regard to any consultation as provided above, shall, to the extent feasible, award grants to eligible institutions on the basis of priorities assigned through a peer review system, the grantees to be selected on a competitive basis in accordance with procedures established by the Secretary. In the case of multiyear grants, funds would be distributed on a schedule reasonably related to the time table required for the orderly conduct of the research project involved.

Technical Amendment—Extension at 1890 Land-Grant Colleges, Including Tuskegee Institute:

Section 1225 amends section 1444 of the 1977 Act by tying the formula for allocation of funds applicable to amounts appropriated in excess of the amount appropriated for this program in FY 1978 under section 3(d) of the Smith-Lever Act to the census data that is current at the time each additional sum is first appropriated. In addition, the amendment changes the title of "administrative head for extension" to "extension administrator"; and requires that a comprehensive program of extension for each State be developed and submitted to the Secretary for approval every five years.

Technical Amendment—Agricultural Research at 1890 Land-Grant Colleges, Including Tuskegee Institute:

Section 1226 amends section 1445 of the 1977 Act to authorize the use of Federal administrative funds for travel by non-Federal scientists to research meetings convened for the purpose of assessing research opportunities or research planning. In addition, it amends the section by tying the formula for allocation of funds applicable to amounts appropriated in excess of the amount appropriated for this program in FY 1978 under section 2 of the Act of August 4, 1965, to the census data that is current at the time each additional sum is first appropriated. The amendment also changes the title "chief administrative officer" to "research director."

Repeal of Miscellaneous Authorities Relating to Solar Energy Research and Development:

Section 1227 repeals sections 1449 through 1457 of the 1977 Act relating to solar energy research and development.

International Agricultural Research and Extension:

Section 1228 amends section 1458 of the 1977 Act to authorize the Secretary to work with transitional countries as well as developed countries on agricultural research and extension and to make it clear that "agricultural research" includes "food, agricultural, and related" research. The amendment also adds a new subsection to section 1458 to authorize the Secretary to provide specialized or technical services on an advance of funds or a reimbursable basis to United States colleges and universities carrying out food, agricultural and related research and development projects and activities. All funds received under such authority would be credited to the appropriation from which the cost of providing such services has been paid or is to be charged.

Studies:

Section 1229 repeals subtitle J of the 1977 Act providing for the preparation and submission of certain studies to the President and Congress. The studies required by the repealed sections have been completed.

Authorization of Appropriations for Agricultural Research Programs:

Section 1230 amends section 1463 of the 1977 Act, authorizing appropriations for agricultural research programs, to delete the specific dollar authorization and substitute therefor such sums annually as Congress may

determine necessary. The amendment also adds a new subsection to provide that notwithstanding any authorization for appropriations for agricultural research in any Act enacted before the effective date of the new subsection, not less than 25 per centum of the total funds appropriated to the Secretary in any fiscal year for the conduct of the cooperative research program provided for under the Hatch Act of 1887; the cooperative forestry research program provided for under the McIntire-Stennis Act; the special and competitive grants programs provided for in sections 2(d) and 2(c) of the Act of August 4, 1965; the animal health research program provided for in sections 1433 and 1434 of the 1977 Act; the native latex research program provided for in the Native Latex Commercialization and Economic Development Act of 1978; and the research provided for under various statutes for which funds are appropriated under the Agricultural Research heading or a successor heading, shall be appropriated for agricultural research at State agricultural experiment stations pursuant to the Hatch Act.

Authorization of Appropriations for Extension Programs:

Section 1231 amends section 1464 of the 1977 Act, authorizing appropriations for extension education, they delete the specific dollar authorization and substitute therefor such sums annually as Congress may determine necessary.

Miscellaneous Provisions:

Section 1232 adds three new sections to the Act.

New section 1471 provides for the conduct of program evaluation by the Secretary on a regular basis to improve the administration and effectiveness of agricultural research, extension and teaching programs; requires such evaluations to be reported to Congress annually; and authorizes appropriations annually in such amounts as are necessary to carry out such activities.

New section 1472 clarifies that in the absence of specific authority, the Secretary may enter into contracts, grants and cooperative agreements when necessary to further the research, extension and teaching programs administered by the Department of Agriculture. Further, it clarifies that title to equipment and supplies purchased with funds provided under such contracts, grants or cooperative agreements may be vested in the contractor or recipient without further accountability when such is deemed appropriate to further research, extension or teaching objectives. Finally, it authorizes such contracts to be awarded without regard to the prohibition on advances of funds and without regard to any requirements for competition.

New section 1473 provides that formula funds and section 1434 funds shall not be available for the payment of indirect costs or tuition remission.

Forestry Research:

Section 1233 amends section 5 of the Act of October 10, 1962, commonly known as the "McIntire-Stennis Act," to add a new sentence providing that program funds may be used for the transportation of scientists who are not Federal employees to research meetings for the purposes of assessing research opportunities or research planning.

Excess Federal Property:

Section 1234 amends section 202(d)(2) of the Federal Property and Administrative Services Act of 1949 to permit the Secretary to obtain excess Federal personal property and furnish it to State or county extension services, State experiment stations, and 1890 colleges including Tuskegee Institute to further the purposes of the Hatch Act, the Smith-Lever Act and sections 1444 and 1445 of the 1977 Act.

TITLE XIII—AGRICULTURAL MARKETING AGREEMENT ACT OF 1937

Section 1301 amends section 8c(5)(B) of the Agricultural Marketing Agreement Act of 1937 to provide permanent authority to include base-excess and Louisville plans in milk marketing orders. This Title shall be effective January 1, 1982. The present authority for such plans was authorized on a temporary basis and will expire on December 31, 1981.

TITLE XIV—DEPARTMENT OF AGRICULTURE ADVISORY COMMITTEES

Section 1401 repeals title XVIII of the Food and Agriculture Act of 1977 which generally provides for responsibilities and requirements with respect to advisory committees operating within the Department of Agriculture in addition to those set forth in the Federal Advisory Committee Act.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., April 8, 1981.

Hon. HOWARD BAKER, JR.,
Senate Majority Leader,
U.S. Senate, Washington, D.C.

DEAR SENATOR BAKER: Enclosed for consideration of Congress is a draft of the "Agricultural Act of 1981". This proposed legislation would provide price support and production adjustment incentives for farmers in order to assure the availability of an abundance of food and fiber, and for other purposes. Authorities under this legislation would extend through the 1985-planted crops.

This Department recommends that the bill be enacted.

This bill is designed to meet three basic objectives. One is to reduce the role of Government in agriculture—both in the marketplace and in the regulatory process. A second objective concerns maintaining—and increasing—growth in the productivity of the agricultural sector and in our level of agricultural exports. Third, we need a farm program which will result in minimal costs to the U.S. Government but provide maximum flexibility to make needed adjustments in farm programs in a timely manner. This proposal is entirely consistent with the President's Economic Recovery Program for the revitalization of the U.S. economy.

Major progress has been made over the past two decades in giving farmers the freedom to decide what and how much to produce and when and how to market their crops. We seek to continue this thrust in the legislative proposal we are bringing to the Congress. In addition, our recommendations simplify programs wherever possible. Our farm programs have become needlessly complex. They are hard to understand and difficult to use. Our proposal simplifies the structure of programs while providing the economic safety net our farmers need.

We have carefully reviewed the program authorities of the 1977 Act and companion legislation. We believe that this legislation forms the base that should be used to design farm programs that further the long-standing trend toward greater market orientation with significantly reduced complexity and cost.

The key features of our proposal for the major crop commodities are nonrecourse loans, a farmer-owned wheat and feed grain reserve, and the authority to implement an acreage diversion program when and if needed. We are recommending that authorities for target prices, deficiency payments, disaster payments, and set asides not be included in the new bill.

Two additional programs which are modified under our proposal are the dairy and peanut programs. Even though the basic structure of the dairy program will remain unchanged, the support level would be set between 70 and 90 percent of parity, adjusted as needed.

The peanut program still remains closely regulated by the Federal Government. The 1977 Act initiated a move towards a more market-oriented peanut program. We propose to continue this process by eliminating acreage allotments and reducing poundage quotas by ten percent annually over the next four years. By reducing marketing quotas gradually rather than immediately eliminating them, we can protect allotment holders against an abrupt adjustment in their asset base.

As part of the farm bill, we are recommending a four-year reauthorization of the Public Law 480 program. In addition to its reauthorization, we are proposing several amendments of a technical nature to update the legislation.

If we are to sustain our ability to produce food and fiber, we must reduce soil erosion and develop an effective program for growth in the agricultural sector. This long-run program has not yet been developed but we are thoroughly reviewing the options put forward in the Resource Conservation Act process. We intend to submit to Congress in the near future a comprehensive soil and water conservation program for its consideration.

We are committed to providing adequate funding for research and education to enhance the productivity of the agricultural sector. In this regard, we are proposing a few changes to programs under Title XIV of the 1977 Act. These changes include emphasis on the continuation of the lead role for the Secretary of Agriculture in agricultural research and extension and an increase in the role of the States in the overall effort of the Department in these activities.

I am providing you and other Members of Congress a section by section description of our legislative proposal. Contained in this document are the Department's federal outlay estimates for the legislation. We will be glad to provide additional material if it is needed and will work closely with you to gain timely passage of this important piece of legislation.

The Office of Management and Budget advises that there is no objection to the presentation of this report and that enactment of this proposed legislation would be in accord with the President's program.

An identical letter has been sent to the Speaker of the House.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

By Mr. HELMS (by request):

S. 944. A bill to increase the interest rates for loans made or insured under the Consolidated Farm and Rural Development Act for water and waste disposal, and essential community facilities; to the Committee on Agriculture, Nutrition, and Forestry.

S. 945. A bill to amend the Consolidated Farm and Rural Development Act and the Small Business Act; to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Small Business, jointly, pursuant to the order of March 31, 1981.

S. 946. A bill to improve the effectiveness and reduce the cost of programs under the National School Lunch and the Child Nutrition Act of 1966; to the Committee on Agriculture, Nutrition, and Forestry.

S. 947. A bill to amend section 110(b) of the Agricultural Act of 1949 to eliminate the requirement that the Secretary of Agriculture waive interest on loans made on 1980 and 1981 crops of wheat and feed grains in the farmer-held grain reserve program; to the Committee on Agriculture, Nutrition, and Forestry.

S. 948. A bill to recover costs associated with cotton classing and standards tobacco inspection and standards, and warehouse examination, inspection, and licensing, and for other purposes.

S. 949. A bill to amend the United States Grain Standards Act to require

that fees charged for official inspection and weighing services cover costs to the Federal Grain Inspection Service including administrative and supervisory costs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 950. A bill to amend the Rural Electrification Act of 1936 to remove provision for the special 2-percent interest rate for insured loans; to the Committee on Agriculture, Nutrition, and Forestry.

LEGISLATION RELATING TO ECONOMIC RECOVERY

Mr. HELMS. Mr. President, I am introducing today, at the request of the administration, a series of bills which have been transmitted for the consideration of the Congress as part of the President's economic recovery program. I ask unanimous consent that each bill and the accompanying request letter from the Secretary of Agriculture be printed in the RECORD.

Mr. President, I ask unanimous consent that the bill to amend the Consolidated Farm and Rural Development Act and the Small Business Act be referred jointly to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Small Business.

I also ask unanimous consent that a letter to the majority leader signed by the chairmen and ranking minority members of both these committees requesting the joint referral be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 944

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Consolidated Farm and Rural Development Act is amended by revising paragraph (3) of Section 307(a) to read as follows:

"(3) The interest rates on loans (other than guaranteed loans) to public bodies or nonprofit associations (including Indian tribes on Federal and State reservations and other federally recognized Indian tribal groups) for water and waste disposal facilities and essential community facilities shall be as determined by the Secretary but not less than such rates as determined by the Secretary of the Treasury taking into consideration the current market yields for outstanding municipal obligations with remaining periods to maturity comparable to the average maturity for such loans, plus not to exceed 1 per centum, as determined by the Secretary, and adjusted to the nearest one-eighth of 1 per centum."

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 10, 1981.

Hon. GEORGE H. W. BUSH,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Congress is a draft bill "To increase the interest rates for loans made or insured under the Consolidated Farm and Rural Development Act for water and waste disposal and essential community facilities."

This legislative proposal is part of the President's Program for Economic Recovery and his Fiscal Year 1982 Budget Revisions. The Department of Agriculture strongly recommends its enactment.

The draft bill would amend Section 307 (a)(3) of the Consolidated Farm and Rural Development Act to remove the 5 per centum ceiling on the interest rate for water and waste disposal and community facility loans. The amended language would authorize interest rates for such loans that would be determined by the Secretary of Agriculture but not less than such rates as determined by the Secretary of the Treasury taking into consideration the current market yields for outstanding municipal obligations with remaining periods to maturity comparable to the average maturity for such loans, plus not to exceed 1 per centum, as determined by the Secretary of Agriculture, and adjusted to the nearest one-eighth of 1 per centum.

If the interest rate on water and waste disposal and community facility loans is assumed to be 10 per centum (based on a 9 per centum municipal bond rate and a 1 per centum add-on), the savings in Federal costs per $100 million in loans would be about $9.5 million over the first 5 years and about $125 million over the lifetime of the loans. While some projects would not be viable at the higher rate of interest, loans would still be available for those projects that could bear the higher rate of interest but not necessarily meet all the financial requirements to qualify for credit in the commercial market for municipal bonds.

This legislation represents the Administration's effort to narrow the focus of FmHA lending to borrowers who lack access to other credit sources, rather than act as a source of below market interest rate loans. Water and waste disposal projects would still be eligible for FmHA grant assistance.

An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that enactment of this proposed legislation would be in accord with the President's program.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

S. 945

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

TITLE I—CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT AMENDMENTS

SEC. 101. The Consolidated Farm and Rural Development Act is amended:

(1) in section 307(a)(3) by deleting "loans (other than guaranteed loans) under section 310D of this title, and";

(2) by deleting section 310D;

(3) in section 321 by inserting in subsection (a) after the phrase "The Secretary shall make and insure loans under this subtitle" the words "only to the extent and in such amounts as provided in advance in appropriation acts", deleting subsection (b), and revising subsection (d) to read "(d) For the purposes of this subtitle 'aquaculture' means the husbandry of aquatic organisms under a controlled or selected environment."

(4) in section 324(b) by amending paragraph (1) to read "(1) For loans or portions of loans up to the amount of the applicant's actual loss caused by the disaster, as limited under subsection (a)(1) of this section, the interest rate shall be the rate prescribed by the Secretary but not less than a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, plus an additional charge of not to exceed 1 per centum per annum as determined by the Secretary, and adjusted to the nearest one-eighth of 1 per centum; and";

(5) in section 333(c) by deleting "(or, in the case of a borrower under section 310D of this title, the borrower may be able to obtain a loan under section 302 of this title)"; and

(6) in section 346(b)(1) by deleting the last sentence which reads "Not more than 75 per centum of the insured loans authorized for farm ownership purposes and not more than 75 per centum of the insured loans authorized for farm operating purposes may be for applicants other than low-income, limited-resource borrowers."

TITLE II—SMALL BUSINESS ACT AMENDMENTS

SEC. 201. Section 7(b) of the Small Business Act is amended to read as follows:

"(b) The Administration also is empowered to the extent and in such amounts as provided in advance in appropriation acts—

"(1)(A) to make such loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred (guaranteed) basis) as the Administration may determine to be necessary or appropriate to repair, rehabilitate or replace property, real or personal, damaged or destroyed by or as a result of floods, riots or civil disorders, or other catastrophes: *Provided,* That (i) no loan or guarantee shall be extended unless the Administration finds that credit is not otherwise available on reasonable terms and conditions; and (ii) such damage and destruction is not compensated for by insurance or otherwise;

"(B) to refinance any mortgage or other lien against a totally destroyed or substantially damaged home or business concern: *Provided.* That (i) no loan or guarantee shall be extended unless the Administrator finds that credit is not otherwise available on reasonable terms and conditions; (ii) such property is to be repaired, rehabilitated or replaced; (iii) the amount refinanced shall not exceed the amount of physical loss sustained; and (iv) such amount shall be reduced to the extent such mortgage or lien is satisfied by insurance or otherwise;

"(2) to make such loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred (guaranteed) basis) as the Administration may determine to be necessary or appropriate to any small business concern located in an area affected by a disaster, if the Administration determines that the concern has suffered a substantial economic injury as a result of such disaster and if such disaster constitutes—

"(A) a major disaster, as determined by the President under the Act entitled "An Act to authorize Federal assistance to States and local governments in major disasters, and for other purposes", approved September 30, 1950, as amended (42 U.S.C. 1855–1855g), or

"(B) a disaster as determined by the Administrator of the Small Business Administration pursuant to the Disaster Relief Act of 1970.

"(C) No loan guarantee shall be extended pursuant to this paragraph (2) unless the Administrator finds that credit is not otherwise available on reasonable terms and conditions.

"(3) No loan under this subsection, including renewals and extensions thereof, may be made for a period or periods exceeding thirty years: *Provided,* That the Administrator may consent to a suspension in the payment of principal and interest charges on, and to an extension in the maturity of, the Federal share of any loan under this subsection for a period not to exceed five years, if (A) the borrower under such loan is a homeowner or a small business concern, (B) the loan was made to enable (i) such homeowner to repair or replace his home, or (ii) such concern to repair or replace plant or equipment which was damaged or destroyed as the

result of a disaster meeting the requirements of clause (A) or (B) of paragraph (2) of this subsection, and (C) the Administrator determines such action is necessary to avoid severe financial hardship: *Provided further,* That the provisions of paragraph (1) of subsection (c) of this section shall not be applicable to any such loan having a maturity in excess of twenty years. Notwithstanding the provisions of any other law, the interest rate on the Federal share of any loan made under this subsection (b) shall be the rate prescribed by the Administrator but not be less than a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans plus an additional charge of not to exceed 1 per centum per annum as determined by the Administrator, and adjusted to the nearest one-eighth of 1 per centum. The interest rate for loans made under paragraphs (1) and (2) hereof shall not be less than the rate of interest which is in effect at the time of the making of the loan: *Provided further,* That no loan under paragraphs (1) and (2) thereof shall be made, either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis, if the total amount outstanding and committed to the borrower under such subsection would exceed $500,000 for each disaster, unless an applicant constitutes a major source of employment in an area suffering a disaster, in which case the Administration, in its discretion, may waive the $500,000 limitation.

"(4) A State grant made on or prior to July 1, 1979, shall not be considered compensation for the purpose of applying the provisions of subsection (b) of section 315 of Public Law 93-288 (42 U.S.C. 5155) to a disaster loan under paragraph (1) or (2) of this subsection, or one made pursuant to the former paragraph (4) of this subsection."

SEC. 202. Conforming Changes.—

(a) Sections 2(b), 7(c)(3), 7(f), 7(g), and 18 of the Small Business Act are hereby repealed.

(b) Section 4(c)(1)(A) is amended by deleting "7(b)(1), 7(b)(2), 7(b)(3), 7(b)(4), 7(b)(5), 7(b)(6), 7(b)(7), 7(b)(8), 7(c)(2), and 7(g) of this Act" and substituting "7(b)(1) and 7(b)(2) of this Act".

(c) Section 4(c)(2)(A) is amended by deleting "7(b)(1), 7(b)(2), 7(b)(3), 7(b)(4), 7(b)(5), 7(b)(6), 7(b)(7), 7(b)(8), 7(c)(2), and 7(g) of this Act" and substituting "7(b)(1) and 7(b)(2) of this Act".

(d) Sections 2(c), 2(d), and 2(e) of the Small Business Act are hereby redesignated Sections 2(b), 2(c), and 2(d); and Sections 19 and 20 of the Small Business Act are hereby renumbered section 18 and 19.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 25, 1981.

Hon. GEORGE H. W. BUSH,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Congress is a draft bill, "To amend the Consolidated Farm and Rural Development Act and the Small Business Act."

This draft bill, which represents a joint effort of this Department and the Small Business Administration, is part of the President's Program for Economic Recovery and his Fiscal Year 1982 Budget Revisions. We strongly recommend its enactment.

Title I of the draft bill would amend the Consolidated Farm and Rural Development Act by:

(1) deleting language in Section 307(a)(3) to remove the 5 percent interest rate ceiling on Section 310D farm ownership loans to limited resource producers;

(2) deleting Section 310D which authorizes farm ownership loans to limited resource producers meeting certain requirements;

(3) amending subsection (a) of Section 321 to require that emergency loans be limited to amounts provided in advance in appropriation acts;

(4) deleting Subsection (b) and paragraph (d)(2) of Section 321 which authorize emergency loans for the amount of actual loss to those producers who can obtain credit elsewhere:

(5) amending paragraph (1) in Section 324(b) to remove language relating to the interest rate on emergency loans for the amount of actual loss to those producers who can obtain credit elsewhere, and to amend the language relating to the interest rate on emergency loans for the amount of actual loss to those producers who cannot obtain credit elsewhere to remove the 5 percent interest rate ceiling on such loans and provide instead for a rate based on the cost of money to the Government;

(6) amending Section 333(c) by deleting the provision referring to the limited resource borrower in the graduation test; and

(7) deleting the last sentence of Section 346(b)(1) which requires that at least 25 percent of the annual appropriation for insured loans go to limited resource producers.

Under existing law, limited resource producers may qualify for 5 percent interest rates on farm ownership loans. This reduced rate applies to the first three years of the loan, after which the borrower may be asked to pay the regular rate. The Administration believes that such a large subsidy runs a serious risk of encouraging inefficient production, abnormal risk-taking, and overextension.

The existing subsidy on emergency loans for the amount of actual loss to those who cannot obtain credit elsewhere tends to encourage production in high-risk areas, and bears little relationship to the financial status of borrowers or the economic burden imposed on such borrowers as a result of disasters. To a lesser extent, the same situation exists for those borrowers who can obtain credit elsewhere. Such borrowers may seek emergency loans to reduce their interest costs where prevailing market rates are higher than the cost of money to the Government rate which already applies to such loans. The Administration believes that disaster assistance can best be provided through private insurance or through Federal crop insurance which is being expanded in response to recently enacted PL 96-365.

Lifetime savings in Federal costs for eliminating reduced interests rates on loans to limited resource producers are estimated to be $13.5 million per $100 million in farm ownership loans to such producers. This estimate reflects the reduced rate of interest for three years, which would be the minimum time limited resource producers now receive at the reduced rate.

Lifetime savings in Federal cost for eliminating the subsidy on emergency loans for the amount of actual loss to producers who cannot obtain credit elsewhere are estimated to be $60 million per $100 million in such loans. This estimate covers about seven years which with certain exceptions, is the maximum term of emergency loans for non-real estate purposes. The higher rate of interest would probably result in a reduced demand for such loans. However, no estimate of this effect is available.

The elimination of emergency loans to those producers who can obtain credit elsewhere would not result in any savings in Federal (subsidy) costs. However, it would reduce the emergency loan program level by about $400 million in a typical year.

Requiring that emergency loans be limited to amounts provided in advance in appropriation acts would not prevent Congress from continuing to provide for such loans on an as needed basis, but it would reinforce the fact that the emergency loan program is subject to the appropriations process.

Title II of the draft bill amends the Small Business Act. The Small Business Administration drafted Title II and the attached Statement of Need and Purpose, which explains its provisions. Title II would make changes to the Small Business Administration's disaster loan program similar to changes that Title I would make to this Department's emergency loss loan program, i.e., it would raise the interest rate for SBA disaster loans to the current cost of Treasury borrowing, and establish a credit elsewhere test for loan applicants. It would also remove SBA's authority to make disaster and regular Section 7(a) business loans to farmers. SBA's authority to make home and personal property loans would not be changed. There is no duplication of effort in this area. With its extensive network of field offices in rural areas and its long-standing expertise in dealing with the problems of farmers, the Farmers Home Administration is a more appropriate source of disaster assistance for farmers than the SBA. We estimate that increasing interest rates on SBA physical disaster loans will result in outlay savings of $23 million in fiscal year 1982 and a total of $347 million in fiscal years 1982 through 1986.

The Administration believes it is essential that these two titles be considered and enacted together, to ensure that farmers and other businessmen suffering from natural disasters receive equal treatment from their respective agencies.

An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget advises that enactment of this draft bill would be in accord with the President's program.

Sincerely,

JOHN R. BLOCK,
Secretary.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY,
Washington, D.C., April 3, 1981.

Hon. HOWARD BAKER,
Office of Legislative Scheduling,
The Capitol

DEAR HOWARD: A draft bill, "To amend the Consolidated Farm and Rural Development Act and the Small Business Act", was recently sent by the Administration.

Since Title I of this bill deals exclusively with matters within the jurisdiction of the Committee on Agriculture, Forestry, and Nutrition and Title II of the bill deals exclusively with matters within the jurisdiction of the Committee on Small Business, and further since it is the desire of all concerned to deal with this legislation as effectively and efficiently as possible, we hereby request that this bill upon introduction be referred jointly to both of the aforesaid committees.

Sincerely,

WALTER D. HUDDLESTON,
Ranking Minority Member.
SAM NUNN,
Ranking Minority Member.
JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition, and Forestry.
LOWELL WEICKER,
Chairman, Committee on Small Business.

S. 946

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Child Nutrition Amendments of 1981".

CHANGES IN REIMBURSEMENT FOR SCHOOL LUNCHES AND BREAKFASTS

SEC. 2. (a) Section 4 of the National School Lunch Act is amended by—

(1) redesignating the present section 4 as subsection 4(a);

(2) striking the second sentence of that redesignated subsection; and adding at the end thereof the following new subsection:

"(b)(1) For each fiscal year the Secretary shall make food assistance payments, at such times as he may determine, from the sums appropriated therefor, to each State educational agency, in a total amount equal to the result obtained by multiplying the number of lunches (consisting of a combination of foods which meet the minimum nutritional requirements prescribed by the Secretary under subsection 9(a) of this Act) served during such fiscal year to children eligible for free or reduced price meals in schools in such State which participate in the school lunch program under this Act under agreements with such State educational agency by the appropriate national average free or reduced-price lunch payment.

"(2) The national average free lunch payment for each free lunch served shall be 18.5815 cents, which payment shall be adjusted on July 1, 1981, and annually thereafter as specified in section 11(a), except that the national average free lunch payment for each free lunch served in any school food authority under which less than 60 per centum of the lunches served under the National School Lunch Program were served free or at a reduced-price during the second preceding school year shall be reduced by 2.5 cents.

"(3) The national average reduced-price lunch payment for each reduced-price lunch served shall be 9 cents, which payment shall be adjusted on July 1, 1982, and annually thereafter as specified in section 11(a).".

(b) Section 11 of the National School Lunch Act is amended by—

(1) striking out the fifth sentence of subsection (a) and inserting in lieu thereof "The special-assistance factor prescribed by the Secretary for free lunches shall be 83.6165 adjusted on July 1, 1981, and annually thereafter; and the special-assistance factor for reduced-price lunches shall be one-half of such adjusted free lunch special-assistance factor, adjusted to the nearest one-fourth cent.";

(2) striking out in the sixth sentence of subsection (a) ", and on January 1, of each fiscal year, semiannual adjustments" and inserting in lieu thereof "an annual adjustment";

(3) striking out in the sixth sentence of subsection (a) "the initial such adjustment shall reflect the change in the series for food away from home during the period September 1973, through November 1973: *Provided further*, That each subsequent adjustment" and inserting in lieu thereof "each July 1, adjustment"; and

(4) striking out in the second proviso of the sixth sentence of subsection (a) "six-month" and inserting in lieu thereof "twelve-month".

(c)(1) Section 4(b)(1) of the Child Nutrition Act of 1966 is amended to read as follows:

"(b)(1)(A) Each fiscal year, the Secretary shall make breakfast assistance payments, at such times as he may determine, from the sums appropriated therefor, to each State educational agency, in a total amount equal to the result obtained by multiplying the number of breakfasts (consisting of a combination of foods which meet the minimum nutritional requirements set forth in subsection (e) of this section) served during such fiscal year to children eligible for free or reduced-price breakfasts in schools in such States which participate in the School Breakfast Program under agreements with such State educational agency by the appropriate national average free or reduced-price breakfast payment prescribed by the Secretary.

"(B) The national average free breakfast payment for each free breakfast shall be 52.027 cents which payment shall be adjusted on July 1, 1981, and annually thereafter as specified in section 11(a).

"(C) The national average reduced-price payment for each reduced-price breakfast shall be one-half of such national average free breakfast payment, adjusted to the nearest one-fourth cent.".

(2) Section 4 of that Act is further amended by—

(A) striking out in subsection (b)(2)(B)(ii) "on a semi-annual basis each July 1 and January 1" and inserting in lieu thereof "on an annual basis each July 1";

(B) striking out in subsection (b)(2)(B)(ii) "six-month" and inserting in lieu thereof "twelve-month"; and

(C) striking out in subsection (b)(2)(C) "five cents less than" and inserting in lieu thereof "one-half of".

REDUCTION IN COMMODITY ASSISTANCE FOR LUNCHES

SEC. 3. The first sentence of section 6(e) of the National School Lunch Act is amended to read "The national average value of donated foods, or cash payments in lieu thereof, per free lunch served to children eligible for free lunches shall be 15.54 cents, adjusted on July 1, 1981, and each July 1 thereafter to reflect changes in the Price Index for Food Used in Schools and Institutions, less 2 cents; and for lunches served to children eligible for reduced-price meals shall be 8 cents per lunch adjusted on July 1, 1982, and each July 1 thereafter to reflect changes in the Price Index for Food Used in Schools and Institutions.".

REVISION OF INCOME ELIGIBILITY GUIDELINES

SEC. 4. (a)(1) Section 9(b)(1) of the National School Lunch Act is amended to read as follows:

"(b)(1) No later than June 1 of each fiscal year, the Secretary shall prescribe income guidelines for determining eligibility for free and reduced-price lunches during the subsequent 12-month period beginning July 1, based on the nonfarm income poverty guidelines prescribed by the Office of Management and Budget adjusted annually pursuant to section 625 of the Economic Opportunity Act of 1964 (42 U.S.C. 2971d).

"(A) The income guidelines for free lunches shall be prescribed at 25 per centum above the applicable family-size income levels of the Office of Management and Budget's income poverty guidelines plus a standard deduction.

"(i) The standard deduction shall be $60 per month for the 48 contiguous States, District of Columbia, and Territories excluding Guam, adjusted in 1981, to the nearest $5 to reflect changes in the Consumer Price Index for All Urban Consumers of the Bureau of Labor and Statistics for items other than food for the period September 1977 through March 1981, and adjusted annually thereafter to reflect the changes in the series of food away from home of the Consumer Price Index for All Urban Consumers for the 12-month period ending March 31 of that year.

"(ii) The standard deduction for Alaska shall bear the same ratio to the standard deduction for the contiguous States as the applicable income poverty guidelines for Alaska bear to the applicable income poverty guidelines for the contiguous States, and the standard deduction for Hawaii and Guam shall bear the same ratio to the standard deduction for the contiguous States as the applicable income poverty guidelines for Hawaii bear to the applicable income poverty guidelines for the contiguous States.

"(B) The income poverty guidelines for reduced-price lunches shall be prescribed at 85 per centum above the applicable family-size income levels of the Office of Management and Budget's income poverty guidelines.".

(2) Section 9(b) of that Act is further amended by redesignating paragraph (2) as paragraph (4) and inserting the following two new paragraphs after paragraph (1):

"(2) Following the announcement by the Secretary of the income eligibility guidelines for each 12-month period, each State educational agency shall announce these income poverty guidelines, by family-size, to be used by schools in the State in making determinations of eligibility for a free or a reduced-price lunch. Local school authorities shall, each year, publicly announce the income poverty guidelines on or at the opening of school. Applications for free and reduced-price lunches, in such form as the Secretary may prescribe, and any descriptive material, shall be distributed to the parents of children in attendance at the school, and shall contain only the family size income scales for 185 per centum of the Office of Management and Budget's income poverty guidelines with the explanation that households with incomes less than or equal to these values would be eligible for free or reduced-price lunches. However, public announcements shall include the income eligibility guidelines for both free and reduced-price lunches. Eligibility determinations shall be made on the basis of a completed application executed by an adult member of the household. Local school authorities shall undertake such verification of the information contained in these applications as the Secretary may by regulation prescribe and local school authorities shall in accordance with such regulations make appropriate changes in the eligibility determinations on the basis of such verification.

"(3) Any child who is a member of a household that has an annual income level less than or equal to the applicable family-size income level of the income poverty guidelines for free lunches, shall be served a free lunch. Any child who is a member of a household that has an annual income which falls between (A) the applicable family-size income level of the income eligibility guidelines for free lunches prescribed by the Secretary and (B) the applicable family-size income level of the income eligibility guidelines for reduced-price lunches prescribed by the Secretary, shall be served a reduced-price lunch, which price shall not be greater than the difference between the total federal cash and commodity assistance for lunches served to children eligible for free meals and the total federal cash and commodity assistance for lunches served to children eligible for reduced-price meals.".

(3) Paragraph 4 of section 9(b) of such Act, as redesignated by this section, is amended by deleting the word "solely" from the second sentence and striking out the third sentence.

(b) Notwithstanding any other provision of law, the Secretary shall conduct a pilot study to verify the data submitted on a sample of applications for free and reduced-price meals. In conducting the pilot study, the Secretary may require households included in the study to furnish social security numbers of all household members and such other information as the Secretary may require, including, but not limited to, pay stubs, documentation of the current status of household members who are recipients of public assistance, unemployment insurance documents, and written statements from employers, as a conditon for receipt of free or reduced-price school meals.

(c) For the school year ending June 30, 1982, the Secretary may prescribe procedures for implementing the revisions in the

income poverty guidelines for free and reduced-price lunches contained in this section of the Act that allow School Food Authorities to (1) use applications distributed at the beginning of the school year when making eligibility determinations based on the revised income poverty guidelines and (2) distribute new applications containing the revised income poverty guidelines and make determinations using the new applications.

REVISION OF STATE REVENUE MATCHING REQUIREMENTS

SEC. 5. (a) Section 7 of the National School Lunch Act is amended to read as follows:

"SEC. 7. (a) Funds appropriated to carry out section 4 of this Act during any fiscal year shall be available for payment to the States for disbursement by State educational agencies, in accordance with such agreements, not inconsistent with the provisions of this Act, as may be entered into by the Secretary and such State educational agencies, for the purpose of assisting schools within the States in obtaining agricultural commodities and other foods for consumption by children in furtherance of the school lunch program authorized under this Act. For the school years beginning July 1, 1981, and July 1, 1982, such payments to any State in each year shall be made upon condition that State revenues, other than revenues derived from the program, appropriated for or used in connection with food service in schools participating in the school lunch program under this Act, other than salaries and administrative expenses at the State level, shall be equal to at least 30 percent of the funds made available to each State pursuant to section 4 of this Act in the school year beginning July 1, 1980, decreased by the percentage, if any, by which the State per capita income is below the per capita income of the United States.

"(b) The State revenues provided to meet the requirement of the preceding subsection shall, to the extent the State deems practicable, be disbursed to schools participating in the school lunch program under this Act. No State wherein the State educational agency is prohibited by law from disbursing State appropriated funds to private schools shall be required to match Federal funds made available on the basis of meals served in such schools.

"(c) The Secretary shall certify to the Secretary of the Treasury from time to time the amounts to be paid to any State under this section and the time or times such amounts are to be paid; and the Secretary of the Treasury shall pay to the State at the time or times fixed by the Secretary the amounts so certified.".

(b) Section 10 of the National School Lunch Act is amended by—

(1) striking out in the first sentence "or is not permitted by law to match Federal funds made available for use by such schools," and ", including the requirement that any such payment or payments shall be matched, in the proportion specified in section 7 for such State, by funds from sources within the State expended by such schools within the State participating in the school lunch program under this Act"; and

(2) striking out the second sentence.

TERMINATION OF FOOD SERVICE EQUIPMENT ASSISTANCE

SEC. 6. (a) Section 5 of the National School Lunch Act is repealed.

(b) Section 5 of the Child Nutrition Act of 1966 is repealed.

TERMINATION OF NUTRITION EDUCATION AND TRAINING PROGRAM

SEC. 7. Section 19 of the Child Nutrition Act of 1966 is repealed.

REVISION OF THE SPECIAL MILK PROGRAM

SEC. 8. Section 3 of the Child Nutrition Act is amended by—

(1) inserting in the first sentence ", which do not participate in a meal service program authorized under this Act or the National School Lunch Act" after "training of children";

(2) inserting in the fourth sentence "which does not participate in a meal service program authorized under this Act or the National School Lunch Act" after "institution"; and

(3) striking out the eighth sentence.

LIMITATION ON PRIVATE SCHOOL PARTICIPATION

SEC. 9. (a) Section 12 of the National School Lunch Act is amended by inserting in the first sentence of subsection (d)(6) "except private schools whose yearly tuition exceeds $1,500 per child" after "under".

(b) Section 15(c) of the Child Nutrition Act of 1966 is amended by inserting in the first sentence "except private schools whose yearly tuition exceeds $1,500 per child" after "such school,".

TERMINATION OF SUMMER FOOD SERVICE PROGRAM

SEC. 10. Section 13 of the National School Lunch Act is repealed.

REVISION OF CHILD CARE FOOD PROGRAM

SEC. 11. (a) Section 17(c) of the National School Lunch Act is amended by—

(1) striking out paragraphs (1)(C), (2)(C), (3), (4)(A)(iii), (4)(B)(iii), and (4)(C);

(2) striking out "; and" at the end of paragraphs (1)(B) and (2)(B) and inserting in lieu thereof a period;

(3) striking out the semicolon at the end of paragraph (4)(B)(ii) and inserting in lieu thereof a period;

(4) inserting at the end of paragraphs (1)(A), (2)(A), (4)(A)(i), and (4)(B)(i) "and"; and

(5) renumbering paragraphs (4) and (5) as (3) and (4), respectively.

(b) Section 17(f) of that Act is amended by—

(1) striking out in the first sentence of paragraph (2) "three" and inserting in lieu thereof "two";

(2) striking out in the first sentence of paragraph (2) ", and (3)" and inserting "and" before "(2)";

(3) striking out in the third sentence of paragraph (2) ", or supplement";

(4) striking out in the first sentence of paragraph (3) ", or paid" and inserting "or" before "reduced-price"; and

(5) amending the second sentence of (f)(3) by inserting "and" before "(C)" and striking out everything after "1966" and inserting a period in lieu thereof.

(c) Section 17 of that Act is further amended by—

(1) striking out in subsection (g)(2) ", and supplements", and inserting "and" before "supper";

(2) inserting in the second sentence of subsection (h) "reimbursed at free or reduced-price rates" after "suppers";

(3) striking out subsection (n);

(4) striking out in the second sentence of subsection (o) "the availability of food service equipment funds under the program"; and

(5) redesignating subsections (o), (p), (q), and (r) as (n), (o), (p), and (q), respectively.

LIMITATIONS ON SECRETARY'S AUTHORITY TO DIRECTLY ADMINISTER PROGRAMS

SEC. 12. (a) Section 10 of the National School Lunch Act, as amended by section 5(b) of this Act, is further amended to read "To the extent the Secretary has continuously withheld and disbursed funds payable to a State under this Act since October 1, 1980, for the purpose of providing funds to schools, service institutions or institutions, and only to that extent, the Secretary shall continue to withhold and disburse such funds within such State for the same purposes and subject to the same conditions as are applicable to the State. In such States, a State may, upon request to the Secretary, assume administration of any program authorized under this Act."

(b) Section 17 of the National School Lunch Act, as amended by section 11 of this Act, is further amended by striking out subsection (m).

(c) Section 13(1) of the National School Lunch Act is amended by striking out the first sentence and striking out in the second sentence "In cases described in clause (1) of the preceding sentence, the".

(d) Section 3 of the Child Nutrition Act is amended by adding at the end thereof the following: "To the extent the Secretary has continuously administered the program or any part thereof in any State since October 1, 1980, and only to that extent, the Secretary shall continue to administer the program for the same purposes and subject to the same conditions as are applicable to the State. In such States, a State may, upon request to the Secretary, assume administration of the program."

(e) Section 4 of the Child Nutrition Act of 1966 is amended by striking subsection (f) and redesignating subsection (g) as subsection (f).

(f) The Child Nutrition Act of 1966, as amended by section 6 of this Act, is amended by inserting a new section 5 as follows:

"SEC. 5. To the extent the Secretary has continuously withheld and disbursed funds payable to a State under this Act since October 1, 1980, for the purpose of providing funds to schools, and only to that extent, the Secretary shall continue to withhold and disburse such funds within such State for the same purposes and subject to the same conditions as are applicable to the State. In such States, a State may, upon request to the Secretary, assume administration of any program authorized under this Act."

(g) Section 19(d) of the Child Nutrition Act of 1966 is amended by striking subparagraph (6).

AUTHORITY TO ADJUST PAYMENTS AND ASSISTANCE

SEC. 13. (a) The National School Lunch Act is amended by adding a new section at the end thereof as follows:

"AUTHORITY TO ADJUST PAYMENTS AND ASSISTANCE

"SEC. 23. If at any time the Secretary determines that the funds appropriated or otherwise available for carrying out any of the provisions of this Act for any fiscal year are not sufficient to permit him to provide the payments and other assistance required by those provisions, the Secretary shall impose such reductions, terminations or other limitations with respect to such payments and assistance in such amounts as he determines will permit him to carry out the provisions of this Act with the funds appropriated or otherwise available, at such times and in such a manner as he determines will best serve the purposes of this Act."

(b) The Child Nutrition Act of 1966 is amended by adding a new section at the end thereof as follows—

"AUTHORITY TO ADJUST PAYMENTS AND OTHER ASSISTANCE

"SEC. 21. If at any time the Secretary determines that the funds appropriated or otherwise available for carrying out any of the provisions of this Act for any fiscal year are not sufficient to permit him to provide the payments and other assistance required by those provisions, the Secretary shall impose such reductions, terminations or other limitations with respect to such payments and assistance in such amounts as he de-

termines will permit him to carry out the provisions of this Act with the funds appropriated or otherwise available, at such times and in such manner as he determines will best serve the purposes of this Act."

CONFORMING AND MISCELLANEOUS AMENDMENTS

SEC. 14. (a) Section 11 of the National School Lunch Act is amended by—

(1) striking out in the first sentence in subbsection (b) "financing the cost of";

(2) striking out "or 5" in subsection (d);

(3) striking out "section 13 of this Act and" in subsection (e)(1)(C);

(4) striking out the second sentence of subsection (e)(2); and

(5) striking out the second sentence of subsection (e)(3).

(b) Section 4(c) of the Child Nutrition Act is amended by striking out in the first sentence "financing the costs of".

(c) Section 12 of the National School Lunch Act is amended by—

(1) striking out paragraph (d)(3); and

(2) striking out subsection (h).

(d) Section 8 of the National School Lunch Act is amended by—

(1) striking out "or 5" in the first sentence;

(2) striking out "to finance the cost of obtaining" and inserting in lieu thereof "to obtain" in the second sentence;

(3) striking out "and food service equipment assistance in connection with such program" in the second sentence;

(4) striking out the fourth sentence; and

(5) striking out "Federal food cost contribution rate" and inserting in lieu thereof "per meal reimbursement rate" in the fifth and sixth sentences.

(e) Section 7 of the Child Nutrition Act is amended by—

(1) striking out in subsections (a)(1), (a)(2), and (b) "3, 4, and 5" and inserting in lieu thereof "3 and 4";

(2) striking out "13 or" in subsection (a)(2);

(3) striking out "and under 13(k)(1) of the National School Lunch Act" in subsections (a)(5) and (a)(6); and

(4) striking out "(except section 13 of the Act)" in subsection (h).

(f) Section 11(a) of the Child Nutrition Act is amended by striking out "through 5" and inserting in lieu thereof "and 4".

(g) Section 4 of the National School Lunch Act is amended by striking out in the first sentence ", excluding the sum specified in section 5,".

(h) Section 3 of the National School Lunch Act is amended by striking out "13, 17," in the first sentence and inserting in lieu thereof "17".

(i) Section 6(a)(2) of the National School Lunch Act is amended by striking out "sections 11 and 13" and inserting in lieu thereof "section 11".

(j) Section 15(f) of the National School Lunch Act is amended by inserting "bi-" before annually.

(k) Section 14 of the National School Lunch Act is amended by—

(1) striking out ", and title VII of the Older Americans Act of 1965";

(2) striking out subsection (c) and redesignating subsections (d) and (e) as (c) and (d) respectively.

CLAIMS ADJUSTMENT AUTHORITY

SEC. 15. Section 16 of the Child Nutrition Act of 1966 is amended by adding at the end thereof of the following: "The Secretary shall have the power to determine the amount of and settle and adjust any claim and to compromise or deny all or part of any such claim or claims arising under the provisions of this Act, the National School Lunch Act, or the regulations issued pursuant to these Acts, including the power to waive claims if he determines that to do so would serve the purposes of those Acts. The preceding sentence shall not diminish the existing authority of the Attorney General under 28 U.S.C. 516 to conduct litigation on behalf of the United States.".

EFFECTIVE DATES; REPEAL OF EXISTING LEGISLATION; REGULATIONS

SEC. 16. (a)(1) The provisions of sections 6, 7, 10, 12, 14(a)(2), 14(a)(3), 14(c)(1), 14(d)(1), 14(d)(3), 14(e), 14(f), 14(g), 14(j), and 14(k) of this Act shall be effective October 1, 1981. The provision of sections 2, 8, 9, 11, 14(a)(1), 14(a)(4), 14(a)(5), 14(b), 14(c)(2), 14(d)(2), 14(d)(4), 14(d)(5), and 14 shall be effective July 1, 1981 or the first day of the second month following enactment, whichever is later.

(2) The provisions of section 4 of this Act shall be effective July 1, 1981 or 90 days after enactment, whichever is later.

(2) The provisions of section 4 of this Act shall be effective July 1, 1981 or 90 days enactment, whichever is later.

(3) The provisions of sections 3, 5, and 13 of this Act shall be effective July 1, 1981.

(b) Public Law 96-499, the Omnibus Reconciliation Act of 1980, is amended by—

(1) repealing section 201(a) of that Act effective July 1, 1981, or the first day of the second month following enactment, whichever is later;

(2) repealing section 203(b) effective July 1, 1981, or 90 days after enactment, whichever is later.

(c) Regulations implementing this Act shall be issued no later than 60 days after enactment.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., Apr. 3, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for consideration of the Congress is a bill to amend the National School Lunch Act and the Child Nutrition Act of 1966. Also enclosed is a copy of the section by section analysis explaining the changes included in the bill.

This bill seeks to alter the structure of Federal meal subsidies to schools and similar institutions to focus Federal nutrition assistance on the truly needy. These amendments will maintain Federal subsidies for those most in need while eliminating subsidies for middle and upper income families. At a time of limited Federal resources and when we are re-evaluating the appropriate role of the Federal Government, subsidies for meals should only be provided for those who are unable to afford meals without such assistance. The amendments in the bill will result in savings of about $1.9 billion in Child Nutrition Programs in fiscal year 1982.

The Child Nutrition Programs are amended to eliminate subsidies for meals served to students from families with incomes above 185 percent of poverty. These subsidies include subsidies for "paid" meals served as well as a commodity support for "paid" meals. The bill also will continue on a permanent basis the temporary change from semi-annual adjustments of meal subsidy rates to annual adjustments, enacted for fiscal year 1981 in the Omnibus Reconciliation Act of 1980 (P.L. 96-499).

The bill lowers subsidies for reduced price meals in the School Lunch, School Breakfast and Child Care Food Programs. Under these provisions the subsidy for reduced price meals, served to students from families with incomes between 125 percent (plus a standard deduction) and 185 percent of poverty, would be approximately half the level of free meals.

Eligibility for reduced meals is adjusted by eliminating the standard deduction used in determining a family's income level. In addition, the maximum income for receipt of reduced price meals is established at 185 percent of poverty.

The bill provides authority to the Secretary to require the verification of income reported on applications for free and reduced price meals. In addition the bill removes the requirement that schools include the free income limit in letters distributing the application to parents. Schools will simply advise parents of the upper limit of eligibility for free and reduced price meals and indicate that anyone below this level is eligible for either free or reduced price meals.

Three programs, Summer Food Service Program for Children, Nutrition Education and Training, and Food Service Equipment Assistance are being repealed. Additionally, the Food Service Equipment provision in the Child Care Food Program is repealed. There are a number of reasons for the repeal of these programs. The Summer Program has been faced with management problems since its inception due to the nature of the program (short term operation, temporary employees, open air feeding sites, etc.). The program also serves essentially the same population as the Food Stamp Program thus resulting in a duplication of benefits. The Food Service Equipment Assistance Program is being eliminated because we believe the program has fulfilled its primary purpose at this point and is no longer needed as a support mechanism for the School Food Service Program. Finally, we feel the States are in a better position to administer the Nutrition Education and Training Program without the intervention of the Federal bureaucracy.

Other subsidies being eliminated are snack subsidies for the Child Care Program and Federal financing for participation in the School Food Programs by private schools whose yearly tuition exceeds $1500 per child.

In addition, participation in the Special Milk Program will be limited to non-program schools and institutions.

Finally, the bill provides for control of Child Nutrition spending by limiting expenditures under the programs to amounts appropriated by the Congress. The Secretary is given the authority to make such program adjustments as are needed to so limit expenditures.

The Department of Agriculture recommends prompt and favorable action on this bill. The proposals it contains will enable us to redirect program resources to those most in need of their benefits.

An identical letter is being sent to the Speaker of the House.

Sincerely,

JOHN R. BLOCK,
Secretary.

S. 947

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 110(b) of the Agricultural Act of 1949 (7 U.S.C. 1445e(b)) is amended by deleting in clause (3) of the second sentence the phrase ", and the Secretary shall waive such interest on loans made on the 1980 and 1981 crops of wheat and feed grains".

DEPARTMENT OF AGRICULTURE,
Washington, D.C.

Hon. GEORGE H. W. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Senate is a proposed bill "To amend Section 110(b) of the Agricultural Act of 1949 to eliminate the requirement that the Secretary of Agriculture waive interest on loans made on 1980 and 1981 crops of wheat and feed grains placed in the farmer-held grain reserve program".

The Department recommends that the proposed bill be enacted.

When the farmer-owned grain reserve was initiated, farmers were required under program provisions to pay interest on their price support loans received from the Commodity Credit Corporation for the first year the grain was in the reserve program, but interest was waived for subsequent years. In an effort to attract corn into the reserve after the Soviet trade suspension in early 1980, the Secretary directed that first year interest also be waived on loans for a certain amount of corn placed in the reserve program. The Agricultural Act of 1980 increased the minimum loan rates for 1980 and 1981 crop grain placed in the reserve program and directed the Secretary to waive all interest on all loans on 1980 and 1981 crop grain in the reserve program.

The Administration very strongly opposes the mandatory interest waiver and proposes that it be repealed. Under Section 110 of the 1949 Act, the Secretary has authority to waive or adjust interest on loans on grain placed in the reserve program and could continue to do so as necessary to provide special incentives for program participation. A mandatory interest waiver, with its very large costs, significantly limits the Secretary's flexibility to make essential adjustments in loan costs. While we believe the authority to waive interest should continue to be available for use in special circumstances, the mandatory waiver is unnecessarily costly.

This bill will have no effect on the 1980 crops. If this bill is enacted, we intend to restore the farmer-held reserve program to its original status. Interest will be charged for the first year, but will be waived for the second and third year on 1981 crop reserve loans. The outlay impact of removing the mandatory waiver of interest and charging interest for the first year of these reserve loans for 1981 crops of wheat and feed grains is estimated to be a reduction in FY 1981 outlays of $83 million and in FY 1982 outlays of $167 million for a 2 year total of $250 million.

An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget advises that the enactment of this legislation would be in accord with the program of the President.

Sincerely,

JOHN R. BLOCK,
Secretary.

S. 948

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That this Act shall be cited as the "Cotton-Tobacco-Warehouse User Fee Act of 1981."

TITLE I.—COTTON CLASSING AND RELATED SERVICES

SEC. 101. Section 5 of the United States Cotton Standards Act, 42 Stat. 1518, 7 U.S.C. 55, is amended to read as follows:

"The Secretary of Agriculture shall cause to be collected such fees and charges for licenses issued to classifiers of cotton under section 3 of this Act, for determinations made under section 4 of this Act and for the establishment of standards and sale of copies of standards under Section 6 of this Act, as will cover, as nearly as practicable, and after taking into consideration net proceeds from any sale of samples, the costs incident to providing services and standards under such sections, including administrative and supervisory costs. Such fees and charges shall be credited to the current appropriation that incurs the cost and shall remain available until expended to pay the expenses of the Secretary incident to providing services and standards under this Act, the Cotton Statistics and Estimates Act, 7 U.S.C. 471 et seq. and the United States Cotton Futures Act, 7 U.S.C. 15b. The Secretary may provide by regulation conditions under which cotton samples submitted or used in the performance of services authorized by this Act shall become the property of the United States and may be sold with the proceeds credited to the foregoing account: *Provided,* That such cotton samples shall not be subject to the provisions of the Federal Property and Administrative Services Act of 1949, 40 U.S.C. 471 et seq.".

SEC. 102. Section 3a of the Cotton Statistics and Estimates Act, 50 Stat. 62, 7 U.S.C. 473a, is amended by deleting all after the first sentence and inserting in lieu thereof:

"The Secretary is further directed, under such regulations as the Secretary may prescribe, to impose and collect reasonable fees and charges which, together with the net proceeds of sale of samples submitted, shall cover as nearly as practicable, the cost of the services provided, including administrative and supervisory costs. All samples of cotton submitted shall become the property of the United States and may be sold: *Provided,* That such cotton samples shall not be subject to the provisions of the Federal Property and Administrative Services Act of 1949, 40 U.S.C. 471 et seq. All such fees and charges collected under this section and under section 3d of this Act and the proceeds of sale of samples shall be credited in the same manner and to the same account referred to in section 5 of the Cotton Standards Act, 42 Stat. 1518, 7 U.S.C. 55.".

SEC. 103. Subsection (f)(1)(G) of the United States Cotton Futures Act, 90 Stat. 1844, 7 U.S.C. 15b(f)(1)(G), is amended by deleting "in such regulations" and inserting in lieu thereof "in such regulations and shall be credited to the account referred to in section 5 of the Cotton Standards Act, 42 Stat. 1518, 7 U.S.C. 55. The Secretary may provide by regulation conditions under which cotton samples submitted or used in the performance of services authorized by this Act shall become the property of the United States and may be sold with the proceeds credited to the foregoing account: *Provided that,* Such cotton samples shall not be subject to the provisions of the Federal Property and Administrative Services Act of 1949, 40 U.S.C. 471 et seq.".

SEC. 104. The provisions of this title shall become effective July 1, 1981.

TITLE II.—TOBACCO INSPECTION AND RELATED SERVICES

SEC. 201. Section 5 of The Tobacco Inspection Act (7 U.S.C. 511d) is amended by deleting the last two sentences and substituting therefor the following:

"The Secretary shall impose and collect fees and charges for inspection or certification and other services under this section at designated auction markets and for the establishment of standards under section 3. The fees and charges authorized by this section shall, as nearly as practicable, cover the costs of the services including administrative and supervisory costs. Such fees and charges, when collected, shall be credited to the current appropriation that incurs the costs and shall be available without fiscal year limitation for the expenses of the Secretary incident to providing services under this Act. Fees and charges assessed under the provisions of sections 5 and 6 of this Act shall be collected from warehouse operators or persons financially interested in the tobacco: *Provided,* That fees and charges for inspecting or certifying tobacco and performing other services at auction warehouses in designated markets shall be assessed against warehouse operators irrespective of ownership or interest in the tobacco, and such inspection and related services shall be suspended or denied at any such warehouse if the warehouseman fails to pay fees and charges assessed.

Tobacco inspection or certification services for tobacco sold at auction shall be provided only at markets designated pursuant to this section. Tobacco inspection or certification services provided to such auction markets shall take precedence over such services, other than reinspection, requested pursuant to the authority contained in section 6 of this Act or any other provision of law.

SEC. 202. Section 6 of The Tobacco Inspection Act (7 U.S.C. 511e) is amended by revising the first sentence of the second paragraph to read as follows:

"The Secretary shall fix and collect such fees or charges in the administration of this section as will cover as nearly as practicable, the costs of the services provided, including administrative and supervisory costs. Such fees and charges shall be credited into the account referred to in Section 5.".

SEC. 203. The provisions of sections 201 and 202 shall become effective July 1, 1981.

SEC. 204. The Naval Stores Act, 42 Stat. 1435, 7 U.S.C. 91–99, is repealed upon the date of enactment of this Act.

TITLE III.—WAREHOUSE EXAMINATION, INSPECTION, AND LICENSING

SEC. 301. Section 10 of the United States Warehouse Act (7 U.S.C. 251) is amended to read:

"SEC. 10. The Secretary of Agriculture, or his designated representative, shall charge, assess, and cause to be collected a reasonable fee for (a) each examination or inspection of a warehouse (including the physical facilities and records thereof and the agricultural products therein) under this Act; (b) each license issued to any person to classify, inspect, grade, sample, and/or weigh agricultural products stored or to be stored under provisions of this Act; (c) each annual warehouse license issued to a warehouseman to conduct a warehouse under this act; and (d) each warehouse license amended, modified, extended, or reinstated under this Act. Such fees shall cover, as nearly as practicable, the costs of providing such services and licenses; including the administrative and supervisory costs. All fees collected shall be credited to the current appropriation that incurs the costs and shall be available without fiscal year limitation for the expenses of the Secretary incident to providing services under the Act."

SEC. 302. Section 31 of the United States Warehouse Act (7 U.S.C. 271) is amended to read:

"SEC. 31. There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act other than those services for which fees are authorized pursuant to section 10. Such appropriated funds may be used by the Secretary to employ qualified persons not regularly in the service of the United States for temporary assistance in carrying out the provisions of this Act.".

SEC. 303. The provisions of this title shall become effective October 1, 1981.

DEPARTMENT OF AGRICULTURE,
Washington, D.C.

Hon. GEORGE H. W. BUSH,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for consideration by the Congress is a draft bill "To recover costs associated with cotton classing and standards, tobacco inspection and standards, and warehouse examination, inspection and licensing, and for other purposes."

This legislative proposal is part of the President's Program for Economic Recovery and his Fiscal Year 1982 Budget Revisions. The Department of Agriculture strongly recommends its enactment. The draft bill provides:

Cotton classing, standards and related services furnished under authority of the Cotton Statistics and Estimates Act, the U.S. Cotton Futures Act, and the U.S. Cotton Standards Act;

Inspection, grading and standardization services furnished under authority of The Tobacco Inspection Act and the Naval Stores Act;

Inspection, examination and licensing of warehouse under authority of the U.S. Warehouse Act.

Enactment of this legislation will result in outlay savings of $25 million in FY 1982.

Title-by-title summaries of the provisions of the bill are enclosed.

An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that enactment of this proposed legislation would be in accord with the President's program.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

UNITED STATES DEPARTMENT OF AGRICULTURE

TITLE I: PROPOSED LEGISLATION TO RECOVER COSTS ASSOCIATED WITH THE COTTON CLASSING, STANDARDS AND RELATED SERVICES

Under the proposed legislation (1) fees would be charged beginning July 1, 1981, to cotton producers for cotton classing under the Smith-Doxey amendment and such fees would be deposited into an account which shall remain available until expended; (2) net proceeds from the sale of loose cotton would also be deposited into such an account; (3) the market value of cotton samples would also be taken into consideration in establishing the new fees and charges; and (4) fees would be charged for the establishment of cotton standards pursuant to the Cotton Standards Act.

Under the proposed legislation, the program would be on a full cost recovery basis in FY 1982, including administrative and supervisory costs.

Fees were charged for cotton classing services prior to the enactment of the Smith-Doxey amendment which has as one of its primary purposes the development of better quality American cotton. This was achieved by the organization of cotton improvement groups and by encouraging the marketing of cotton on the basis of quality. Free cotton classing was provided to encourage producers to join groups which carried out cotton improvement programs. Cotton improvement groups have been organized across all of the cotton producing area and the Department now classes about 97 percent of the cotton crop each year for growers. Historically, grading programs have been set up on a self-supporting basis or have become self-supporting following their establishment. Therefore, it is considered entirely reasonable that all users of cotton classing services be required to pay a fee for the service.

The Smith-Doxey amendment provides that cotton samples submitted for classing become the property of the Federal Government. Under provisions of the Federal Property and Administrative Services Act of 1949, we are required to dispose of cotton samples under surplus property regulations. All loose cotton accumulations are made available to other government agencies or sold with net proceeds deposited in the Treasury as miscellaneous receipts. Under the proposed legislation, cotton samples would no longer be subject to provisions of the Federal Property and Administrative Services Act of 1949. All samples would be sold with net proceeds deposited in an account where they would remain available until expended. About $3 million would be derived annually from sales of loose cotton.

We estimate that enactment of Title I of the proposed legislation would reduce Federal outlays by $13 million in FY 1982.

TITLE II: TO PROVIDE THAT TOBACCO AND NAVAL STORES INSPECTION, GRADING, AND STANDARDIZATION ACTIVITIES BE PLACED ON A COST RECOVERY BASIS

Nearly all tobacco sold at auction is sold on designated markets. Tobacco inspection at such designated markets has been provided to the public free-of-charge since 1935. Inspection at non-designated markets has always been on a fee basis. Free tobacco grading services were authorized because of a belief that the high taxes imposed on tobacco decreased grower returns because the tax limited consumption. Despite an increase in taxes on tobacco, however, consumption continues to rise. The Department believes that there is no longer any reason to provide free tobacco inspection and, therefore, recommends an amendment to The Tobacco Inspection Act to remove the restrictions against charging for tobacco inspection at designated markets. Since tobacco inspection is primarily a seasonal operation, it is necessary to anticipate the number of inspectors that will be required. Therefore, so that the program will be cost effective and also provide inspection when needed, it is necessary to give priority to tobacco inspection and certification, where tobacco is sold at auction, to markets designated under the Act as proposed in the amendment.

Under the proposed legislation, fees would be charged to cover the services under The Tobacco Inspection Act, including standardization activities which have traditionally been funded by annual appropriations. These services would be placed on a fee basis July 1, 1981, to coincide with the beginning of the flue-cured marketing year. The program would be on a full cost recovery basis in FY 1982, including administrative and supervisory costs. The receipts would be deposited into an account which would remain available until expended.

Pursuant to the Naval Stores Act, the Department performs inspection and grading, as well as standardization of naval stores products (spirits of turpentine and rosin). The law was passed to prevent the misrepresentation, adulteration and misgrading of turpentine and rosin and to provide a basis for uniformity in these products and in marketing practices related thereto. Funds for these activities have always been made available by annual appropriations. The proposed legislation would repeal the Naval Stores Act and place these activities on a cost recovery basis pursuant to the Agricultural Marketing Act of 1946.

We estimate that enactment of Title II of the proposed legislation would reduce Federal outlays by $8 million in FY 1982.

TITLE III: TO RECOVER COSTS ASSOCIATED WITH THE INSPECTION, EXAMINATION, AND LICENSING OF WAREHOUSES UNDER AUTHORITY OF THE U.S. WAREHOUSE ACT

Since passage of the U.S. Warehouse Act in 1916, the inspection, examination, and licensing of warehouses has been administered as a voluntary program with appropriated funds. Fees provided for and collected thereunder have been less than 10 percent of costs, and, in accordance with provisions of the law, have been deposited into the Treasury as miscellaneous receipts. Fees have been charged for examination and inspections made pursuant to applications by warehousemen, or other persons under Section 9, and for warehouse licenses or amendments of such licenses. Fees have also been charged for licensing of applicants to inspect, classify, sample, grade or weigh products. However, fees have never been charged for the inspection and examination of the over 2,100 licensed warehouses or administrative and supervisory costs.

The major program emphasis in the administration of the U.S. Warehouse Act is the semiannual unannounced compliance examinations at each licensed warehouse. The on-site work during the examination process, both before and after licensing, constitutes an independent review or examination of merchandising activities and storage operations, including warehouse records and stored inventory. The information developed is of primary benefit to sellers and depositors, the owners of stored inventory, who individually are not in a position to determine whether their interests are being properly safeguarded. The results of the examination also benefit the licensed warehouseman as a check on the status of merchandising activities, storage operations, inventory of product and records and on the performance of the warehouse employees engaged in actual operation of the warehouse. The examinations contribute to the acceptability of warehouse receipts as security for loan transactions which in turn benefit both the warehousemen and the depositors.

The proposed legislation amends the U.S. Warehouse Act to provide for the imposition of user fees to offset the cost of administering the U.S. Warehouse Act. The costs to be covered include activities involving applications made by warehousemen or others for inspections; original licenses, and amendments to licenses; special and semi-annual unannounced examinations of warehousing and merchandising activities of warehouses; licensing of applicants to inspect, classify, sample, grade or weigh products; and administration and supervision of the program.

We estimate that enactment of Title III of this proposed legislation would reduce Federal outlays by $4 million in FY 1982.

S. 949

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Grain Standards Act, 7 U.S.C. 71 et seq., is amended as follows:

(a) By amending section 7(j) to read as follows:

"(j)(1) The Administrator shall, under regulations as he may prescribe, charge and collect reasonable inspection fees to cover the estimated cost to the Service incident to the performance of official inspection except when the official inspection is performed by a designated official agency or by a State under a delegation of authority. The fees authorized by this subsection shall, as nearly as practicable and after taking into consideration any proceeds from the sale of samples, cover the costs of the Service incident to its performance of official inspection services in the United States and on United States grain in Canadian ports, including administrative and supervisory costs related to such official inspection of grain. Such fees, and the proceeds from the sale of samples obtained for purposes of official inspection which become the property of the United States, shall be deposited into a fund which shall be available without fiscal year limitation for the expenses of the Service incident to providing services under this Act.

"(2) Each designated official agency and each State agency to which authority has been delegated under subsection (e) of this section shall pay to the Administrator fees in such amount as the Administrator determines fair and reasonable and as will cover the estimated costs incurred by the Service relating to supervision of official agency personnel and supervision by Service personnel of its field office personnel, except costs incurred under paragraph (3) of subsection (g) of this section and sections 9, 10, and 14 of this Act. The fees shall be payable after the services are performed at such times as specified by the Administrator and shall be deposited in the fund created in paragraph (1) of this subsection. Failure to pay the fee within thirty days after it is due shall result in automatic termination of the delegation or designation, which shall be reinstated upon payments, within such period as specified by the Administrator, of the fee currently due plus interest and any further expenses incurred by the Service because of such termination. The interest rate on over-

due fees shall be prescribed by the Secretary of Agriculture, but not less then the current average market yield on outstanding marketable obligations of the United States of comparable maturity, plus an additional charge of not to exceed 1 per centum per annum as determined by the Secretary of Agriculture, and adjusted to the nearest one-eighth of one per centum."

(b) By amending section 7A(*1*) to read as follows:

"(*1*)(1) The Administrator shall, under such regulations as he may prescribe, charge and collect reasonable fees to cover the estimated costs to the Service incident to the performance of the functions provided for under this section except as otherwise provided in paragraph (2) of this subsection. The fees authorized by this paragraph shall, as nearly as practicable, cover the costs of the Service incident to performance of its functions related to weighing, including administrative and supervisory costs directly related thereto. Such fees shall be deposited into the fund created in section 7(j) of this Act.

"(2) Each agency to which authority has been delegated under this section and each agency or other person which has been designated to perform functions related to weighing under this section shall pay to the Administrator fees in such amount as the Administrator determines fair and reasonable and as will cover the costs incurred by the Service relating to supervision of the agency personnel and supervision by Service personnel of its field office personnel incurred as a result of the functions performed by such agencies, except costs incurred under sections 7(g)(3), 9, 10, and 14 of this Act. The fees shall be payable after the services are performed at such times as specified by the Administrator and shall be deposited in the fund created in section 7(j) of this Act. Failure to pay the fee within thirty days after it is due shall result in automatic termination of the delegation or designation which shall be reinstated upon payment, within such period as specified by the Administrator, of the fee currently due plus interest and any further expenses incurred by the Service because of such termination. The interest rate on overdue fees shall be prescribed by the Secretary of Agriculture, but not less then the current average market yield on outstanding marketable obligations of the United States of comparable maturity, plus an additional charge of not to exceed 1 per centum per annum as determined by the Secretary of Agriculture, and adjusted to the nearest one-eighth of one per centum."

(c) By amending section 19 to read "There are hereby authorized to be appropriated such sums as are necessary for standardization and compliance activities and any other expenses necessary to carry out the provisions of this Act to the extent that financing is not obtained from fees and sales of samples as provided for in section 7, 7A and 17A of this Act."

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 10, 1981.

Hon. GEORGE H. W. BUSH,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith for the consideration of the Congress is a draft bill "To amend the United States Grain Standards Act to require that fees charged for official inspection and weighing services cover costs to the Federal Grain Inspection Service including administrative and supervisory costs, and for other purposes".

This legislative proposal is part of the President's Program for Economic Recovery and his Fiscal Year 1982 Budget Revisions. The Department of Agriculture strongly recommends its enactment.

The United States Grain Standards Act presently provides that the Administrator of the Federal Grain Inspection Service (FGIS) shall collect fees to cover the costs of the Service incident to its performance of official inspection and weighing of grain, excluding administrative and supervisory costs. However, the FGIS is also responsible for the supervision of the inspection and weighing activities, which may be performed by FGIS personnel or by states and private agencies.

In the 1976 amendments to the United States Grain Standards Act, Public Law 94-582, Congress directed the Administrator of FGIS to collect fees which would cover all inspection and weighing costs, including administrative and supervisory costs directly related thereto, incurred outside the Washington office of FGIS. It further provided that designated agencies and State agencies delegated authority to perform inspection and weighing of grain shall pay to the Administrator, fees to cover the cost (outside the Washington office) of direct supervision of agency personnel and direct supervision by FGIS personnel of its field office personnel. However, the Act was amended again in 1977 by section 1602 of Public Law 95-113 to delete the authority to recover administrative and supervisory costs. This proposed amendment to the Act would reinstate authority to recover administrative and supervisory costs, including costs incurred in the Washington office.

The bill would enable the Federal Government to recover from the users of the inspection and weighing services, whether provided by FGIS, designated agencies, or delegated States, those costs which can be clearly identified as benefiting those being served. Supervision over this work is an essential and integral part of official grain inspection and weighing activities. Consequently, the Administration believes that those who benefit from the services should compensate the Government, rather than continuing to be subsidized by the general taxpayer.

Establishing such charges will reduce Federal outlays by some $25 million in 1982. The additional cost to grain handlers will amount to only about ⅓ cent per bushel of grain.

An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that enactment of this proposed legislation would be in accord with the Administration's program.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

S. 950

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Rural Electrification Act of 1936, 87 Stat. 68, as amended, 7 U.S.C. 901-950b, is amended:

(1) by amending section 305(b), to read "(b) Insured loans made under this title shall bear interest at 5 per centum per annum.";

(2) by deleting in sections 305(a) and 310 the word "rates" and inserting in lieu thereof "rate"; and

(3) by deleting in the fourth sentence of section 306 and in section 307 the words "a loan insured at the standard rate" and inserting in lieu thereof "an insured loan".

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 10, 1981.

Hon. GEORGE H. W. BUSH,
President of the Senate,
U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Congress is a draft bill "To amend the Rural Electrification Act of 1936 to remove provision for the special 2 percent interest rate for insured loans."

This legislative proposal is part of the President's Program for Economic Recovery and his Fiscal Year 1982 Budget Revisions. The Department of Agriculture strongly recommends its enactment.

Existing law mandates the special 2 percent interest rate on insured loans to:

Telephone borrowers whose average subscriber density is three or fewer per mile; and

Electric borrowers whose average subscriber density is two or fewer per mile, or with an average Adjusted Plant to Revenue Ratio over 9.0, computed as set forth in the Act.

The REA Administrator may also provide the special interest rate on an insured loan if he finds the borrower:

Has experienced extenuating circumstances or extreme hardship; or

Cannot, in accordance with generally accepted management and accounting principles, produce net income or margins before interest at least equal to 150 per centum of its total interest requirements on all outstanding and proposed loans with an interest rate greater than 2 per centum per annum on the entire current loan, and still meet the objectives of the Act, or

Cannot, in accordance with generally accepted management and accounting principles and without an excessive increase in the rates charged by such borrowers to their consumers or subscribers, provide service consistent with the objectives of the Act.

The draft bill would eliminate insured loans at the special 2 percent interest rate and provide instead the standard 5 percent interest rate for all insured loans.

The President's Fiscal Year 1981 Budget revisions recommend discontinuance of both insured loans for telephone systems and insured electric loans for power generation and transmission facilities.

For fiscal year 1982, the President is requesting $700 million in insured electric loans for distribution purposes. Under existing legislation, about $100 million of this amount would go to borrowers who would qualify for the special 2 percent interest rate. Requiring these borrowers to pay 5 rather than 2 percent interest would reduce Federal interest subsidy cost per $100 million in loans by some $70 million over the lifetime of the loans. Savings in the first year would be slight because only a small portion of these loans would actually be disbursed and begin to bear interest. However, savings over the first five years would amount to about $10.5 million per $100 million in loans.

If enactment of this legislation results in increases in some subscriber's user charges, the adverse impact will be relatively small in relation to cost increases that are being imposed by higher energy prices. Such increase would also create a positive incentive to conserve energy.

An identical letter has been sent to the Speaker of the House of Representatives.

The Office of Management and Budget advises that enactment of this draft bill would be in accord with the President's program.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

By Mr. THURMOND (for himself and Mr. BIDEN) (by request):

S. 951. A bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes; to the Committee on the Judiciary.

DEPARTMENT OF JUSTICE APPROPRIATION AUTHORIZATION, 1982

Mr. THURMOND. Mr. President, I am introducing today, at the request of

the administration, legislation to authorize appropriations for fiscal year 1982 for the U.S. Department of Justice.

In addition to authorizing appropriations for a number of special activities of the Justice Department, the legislation requests many of the same general provisions which were included in the fiscal year 1981 authorization request, such as uncover operations of the FBI, the use of confidential funds, and authority to pay rewards and the protection of the President by the FBI as required.

A number of changes have been included in the bill to reflect the President's budget priorities for the Department. Reference to the alien property funds, World War II has been dropped since all claims have been resolved and no resources are required for fiscal year 1982. There is also language providing authority for the FBI to modernize its planned automated data and telecommunications system, and language which would allow the Drug Enforcement Administration to reta'n certain funds for the purchase of evidence and for the payment of information.

Provisions are included that would conform the present law to the President's decision to eliminate the U.S. trustees program by the end of fiscal year 1982, and to place the Antitrust Division within the general legal activities area.

A major section in the bill is a proposal to convert the overtime provisions of the Immigration and Nationality Act from the 1931 law to section 5 of the United States Code. This change in the law will result in substantial savings to the Government, with no intended loss of service to those people entering the United States at various points of entry.

Mr. President, the Committee on the Judiciary has already begun hearings on the President's request for fiscal year 1982 for the Justice Department. The bill introduced today will serve as the vehicle for any changes that the committee may seek to make in the administration's request.

I fully expect that hearings on the measure will be completed and action taken on the bill by May 15, 1981, in order to meet the requirements of the Budget Act of 1974, and to expedite consideration of President Reagan's total budget package.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 951

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Justice Appropriation Authorization Act, Fiscal Year 1982".

SEC. 2. There are authorized to be appropriated for the fiscal year ending September 30, 1982, to carry out the activities of the Department of Justice (including any bureau, office, board, division, commission, or subdivision thereof) the following sums:

(1) For General Administration, including—

(A) the hire of passenger motor vehicles;

(B) miscellaneous and emergency expenses authorized or approved by the Attorney General, or the Deputy Attorney General, or the Associate Attorney General, or the Assistant Attorney General for Administration: $37,653,000.

(2) For the United States Parole Commission for its activities including the hire of passenger motor vehicles: $6,461,000.

(3) For General Legal Activities, including—

(A) the hire of passenger motor vehicles;

(B) miscellaneous and emergency expenses authorized or approved by the Attorney General, or the Deputy Attorney General, or the Associate Attorney General, or the Assistant Attorney General for Administration;

(C) not to exceed $20,000 for expenses of collecting evidence, to be expended under the direction of the Attorney General and accounted for solely on the certificate of the Attorney General;

(D) advance of public moneys under section 3648 of the Revised Statutes (31 U.S.C. 529);

(E) pay for necessary accommodations in the District of Columbia for conferences and training activities;

(F) the investigation and prosecution of denaturalization and deportation cases involving alleged Nazi War Criminals: $176,702,000.

(4) For the Foreign Claims Settlement Commission for its activities, including—

(A) services as authorized by section 3109 of Title 5, United States Code;

(B) expenses of packing, shipping, and storing personal effects of personnel assigned abroad;

(C) rental or lease, for such periods as may be necessary, of office space and living quarters for personnel assigned abroad;

(D) maintenance, improvement, and repair of properties rented or leased abroad, and furnishing fuel, water, and utilities for such properties;

(E) advances of funds abroad;

(F) advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission;

(G) the hire of motor vehicles for field use only; and

(H) the employment of aliens: $705,000.

(5) For United States Attorneys, Marshals, and Trustees, including—

(A) purchase of firearms and ammunition;

(B) lease and acquisition of law enforcement and passenger motor vehicles without regard to the general purchase price limitation for the current fiscal year;

(C) supervision of United States prisoners in non-Federal institutions;

(D) bringing to the United States from foreign countries persons charged with crime; and

(E) acquisition, lease, maintenance, and operation of aircraft: $291,206,000.

(6) For Support of United States Prisoners in non-Federal institutions, including—

(A) necessary clothing and medical aid, payment of rewards, and reimbursements to Saint Elizabeths Hospital for the care and treatment of United States prisoners, at per diem rates as authorized by section 2 of the Act entitled "An Act to authorize certain expenditures from the appropriations of Saint Elizabeths Hospital, and for other purposes", approved August 4, 1947 (24 U.S.C. 168a);

(B) entering into contracts or cooperative agreements for only the reasonable and actual cost to assist the government of any State, territory, or political subdivision thereof, for the necessary physical renovation, and the acquisition of equipment, supplies, or materials required to improve conditions of confinement and services of any facility which confines Federal detainees, in accordance with regulations to be issued by the Attorney General and which are comparable to the regulations issued under section 4006 of Title 18, United States Code: $25,600,000.

(7) For Fees and Expenses of Witnesses, including expenses, mileage, compensation, and per diem of witnesses in lieu of subsistence, as authorized by law, including advances of public moneys: $29,421,000. No sums authorized to be appropriated by this Act shall be used to pay any witness more than one attendance fee for any one calendar day.

(8) For the Community Relations Service for its activities including the hire of passenger motor vehicles: $5,313,000.

(9) For the Federal Bureau of Investigation for its activities, including—

(A) expenses necessary for the detection and prosecution of crimes against the United States;

(B) protection of the person of the President of the United States and the person of the Attorney General;

(C) acquisition, collection, classification and preservation of identification and other records and their exchange with, and for the official use of, the duly authorized officials of the Federal Government, of States, cities, and other institutions, such exchange to be subject to cancellation if dissemination is made outside the receiving departments or related agencies;

(D) such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General;

(E) purchase for police-type use without regard to the general purchase price limitation for the current fiscal year and hire of passenger motor vehicles;

(F) acquisition, lease, maintenance, and operation of aircraft;

(G) purchase of firearms and ammuntion;

(H) payment of rewards;

(I) not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and to be accounted for solely on the certificate of the Attorney General;

(J) classification of arson as a Part I crime in its Uniform Crime reports: $739,013,000 of which $5,000,000 for automated data processing and telecommunications and $600,000 for undercover operations shall remain available until September 30, 1983. None of the sums authorized to be appropriated by this Act for the Federal Bureau of Investigation shall be used to pay the compensation of any employee in the competitive service.

(10) For the Immigration and Naturalization Service, for expenses necessary for the administration and enforcement of the laws relating to immigration, naturalization, and alien registration, including—

(A) advance of cash to aliens for meals and lodging while en route;

(B) payment of allowances to aliens, while held in custody under the immigration laws, for work performed;

(C) payment of expenses and allowances incurred in tracking lost persons as required by public exigencies in aid of State or local law enforcement agencies;

(D) payment of rewards;

(E) not to exceed $50,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on the certificate of the Attorney General;

(F) purchase for police-type use without regard to the general purchase price limitation for the current fiscal year and hire of passenger motor vehicles;

(G) acquisition, lease, maintenance, and operation of aircraft;

(H) payment for firearms and ammunition and attendance at firearms matches;

(I) operation, maintenance, remodeling and repair of buildings and the purchase of equipment incident thereto;

(J) refunds of maintenance bills, immigration fines and other items properly returnable except deposits of aliens who become public charges and deposits to secure payment of fines and passage money;

(K) payment of interpreters and translators who are not citizens of the United States and distribution of citizenship textbooks to aliens without cost to such aliens;

(L) acquisition of land as sites for enforcement fences, and construction incident to such fences;

(M) research related to immigration enforcement which shall remain available until expended: $363,376,000 of which not to exceed $100,000 may be used for the emergency replacement of aircraft upon the certificate of the Attorney General.

(11) For the Drug Enforcement Administration for its activities, including—

(A) hire and acquisition of law enforcement and passenger motor vehicles without regard to the general purchase price limitation for the current fiscal year;

(B) payment in advance for special tests and studies by contract;

(C) payment in advance for expenses arising out of contractual and reimbursable agreements with State and local law enforcement and regulatory agencies while engaged in cooperative enforcement and regulatory activities in accordance with section 503a (2) of the Controlled Substances Act (21 U.S.C. 873(a)(2));

(D) payment of expenses not to exceed $70,000 to meet unforeseen emergencies of a confidential character to be expended under the direction of the Attorney General, and to be accounted for solely on the certificate of the Attorney General;

(E) payment of rewards;

(F) payment for publication of technical and informational material in professional and trade journals and purchase of chemicals, apparatus, and scientific equipment;

(G) payment for necessary accommodations in the District of Columbia for conferences and training activities;

(H) acquisition, lease, maintenance, and operation of aircraft;

(I) research related to enforcement and drug control to remain available until expended;

(J) contracting with individuals for personal services abroad, and such individuals shall not be regarded as employees of the United States Government for the purpose of any law administered by the Office of Personnel Management;

(K) payment for firearms and ammunition and attendance at firearms matches;

(L) payment for tort claims against the United States when such claims arise in foreign countries in connection with Drug Enforcement Administration operations abroad;

(M) not to exceed $1,700,000 for purchase of evidence and payments for information (PE/PI) to remain available until the end of the fiscal year following the year in which authorized: $228,524,000. For the purpose of section 709(b) of the Controlled Substances Act (21 U.S.C. 904(b)), such sums shall be deemed to be authorized by section 709(a) of such Act, for the fiscal year ending September 30, 1982.

(12) For the Federal Prison System for its activities including—

(A) for the administration, operation, and maintenance of Federal penal and correctional institutions, including supervision and support of United States prisoners in non-Federal institutions, and not to exceed $100,000 for inmate legal services within the system;

(B) purchase and hire of law enforcement and passenger motor vehicles;

(C) compilation of statistics relating to prisoners in Federal penal and correctional institutions;

(D) assistance to State and local governments to improve their correctional systems;

(E) purchase of firearms and ammunition and medals and other awards;

(F) payment of rewards;

(G) purchase and exchange of farm products and livestock;

(H) construction of buildings at prison camps and acquisition of land as authorized by section 4010 of title 18 of the United States Code;

(I) transfer to the Health Services Administration of such amounts as may be necessary, in the discretion of the Attorney General, for the direct expenditures by that Administration for medical relief for inmates of Federal penal and correctional institutions;

(J) for Federal Prison Industries, Incorporated, to make such expenditures, within the limits of funds and borrowing authority, and in accord with the law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation, including purchase and hire of passenger motor vehicles;

(K) for planning, acquisition of sites and construction of new facilities, and constructing, remodeling, and equipping necessary buildings and facilities at existing penal and correctional institutions, including all necessary expenses incident thereto, by contract or force account, to remain available until expended, and the labor of United States prisoners may be used for work performed with sums authorized to be appropriated by this clause; and

(L) for carrying out the provisions of sections 4351 through 4353 of Title 18 of the United States Code, relating to a National Institute of Corrections, to remain available until expended: $383,784,000.

SEC. 3. Sums authorized to be appropriated by this Act may be used for—

(a) the travel expenses of members of the family accompanying, preceding, or following an officer or employee if, while he is en route to or from a post of assignment, he is ordered temporarily for orientation and training or is given other temporary duty;

(b) benefits authorized under Sec. 901 (5)(6A)(8)(9) and Sec. 904 of the Foreign Service Act of 1980 (22 USC 4081 (5)(6)(A)(8)(9) and 22 USC 4084), and under the regulations issued by the Secretary of State.

SEC. 4. (a) Sums authorized to be appropriated by this Act which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations issued by the Attorney General.

(b) Sums authorized to be appropriated by this Act may be used for the purchase of insurance for motor vehicles and aircraft operated in official Government business in foreign countries.

(c) Sums authorized to be appropriated by this Act for salaries and expenses shall be available for services as authorized by section 3109 of Title 5 of the United States Code.

(d) Sums authorized to be appropriated by this Act to the Department of Justice may be used, in an amount not to exceed $35,000 for official reception and representation expenses in accordance with distributions, procedures, and regulations issued by the Attorney General.

(e) There are authorized to be appropriated for the fiscal year ending September 30, 1982, such sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs.

(f) Sums authorized to be appropriated for "Salaries and expenses, General Administration", "Salaries and expenses, United States Attorneys and Marshals", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Bureau of Prisons" may be used for uniforms and allowances as authorized by sections 5901 and 5902 of Title 5 of the United States Code.

SEC. 5. Notwithstanding the second of the paragraphs relating to salaries and expenses of the Federal Bureau of Investigation in the Department of Justice Appropriation Act, 1973 (86 Stat. 1115), sums authorized to be appropriated by this Act for such salaries and expenses may be used for the purposes described in such paragraph until, but not later than the end of the fiscal year ending September 30, 1982.

SEC. 6. (a) With respect to any undercover investigative operation of the Federal Bureau of Investigation which is necessary for the detection and prosecution of crimes against the United States or for the collection of foreign intelligence or counterintelligence—

(1) sums authorized to be appropriated for the Federal Bureau of Investigation by this Act may be used for leasing space within the United States, District of Columbia, and the territories and possessions of the United States without regard to section 3679(a) of the Revised Statutes (31 U.S.C. 665(a)), section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)), section 305 of the Act of June 30, 1949 (63 Stat. 396; 41 U.S.C. 255), the third undesignated paragraph under the heading "Miscellaneous" of the Act of March 3, 1877 (19 Stat. 370; 40 U.S.C. 34), section 3648 of the Revised Statutes (31 U.S.C. 529), section 3741 of the Revised Statutes (41 U.S.C. 22), and subsections (a) and (c) of section 304 of the Federal Property and Administrative Services Act of 1949 (63 Stat. 395; 41 U.S.C. 254(a) and (c));

(2) sums authorized to be appropriated for the Federal Bureau of Investigation by this Act may be used to establish or to acquire proprietary corporations or business entities as part of an undercover operation, and to operate such corporations or business entities on a commercial basis, without regard to the provisions of section 304 of the Government Corporation Control Act (31 U.S.C. 869);

(3) sums authorized to be appropriated for the Federal Bureau of Investigation by this Act, and the proceeds from such undercover operation, may be deposited in banks or other financial institutions without regard to the provisions of section 648 of title 18 of the United States Code, and section 3639 of the Revised Statutes (31 U.S.C. 521); and

(4) the proceeds from such undercover operation may be used to offset necessary and reasonable expenses incurred in such operation without regard to the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484);

only upon the written certification of the Director of the Federal Bureau of Investigation (or, if designated by the Director, an Executive Assistant Director) and the Attorney General (or, if designated by the Attorney General, the Deputy Attorney General) that any action authorized by paragraph (1), (2), (3), or (4) of this subsection is necessary for the conduct of such undercover operation.

(b) As soon as the proceeds from an undercover investigative operation with respect to which an action is authorized and carried out under paragraphs (3) and (4) of subsection (a) are no longer necessary for the conduct of such operation, such proceeds or the balance of such proceeds remaining at the time shall be deposited into the Treasury of the United States as miscellaneous receipts.

(c) If a corporation or business entity established or acquired as part of an undercover operation under paragraph (2) of sub-

section (a) with a net value of over $50,000 is to be liquidated, sold, or otherwise disposed of, the Federal Bureau of Investigation, as much in advance as the Director or his designee determines is practicable, shall report the circumstances to the Attorney General and the Comptroller General. The proceeds of the liquidation, sale, or other disposition, after obligations are met, shall be deposited in the Treasury of the United States as miscellaneous receipts.

(d)(1) The Federal Bureau of Investigation shall conduct detailed financial audits of undercover operations closed on or after October 1, 1981 and—

(A) report the results of each audit in writing to the Attorney General and

(B) report annually to the Congress concerning these audits.

(2) For the purposes of paragraph (1), "undercover operation" means any undercover operation of the Federal Bureau of Investigation, other than a foreign counterintelligence undercover operation—

(A) in which the gross receipts exceed $50,000 and

(B) which is exempted from section 3617 of the Revised Statutes (31 U.S.C. 484) or section 304(a) of the Government Corporation Control Act (31 U.S.C. 869(a)).

SEC. 7. Section 709(a) of the Controlled Substances Act (21 U.S.C. 904(a)) is amended—

(1) by striking out "and" after "1980", and

(2) by inserting after "1981", the following: "and $228,524,000 for the fiscal year ending September 30, 1982,".

SEC. 8. Section 511(d) of the Controlled Substances Act (21 U.S.C. 881(d)) is amended by inserting "and the award of compensation to informers in respect to such forfeitures" immediately after "compromise of claims".

SEC. 9. Without regard to the provisions of Section 3617 of the Revised Statutes (31 U.S.C. 484), the Drug Enforcement Administration is authorized to—

(a) set aside 25 percent of the net amount realized from the forfeiture of seized assets and credit such amounts to the current appropriation account for the purpose, only, of an award of compensation to informers in respect to such forfeitures and such awards shall not exceed the level of compensation prescribed by 19 U.S.C. 1619;

(b) the amounts credited under this section shall be made available for obligation until September 30, 1983;

(c) such awards shall be based on the value of the seized property or the net proceeds from the sale of such property except that no award may be paid from or based on the value of the seized contraband; and

(d) the remaining 75 percent of the net amount realized from the forfeiture of the seized assets referred to in subsection (a) shall be paid to the miscellaneous receipts of the Treasury:

Provided, That the authority furnished by this Section shall remain available until September 30, 1983, at which time any amount of the unobligated balances remaining in this account, accumulated before September 30, 1982, shall be paid to the miscellaneous receipts of the Treasury: *And provided further,* That the Drug Enforcement Administration shall conduct detailed financial audits, semi-annually, of the expenditure of funds from this account and—

(1) report the results of each audit, in writing, to the Attorney General, and

(2) report annually to the Congress concerning these audits.

SEC. 10. (a) Section 569(a) of Title 28, United States Code, is amended to read as follows:

"(b)(1) Except as provided in paragraph (2), the United States Marshals shall execute all lawful writs, process, and orders issued under authority of the United States, and command all necessary assistance to execute their duties.

"(2) Service of civil process, including complaints, summonses, subpoenas, and similar process, shall not be performed by the United States Marshals on behalf of any party other than the United States, unless performed pursuant to—

"(A) section 1915 of this title or any other express statutory provision, or

"(B) order issued by the court in extraordinary and exigent circumstances".

(b) The amendment made to Title 28, United States Code, by subsection (a) of this section shall take effect on the date of enactment of this Act or October 1, 1981, whichever date is earlier.

SEC. 11. (a) The Attorney General shall perform periodic evaluations of the overall efficiency and effectiveness of the Department of Justice programs and any supporting activities funded by appropriations authorized by this Act and annual specific program evaluations of selected subordinate organizations' programs, as determined by the priorities set either by the Congress or the Attorney General.

(b) Subordinate Department of Justice organizations and their officials shall provide all the necessary assistance and cooperation in the conduct of evaluations, including full access to all information, documentation, and cognizant personnel, as required.

SEC. 12. (a) Chapter 15 of Title 11 United States Code (92 Stat. 2651 et seq.) and Chapter 39 of Title 28 United States Code (92 Stat. 2662 et seq.) are repealed.

(b) Section 408 of the Act entitled "An Act to establish a uniform Act on the Subject of Bankruptcy", approved November 6, 1978 (92 Stat. 2686), is repealed.

(c) Section 330 of Title 11 United States Code (92 Stat. 2564) is amended by striking out "and to the United States Trustees".

SEC. 13. The Act of March 2, 1931 (8 U.S.C. 1353a and 8 U.S.C. 1353b) is hereby repealed.

SEC. 14. The Immigration and Nationality Act is amended by adding after section 283 the following new section:

"283a. Reimbursement by vessels and other conveyances for extra compensation paid to employees for inspectional duties.

(a) The extra compensation for overtime services of immigration officers and employees of INS for duties in connection with the examination and landing of passengers and crews of steamships, trains, airplanes, or other vehicles arriving in the United States by water, land, or air, from a foreign port shall be paid by the master, owner, agent, or consignee of such vessel or conveyance, at the rate fixed under the applicable provisions of 5 U.S.C. 5542 and 5 U.S.C. 5545.

(b) The extra compensation shall be paid if the employee has been ordered to report for duty and has reported, whether or not the actual inspection or examination takes place: *Provided,* That this section shall not apply to the inspection at designated ports of entry of passengers arriving by international ferries, bridges, or tunnels, or by aircraft, railroad trains, or vessels on the Great Lakes and connecting waterways, when operating on regular schedules."

SEC. 15. (a) 8 U.S.C. 1353c (The Act of March 4, 1921 (41 Stat. 1224), as amended), is redesignated as 8 U.S.C. 1353b.

(b)(1) The Act of August 22, 1940, as amended (8 U.S.C. 1353d), is amended by striking the words "the Act of March 2, 1931" and inserting instead the words "section 283a of the Immigration and Nationality Act."

(2) 8 U.S.C. 1353d is redesignated as 8 U.S.C. 1353c.

(c) 5 U.S.C. 5549 is amended by:

(1) striking subsection (2), and

(2) redesignating subsections (3) through (5) as (2) through (4), respectively.

By Mr. PRESSLER:

S. 952. A bill to simplify the program of grants to the States for vocational education and for other purposes; to the Committee on Labor and Human Resources.

GRANTS FOR VOCATIONAL EDUCATION

Mr. PRESSLER. Mr. President, vocational education is one of the most worthwhile Federal, State, and local investments in preparing people for America's work force. Its effectiveness is evident and its potential is growing. Therefore, as the current vocational education authorization draws to an end, it is my pleasure to introduce legislation to extend this important program.

The measure I am introducing today would extend the Vocational Education Act while making some changes in the funding of the programs. There are many approaches to restructuring vocational education programs, and I realize this bill is only one of several concepts which have been suggested. The program does deserve to continue. I hope that the appropriate committees will explore the efficiency of the current programs and that this measure will serve as a vehicle for reviewing the vocational education system. In doing so, I trust we can strengthen vocational education.

This measure extends the Vocational Education Act for 5 years. It also incorporates the bloc grant funding mechanism to give State and local education agencies more flexibility to structure programs in a manner consistent with local priorities.

According to the interim report on vocational education by the National Institute of Education, the procedures for distributing Federal funds have created problems, confusion, and controversy since the passage of the 1976 vocational education amendments. The lack of clarity and the loosely defined priority funding requirements have resulted in overlapping and misunderstood regulations. Every single State has had a funding formula disapproved for one reason or another in the last 3 years. Such complexity and interpretation problems have caused administrative burdens on State vocational education agencies and the schools.

The bill I am introducing is intended to reduce such funding problems by establishing bloc grants to States. As proposed by President Reagan, bloc grants allow for flexibility on the State and local level in meeting the existing needs. By continuing the State plans of the existing law, accountability and priorities will be maintained. However, States will be more capable of targeting resources to the programs most needed in the State and community.

Flexibility in the use of Federal funds is especially important since Federal dollars account for approximately $1 of every $11 spent on vocational education. Representing such a relatively small amount of vocational education resources, the Federal portion should be easily integrated into the State and local projects in order to be effective.

The success of the State and local combined efforts can be clearly exemplified in South Dakota. At the Western Dakota Vo-Tech School in Rapid City, a cooperative venture between the private trucking sector and the school proved that vocational education is a

partnership in approaching employment needs. A truck and diesel technician program evolved when 22 local diesel mechanic shops realized the need for trained diesel mechanics and were willing to contribute money, time, and equipment. Through coordination with the State and local education agency, students receive valuable experience and the industry is able to hire trained workers. In this instance and countless others, education and industry cooperatively recognize and respond to training and manpower needs. South Dakota's 90-percent in-State placement rate for postsecondary vocational education graduates is proof that the programs are working.

However, the need for diesel mechanics in western South Dakota is not necessarily shared by a vocational school in more urban-oriented areas. The widely varied needs of our Nation cannot be met with rigid categorical requirements that actually stifle experimentation in programs. Therefore, the Federal role should be to foster, not mandate, voc-ed efforts.

As a member of the House Voc-Ed Subcommittee during the consideration of the 1976 amendments, I regret that our congressional efforts were not as well defined as necessary. While our intentions for block grants were evident, the interpretation for distribution was left to Federal administrators. I think my legislation will make these intentions more understood and accepted in the States.

Mr. President, I believe it is fitting that we should consider the voc-ed reauthorization at this time. In our goal to revitalize our economy, I believe voc-ed must play a crucial role. A voc-ed environment produces new jobs, improves productivity, strengthens industry and rejuvenates the economy. I believe that through enactment of this legislation we can redefine the Federal role in voc-ed, reduce the bureaucratic burdens on State agencies and make the best use of human potential through vocational education programs.

By Mr. HELMS (for himself and Mr. EAST):

S.J. Res. 63. Joint resolution proposing an amendment to the Constitution requiring a balanced Federal budget; to the Committee on the Judiciary.

PROPOSED CONSTITUTIONAL AMENDMENT PROVIDING FOR A BALANCED FEDERAL BUDGET

Mr. HELMS. Mr. President, I introduce a joint resolution, on behalf of my distinguished colleague from North Carolina (Mr. EAST) and myself to provide that the Constitution be amended to require that Federal outlays do not exceed Federal revenues. In other words, this is legislation to require a balanced Federal budget.

The discipline this amendment would impose on the Congress and the President is imperative. The cost of failing to balance the Federal budget is perilously high. This proposed amendment would allow deficit spending during a "grave national emergency" by a three-fourths vote of both Houses of Congress.

MORALITY OF BALANCED BUDGETS

The Federal Government has no funds to spend except money taken from the taxpayers, or the demonstrably ruinous deficit financing. It takes either through taxation and other revenue-producing activities, or it takes through the financing of budget deficits. Inflation is caused by the monetization of those debts—the excessive creation of money—through the Federal Reserve System's purchase and handling of those Federal debt instruments.

When the Federal Government imposes taxes equal to the amount of the expenditures, then citizens can know to what degree they are being burdened to pay for those Federal outlays. Congress has to approve the taxes to match the level of outlays. Congress has to justify expenditures which are popular or necessary with equal taxes, which are never popular.

When the President and the Congress so operate the Federal Government that the politically popular expenditures exceed the politically unpopular taxes, then Congress is hiding the cost of its largess. Politically, it is a "something for nothing" pretense. It is about as straightforward as a con-game. It is about as honest as a chain letter that promises windfall wealth. It is the ultimate "free lunch," except there's nothing free about it.

Mr. President, let us not be deluded: Inflation is caused by Federal deficit spending, and inflation is the greatest economic disrupter ever conceived by man. And the American people now realize that the evil of inflation is caused by deficit spending.

One major way inflation disrupts the economy is in its destruction of the ability of people to measure relative economic worth. During inflationary periods, the value of currency is not stable, and its utility as the most important standard of measuring value is lost. And when the most important economic standard is corrupted, the other standards in the society come under attack. The relativism inflation imposes on the economy has been paralleled in our time by relativism in other values as well.

Inflation also cripples our society by concentrating economic power in the big corporations and the big unions. Only the big corporations have the power to ride out inflation and the money to pay for economists to aid in overcoming inflation. Only the big unions have muscle to win gains for union members in times of inflation. In other words, the great competitive vitality that our economy has exhibited in the past is discouraged, because the small businesses are hit hardest by inflation, and the small unions are less able to operate. The innovators are discouraged, and penalized, by Government-imposed inflation.

During inflation other centers of power in the society for various educational and charitable work are crippled. The resources of churches, schools, and other non-Government groups and organizations are eroded by inflation, and as a result, the good works that once were performed by non-Government organizations are now left only to Government.

And during an inflationary period, the independence of the individual is undermined. The worker that saves for retirement finds that the value of savings has been cut drastically, and the worker finds Government aid the only way to survive.

INFLATION AND THE FOUNDERS

One of the earliest reasons for forming the union was to preserve the sanctity of contracts between individuals in the various colonies. It was rightly held that for commerce to grow and the Nation to prosper, contracts between citizens should be held enforceable.

But what do we do today?

If I rent a house from someone for a given sum, I am in effect paying a different real amount every month. The lease I signed to rent for a sum certain is being violated regularly—not by either party to that lease, but by the Federal Government which is corrupting the medium of exchange in which that contract is denominated.

By its depreciation of the dollar, the Government has not only eliminated the sanctity of contracts, it has almost made it impossible for a contract to be written in terms of constant value.

An honest dollar is necessary for honest business.

THE ECONOMICS OF BUDGET DEFICITS

Twentieth century budget deficits have been rationalized by politicians because of the allegedly salutary effects that deficits have on the Nation's economy. John Maynard Keynes said that the Government could stimulate economic activity by increasing aggregate demand: That is, by putting money into people's hands through Government deficits. Since Government spending is always politically popular the politicians naturally embraced the economics of Lord Keynes. The less attractive aspects of Keynes' economics were ignored: The inflation, the economic disruptions, and the aggrandizement of Government power.

Keynes' economic theory is today the dominant school of thought in our great Government-supported universities and certainly in the high policy centers of our Government. But, the contemporary Keynesian view of the economy has ceased to fit the facts. The Keynesian policies of stimulation have resulted in inflation and high unemployment—stagflation. When he was asked about these two problems, Jimmy Carter's Secretary of the Treasury said, "We don't know enough about inflation." It was as if the side effects of Keynesian policies indicated something basically wrong with reality rather than something basically wrong with Keynesian economics.

In a predictably self-righteous editorial in the Washington Post, some time ago, the contention was advanced that a balanced budget would put economics back to the era of Calvin Coolidge. The obvious unintentional irony is that it was during Coolidge's administration that Keynes was writing his most important works, and it indeed is the economics of that generation that we must discard.

The "common wisdom" which is held by all practicing Keynesians states that in times of economic slowdowns, the Federal Government should spend more than it takes in to stimulate the econ-

omy. Not only are these attempts at stimulation almost always timed wrong, but the stimulation is almost never accompanied by reciprocal spending cutbacks when the economy is overheated.

Ironically, the Post editorialist overlooked one of the most important tools of demand stimulation—the monetary authority of the Federal Reserve System. And the Fed does not necessarily need the excuse of Federal deficits to expand the money supply.

If the regulation of demand is the axis of economic activity as held by orthodox Keynesians, then the Federal Reserve System should be able to do the job. The politically unattractive part about this is, of course, that the Keynesian politicians would have no excuse for free lunch giveaway programs.

In fact, of course, we are now coming to the realization that the economy is not the simplistic thing that the orthodox Keynesians would have us believe. The economy depends in large part on the kinds of incentives there are for economic activity.

A balanced Federal budget will require Congress to look toward economists that have answers and not excuses. A balanced budget will require that Federal expenditures can justify themselves within the confines of firm spending limits. And, a balanced budget will eliminate the excuse for the scourge of inflation.

The language of my amendment is brief. I believe that the Constitution should not carry involved statute-like verbiage. As a result, however, my proposal does not specifically define the term "outlays." I think that should be clear enough, and I distinctly did not want a constitutional amendment to get into the nuances of the Budget Act.

The other possible criticism of my amendment is that it does not provide for a phase-in of the balanced budget. Obviously, if our gluttonous Government went on a strict diet tomorrow and ceased running up a deficit of a billion dollars every 5 days, there would be drastic, untoward side effects. But constitutional amendments are not passed in a day. They usually take several years—time enough for Congress to get the message and begin trimming down.

Finally, I think that if Congress does not act and act soon, the various States may go ahead and amend the Constitution by the Convention process. Over 20 State legislatures have already approved resolutions calling for a Constitutional Convention to approve an amendment requiring a balanced Federal budget.

I have also introduced legislation initially sponsored by Senator Sam Ervin of North Carolina which would provide for an orderly Constitutional Convention process, so that if the States act in this manner, there will be minimal risk from this unprecedented procedure.

Mr. President, I ask unanimous consent that my joint resolution be printed in the RECORD at this point.

S.J. RES. 63

Resolved, by the Senate and the House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification.

"ARTICLE—"

"SECTION 1. Except when Congress shall determine, by three-fourths of the votes of both Houses thereof, that a grave national emergency exists, the Congress shall assure that the total outlays of the Government during any fiscal year (not including any outlays for the redemption of bonds, notes, or other obligations of the United States) do not exceed the total receipts of the Government during such fiscal year (not including any receipts derived from the issuance of bonds, notes, or other obligations of the United States).".

By Mr. SIMPSON (for himself, Mr. THURMOND, Mr. STAFFORD, Mr. KASTEN, Mr. DENTON, Mr. MURKOWSKI, Mr. SPECTER, Mr. CRANSTON, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. DECONCINI, and Mr. MITCHELL):

S.J. Res. 64. Joint resolution designating August 13, 1981, as "National Blinded Veterans Recognition Day"; to the Committee on the Judiciary.

(The remarks of Mr. SIMPSON on this legislation appear earlier in today's RECORD.)

By Mr. PELL (for himself, Mr. SARBANES, Mr. BAUCUS, Mr. WILLIAMS, Mr. GOLDWATER, Mr. SPECTER, Mr. TSONGAS, Mr. MOYNIHAN, Mr. LEVIN, Mr. RIEGLE, Mr. ZORINSKY, Mr. HAYAKAWA, Mr. INOUYE, Mr. BRADLEY, Mr. METZENBAUM, Mr. BOREN, Mr. EAGLETON, Mr. HUDDLESTON, Mr. DANFORTH, Mr. HOLLINGS, Mr. DURENBERGER, Mr. DODD, Mr. JACKSON, Mr. HART, Mr. NUNN, Mr. PRYOR, Mr. HEFLIN, Mr. MATHIAS, Mr. MATSUNAGA, Mr. BENTSEN, Mr. CRANSTON, Mr. CANNON, Mr. DECONCINI, Mr. BIDEN, Mr. ARMSTRONG, Mr. CHILES, Mr. EXON, Mr. COHEN, Mr. GLENN, Mr. BOSCHWITZ, Mr. ROTH, Mr. WALLOP, and Mr. LEAHY):

S.J. Res. 65. A joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom: by unanimous consent, referred jointly to the Committee on Foreign Relations and the Committee on the Judiciary.

(The remarks of Mr. PELL, Mr. LEVIN, and Mr. HAYAKAWA on this legislation appear earlier in today's RECORD.)

By Mr. PRYOR:

S.J. Res. 66. A joint resolution designating May 6, 1981, as "National Nursing Home Residents Day"; to the Committee on the Judiciary.

NATIONAL NURSING HOME RESIDENTS DAY

● Mr. PRYOR. Mr. President, today I am introducing a joint resolution which proclaims and authorizes the President to designate May 6, 1981, as "National Nursing Home Residents Day."

The month of May has been officially declared "Older Americans Month." The proclamation I am introducing will go even further toward honoring a most significant group within the senior citizens population—the more than 1 million senior citizens who reside in nursing homes throughout these United States.

Mr. President, we are all aware of the growing shift in our population—what is commonly called the graying of America. Currently, the more than 25 million senior citizens make up a full 11 percent of our population. It has been projected that, by the year 2000, 31.8 million, or 12.2 percent of the population, will be 65 years of age or more.

But perhaps even more significant than this general shift in the population is the very dramatic shift that is taking place within the over-65 population itself. I am referring to the fact that between now and the year 2000, the oldest part of our senior citizens population—those 85 years and over—will be growing most rapidly.

This demographic shift translates into some very real challenges for our institutions. It also demands a reassessment of our own personal attitudes toward our elderly, and specifically toward that group of elderly whose value is all too often forgotten—the nursing home residents of our Nation. These citizens, who frequently are treated as a burden, are actually an invaluable source of wisdom and experience. It is our responsibility to foster reintegration of this group into their community—to join in support of this valuable resource that has, throughout the years, helped to make our Nation great.

Therefore, Mr. President, I am proud to introduce this joint resolution in the Senate to set aside a special day in honor of nursing home residents. I hope my colleagues will support this resolution to establish May 6, 1981, as "National Nursing Home Residents Day." It is my understanding that the distinguished chairman of the House Select Committee on Aging, Congressman CLAUDE PEPPER, will introduce an identical joint resolution in the House of Representatives.●

By Mr. INOUYE:

S.J. Res. 67. A joint resolution to establish "National Nurse-Midwifery Week"; to the Committee on the Judiciary.

NATIONAL NURSE-MIDWIFERY WEEK

● Mr. INOUYE. Mr. President, today, I am introducing a Senate joint resolution to proclaim the week of April 19–26, 1982, as "National Nurse-Midwifery Week" in recognition of the unique contribution that our Nation's nurse-midwives have made to the high quality of life that we possess in the United States.

A certified nurse-midwife is an individual who is educated in the two distinct disciplines of nursing and midwifery and who possesses evidence of certification according to the requirements of American College of Nurse-Midwives. The nurse-midwifery practice

is the independent management of the care of essentially normal newborns and women, antepartally, intrapartally, postpartally, and/or gynecologically. This occurs within a health care system which provides for medical consultation, collaborative management, and referral and is in accord with the "functions, standards and qualifications for nurse-midwifery practice" as defined by the American College of Nurse-Midwives.

There are approximately 2,200 nurse-midwives in the United States and the 25 universities across our Nation who have trained nurse-midwives, represent some of the most prestigious institutions that we have; for example, Johns Hopkins, Yale, Columbia, and Georgetown Universities.

Although nurse-midwifery formally began in this country in 1925 when Mary Breckenridge established the first nurse-midwifery service in eastern Kentucky, there has been a significant increase in nurse-midwives only within the past 10 years. In fact, this profession has doubled its membership in the past 5 years and there are projections of nearly 5,000 nurse-midwives serving by the year 1990.

Nurse-midwives practice today in a variety of settings including traditional hospitals, public health departments, private practicing physicians, family planning clinics, and the independent and copractices of other nurse-midwives. They have been working closely with various hospital authorities and the Federal Trade Commission in order to insure that the consumer will truly have complete freedom of choice and as part of this, that the certified nurse-midwife will be able to have hospital admitting privileges.

From all the evidence that I have seen, the availability of high quality nurse-midwife services have very definitely been in the best interest of our Nation. Accordingly, I am introducing this legislation today in order to provide the profession with the public recognition that they so richly deserve.

Mr. President, I request unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 67

Whereas the health and safety of childbearing families is of paramount importance in our society;

Whereas nurse-midwives have practiced in this country since coming to the mountains of eastern Kentucky in 1925;

Whereas the Federal Government has a long history of support for the nurse-midwifery practice and education;

Whereas certified nurse-midwives have demonstrated their ability to give high quality care to normal mothers and babies throughout the maternity cycle, and their emphasis on health teaching and high quality care for well mothers and babies makes them a valuable part of the health care team and makes their services increasingly in demand by the public;

Whereas nurse-midwifery care has a proven record in reducing infant morbidity and mortality;

Whereas nurse-midwifery care has been demonstrated to be cost effective for families and for the Nation;

Whereas childbearing families have found nurse-midwives responsive to their wishes for more participatory maternity care; and

Whereas the Congress has already recognized the autonomous practice of certified nurse-midwives under both Medicaid and the Department of Defense Civilian Health and Medical Program of the Uniformed Services (CHAMPUS): Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Congress declares April 19 to 26, 1982 as National Nurse-Midwifery Week, and Congress recognizes the unique contribution that nurse-midwives have made to mothers and babies in the United States during the past half century.●

ADDITIONAL COSPONSORS

S. 63

At the request of Mr. RANDOLPH, the Senator from West Virginia (Mr. ROBERT C. BYRD) was added as a cosponsor of S. 63, a bill to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization.

At the request of Mr. METZENBAUM, his name was added as a cosponsor of S. 63, supra.

S. 114

At the request of Mr. DECONCINI, the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 114, a bill to establish rational criteria for the imposition of the sentence of death, and for other purposes.

S. 141

At the request of Mr. BENTSEN, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 141, a bill relating to tax treatment of qualified dividend reinvestment plans.

S. 207

At the request of Mr. MITCHELL, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 207, a bill to amend the Bank Holding Company Act of 1956 to limit the property and casualty and life insurance activities of bank holding companies and their subsidiaries.

S. 267

At the request of Mr. DECONCINI, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) was added as a cosponsor of S. 267, a bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes.

S. 408

At the request of Mr. CHAFEE, the Senator from Maryland (Mr. MATHIAS), the Senator from Delaware (Mr. ROTH), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Mississippi (Mr. COCHRAN), the Senator from Indiana (Mr. LUGAR), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Mexico (Mr. SCHMITT), the Senator from Iowa (Mr. GRASSLEY), the Senator from Oklahoma (Mr. BOREN), the Senator from Wyoming (Mr. SIMPSON), and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of S. 408, a bill to amend the Internal Revenue Code of 1954 with respect to the income tax treatment of earned income of citizens or residents of the United States earned abroad, and for other purposes.

S. 432

At the request of Mr. MATHIAS, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 432, a bill to establish a Commission on the International Application of Antitrust Laws.

S. 481

At the request of Mr. HELMS, the Senator from Delaware (Mr. ROTH) was added as a cosponsor of S. 481, a bill to restore the right of voluntary prayer in public schools and to promote the separation of powers.

S. 517

At the request of Mr. BENTSEN, the Senator from Nevada (Mr. CANNON) and the Senator from Florida (Mrs. HAWKINS) were added as cosponsors of S. 517, a bill to amend the Clean Air Act to provide for further assessment of the validity of the theory concerning depletion of ozone in the stratosphere by halocarbon compounds before proceeding with any further regulation of such compounds, to provide for periodic review of the status of the theory of ozone depletion, and for other purposes.

S. 527

At the request of Mr. BAUCUS, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 527, a bill to amend the Internal Revenue Code of 1954 to subject pension trusts to the tax imposed by section 511 on unrelated business income for income related to the sale or rental of farmland and grazing land.

S. 622

At the request of Mr. INOUYE, the Senator from West Virginia (Mr. RANDOLPH), the Senator from North Dakota (Mr. BURDICK), and the Senator from Massachusetts (Mr. KENNEDY) were added as cosponsors of S. 622, a bill to control the export of hazardous wastes.

S. 631

At the request of Mr. DECONCINI, the Senator from North Dakota (Mr. ANDREWS) and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 631, a bill to dismiss certain cases pending before the Education Appeal Board.

S. 664

At the request of Mr. CHILES, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 664, a bill to amend section 481(d) of the Foreign Assistance Act of 1961.

S. 698

At the request of Mr. DECONCINI, the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 698, a bill to authorize the Secretary of the Interior to assist the Yuma County Water Users' Association, Ariz., to relocate the headquarters of such association.

S. 701

At the request of Mr. BENTSEN, the Senator from Delaware (Mr. ROTH), the Senator from Georgia (Mr. NUNN), the

Senator from Arkansas (Mr. PRYOR), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Montana (Mr. MELCHER), the Senator from Arizona (Mr. DECONCINI), the Senator from Nebraska (Mr. EXON), and the Senator from Oklahoma (Mr. BOREN) were added as cosponsors of S. 701, a bill to amend the Internal Revenue Act of 1954 to provide for the exclusion from taxation of interest earned on deposits which are used for residential mortgage lending purposes.

S. 734

At the request of Mr. MITCHELL, his name was added as a cosponsor of S. 734, an original bill to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

S. 750

At the request of Mr. WALLOP, the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 750, a bill to amend the Internal Revenue Code of 1954 to provide nonrefundable tax credits for investments in qualified industrial energy efficiency and fuel conversion projects, and for other purposes.

S. 777

At the request of Mr. TOWER. the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 777, a bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes.

S. 857

At the request of Mr. TOWER, the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 857, a bill to impose quantitative restrictions on the importation of lamb meat.

S. 877

At the request of Mr. CANNON, the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 877, a bill to authorize appropriations for certain maritime programs of the Department of Commerce for fiscal year 1982, and for other purposes.

S. 894

At the request of Mr. CANNON, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 894, a bill to exempt rural electrical cooperatives from fees under the Federal Land Policy and Management Act of 1976.

SENATE JOINT RESOLUTION 12

At the request of Mr. INOUYE, the Senator from Iowa (Mr. JEPSEN), the Senator from Idaho (Mr. SYMMS), the Senator from Michigan (Mr. RIEGLE), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Utah (Mr. HATCH), the Senator from South Dakota (Mr. ABDNOR), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of Senate Joint Resolution 12, a joint resolution to authorize and request the President to designate November 14 of each year as "Operating Room Nurses Day."

SENATE JOINT RESOLUTION 50

At the request of Mr. DECONCINI, the Senator from Delaware (Mr. ROTH), the Senator from Indiana (Mr. LUGAR), the Senator from Maine (Mr. COHEN), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Mississippi (Mr. COCHRAN), the Senator from Missouri (Mr. EAGLETON), the Senator from New York (Mr. MOYNIHAN), the Senator from New York (Mr. D'AMATO), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Utah (Mr. GARN), the Senator from Wyoming (Mr. WALLOP), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of Senate Joint Resolution 50, a joint resolution designating July 17, 1981 as "National POW–MIA Recognition Day."

SENATE CONCURRENT RESOLUTION 4

At the request of Mr. DOLE, the Senator from Utah (Mr. HATCH), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Indiana (Mr. LUGAR), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of Senate Concurrent Resolution 4, a concurrent resolution expressing the sense of the Congress with respect to implementing the objectives of the International Year of Disabled Persons (1981).

SENATE RESOLUTION 74

At the request of Mr. MOYNIHAN, the Senator from Missouri (Mr. DANFORTH), the Senator from Missouri (Mr. EAGLETON), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Ohio (Mr. METZENBAUM), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from Maine (Mr. COHEN) were added as cosponsors of Senate Resolution 74, a resolution relating to actions taken by the foreign ministers of the Nonalined Movement at their recently concluded meeting in New Delhi.

SENATE RESOLUTION 111—SUBMISSION OF A RESOLUTION IN RELATION TO INFANT NUTRITION

Mr. LEAHY submitted the following resolution, which was referred to the Committeee on Agriculture, Nutrition, and Forestry:

S. RES. 111

Whereas it is the right of every child to be adequately nourished as a means of attaining and maintaining proper health, and it is the responsibility of every society to ensure the effective enjoyment of this right so that children may develop to their full potential;

Whereas nutrition is among the most critical needs of infants from birth:

Whereas mother's milk provides the best possible food for infants and breastfeeding provides the optimal biological and emotional means of nourishment for health child development;

Whereas infant feeding practices are of critical importance and inappropriate feeding practices can lead to malnutrition and death, particularly when economic conditions in the home and the community limit access to food, adequate sanitation, and other basic health safeguards;

Whereas member nations of the World Health Organization and UNICEF conscious of these conditions and aware of the impact of certain marketing practices of manufacturers of breastmilk substitutes, have been developing a code to promote health programs which encourage breastfeeding and guide the development of acceptable marketing practices of breastmilk substitutes;

Whereas the formulation of this code was affirmed by consensus at the May 1980 World Health Assembly, and the Executive Board of the World Health Organization unanimously approved a proposed draft of such a code in January 1981, which is to be submitted to member nations at the World Health Assembly in May 1981; and

Whereas the United States has historically been the world leader in advocating and upholding the rights of all individuals for adequate nutrition and health, and the United States Government supported resolutions on breastfeeding, infant nutrition, and sales promotion of infant foods which were adopted by the World Health Assembly in 1974, 1978, and 1980: Now, therefore be it

Resolved, That it is the sense of the Senate that:

(1) the United States representatives to the meeting of the World Health Assembly in May 1981 should vote in favor of adopting the "International Code of Marketing of Breastmilk Substitutes," proposed by the World Health Organization and UNICEF, and should oppose amendments which weaken the purpose or delay the use of this code;

(2) the American infant formula industry should abide by the guidelines of this code, particularly with respect to exports and activities of subsidiaries in developing countries;

(3) the President should actively encourage the governments of other countries exporting infant formula to call upon the infant formula industries in their respective countries to comply with this code; and

(4) the President should cooperate with the governments of developing countries in their efforts to develop health standards and programs designed to implement the objective of this code.

● Mr. LEAHY. Mr. President, today I am submitting the infant nutrition resolution. along with Senator HATFIELD.

This resolution expresses the support of this body for the World Health Organization (WHO) and UNICEF's efforts to combat infant malnutrition by supporting breastfeeding and countering the trend toward inappropriate and potentially dangerous infant feeding practices. Specifically, the resolution calls for the President to support the International Code of Marketing of Breastmilk Substitutes, which has been developed by WHO and UNICEF in close consultation with health and nutrition scientists, government health ministries, nongovernmental organizations active in the areas of health, nutrition, development and consumer affairs, and representatives of the infant formula industry.

The persistance of widespread hunger and malnutrition in the world continues to be one of the most awesome challenges confronting humanity. Hunger has many faces, but is perhaps most tragic when it strikes at the lives of children. Over 200 million young children are chronically malnourished, and each year more than 11 million children die before reaching their first birthday. Less well known is the fact that each year as many as 10 million infants in developing countries suffer acutely from the effects of bottle feeding under poverty conditions.

Mother's milk provides all of the essential nutrients required for infant health, as well as a range of natural anti-infective properties. It is the optimal means of feeding for all infants for at least the first 4 to 6 months. When mothers have ready access to clean water, refrigeration and modern stoves, are able to read formula labels and mixing instructions, and have sufficient incomes to be able to mix formula full strength, feeding with for-

mula can be a viable alternative to breastfeeding. But in most areas of developing countries, infant formula use has been shown to be extremely hazardous. Dr. Halfdan Mahler, Director General of WHO has said:

> Evidence from the Third World indicates that infants breastfed for less than 6 months, or not at all, have a mortality rate 5 to 10 times higher in the second 6 months of life than those breastfed for 6 months or more.

Modernization and urbanization are among the major causes of declining breastfeeding and increased bottle feeding. Another important (and relatively more controllable) cause has been the vigorous advertising and promotional campaigns undertaken by formula manufacturers, billboards, posters, calendars, and "baby books" have been used to promote formula use. "Milk nurses" or "mothercraft" workers, often dressed to resemble nurses, have visited mothers in maternity wards, in clinics and in homes, offering free samples of formula. Once interrupted, the process of lactation can be extremely difficult to reestablish.

James Grant, executive director of UNICEF, has highlighted the importance of countercyclical measures to protect breastfeeding:

> In the crucial first few months of life, breastfeeding is usually the young child's life-line. And the recent drift towards the bottle feeding of babies, a drift for which the industrialized world has provided both the example and the means, has costs tens of thousands of young lives.
>
> Sadly, therefore, "advertising" the fact that breast milk is best is now also a necessary step in improving child health . . .
>
> In part, the campaign for breastfeeding must also be a campaign to regulate those who promote and sell commercial infant formula to mothers who do not need it, cannot afford it, and are unable to safely use it.

No one argues seriously that infant formula should be withdrawn from the marketplace. A small percentage of women are physiologically incapable of breastfeeding; for their children, formula can be lifesaving. All mothers, of course, should be able to make their own choices about infant feeding practices. Mothers should be able to make informed choices, however, with full knowledge as to the benefits of breastfeeding and the health risks posed by bottle feeding.

The WHO/UNICEF code represents a major first step forward toward safeguarding the practices of breastfeeding and restricting the more egregious forms of advertising and promotion of commercial breast milk substitutes. The code is based on the findings and recommendations of the historic October 1979 WHO/UNICEF Meeting on Infant and Young Child Feeding, which brought together 150 representatives from international health and development organizations, member governments, the health and nutrition sciences, nongovernmental organizations such as OXFAM, the Christian Medical Commission and the Infant Formula Action Coalition, and the infant formula industry.

The same broad cross-spectrum of individuals and organizations have been fully represented in the series of consultations convened by WHO and UNICEF as an integral part of the process of developing the code. A final draft of the code has now received the unanimous support of the executive boards of both WHO and UNICEF.

At last year's World Health Assembly, the resolution calling on the staff of WHO and UNICEF to develop a code passed unanimously, with almost 60 delegations speaking on the need for a strong code. In the United Kingdom, Under Secretary for Health Sir George Young recently announced that his Government would support the code. Young's announcement came after more than 180 Members of Parliament from all parties had signed an "Early Day Motion" in support of the code. The code itself is expected to receive virtually unanimous support this year.

Recently three American infant formula companies announced their opposition to the code, after previously expressing support. In my view, these companies are taking an extremely shortsighted position. In light of the overwhelming support which the code has received from both developed and developing countries—and the fact that these companies wish to continue operating in these same countries—together with the fact that this code is to be adopted as a recommendation to be voluntarily complied with, it seems to me that these formula companies are seriously overreacting. To again quote UNICEF's Mr. Grant:

> It is hard to see the disadvantages for responsible manufacturers if a general Code of Marketing is implemented that prevents less responsible producers from using undesirable forms of brand competition.

I am submitting this resolution today as a reminder that our Nation continues to be deeply concerned about the fate of all of the world's children and committed to working for a world in which no child need go to bed hungry at night.

I urge my colleagues to support the Infant Nutrition Resolution.●

AMENDMENTS SUBMITTED FOR PRINTING

CONSTRUCTION OF DEEP DREDGE HARBORS

AMENDMENT NO. 31

(Ordered to be printed and referred to the Committee on Environment and Public Works.)

Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill (S. 809) to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep-draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances.

CONSTRUCTION OF INLAND WATERWAY PROJECT

AMENDMENT NO. 32

(Ordered to be printed and referred to the Committee on Environment and Public Works.)

Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill (S. 810) to provide for the recovery of capital and operation and maintenance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects.

Mr. DOMENICI. Mr. President, I am today submitting amendments designed to improve both our inland waterway system and our coastal port system. These two amendments seek to augment these systems in a way that makes sense economically, and in a way that assures more rapid development of the truly needed projects.

As many of my colleagues know, I have long believed that our Nation no longer has the luxury of being able to subsidize major commercial beneficiaries of waterborne transportation. Such subsidies create economic distortions that damage competitive modes of transportation and prove unfair to the American taxpaying public. A sound system of cost recovery not only lessens those distortions, but it provides a mechanism to assure the public that only the truly necessary and important projects will be built to meet the long-term needs of our country.

The legislation I am introducing today would continue a significant Federal subsidy for waterborne transportation. But the amendments provide for a phased reduction in the level of that subsidy, and assure greater market participation in the selection of projects. Very simply, if the users of a proposed project are willing to pay a substantial portion of the costs of a project, as well as its future operation and maintenance, the Congress and the public will know that the project is likely to prove a wise investment. Cost-sharing will give the taxpayers a sense of confidence they now lack.

Because of that confidence, the Congress will be able to expedite projects. In fact, these amendments authorize the construction of future commercial waterway and port projects, eliminating the need for protracted and frustrating congressional delays. Let me explain how the two amendments work.

The first amendment replaces language in S. 809, which is the administration's proposal for cost-recovery on deep-draft channels. My alternative approach is intended to provide for more rapid port improvements in return for cost-sharing on certain projects. It offers port operators this option: you pay for part of the cost, and we will move your project to the head of the list of work to be accomplished.

Section 2 spells out various congressional findings; these are clear and need no further explanation.

Section 3 creates an automatic authorization procedure that will enable the Secretary of the Army, acting through the Chief of Engineers, to deepen any major harbor beyond the depth of 40 feet whenever a local public entity—either a State or city or regional authority—agrees to pay half the projects construction costs during the construction period, plus 75 percent of the future operation and maintenance costs for the project. The local public entity must provide the Secretary of the

Army with evidence that it has established a mechanism that will assure those payments.

The local public entity would have a variety of options. It might establish a port fee system collected from vessels using the port, or it might issue bonds, or it might utilize general revenues. The choice is strictly a local one.

Subsection (b) makes it clear that the local public agency has the authority to collect a user fee from users of the channel—a fee that might be designed to enable the local agency to pay off revenue bonds or to repay the local portion of the cost of operations and maintenance.

Once the local public entity provides the assurances I have described toward the costs of the construction and operations, the Secretary of the Army is directed to give a high priority, in his request for the budget, to the construction of that project over projects of similar character.

I anticipate that such an automatic authorization process, plus priority funding, would truly expedite project development. Yet I remain open to other suggestions for methods to assure even more completely that such work would be moved forward as rapidly as possible.

I should add that there may be a need to create greater flexibility in the method for making the local payment, or even allowing the local interests to move forward to dredge the main harbor channels as a fully local project, outside the program of the Corps of Engineers.

Let me explain why I believe such an approach is very important. A few weeks ago, the Committee on Environment and Public Works heard testimony from the Army Corps of Engineers. The corps told us that it could not complete a proposed deepending of Norfolk Harbor in Virginia until 1989, even assuming that everything falls into place—that there are no hitches in authorizing or funding the project, or in obtaining such items as the necessary dredging equipment and spoil disposal areas.

I find such slow process totally unacceptable. We must find a better approach, which is what this bill seeks to achieve.

This amendment includes one further technique for expediting the program. If the local public entity also agrees to repay the full costs of the corps' studies to design the project, the Secretary of the Army will give that study a high priority in any request for general investigation funds and he will be directed to expedite that study and complete it within 3 years. Obviously, there are cases where the study could be completed in much less time; the point is that the study should be completed as rapidly as possible.

A major problem with the corps program for port development—and water resources in general—is the total absence of priorities. If Congress were to authorize and fund the Norfolk project, we are also likely to authorize and fund similar projects for New Orleans and Mobile and Charleston and Galveston and any number of other important ports.

We must find some way to allow the market and the shippers to select the cost-effective priority. My proposal will assure the citizens of Norfolk, or the citizens of Mobile, or the citizens of Galveston, or the citizens of New Orleans that if they and their customers can get their act together, the Federal Government will move their project ahead as rapidly as possible. I would hope that such work could be completed in periods far shorter than the 8 years projected by General Heiberg. That may not be possible, but at least it will be completed in 8 years. The funds will be focused on those ports which need to be deepened, rather than being spread broadly—and slowly—among a large number of ports, dragging the completion dates well into the 1990's or beyond.

I should point out that this approach is strictly discretionary; if a port decides not to cost-share and thus obtain priority treatment, it may still receive funding in the traditional—although slow—process.

My second amendment replaces the language in S. 810, which is the administration's cost-recovery proposal for inland waterways. My alternative would establish a new cost recovery system for inland navigation. In many ways, it is similar to legislation I sponsored several years ago. That earlier legislation passed the Senate, but did not become law.

This amendment establishes a percentage cost recovery for inland waterways that is identical to what I have proposed for coastal ports: 50-percent capital expenditures, plus 75 percent of operation and maintenance expenditures.

There are a couple of significant changes from my 1977 and 1978 legislation. First, that earlier legislation had required 100-percent cost recovery on operations and maintenance. This amendment reduces that figure, but envisions a more rapid imposition of user charges—5 years, rather than 10 years.

Specifically, this amendment requires that in the initial year of cost recovery (fiscal year 1983), the users of the system would pay 25 percent of the total expenditures for operations and maintenance; in the second year, 50 percent of those operating expenditures; in the third year, 75 percent of expenditures for operations and maintenance; in the fourth year, 75 percent of operations and maintenance, plus 25 percent of the capital expenditures from the preceding year. In the fifth year, and thereafter, the percentage would stand at 75 percent of operations and maintenance, plus 50 percent of capital expenditures. User fees would be based on the previous year's expenditures for such work.

It must be noted, of course, that this amendment provides a permanent 25-percent Federal subsidy of operations and maintenance costs, plus a 50-percent capital subsidy. I do not know that these suggested percentages are set at the correct levels. However, I do believe that they represent a sound starting point. And, I believe that a case is more likely to be made for higher levels of cost recovery, rather than lower.

Currently, Federal law imposes a modest fuel tax on the inland barge system, a tax which President Reagan has suggested be sharply increased. I would make two points. First, my amendment provides that any fuel tax payments by an operator be credited as an offset against the user fees to be paid by that operator. There would be no double collection; some of the percentage fee would be paid by existing fuel tax, with additional charges collected in lockage fees, segment charges, and other methods that more accurately reflect the use and cost of the inland waterways.

Second, I believe a user fee that is more closely related to the location of expenditures makes more sense, lessening the danger and problems of cross-subsidies within the waterways industry.

This amendment also envisions a change from current law in the definition of inland waterways, eliminating the present exclusion of the Tennessee-Tombigbee and various other waterways that now are free of any charge or tax.

I believe this bill offers major benefits to the waterway industry, in return for this fee. Section 5 provides automatic authority for the Secretary of the Army, using funds from the Inland Waterways Trust Fund, to construct new inland waterways projects. It will work this way: If the Corps of Engineers finds that a waterways project is cost effective and sound from an engineering and environmental basis, and represents a priority need in the development of the waterways of the United States, the Secretary may, without further congressional authorization, use the trust fund to build the project. Thus, assuming there is enough money in the trust fund, the Secretary of the Army, working with the waterways industry, would have the sole discretion to construct those projects essential to the development of a sound waterway system.

I am convinced this will provide a useful tool in expediting projects, assuring that there will no longer be unnecessary and needless fights and delays over whether or not to build projects such as locks and dam 26 on the Mississippi.

I would also like to explain how the Waterways Trust Fund would work. Present law requires that the trust fund be expended on waterway projects, when authorized and appropriated by Congress. Under the legislation I am introducing today, both the existing tax and the new user charges would be deposited in the trust fund. Moneys in that fund would be guaranteed to be available for spending on new waterway construction projects; projects now under construction would be continued by direct appropriations.

It is my intent that the fund—financed by both operating and construction charges—would be the sole source of new construction work. But I recognize that such a limitation may eventually prove impractical, and that some general revenues eventually may have to be transferred to the fund to assure rapid project work.

Mr. President, I believe these amend-

ments represent a sound approach. Yet I do not pretend that it is the ultimate answer. Rather, I am convinced that they provide a basis for discussion, and I believe they merit the serious consideration of my colleagues and the industries affected.

I should point out that I do not offer these amendments in any effort to undercut the administration. I commend the administration for its initiative. However, I believe that the Committee on Environment and Public Works needs to consider alternative approaches to assure that we eventually report the most practical and effective legislation to get these programs moving forward on a fair basis.

Mr. President, I ask unanimous consent that a copy of a chart showing the costs of my amendment to S. 810, plus a copy of both amendments, be printed at this point in the RECORD. I should note that the figures in the chart assume the fiscal year 1982 level of waterways funding, a level that may not persist once the Tennessee-Tombigbee project nears completion, and once the waterways industry begins to press for the more cost-effective projects as a technique for lowering its overall expenditures.

There being no objection, the amendments and table were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 31

Beginning with page 1, line 3, strike all through line 3 on page 8 and insert in lieu thereof the following:

"This Act may be cited as the "Coastal Port Improvement Act of 1981."

"CONGRESSIONAL FINDINGS

"SEC. 2. (a) Congress finds that:

"(1) An increase in the volumes of coal, grain, and other bulk commodities that are exported by the United States is in the interest of the continuing development of productive jobs in the nation's private sector and improvement in the nation's balance of international payments;

"(2) Increased exports will be more economical if shipped on vessels having drafts greater than can now be accommodated at harbors of the United States; and

"(3) The absence of any realistic consideration of the needs and demands of shippers and the marketplace in the selection of priorities in the construction of major harbors is wasteful of national resources, and, therefore, fails to meet the transportation needs of the United States.

"(b) Congress further finds that within the limited funds that will be available to the United States for major harbor improvements, investments should be undertaken in a manner that provides the greatest possible degree of assurance that such investments will prove wise and will provide economic benefits to the Nation.

"(c) Therefore, the Congress declares that the sound economic development of the Nation requires the dredging of major harbors, on the basis of their priority, to depths greater than now exist, and that economic considerations and priorities are best implemented when commercial and other direct beneficiaries of such improvements participate, through cost-sharing, in the selection and the expeditious completion of such needed projects.

"(d) It is, therefore, the purpose of this Act to establish a system of cost-sharing in the development of major harbors that promotes the more expeditious construction of needed harbor projects to depths greater than 40 feet, and further promotes equity and efficiency among all harbor projects.

"PROJECT AUTHORIZATIONS

"SEC. 3. (a) The Secretary of the Army, acting through the Chief of Engineers (hereinafter in this Act referred to as the "Secretary"), is authorized to deepen any major harbor to a depth greater than 40 feet below mean low water whenever a non-Federal public body requests such deepening and, upon completion by the Secretary of the necessary engineering and environmental studies and cost estimates for such work, agrees in writing to pay 50 per centum of the project construction cost during the period of construction, plus 75 per centum of future operating and maintenance costs of such project. Prior to the initiation of construction, such non-Federal public body shall provide to the Secretary evidence that it has established a mechanism, satisfactory to the Secretary, that will assure such payments.

"(b) Any non-Federal public body that signs an agreement with the Secretary under the terms of subsection (a) of this section is authorized to recover all or a portion of the body's share of the cost of the work to be performed pursuant to subsection (a) of this section through the collection of fees from commercial vessels utilizing such works.

"(c) Whenever a non-Federal public body agrees in writing with the Secretary to repay the cost of the studies and estimates described in subsection (a) of this section once such studies and estimates are completed, the Secretary shall give such study and estimates a high priority in any request for general investigation funds, and shall expedite such study and estimates, together with environmental reviews, and seek to complete such study, estimates, and review within three years of their initiation.

"(d) Payments by a non-Federal public body under the terms of this section shall be made to the Secretary, who shall deposit such payments in the general fund of the Treasury.

"PRIORITY TREATMENT

"SEC. 4. Once a local public entity provides the assurances described in Section 3(a) of this Act, the Secretary shall in any request for construction funds, give a high priority to the construction of such project over projects of a similar character, and seek to complete such project as rapidly as possible."

AMENDMENT NO. 32

Beginning on page 1, line 5, strike all through line 2 on page 6 and insert in lieu thereof the following:

"CONGRESSIONAL FINDINGS

"SEC. 2. (a) The Congress finds that construction of an inland navigational system that imposes on the direct beneficiaries of such system only a nominal cost, and a cost which is unrelated to the improvements to such system, is unfair to the operators and users of competing modes of transportation and creates distortions in transportation usage that are wasteful of the resources of the United States.

"(b) The Congress declares that national economic development requires the maintenance of an adequate inland waterway system; however, as a matter of equity and efficiency, the commercial users of this inland waterways system should contribute a fair proportion of the Federal navigation-related costs involved in building, operating, maintaining, and rehabilitating such waterways, directly related to such costs.

"(c) It is, therefore, the purpose of this Act to authorize the construction of projects on the inland waterways of the United States and that such projects shall be financed by a system of user charges that will promote greater equity and efficiency among all models of transportation and demonstrate the economic feasibility of projects on the inland waterways of the United States, providing a market test for their need.

"SCHEDULE OF USER CHARGES

"SEC. 3. (a) Not later than nine months after the date of enactment of this Act, the Secretary of Transportation shall, after consultation with the Secretary of the Army, and after conducting public hearings and permitting not less than forty-five days for public comment, publish in the Federal Register proposed regulations for a system of user charges (including methods of collection) intended to recover that portion of the Federal navigation-related costs of the operation, maintenance, new construction, and rehabilitation of the inland waterways of the United States described in subsection (d) of this section. After receiving comments on the proposed regulations required by this subsection, the Secretary shall, no later than July 1, 1982, promulgate final regulations that establish a schedule and method of collection of user charges to be paid by commercial users of the inland waterways of the United States. Notwithstanding any other provision of law, such charges shall become effective on October 1, 1982. In establishing user charges under this section, the Secretary of Transportation is authorized and directed to assure that user charges applying to any particular existing segment of the inland waterways of the United States shall be set at a level so as not to cause severe economic disruption among the commercial users of such segment.

"(b) The schedule of user charges promulgated under this section shall, to the extent reasonable and equitable, be determined, in accordance with subsection (d) of this section, on the basis of the full costs of operating, maintaining, constructing, and rehabilitating the inland waterways of the United States, and various segments thereof, during the preceding fiscal year, and may reflect (1) the volume of commercial traffic; (2) seasonal and other repetitive peak demands for use of the inland waterways of the United States; and (3) any other factors that the Secretary of Transportation, after consultation with the Secretary of the Army, finds reasonable and equitable.

"(c) The Secretary of Transportation, in promulgating final regulations under this section, is authorized to utilize, but is not limited to, one or more of the following mechanisms as a way to recover a portion of the Federal navigation-related costs from the commercial users of the inland waterways of the United States: (1) license fees; (2) congestion charges; (3) charges based on ton-miles over a given segment; (4) lockage fees; and (5) charges based on the capacity of cargo vessels, loaded and unloaded, over various segments of the inland waterways of the United States. No charge shall be collected from, or imputed to, the use of any inland waterway that is not operated and maintained by the United States.

"(d)(1) User charges authorized by this Act shall be adequate to recover (A) 75 per centum of the full navigation-related expenditures of the Secretary of the Army, acting through the Chief of Engineers, on the operation and maintenance of the inland waterways of the United States in accordance with paragraph (2) of this subsection, and (B) 50 per centum of the full navigation-related expenditures of the Secretary of the Army, acting through the Chief of Engineers, on new construction and rehabilitation of the inland waterways of the United States in accordance with paragraph (3) of this subsection.

"(2) During the first year that user charges established under this section are effective, such charges shall be equal to 25 per centum of the total expenditures described in subparagraph (A) of paragraph (1) of this sub-

section, and shall be increased by 25 per centum of such total expenditures for each of the succeeding two years until 75 per centum of such total expenditures is reached.

"(3) During the fourth year that user charges established under this section are effective, such charges shall, in addition to the charges in subparagraph (A) of paragraph (1) of this subsection, be equal to 25 per centum of the total expenditures described in subparagraph (B) of paragraph (1) of this subsection, and shall be increased by 25 per centum of such total expenditures in the succeeding year.

"(e) Charges under this section shall be collected by the Secretary of Transportation and deposited in the Inland Waterways Trust Fund established by Section 203 of the "Inland Waterways Revenue Act of 1978" (Public Law 95–502).

"PENALTY FOR FAILURE TO PAY

"SEC. 4. Failure to pay any user charge established under this Act shall subject the violator to a forfeiture of not more than $10,000 per day, and prohibit the violator from the use of any lock on the inland waterways of the United States that is operated and maintained by the United States during the period of violation of this Act. Such forfeiture shall be collected by the Secretary of the Treasury and deposited in the Treasury.

"PROJECT CONSTRUCTION

"SEC. 5. The Secretary of the Army, acting through the Chief of Engineers, is authorized to utilize funds deposited in the Inland Waterways Trust Fund, established by Section 203 of the "Inland Waterways Revenue Act of 1978" (Public Law 95–502), to construct projects for improvements on the inland waterways of the United States, *Provided*, That such Trust Funds monies shall be the sole source of Federal funds for projects for which construction is initiated subsequent to the enactment of this Act; and *Provided further*, That no further authorization by Congress of a project to be constructed under this section shall be necessary, so long as the Secretary of the Army, acting trough the Chief of Engineers, finds that such project is cost-effective, sound on an engineering and environmental basis, and represents a priority need in the development of the inland waterways of the United States.

"TAX OFFSET

"SEC. 6. In establishing any regulations promulgated to provide for the recovery of the costs of operating, maintaining, constructing, and rehabilitating the inland waterways of the United States under this Act, the Secretary of Transportation shall allow, as an offset or deduction, any payment of a tax on fuel used in commercial transportation on inland waterways required by Section 4042 of Chapter 31 of the Internal Revenue Code.

"DEFINITIONS

"SEC. 7. As used in this Act, the term—

"(a) 'user charges' means a charge established by the Secretary of Transportation, under the authority of section 3 of this Act, to be paid by the owner or operator of shallow-draft cargo vessels that use the inland waterways of the United States for commercial purposes;

"(b) Not withstanding the provisions of Section 206 of the Inland Waterways Revenue Act of 1978 (Public Law 95–502), 'inland waterway of the United States' means any improved waterway operated and maintained by the United States, the improvements to which are primarily for the use of commercial vessels other than oceangoing vessels, and does not include the Great Lakes, their interconnecting channels, and the Saint Lawrence Seaway.

"(c) 'Commercial users' means common contract or other carriers for hire and owners or operators of private shallow-draft cargo vessels."

COST BREAKDOWN OF DOMENICI AMENDMENT TO S. 810

[In millions of dollars]

	Fiscal year—				
	1983	1984	1985	1986	1987 and thereafter
Inland waterways expenditures:					
Estimate of Corps of Engineers, Reagan budget expenditures on inland waterways for fiscal year 1982:					
Operations and maintenance	$284.0	$284.0	$284.0	$284.0	$284.0
Construction	488.1	488.1	488.1	488.1	488.1
Total	772.1	772.1	772.1	772.1	772.1
Estimated user charges imposed by bill:					
Based on expenditures listed above	71.0	142.0	213.0	335.0	457.0
Estimated fuel tax offset:					
Public Law 95–502	60.0	80.0	80.0	100.0	100 0
Estimated net user charges	11.0	62.0	133.0	235.0	357.0

AUTHORIZATION OF APPROPRIATIONS FOR DEPARTMENT OF STATE

AMENDMENT NO. 33

(Ordered to be printed and referred to the Committee on Foreign Relations.)

Mr. MOYNIHAN submitted an amendment intended to be proposed by him to the bill (S. 784) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State.

● Mr. MOYNIHAN. Mr. President, today I submit an amendment that conforms well to one of the distinctive themes of the still young administration, which has placed deserved emphasis on the dangers posed by international terrorism. Among the groups that spread this scourge in international life, none is more deadly than the Palestine Liberation Organization and yet, despite the deadliness of its program, none is accorded greater respect. The PLO has been able to secure for itself rights and privileges usually accorded only to states.

This problem appears to be well understood in the new administration. Its spokesmen seem determined to combat the growing international disregard of the true nature of the PLO and to reverse the organization's success in gaining legitimacy for its repugnant purposes. In an interview with ABC News, Mr. Richard Allen, the President's assistant for national security affairs, recently spoke the truth that American administrations have too long wished to sidestep. That the PLO is to be understood as a terrorist apparat if it is to be understood at all.

In this light it is unfortunate that the administration's State Department authorization request for fiscal 1982 and 1983 should lack the very provisions that were attached by the Congress 2 years ago in an effort to prevent even indirect American subsidy of the Palestine Liberation Organization. Two years ago, Mr. President, I submit to this body—as did then Congressman Wolff in the other body—an amendment to the last State Department authorization bill. We proposed, and both Houses of Congress agreed without objection, that the United States should withdraw any contribution to the United Nations to support two units within the U.N. that serve as front organizations for the PLO. These are the Committee for the Exercise of the Inalienable Rights of the Palestinian People, and the Special Unit on Palestinian Rights. The former organization, it will be recalled, was created by the General Assembly on November 10, 1975, the day that it also declared Zionism to be a form of racism. Since that time, this body, like its sister unit, has been run as an arm of the PLO.

Because this seemed intolerable to the entire Congress 2 years ago, we adopted the restrictions of the Moynihan-Wolff amendment, that the U.S. contribution to the United Nations be reduced by an amount equal to 25 percent of the budget of the two PLO bodies. As a result the U.S. contribution to the United Nations was reduced in this past year by $190,775. In the present year, the U.S. payment will be cut by $228,550.

The amendment I submit today would continue this pattern of reductions, and I hope that the Senate Foreign Relations Committee will wish to adopt it once more. If it is attached to S. 784, the State Department authorization bill, this amendment would have an impact much like that of the one described above. The budgetary effect of this cut would as before be modest, but its importance lies in expressing the view of the Congress that the United States cannot abide the role that the PLO has acquired at the United Nations. It is beyond our power at this time to undo this role, but we hardly need subsidize what we find utterly repugnant.

Accordingly we take the extraordinary step of withholding a small portion of the assessed contribution of the United States. The United Nations will find it hard to operate if members freely withhold funds to express disapproval of particular budget items. But we do not take this step lightly. We take it to express our very deep alarm that the PLO, whose purposes run counter to those of international society, has been admitted as a member in good standing within that society. We are alarmed that the United Nations has conferred legitimacy on an organization dedicated to the destruction of one of the U.N.'s members.

Mr. President, I first introduced this measure 2 years ago. Last November I introduced a measure making comparable cuts in U.S. contributions to UNESCO

programs that are operated in conjunction with the PLO.

Its purpose was similar to the amendment I propose today.

It may in time prove desirable to tie together these amendments in legislation that imposes comprehensive restrictions on U.S. payments to international organizations. Yet as we study this possibility, we should make as clear as we can—by attaching this amendment to S. 784—that the United States can have no part in support of whatever sort for the Palestine Liberation Organization. The American taxpayer will not bankroll terrorism.

Mr. President, I ask that the amendment be printed in the RECORD with my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 33

After Section 102, insert the following new subsection:

SEC. 102(b). Funds appropriated under paragraph (2) of subsection (a) may not be used for payment by the United States, as its contribution toward the assessed budget of the United Nations for any year, of any amount which would cause the total amount paid by the United States as its assessed contribution for that year to exceed the amount assessed as the United States contribution that year less—

(1) 25 percent of the amount budgeted for that year for the Committee on the Exercise of the Inalienable Rights of the Palestinian People (or any similar successor entity) and

(2) 25 percent of the amount budgeted for that year for the Special Unit on Palestinian Rights (or any similar successor entity).

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate today, Wednesday, April 8, to hear hearings on the following pending nominations:

R. Tenney Johnson, William H. Coldiron, Garrie E. Carruthers, G. Ray Arnett, and Robert F. Burford.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY REGULATION

Mr. HUMPHREY. Mr. President, I would like to announce for the information of the Senate and the public, that the hearings previously scheduled on the amendments to the Powerplant and Industrial Fuel Use Act are rescheduled for Thursday, April 23 and Friday, April 24 at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

For further information regarding these hearings, you may wish to contact Mr. Howard Useem or Ms. Marilyn Burkhardt at 224–5205.

SUBCOMMITTEE ON WATER RESOURCES

Mr. ABDNOR. Mr. President, the Subcommittee on Water Resources, which I am pleased to chair, will conduct 3 days of hearings during the Senate's Easter recess. The subcommittee will meet on April 21, 22, and 23, with several additional days of hearings to be scheduled in succeeding weeks.

This will, I believe, prove to be a most important series of hearings, for I am convinced that the development of a water projects and policy bill may prove to be one of the most significant activities of the 97th Congress. I urge my colleagues, as well as the public, to study the issues before us, and to help us develop reasonable and thoughtful solutions to the various issues.

Mr. President, I ask unanimous consent that a copy of the committee's press release announcing the hearings be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS, U.S. SENATE

The Subcommittee on Water Resources will conduct hearings on water resources projects and legislation on Tuesday, April 21, Wednesday, April 22, and Thursday, April 23, 1981, Senator James Abdnor (R-S.D.) announced.

"These hearings will examine the entire issue of water resources policy and project development," said Abdnor, Chairman of the Senate's Water Resources Subcommittee. "With several additional days of hearings to be held later in the spring, together with field hearings this summer, we hope to establish a foundation that will enable the Subcommittee to write the first significant water resources bill since 1976.

"I am hopeful that our Committee will be able to report legislation to the Senate during this session," Abdnor added.

Abdnor listed a number of the issues the Subcommittee will examine, and which witnesses will be asked to discuss during the hearings:

(1) Why spending on water projects has declined significantly in recent years, and what can and should be done to reverse that decline?

(2) Why project development takes so long, and what impediments to development can be removed?

(3) How past commitments for water development can be fulfilled in a fair and rapid manner?

(4) Should the states be involved to a far greater degree in project consideration and development? If so, how?

(5) What options are available for restructuring the responsibility for national water policy and water resources research within the Department of Interior?

(6) How should priorities be established among various types of water projects?

(7) What can be done to accelerate port development, particularly to facilitate increased coal exports?

(8) Are changes in cost-sharing arrangements necessary? If so, what changes would prove fair and beneficial to water development?

(9) Should the scope of the water resources program be expanded to include such purposes as desalting and single-purpose water supply projects?

The initial hearings will focus on state program assistance, the Federal interest in water research, dam safety, as well as various other policy issues. Subsequent hearings will examine issues relating to port and waterway development, S. 621, and urban water supply, Abdnor said.

Among the specific legislative proposals to be considered by the Subcommittee will be the Administration's proposal to impose cost-recovery user charges for inland waterway and coastal port development (S. 809 and S. 810), plus various other port development proposals (S. 68, S. 202, S. 576, and S. 828), legislation to establish a block allocation approach for water project funding (S. 621), dam safety legislation (S. 761), various other water policy proposals (including S. 305, S. 420, S. 423, and S. 454), together with a variety of bills and proposals to authorize or deauthorize specific projects.

The Subcommittee's ranking minority member is Senator Moynihan. Other Subcommittee members are Senators Domenici, Gorton, Murkowski, Bentsen, and Baucus.

The hearings will begin at 10 a.m. and 2 p.m. on April 21 and 22, and at 10 a.m. on April 23, in Room 4200 of the Dirksen Senate Office Building in Washington, D.C.

Persons wishing to testify, or to submit statements for the hearing Record, should contact Carole Cristiano at the Committee on Environment and Public Works. The Subcommittee will seek to accommodate any person wishing to testify, either during the April hearings or at subsequent hearings.

SUBCOMMITTEE ON INNOVATION AND TECHNOLOGY

Mr. WEICKER. Mr. President, the Subcommittee on Innovation and Technology of the Small Business Committee will hold a hearing on May 1, 1981, on S. 881, the Small Business Innovation Research Act of 1981. The hearing will convene at 9:30 a.m. in room 424 of the Russell Senate Office Building. For additional information, contact Anne Sullivan at 224–5175. Senator RUDMAN will chair the hearing.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, on Thursday, May 7, 1981 the Committee on Small Business will hold a full committee hearing on the Small Business Administration's pollution control bond guarantee program and S. 580, a bill to increase the funding levels for the program. The hearing will convene at 9:30 a.m. in room 424 Russell Senate Office Building. Senator HAYAKAWA will chair.

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, on Thursday, April 30, the Subcommittee on Federal Expenditures, Research and Rules of the Senate Committee on Governmental Affairs will hold an oversight hearing to identify current problems concerning the Federal procurement system. This hearing will be the first of several hearings to be held by the subcommittee pending submission of the administration's proposal for a uniform procurement system in October. The hearing will be held in room 3302 of the Dirksen Senate Office Building, beginning at 2 p.m.

SUBCOMMITTEE ON LABOR

Mr. NICKLES. Mr. President, the Labor Subcommittee of the Labor and Human Resources Committee will hold 2 days of oversight hearings on the Davis-Bacon Act on April 28 and 29. The hearings will begin at 9:30 a.m. in room 4232 of the Dirksen Senate Office Building. Members of the public wishing to testify should submit a written request as soon as possible.

ADDITIONAL STATEMENTS

ACCELERATED DRILLING—BUT LESS OIL

● Mr. METZENBAUM. Mr. President, when President Reagan decontrolled the price of oil on January 28, Energy Secre-

tary Edwards promised the people of this Nation that decontrol will bring sharply increased domestic production during the next 5 years. "Raise the price of oil to the level set by OPEC," Secretary Edwards told us—"and the major oil companies will have sufficient incentive to drill for oil in the United States."

This promise, of course, flies in the face of the production estimates given by the Department of Energy's Energy Information Administration and by the major oil companies themselves. During the past 7 years the average price for a barrel of domestic crude oil has gone up more than 1,200 percent. Yet, during the same period, domestic production in the lower 48 States has declined from just over 9 million barrels a day to just under 7 million barrels a day. The addition of Alaskan production does not turn the numbers around. Including Alaska, total domestic production has dropped during the past 7 years from 9.21 million barrels a day to 8.61 million barrels a day.

According to EIA, that decline will continue. For 1981, EIA forecasts domestic production will be 8.55 million barrels a day—regardless of whether the price per barrel is $37 or $50 or $100. For 1982, the number is 8.5 million barrels a day, and EIA reports that the decline will continue throughout this decade.

Skyrocketing oil prices have, of course, produced a massive increase in domestic drilling activity. According to the Hughes drilling rig count, there were 1,581 domestic rigs in place on March 1, 1976. As of 2 weeks ago, that number had almost tripled to 3,492.

But drilling holes in the ground does not mean increased domestic oil supplies. In an article appearing in the February 6, 1981, issue of Science magazine, Charles A. S. Hall and Cutler J. Cleveland of Cornell University's section on ecology and systematics analyzed the amount of petroleum found per foot of drilling effort in the United States during the past three decades. The authors noted that in the 1930's the oil companies gathered almost 250 barrels of oil for every foot drilled. By the mid-1950's this figure was down about 40 barrels a foot. In 1978, the oil companies were finding only 10 to 15 barrels for every foot drilled, and the numbers continue to drop.

The authors reported that increased domestic drilling means that by the mid 1980's the oil companies will be consuming more oil than they will find. Unless the oil companies are able to develop a vastly superior method of locating domestic oil pools, the authors say it will not be long before "the energy cost of obtaining a barrel of oil is the same as the energy in that barrel." In light of the decreasing production returns and the sharp increasing drilling activities of the oil companies, the authors conclude, "the current trend of increasing conventional exploration efforts by the oil industry may not be in the interest of the Nation as a whole."

Mr. President, the Reagan administration has adopted an energy policy which refuses to accept the fact that our domestic oil supplies are declining. This administration has announced its intention to scrap programs designed to conserve our dwindling oil resources by increasing our energy efficiency. This administration also plans to eliminate programs that foster alternative and renewable energy sources. In light of the severe shift in energy policy now underway. I believe it is particularly important that the Senate examine this study. I ask that the study along with an article in the Wall Street Journal written by Jerry E. Bishop, be printed in the RECORD.

PETROLEUM DRILLING AND PRODUCTION IN THE UNITED STATES: YIELD PER EFFORT AND NET ENERGY ANALYSIS

(Abstract. For the past three decades the quantity of petroleum (both oil and oil plus gas) found per foot of drilling effort in the United States for any given year can be expressed as a secular decrease of about 2 percent per year combined with an inverse function of drilling effort for that year. Extrapolation of energy costs and gains from petroleum drilling and extraction indicates that drilling for domestic petroleum could cease to be a net source of energy by about 2004 at low drilling rates and by 2000 or sooner at high drilling rates, and that the net yield will be less at higher drilling rates.)

Production and reserves of U.S. liquid and gaseous petroleum peaked in the early 1970's and generally have declined since then despite considerable increases in drilling effort. Continued increases in effort are likely in the near future because imports carry a heavy economic and political price and because recent increases in oil prices have given petroleum corporations considerable quantities of new working capital. But the Carter Administration and Congress have imposed a large "windfall profits tax" on petroleum corporations, which will decrease the capital available for additional exploratory effort. On the other hand, oil industry advertisements and some politicians have promised large new exploratory efforts and oil supplies if government decreass regulation and taxation of the industry. Finally, some geologists have been telling us for years that not very much new oil will be found no matter who does or does not regulate what. Clearly, an important question for this nation is to what degree we should increase drilling effort and to what degree such an increase would achieve the goal of finding additional new oil.

Fortunately, the statistical behavior of certain aspects of the industry as a whole has shown several regularities that make it possible to analyze past trends and, for the courageous, to make predictions. The principal proponent and practitioner of statistical approaches to analyzing the production history of the industry has been Hubbert (*1*), who has documented the very large decline in the rate at which new oil was discovered per foot of exploratory drilling as exploratory effort was expended over time. He found that in the early 1930's some 250 barrels of oil were found per foot of exploratory drilling as compared to about 40 barrels per foot in the 1950's. Hubbert extrapolated these observations to predict that discovery rates would continue to decline, and that the ultimate yield of petroleum from the lower 48 states of the United States would be from 150 to 200 $\times$ 10^9 barrels. He refined his analysis in successive publications, but all his later estimates have agreed reasonably well with his initial estimates made in 1956 and with the historical behavior of the petroleum industry. During the 1960's, however, there was a stabilization and even an increase in the rate at which petroleum was found per foot of exploratory well drilled, so that Hubbert's analysis appeared to some to be no longer applicable (*2*). This stabilization gave encouragement to those who thought that large new quantities of conventional petroleum would be found in the continental United States, since the increase in drilling effectiveness could be attributed to the many improvements in geophysical theory and technology that had occurred in the petroleum industry. During the 1970's, however, the ratio of petroleum found per unit of drilling effort fell to levels at and below those of the 1950's.

Our analysis is a revision and extension of the classic Hubbert analysis, based on the returns of petroleum per total drilling effort as a function of both time and drilling effort at any point in time. The inclusion of the effort component (that is, the number of feet drilled in any 1 year) is important because, as developed below, the variable success rate of drilling for any given year can be expressed simply as Hubbert's secular downward trend (as the resource is depleted over time as a function of cumulative effort) coupled with an inverse linear relation to drilling effort. Such a relation between yield and effort has been observed for copper (*3*) and for fish (*4*) and it is similar to the familiar economic concept of diminishing returns.

Our analysis, straightforward in principle, is constrained by the nature of the available data base, which was developed for purposes not closely related to the present analysis. It is possible to modify the data base slightly so that our requirements are met. Estimates of drilling effort, subdivided according to exploratory footage and development footage, are given yearly since 1925 (*5, 6*) (Fig. 1a). "Additions to proved reserves" also are available for each year, subdivided according to "new field" (NF), "new pools in old fields" (NPOF), "revisions" (REV), and "extensions" (EX). Our analysis is complicated by the fact that about 80 percent of the oil added to reserves comes from REV and EX rather than from NF and NPOF. Most REV and EX are confirmed through development drilling (D_d) rather than exploratory drilling (De), since D_d adds to the information base on a known field and adjacent regions in years subsequent to an initial discovery and gives concrete measurements of actual reserves. Because we are interested in total gains (additions to reserves) related to total drilling effort, we use the ratio

$$YPE = \frac{NF + NPOF + REV + EX}{D_d + De}$$

where YPE is yield per effort in barrels per foot (*7*). In a sense the use of this ratio overestimates the effort used to find petroleum since some of that effort was solely for production, but it does give a running average of the total effort used to bring new petroleum to society, and this relation is appropriate for both our later yield versus effort and our cost versus yield analysis (*8, 9*).

Figure 1b shows the relation of YPE for oil, and oil plus gas, for the years 1946 through 1978. For both oil and oil plus gas, periods such as the late 1960's, when the finding rates were high relative to the general secular trend, were characterized by relatively low drilling effort. Conversely, periods such as the mid-1950's and late 1970's were characterized by high effort and low yield as compared to the secular trend. One can see the relation of yield and drilling effort more clearly if the points in Fig. 1a are connected for all years with high effort (about 220×10^6 feet per year), all years with medium effort (about 180×10^6 feet per year, not plotted for clarity), and all years with low effort (about 130×10^6 feet per year) as

they have occurred at various times since 1946 (10) (Fig. 1b). The results of these analyses indicate that there has been an approximately parallel decline in finding rates per effort for high, medium, and low rates of effort, and that the actual yield per effort for any year is an inverse function of both the year (and hence the depletion of reserves left to be found) and the drilling effort for that year.

In other words, the important trends of the year-to-year yield per effort for both oil and oil plus gas can be expressed as a secular decrease of about 2 percent per year in the rate of petroleum added to reserves per foot of drilling effort and an increase or decrease of about 5 percent for each million feet of lesser or greater effort. This conclusion is further supported by a multiple regression analysis of data points for both all oil and all oil plus gas (1946 through 1978) which confirmed ($P < .01$) that YPE is both decreasing with time and, at all times, is a decreasing function of effort (*11*). In this regression model the secular trend explained about 52 percent of the variation among all oil data points, the effort component explained another 40 percent, and only about 8 percent of the total variation was unexplained by either time or effort (*11*). For oil plus gas the corresponding percentages are 63, 82, and 18 percent, respectively, although a squared term for effort improves the fit, indicating the importance of effort. The only significant deviation between the linear model and the data occurs for the late 1960's, a time of relatively low effort: about 20 percent more gas was found than predicted.

There are two ways in which our analysis falls. First, when we include the previously excluded Prudhoe Bay find (the largest field ever found in the United States and a very atypical find), the YPE for oil and oil plus gas jumps to, respectively, 80 and 120 barrels per foot for 1968, and the associated R^2 values, as defined in (11), drop to about .05 (no effort) and .22 (with effort), respectively. Although the last 200 wells drilled in Alaska have been essentially dry holes (*12*), Alaska as a whole still has a YPE since 1965 of some 1580 barrels of oil per foot.

The second way in which our analysis fails is that our estimates of YPE for 1979, based on the data for 1946 through 1978, and the linear time and effort components used for our initial analysis, were low, predicting only 16 percent of the additions to oil reserves reported and 64 percent of the oil plus gas found in this high-effort year. There are three possible reasons beyond a statistical quirk. First, we may be, in fact, becoming more clever at finding oil. Second, we may have explored more new petroleum provinces in 1979 than in the past. Third, because of the increased value of oil relative to the cost of finding it, there were economic incentives for upgrading previously known, but previously uneconomic, low-quality fields to the status of reserves. This upgrading process took place in 1979 with a portion of the Kern River field (discovered in 1899), whose "revision" in 1979 was a large contributor to the additions to reserves reported in 1979.

The principal reason for the secular decline in petroleum finding rates appears to be that we are no longer locating many of the relatively rare large petroleum fields that historically have been the largest additions to reserves. Since there are about 2.5×10^6 petroleum wells in the United States, there is not much room left between boreholes in sedimentary rock for many of the very large fields that take up many tens to hundreds of square kilometers (*9*).

Why should YPE be related to effort? This makes sense for fish, as the fish can recover through reproduction and growth when not fished. Petroleum, obviously, cannot recover, at least on time scales of interest to our species. One possible explanation is that, when drilling rates are low, the petroleum industry drills at locations where present information suggests that success is most likely. During years of high drilling effort, additional drilling is done at other, less likely locations. Presumably relatively inexpensive petroleum-finding theory development, seismic charging, and interpretation occur at a more constant rate than drilling effort, so that when drilling effort (that is, economic incentive) is low, it is concentrated in areas where success appears most likely. When drilling effort (and economic incentive) is high, much of that effort is directed at additional targets less likely to produce a large find. In a sense it is promising but untested geologic information that is depleted as wells are drilled and that accumulates in the absence of drilling. The decrease in drilling rates after 1956 is associated with the inauguration of government taxation policy that decreased the profitability of finding oil. Had that not occurred, our present finding rates probably would be considerably lower than they are now. Other possible explanations are that since 1974 much of the increased effort has been concentrated in mature, well-known fields where chances of some success are great but the chances of large new discoveries (and hence large additions to proved reserves) are very low, or that less efficient drilling companies contribute a higher percentage of all drilling when economic incentives are high.

The principal use of petroleum is as fuel, and the oil exploration-extraction and refining industry (taken together) is the second most energy-intensive industry in the United States. The time at which domestic petroleum will no longer, on the average, be a net fuel for the nation is not when all the wells run dry but rather at some point before that time when the energy cost of obtaining a barrel of oil is the same as the energy in that barrel. The cost is, at a minimum, a running average of the energy cost of drilling a foot of petroleum well and delivering the petroleum found by that drilling to society. Comprehensive statistics on the economic activity and the energy use of the petroleum exploration and development industry are available (*13*), from which we were able to calculate the energy cost of drilling and extraction.

A quantity of energy equivalent to about 1½ barrels of petroleum was used per foot of drilling by the petroleum exploration and development industry in 1977, slightly more than half directly as fuel and the rest as fuel to produce the equipment and services used. This energy use has been increasing in recent years (see Fig. 1b) as the petroleum industry has drilled increasingly to greater depths, at offshore locations, and in hostile environments such as Alaska, and as a larger percentage of petroleum is produced as a result of energy-intensive secondary and tertiary recovery. An additional 0.4 barrel equivalent per mean foot was used in 1977 for refining petroleum but was not included in Fig. 1b.

We have extrapolated linearly the trends in energy cost and energy gained as a function of drilling intensity (Fig. 2). If we were to decrease drilling rates to a low level of 130×10^6 feet per year, the lines would intersect in 2004. Were we to continue to drill at the 1978 levels of about 200×10^6 feet per year, the linear extrapolations would intersect in 2000. For oil alone, we could reach the break-even point within about a decade. An extrapolation of the rate of increase in the drilling rate that occurred from 1971 to 1978 indicates that the break-even point for oil could occur in the mid-1980's.

One might question our linear extrapolation, for certainly other finding rates may characterize the future. The assumption of linearity is most strongly supported by the remarkably parallel least-squares fit of all four lines in Fig. 1b and by the very high correlation coefficients associated with the analysis. It is, of course, possible that generic changes in the oil industry would make some other line (such as an asymptotic decline) a better fit 30 years from now, but that possibility cannot be supported now on the basis of existing data.

In our analysis we assume that the first derivative of changes in the petroleum industry's exploratory and development methods remains constant. There could be significant deviations from the projections of Fig. 2, if, for example, new provinces (such as the Bering or Chukchi Sea, very deep sediments, or overthrust belts) were explored differently from past years. Most remaining new petroleum provinces will be very energy-intensive to exploit, and so intensive new province drilling could work to either increase or decrease the time until the intersection of the energy costs and gains. But it is only from such unexplored areas that we reasonably can expect to find the very large oil fields that are necessary if a change in the sharply downward trend of the YPE in Fig. 1b is to occur. One possible conclusion from our analysis is that it might be advisable to do most exploration only in new provinces. A somewhat similar conclusion was reached by Menard and Sharman (*9*).

Most domestic oil (and presumably gas) that is now produced comes from reserves discovered before 1940 (*14*). We see little hope for changing this picture very much through increased conventional drilling effort, and in fact such effort could decrease the total energy delivered to society by the petroleum industry by lowering the efficiency of that energy-intensive industry. Integrating the extrapolated regions of Fig. 2 for the period from 1980 to the intersection of the energy cost and gain lines gives a projected ultimate additional net yield of 20×30^9 barrels equivalent for a low drilling effort and 27×10^9 barrels equivalent for a high drilling rate. Thus, developing our remaining reserves slowly could increase somewhat our projected ultimate net yield. On the other hand, after the energy gain decreases below the energy cost, petroleum could still be pumped at a monetary profit for feedstocks or, by using alternative fuels (such as coal), for an energy source in oil fields.

The results of our analysis indicate that the current trend of increasing conventional exploration effort by the oil industry may not be in the best interest of the nation as a whole because of the lower efficiency with which the industry delivers petroleum to society at higher rates of drilling, and also because such efforts appear to offer a "solution" to the decline in domestic conventional production. In fact, it appears that no genuine long-term solution exists unless there is a dramatic change in the way that we go about finding petroleum.

7. Since the date at which a given oil or gas find is confirmed and added to official reserves estimates is often later than the year of actual discovery (and hence the year in which the effort was expended), it is necessary to back-correct (slip) the additions-to-reserves data. The lag is approximately 2 to 3 years for NF and NPOF and 1 to 2 years for REV and EX (E. Murphy and D. Moorehouse, personal communication). We have incorporated these corrections by determining 3-year running averages (and 3- and 5-year running averages for NF and NPOF) of yield with (i) 1- to 3-year slippage (1 year for final analysis) for REV and EX, and (ii) a 2- to 5-year slippage (2 years for final analysis) for NF and NPOF discoveries. The different slippages and averaging assumptions used had little effect on our results (R^2 varied by only .02 for oil and .19 for oil plus gas over the whole range of slippage tested). Our analysis also was insensitive to whether we used time or cumulative effort (as did Hubbert) for the abscissa. Regressing YPE versus time alone decreased the r^2 to about .51 for oil and about .62 for oil plus gas compared to a regression versus time and effort, and left a residual that was an almost perfect mirror image of effort.

8. Our method also avoids the problem of estimating Hubbert's a factor (the ratio of ultimate estimate of reserves in a field compared to initial estimates), an important consideration since the a factor has changed irregularly and sometimes rapidly since Hubbert's original use of the term. E. L. Dillon and L. H. van Dyke, *Bull. Am. Assoc. Pet. Geol.* 42, 2549 (1958); C. F. Iglehart, *ibid.* 56, 1145 (1972).

9. H. W. Menard and G. Sharman, *Science* 190, 337 (1975).

10. The YPE for data before 1946 was in general higher and often much higher than for data after 1946 but showed large and irregular fluctuations associated with the depression and World War II. These fluctuations made the backward extension of our analysis less productive. The general trends, however, held at the .05 level when regression analyses were carried out for our full data set back to 1925.

11. For 1946 through 1978, level of effort is uncorrelated with time with respect to predicting YPE ($P \geq .05$). The simplest models that best describe variability in YPE from 1946 through 1978 are

$$\text{YPE (oil)} = 821 - 0.401\,(t) - 0.107\,(E). \qquad R2 = .92$$

$$\text{YPE (oil+gas)} = 1346 - 0.661\,(t) - 0.106\,(E). \qquad R2 = .82$$

where t is the year (1946, 1947, and for forth) and E is effort in millions of feet drilled per year. Standard deviations of model coefficients are 61.5, 0.0314, and 0.00869 for oil, and 133, 0.0677, and 0.0187 for oil plus gas. There can be a problem with the above equations because the same term appears on both sides of the regression model [D. Roff and D. Fairbairn, *Can. J. Fish. Aquat. Sci.* 37, 1229 (1980)]. The equations can be rearranged to avoid this problem without changing our conclusions by making yield (Y) the dependent variable, or by using a polynomial model:

$$Y = a(E) + (tE) + c(E2)$$

$$Y = a + b(t) + c(E) + b(E2)$$

Analyses of these regressions for both oil and oil plus gas show that t alone is the most powerful predictor of total yield, that E predicts little additional variation in total Y, that E had a weak positive, but diminishing with time, effect on Y in the past, and that any oil production gained through increased effort will decrease as total E becomes greater. In other words, total Y during this three-decade period was dominated by the 2 percent per year secular trend. Increasing drilling effort had little or no effect on that trend but did decrease considerably the YPE.

12. *Wall Street Journal* (26 November 1979), p. 1.

13. U.S. Bureau of Census, Census of Mineral Industries and Annual Survey of Manufacturers (various years). In 1977, it cost about $48 per foot for the average of all petroleum well-drilling in the United States when exploration and development wells, and extraction costs, are included. The costs can be subdivided further. In 1977 it took the following resources per mean foot of drilling in the industry: 1.5 m^3 of natural gas, 0.21 barrel of liquid petroleum, $8 of steel forms and pipes, and $11 of other equipment. The capital and operating equipment can be converted easily to energy equivalents with the use of straightforward national statistics [C. A. S. Hall, M. Lavine, J. Sloane, *Environ, Manage.* 3, 505 (1980); R. A. Herendeen and C. W. Bullard, *Energy Costs of Goods and Services*, 1963 and 1967; Document 140 (Center for Advanced Computation, University of Illinois at Urbana-Champaign, 1974)]. Additional energy is required to refine, transport, distribute, and convert petroleum and to build and run the corporate buildings in Houston and New York, but we have excluded all of these indirect costs although they would substantially hasten the intersection of costs and benefits. An increasing proportion of exploratory effort is in nondrilling activities that use energy, such as sonar exploration and airplane mapping. An analysis of petroleum returns per constant dollar of exploratory-recovery effort presumably would show an even larger decline than those of Fig. 1b.

Increased Drilling for Oil May Consume More Energy Than It Gleans, Study Finds

(By Jerry E. Bishop)

The faster the oil industry drills for new oil in the U.S. the sooner it becomes a losing energy proposition.

That's the conclusion of a new study by two Cornell University scientists. The study appeared in a scientific journal only a few days after President Reagan decontrolled domestic oil prices to stimulate exploration for new oil supplies in the continental U.S.

Unless the oil industry finds a superior way to look for new oil pools, drilling soon will consume more energy than it unearths, the study found. The day soon will come, the researchers explained, when "the energy cost of obtaining a barrel of oil is the same as the energy in that barrel."

This break-even day of reckoning won't come for about 20 years if the industry holds drilling to its 1978 rate, the study predicted. But if that rate continues to increase, "the break-even point for oil could occur in the mid-1980's," the researchers said.

"The result of our analysis indicates that the current trend of increasing conventional exploration effort by the oil industry may not be in the best interest of the nation as a whole," Charles A. S. Hall and Cuter J. Cleveland of Cornell's section on ecology and systematics asserted in their study, published in this week's issue of the magazine Science.

The main reason is that the oil industry is becoming less energy-efficient at finding oil, they explained.

Oil observers generally reject this theory of inefficiency, although industry studies have previously demonstrated that oilmen have been finding less oil per foot drilled in recent years. Oil observers maintain that there are a number of factors that could reverse the discovery trend. They cite continuing technological improvements in the search for oil and gas, such as new direct hydrocarbon techniques. Also, industry sources say, there probably are big new oil and gas fields still to be found in the U.S. by the new spurts in drilling resulting from rising prices for the fuels.

STATISTICAL CORRELATION

The Cornell scientists' study statistically correlated the industry's yearly volume of drilling for exploration and development and the amount of oil found. That correlation doesn't show what is commonly assumed, however.

The team found that the amount of oil and gas (measured in equivalents of barrels of oil) discovered per foot of well drilled is dropping precipitously. They cited studies more than a decade ago by M. King Hubbert, an oil exploration consultant to both the industry and the government, that showed the industry in the 1930s extracted about 250 barrels of oil for every foot drilled. This dropped to about 40 barrels per foot drilled in the 1950s.

The trend was reversed briefly in the 1960s, causing many to cast aside Mr. Hubbert's analysis, the researchers noted. The new analysis, they said, shows that the downward trend resumed in the mid-1960s.

By the late 1970s, the industry was finding only 10 to 15 barrels of oil for every foot drilled.

"ISN'T WHEN THE WELLS RUN DRY"

At the same time, they said, the energy cost of exploring for, existing and delivery oil has been increasing steadily. It currently equals about 1½ barrels of oil energy for every foot of well drilled.

"The time at which domestic petroleum will no longer, on the average, be a net fuel for the nation isn't when all the wells run dry but rather at some point before that time when the energy cost of obtaining a barrel of oil is the same as the energy in that barrel," they said.

If the yield of oil per foot of well drilled continues to drop—and the energy cost of drilling continues to rise—this break-even point will be reached fairly soon. How soon, they said, depends on how intensively the industry explores for oil.

BREAK-EVEN YEAR

If the industry slows its drilling rate to about 130 million feet of well a year, the break-even point could be staved off until the year 2004, their analysis found.

"Were we to continue to drill at the 1978 levels of about 200 million feet a year, the linear extrapolations would intersect in 2000," they added. This is for both oil and its equivalent in natural gas. "For oil alone, we could reach the break-even point in about a decade."

If the industry continues to increase its drilling rate at the pace it has in recent years, the break-even point for oil and gas could be reached in the mid-1980s, they concluded.

REAGAN ADVISER'S CHALLENGE

Michel Halbouty, the Houston industry consultant who was President Reagan's chief adviser on energy policies, quickly challenged the Cornell researcher's conclu-

sions. The study, he noted, was based on the industry's drilling record since 1945. But, he said, this drilling record has been distorted by government regulation.

"We've experienced 23 years of controls and regulations that have stymied the exploration effort in this country," he said. Because of such regulation he said, many oil men have been forced to drill near old oil fields where there's a better chance of finding oil. Such drilling, he said, doesn't really add much to new oil reserves. This he said, was one reason for the decline in the number of new barrels added to reserves per foot of well drilled.

With President Reagan's decontrol order, Mr. Halbouty said, "we're going to see more real wildcatting in the boondocks."

"Most domestic oil (and presumably gas) that is now produced comes from reserves discovered before 1940," the ecologists said. "We see little hope for changing this picture very much through increased conventional drilling effort, and in fact such effort could decrease the total energy delivered to society by the petroleum industry by lowering the efficiency of that energy-intensive industry," they declared.●

OUTRAGEOUS ACTS OF A SMALL GROUP OF TERRORISTS

● Mr. LUGAR. Mr. President, for years Turkish diplomats were killed at regular intervals by the so-called Secret Liberation Army of Armenia. It is estimated that the losses of the Turkish foreign service were larger than those of any other foreign service in the world.

Just recently, two Turkish diplomats were gunned down in Paris. The Turkish consul and his driver also fell victim to an ambush in Australia earlier this year. The recent wave of killings began in Los Angeles, Calif., on January 27, 1973, with the assassination of the consul general and consul of Turkey. From then, the terrorist acts found better haven in Europe, particularly in Spain, France, and Italy. Lately, however, bombings occurred also in New York against the building owned by the Turkish delegation to the U.N., October 12, 1980.

The press conference of the Secret Army in April 1980, which was reprinted in part by the Armenian Observer emphasized as the reason for the killings the massacre of Americans by the Ottoman Empire during World War I. and stressed anti-imperialist, anti-American, Marxist slogans. There is little doubt that this is a terrorist group of the left, partially supported and trained by the PLO with discreet Soviet support.

The Department of State has always strongly condemned the killings, and on March 5, 1981, denounced the last killings in Paris, stating:

The inviolability of diplomatic personnel is fundamental to the conduct of foreign relations and to the maintenance of international order. We condemn all acts of violence against diplomats and their families and we hope that the perpetrators will soon be brought to justice.

Condemnation has not been restricted to official channels. Archbishop Shnorhk Kaltusdian, patriarch of the Armenians in Turkey, stated in the Armenian-language daily Marmara on January 1, 1981:

We should not remain silent in the face of the crimes committed by irresponsible elements in the name of the Armenian people. Every crime is a moral calamity thrown at the face of the Armenian people.

Senator THURMOND and Congressmen SOLARZ, MCDONALD, and DICKINSON have already condemned the killings in statements on the floor. At this point, I would like to express my indignation about the killings of Turkish diplomats, to assure our Turkish friends of our empathy and friendship, and to call upon the police and other investigative services of our allies in Europe to help put an end to the outrageous acts of a small group of terrorists masquerading in the name of the unfortunate Armenian people.●

EXPORT TRADING COMPANIES—IX

● Mr. HEINZ. Mr. President, a recent article by Michael Argetsinger, director of corporate communications for the J. D. Marshall Co. of Skokie, Ill., one of our country's successful trading companies, cogently explains the export trading company legislation now being considered by the Senate, and makes a compelling case for it. This is particularly noteworthy in view of the long experience of Marshall International in the export business and the fact, as the accompanying interview with Marshall Frankel points out, that the company itself would see little short-term benefit from the bill, as it is directed toward new companies, rather than established ones. While others might oppose the bill as creating competition, Frankel, with the same vision that has made his company successful, sees the opportunities it provides and the significance it has as representing a new more positive Government attitude toward exporting.

Mr. President, I ask that the article and interview be printed in the RECORD.

The material follows:

EXPORT TRADING COMPANIES—THE FUTURE FOR U.S. EXPORTERS

(By Michael R. Argetsinger)

Export Trading Companies claimed center stage in Washington, D.C. and around the country in 1980. The fresh focus stems from recent legislative initiatives designed to boost American exports.

Spurred by the increasing U.S. trade deficit, members of Congress are looking to existing American export management companies (EMC's) and foreign trading companies for inspiration. Although legislation to encourage growth of such firms did not become law in the 96th Congress the idea will certainly resurface this year as part of the new administration's commitment to the expansion of exports.

While the politics of the bill and its chances of survival this year present a fascinating study, it is well to remember that, with or without the legislation, many viable export trading entities already exist in this country and continue to make an important contribution to the U.S. trade picture.

It is said that fewer than 20,000 of the 250,000 manufacturing firms in the U.S. now sell a portion of their production overseas. It is the belief of the best experts in this country that because of the competitiveness of our products in terms of price, quality, and delivery schedules, at least another 20,000 firms should be able to enter overseas markets. The hope for realizing this potential, and for measurably affecting our present negative balance of trade, lies in the understanding and promotion of the export trading company concept.

DEVELOPMENT OF LEGISLATION

The Export Trading Company Act of 1980 was conceived by Senator Adlai E. Stevenson, III and stemmed from his belief in the soundness of the export trading company concept. His analysis was that the greatest potential for increasing U.S. exports exists among the large number of U.S. producers presently doing little or no export. He believed that the international sales and marketing requirements of such firms could be best served by association with an export trading company (ETC).

Stevenson, as Chairman of the Subcommittee on International Finance of the Senate Committee on Banking, Housing, and Urban Affairs, along with Robert W. Russell, Counsel to the Subcommittee, nurtured the bill through the legislative process. As the bill gained strength through the revision and transition stage of congressional hearings throughout 1979 and 1980 it attracted tremendous bipartisan support. The administration came out squarely behind it in early 1980 making it their number one priority for export legislation. By the time it came to a vote in the Senate in early September 1980 it had 55 co-sponsors and passed by a resounding 77–0 margin.

Unfortunately the companion bill in the House of Representatives never achieved quite the same momentum as Stevenson's bill. Hopes that the bill would pass the House before recess in early October were squelched when eleventh hour hearings were called, which effectively delayed efforts to bring the bill to the floor of the House and final hopes that the bill would be heard during the lame duck session never materialized.

Although Senator Stevenson has retired from the Senate, the bill generated such wide interest and acceptance that it is virtually certain that new champions for a similar package will emerge in the new Congress. One way or another export trading companies will be heard from in Washington, D.C. this year.

TRADING COMPANY DEFINED

Before attempting to assess the impact that export trading companies will have on the U.S. balance of trade in the future, it is important to understand just what an export trading company is.

One definition was provided by then Secretary of Commerce Philip Klutznick in his statement of April 3, 1980 to the United States Committee on Banking, Housing and Urban Affairs, Subcommittee on International Finance.

"There are, I believe, three general characteristics of a successful export trading entity. First, it provides a "one stop" facility for any sized firm interested in exporting. The export company provides market analysis, distribution services, documentation, transportation, financing, and after sale services. The company achieves economies of scale in all these areas over what smaller individual companies could hope to achieve.

"Second, the successful export trading company will search out U.S. producers of products for which the company has discovered markets overseas. It will not simply await passively at U.S. manufacturer interested in exporting.

"Third, by its very existence, an export trading company should limit the capital outlay and risk that any individual company will have to assume to launch a realistic exporting effort."

Secretary Klutznick went on the describe several types of export trading entities that may develop and concluded this section of his statement by saying, "no matter what the origins or ownership of the export trading

company, its purpose and aim will remain the same—to export products of U.S. companies that do not now export significant quantities."

EXPORTING FIRMS EXIST NOW

There are of course a limited number of successful export trading entities in the United States today that fully live up to Secretary Klutznick's definition. With or without the bill these companies flourish and provide an important service to U.S. manufacturers seeking expansion of their international market share, and even to those manufacturers looking at overseas markets for the first time.

The banking provisions of the bill will encourage the growth of new ETC's with substantial financial banking. The bill permits banks to assume, within limits, an equity position in the firms. Additionally, the scope of ETC's will be increased by providing the option for representing directly competing lines. The bill amends the Webb-Pomerene Act of 1918 by providing a certification process that grants an antitrust exemption in advance.

Most importantly, the bill will shine a very positive spotlight on the entire trading company concept. U.S. manufacturers of all sizes will be encouraged to look to ETC's for their export needs.

HOW IT WORKS

Examined up close, export trading companies as presently constituted in this country can offer U.S. manufacturers two important advantages; (1) ready access to the foreign market through their existing distribution network, and (2) staying power overseas that translates into service, technical feedback and long term relationships with foreign buyers.

An export trading company can serve as the export department for a manufacturer who wants to sell abroad without establishing a separate export operation. It has the capability to do market research and to locate dealers and distributors for the exporters' products. It assists in marketing, merchandising and service. The ETC generally takes the credit risk and pays the manufacturer in the U.S. under domestic terms of sale.

A well organized export trading entity should be able to offer the U.S. manufacturer the following features:

1. Sales and management talent with a proven record of expertise in penetrating overseas markets.

2. The capability to provide marketing techniques that will lead the producer to a network of foreign buyers so that substantial tangible business can develop rapidly.

3. The ability to produce export sales without any direct investment on the part of the manufacturer.

4. A multilingual staff in the U.S. and abroad, knowledgeable in the intricacies of export paperwork, who besides setting up shipping documents, bank drafts, and marine insurance, will keep open the line of communication with the overseas buyer.

5. Credit files and international banking connections organized to judge credit worthiness and to quickly set up credit lines for any potential buyer.

6. The ability to pay the U.S. producer as the product leaves his plant with the export trading company taking responsibility for the merchandise until it reaches its destination abroad. At the same time, the ETC finances terms of payment to the importer which encourages him to provide a marketable balanced inventory.

The future of the export trading concept in the United States is bright. Our own brand of uniquely American export trading entities has evolved from firms that started out as small export management companies. The direction and encouragement being generated by Congress and the New Administration, coupled with the existing nucleus of proven successful export trading entities, provides the basis for the most effective means of bringing American manufacturing companies into export markets in increasing numbers.

INTERVIEW WITH MARSHALL FRANKEL, EXPORT TRADING COMPANY EXECUTIVE

American Import/Export Bulletin recently had the opportunity to obtain the perspective of Marshall Frankel on the future of export trading companies in the United States. Mr. Frankel is Chairman of the Board of Marshall International Trading Company of Skokie, Illinois and, with Joel D. Honigberg, a co-founder of J.D. Marshall International—one of the largest export management companies in the United States.

Marshall Frankel serves in Washington, D.C. as a member of the Industry Policy Advisory Committee for Trade Policy Matters and is frequently called upon to testify as an expert witness on international trade issues before congressional committee hearings.

The Bulletin opened the questioning by asking Mr. Frankel his reaction to the export trading company legislation.

MF. I am supportive of the bill and my statement before the Senate Subcommittee on International Finance reflects that. I testified at hearings relatively early on, September of 1979 in fact, one year before the bill passed. Of course it changed along the way and I was gratified to see some of my ideas adopted in the later version.

Q. You don't then see the bill as a threat to establishing trading companies such as J.D. Marshall International?

MF. No, I don't. Certainly the bill will foster competition, but this is healthy. We have tremendous competition now from many different quarters and seem to thrive on it.

Q. What immediate benefit would your company realize should the bill pass?

MF. Very little of a tangible nature. The banking provisions do not concern us since they provide for financing of new ETC's, and, as an established, well financed company, they simply do not relate to us. The other controversial aspect of the bill, the anti-trust exemption section, is likewise no boon to us since we do not represent competing firms. Our philosophy is geared to representing compatible but not competing manufacturers within a given product group.

But, what is important to us is the spirit of the bill. It represents a clear recognition at the highest levels of government of the importance of export trading companies, and as one of the leaders in this industry we take great pride in being part of its evolution.

Q. What do you see as the future for export trading companies?

MF. I believe that the remainder of this century will be very good to export trading companies in this country. As more and more U.S. manufacturers, of necessity look to export markets, there will be an increasing acceptance of the concept of the trading company. This will in part be dictated by a need for economy as the dramatically increasing cost of doing business overseas makes it less and less practical for an individual firm to go it alone.

Q. So you are optimistic?

MF. Yes, I am optimistic with regard to the future of American exports in general. But national success in this regard, and by this I mean restoring our country's balance of trade, won't come easy. A great deal of work needs to be done by all concerned. The manufacturing community must make a real commitment to the export market, the government must come to terms with the many cross signals and disincentives they have placed in the way of international trade, and we exporters must do a better job of making our capabilities and services known. Then we need to go out and sell!●

ILLICIT MARIHUANA TRADE

● Mr. HUMPHREY. Mr. President, today, I become a cosponsor of S. 664, a bill introduced by Senator CHILES and aimed at restoring a valuable weapon against the illicit marihuana trade. S. 664 would allow U.S. foreign assistance funds to be used for herbicide eradication of marihuana growing in foreign countries.

What we are talking about is the use of the herbicide paraquat to destroy marihuana growing at its source. Paraquat got a bad name in 1978 because it was believed that countless smokers of paraquat-contaminated marihuana would suffer dire health effects. Due to the hysteria associated with this paraquat scare, the Congress adopted an amendment preventing the State Department from assisting foreign countries in the use of paraquat to destroy marihuana crops. Despite this action, Mexico, at its own expense, continued to use paraquat. However, Colombia abandoned herbicide eradication programs.

A 1980 report by the House Select Committee on Narcotics Abuse and Control recounts an exhaustive investigation by the committee into the controversy concerning paraquat, and its use by the Mexican Government to kill marihuana plants. The report documents the impressive effectiveness of the Mexican eradication program. More importantly, the report analyzes the evidence regarding the potential health effects of paraquat eradication programs, and concludes that the hysteria of the paraquat scare was unwarranted. The report demonstrates compellingly that the Department of Health and Human Services has overblown the dangers of using paraquat.

The latest narcotics intelligence estimate reveals that about 10,000 to 13,000 metric tons of marihuana are being used in this country each year, and about 75 percent of that amount is coming from Colombia, a country without an effective marihuana eradication program. Younger and younger children are using marihuana and we know that the high-potency marihuana on the streets is particularly damaging. Drug abuse, including abuse of marihuana, is having a terribly negative impact in this country's classrooms, as any educator can tell us. Illicit drug sales are estimated to be at least $64 billion annually, and a significant portion of this vast underground economy is attributable to sales of marihuana. As chairman of the Subcommittee on Alcoholism and Drug Abuse, I am particularly distressed by all of these developments.

From all of the above, what we must do seems obvious. We must recognize the dangers associated with the marihuana flooding this country. We must use every weapon available to combat the illicit drug traffic, including the use of paraquat.

It seems inherently foolish not to use paraquat. Paraquat is an effective marihuana crop eradicator. Mexico used it to transform itself from the major supplier of marihuana to the United States to a relatively minor supplier. Paraquat is environmentally safe. A January 1980 Mitre Corp. report noted that paraquat possesses all the characteristics essential for potentially minimal environmental impact. The dangers of contamination and from contamination by paraquat are greatly exaggerated while the physical and psychological health consequences of marihuana use, especially by young people, are serious and distressing.

Mr. President, we do not hesitate to use herbicides to destroy weeds invading our lawns. We must not hesitate to use herbicides to destroy marihuana, a weed that is invading our society. For this reason, I am happy to cosponsor S. 664 and urge all my colleagues to join in this endeavor. Hearings on S. 664 should be held promptly for delay is inexcusable.●

AUTO IMPORT QUOTAS

● Mr. CHAFEE. Mr. President, my opposition to legislated automobile import quotas is well known. However, it is an issue upon which honest men and women, both in the Congress and in the administration, have disagreed.

Mr. Eugene McAllister, the Walker Fellow in Economics at the Heritage Foundation has written a brief, but cogent background paper on the issue entitled "Import Quotas: An Unwise Solution." I ask that Mr. McAllister's background paper be printed in the RECORD.

The paper follows:

IMPORT QUOTAS: AN UNWISE SOLUTION

BACKGROUND

As a remedy for the auto industry's ills, many prominent policymakers, including Transportation Secretary Drew Lewis and Commerce Secretary Malcolm Baldridge are advocating the establishment of an import quota on Japanese cars. A temporary restraint, it is reasoned, will help the domestic manufacturers through their current difficulties and better prepare them for the highly competitive environment of the eighties.

The Administration, whose official position has yet to be announced, should reject the plea for protection. Philosophically, quotas are a move away from a trade policy based on the notions of competition and consumer sovereignty. Practically, quotas will not achieve the promised results. The auto industry's troubles are much deeper than competition from abroad, and quotas would serve only to mask the real problem.

Proponents of the quotas support their position by citing the dismal 1980 profit performance of U.S. manufacturers. Chrysler lost $1.7 billion, Ford $1.5 billion, and even General Motors suffered losses of over $750 million. With over $70 billion in investments needed during the next five years, it is feared domestic producers will be unable to afford the retooling vital to the rebirth of the American auto industry.

Another perspective of the same picture was revealed in a recent letter to the Washington Post by the governors of six states heavily dependent on the auto industry. In urging adoption of the quotas, they pointed out that nearly 200,000 auto workers have been laid off, with another 700,000 workers having been hurt through a ripple effect.

Quotas are not the solution to the auto industry's woes because imports are not the most significant factor in its decline. The United States International Trade Commission, in response to a petition by the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) for import relief, found that the economic recession harmed domestic auto manufacturers far more than the Japanese competition. USITC Chairman Bill Alberger estimated that even if imports had been held constant and the increase in import purchases had instead gone to domestic consumption, domestic car sales would have fallen by 80 percent and 60 percent of the actual decline in 1979 and the first half of 1980, respectively.

Furthermore, even the increase in imports is not due entirely to greater competition, but to a shift in consumer preferences. Consumers were often willing to postpone purchases, and those that did buy were more interested in the economical, fuel-efficient models which Detroit is only now beginning to produce.

A limitation on imports will neither alter households' financial status nor will it by itself make the less fuel efficient autos more attractive. Since these are two extremely significant factors in the decline of U.S. car sales, quotas will not substantially increase the profitability of U.S. manufacturers, nor will they restore many of the lost jobs. Ironically, the Department of Transportation estimates that if the desired retooling is achieved, the U.S. auto industry will become so efficient as to no longer require 100,000 of the current jobs.

A major factor in the relative cost of domestic versus imports has been the higher cost of labor in the United States. When measured against Japanese scales, U.S. auto industry wages are nearly 50 percent greater. Within the U.S. auto workers' hourly wages, including fringe benefits, are 60 percent higher than the average manufacturing hourly wage. Ten years ago, the differential was only 40 percent.

Recently, the UAW has shown some flexibility in its wage demands. Certainly the special consideration given Chrysler suggests a moderation in the rise of wages. However, quotas may place the newfound restraint in jeopardy. While bargaining for wages and prices is crucial to a market economy, an important and often overlooked element of the negotiation is risk. Both labor and management are aware that the demand for, and acquiescence to, extraordinary wage rates heightens the risk of the firm's or industry's failure. Import quotas, by reducing the risk to both sides, reduce the desirability of temperence and could very well lead to a resurgence in labor costs.

It is clear that the intended beneficiaries of quotas are the domestic auto employees and stockholders. The victims are much more anonymous. The cost will be paid by future consumers who are unable to purchase an import or must pay a higher price. (The more stringent and effective the quotas, the higher prices will be.) Even those who have no intention of purchasing an import will face higher prices because potential import purchasers will shift to domestics, thus driving those prices up also.

An even greater cost is the possibility of Japan or other nations responding to the U.S. quotas with trade restrictions of their own. The human cost would undoubtedly exceed that of the current situation because: (1) the median domestic worker is paid much less than the auto worker (and therefore unemployment payments would be smaller); and (2) there is no retraining program, such as trade adjustment assistance, offered to employees of export industries.

In addition, a less open economy would create inefficiencies which would hurt all consumers. It should be noted that negotiated quotas, as U.S. Trade Representative William Brock has discussed, do not create as great a risk for retaliation as does the legislative approach advanced by Senators Danforth and Bentsen.

Both critics and advocates of the quotas attribute the precarious position of the domestic industry in large part to government policies. Certainly price controls on oil created an environment of cheap and plentiful gas, which of course suddenly collapsed, leaving auto manufacturers making the wrong sized cars. The industry does have a case for some sort of indemnification, but import quotas are neither equitable nor efficient. Rather than the government (taxpayer) paying for its error, the cost would be shifted to the new car buyer and workers in export industries. The most efficient form of indemnification, because it would not distort any prices and thus create economic biases, is a simple cash payment. If the sole object is to correct a policy mistake which severely injured the auto industry, the current debate about quotas should instead be focused on the size of the transfer.

Since the quotas will not save the auto industry, the questions are what will, and should the attempt be made to rescue domestic manufacturers? Essentially, it is the Chrysler question revisited. Consistency within the Reagan economic package would dictate no special treatment for the auto industry. The program for recovery is a broadly-based freeing of resources with the market directing the uses. If, as some suggest, special tax credits are given auto manufacturers, the government would be overriding the market's judgment.

Undoubtedly, without assistance the auto industry will have a rough time. Stock values will fall and wages will rise much more slowly. However, that cost is both more obvious and effective than directing resources from less political but more economically efficient uses.●

SUBSIDIZING THE SUNBELT

● Mr. METZENBAUM. Mr. President, during the budget debate, I stated repeatedly that the administration has failed to meet its own criterion of even-handedness in reducing Federal expenditures. A classic example of the failure is the outright discrimination the Reagan budget imposes upon the States of the Northeast and the Midwest.

On March 29, an editorial in the Cleveland Plain Dealer pointed out that the people of the Midwest are, in effect, subsidizing through their Federal taxes, the growth of the so-called "outer rim" States. My own State of Ohio, for example, receives in Federal expenditures about three-quarters of its fair share based on population and tax receipts. New Mexico, by contrast, receives about double the share on a per capita basis that goes to States like Ohio, Michigan, Indiana, and Illinois. The States of the Midwest are today running a deficit of $110 billion in terms of what they send to Washington and what they get back. The South and the West have a positive balance of $100 billion.

My own State of Ohio has an unemployment rate of 10.4 percent—and the Reagan-Stockman budget addresses that problem by cutting or eliminating jobs programs. The older cities, mainly in the Northeast-Midwest part of the country,

need help—but they will not get it under the administration's budget.

The fact is that the Midwest will not get much of anything from the Reagan budget proposal—except, perhaps, the privilege of paying more subsidies.

More than any other area in this country, the Midwest has suffered from the economic crisis. We have suffered through lay offs and massive plant closings. We have suffered through double-digit unemployment rates. And after the administration's economic proposal is put into effect, we will suffer even more.

The Cleveland Plain Dealer describes the administration's action as "aiming at the middlewestern jugular." I would say that is a pretty accurate assessment of the situation.

Mr. President, I ask that this editorial, entitled "Save Ohio From Brink," be printed in its entirety in the RECORD.

The editorial follows:

SAVE OHIO FROM BRINK

Times are tough here in the Midwest and the outlook is dismal. One painful factor is the way the federal government keeps giving this region the short end of the stick.

Thousands of jobs, thousands of people, millions of dollars in capital keep moving away, out into the sun belt or to foreign lands. And the federal government seems to spur, not deter, that exodus.

President Reagan's budget ax seems to aim at the middlewestern juglar. Rep. Dennis Eckart, D–22, of Euclid, said the Reagan budget is "brutal."

It would cut the heart out of federal help to our kind of metropolis, said Eckart. It would "help the Cleveland area commit suicide."

That would be inflicting the worst on one of the victims of a long trend of industrial decline. In an article entitled "Trouble in the Heartland," Forbes magazine this month gave disheartening details of the uprise of unemployment and sag of jobs in this center of auto and steel, hardest hit of industries.

"When the national slump is over," said the Forbes article, "the Midwest will still be in trouble." That means Ohio, Michigan, Indiana, Illinois and Wisconsin, and even pieces of New York, Pennsylvania and Missouri.

This region is paying out more money to the federal government than it gets back. The Midwest has a $110 billion deficit in that exchange, while the South and West—the sun belt—have a positive balance of $100 billion.

Confirming that is a map in the Economist of London. The average for the 50 states is set at a ratio of 1.00. Ohio gets 0.76. So do Michigan and Wisconsin. Indiana gets 0.74 and Illinois 0.70.

By contrast, South Carolina gets 1.22, New Mexico 1.47, Virginia 1.46, California 1.15, Arizona 1.18, Mississippi 1.65, Alabama 1.31, and all the outer-rim states well above average.

Therefore it is urgently necessary to end that tilt of the federal government's favor. The Northeast-Midwest Congressional Coalition is putting together amendments with which to achieve that in the coming debate over the Reagan budget proposals.

Reagan's plan is heavily loaded with more lavish spending for military items—most of them in the South and West—and is likely to erase aid to jobless, economic development, school lunches, school help and segments of the welfare system.

Reagan has used a "fast track" tactic to rush his budget through the congressional preliminaries but Midwest representatives must not succumb to a rush act.

Members of the Senate and House should not surrender their prerogatives. They should limit the damage so far as they are able, and protect what is too valuable to be jettisoned in an effort to wipe out federal programs wholesale.●

REPRESENTATIVE CARL D. PERKINS

● Mr. KENNEDY. Mr. President, I want to call the attention of my colleagues to a recent article in the Washington Post which outlines the unique contribution that CARL D. PERKINS, chairman of the House Education and Labor Committee has made to the quality of life for millions of Americans.

As many of my colleagues are aware, the strong influence of Chairman PERKINS on the full range of education, employment, nutrition, and poverty programs has strengthened social justice in America.

It is because of that history that his views and concerns about the budget proposals of the Reagan administration are of particular importance.

I ask that the article by Margot Hornblower of the Washington Post be printed in the RECORD.

The article follows:

PERKINS STOUTLY RESISTS REAGAN'S CUTS IN EDUCATION, NUTRITION, JOB PROGRAMS

(By Margot Hornblower)

Carl D. Perkins, mountain man. He calls himself that and, on first impression, you might believe it. He is a great hulk of a fellow whose east Kentucky twang whistles through the gap in his front teeth. With his loping stride, plowboy hands and rumpled suits, he seems out of place among Congress' manicured politicians.

But if President Reagan wants to slash federal spending, wipe out whole social programs, he's going to have to get past wily Carl Perkins first. And that is no mean feat.

Perkins, 68, is the chairman of the House Education and Labor Committee; he has been for 14 years. That 34-member panel has created and now oversees $34 billion in federal programs. Many of these Perkins fathered.

And now some of Reagan's largest cuts would come in this turf: $2.6 billion (a 28 percent cut) in elementary and secondary educational assistance, the main source of funds for teaching poor children: $6.1 billion (58 percent) from employment programs, including public service jobs; $1.9 billion (38 percent) from child nutrition funds.

The Republican-controlled Senate concurred in most of these cuts last week, and the House Budget Committee is to begin its work on them today. Perkins, one of the opposition's point men in the Democratic House, is stoutly resisting.

"We have worked for 25 to 30 years on these programs," said Perkins, who left his poverty-stricken Appalachian district for Washington in 1949. "The school-lunch program is the greatest feeding program in the world. And these old people who carried us through two world wars—how can we cut their benefits? I hate to see these programs destroyed by people who don't know a damn thing about them."

In 24 days of carefully orchestrated hearings over the past few weeks, Perkins has gathered his flock: a pleading, protesting procession of wheezing coal miners, unemployed factory workers, crippled children, state education officials, impecunious college students, teachers, food service executives, family court judges, malnourished pregnant women—all testifying to the drastic effects of the Reagan budget.

And behind the scenes, Perkins has wheedled and cajoled nearly every member of the House Budget Committee, which is to set spending ceilings in a few weeks.

He accompanied each of his subcommittee chairmen before the budget panel to emphasize his personal interest in every program. At one hearing, he provided Budget Committee members with lists of schools in their districts that would likely shut down lunch programs under Reagan's proposal.

"Underneath that southern gentlemanly, Kentucky mountain-type approach, Perkins is a master politician and parliamentarian," said Rep. Leon Panetta (D-Calif.), a Budget Committee member. "You get taken in by the quiet approach—and the whistle—and before you know it, your pockets have been picked. But it's hard to take him on directly. His heart is in the right place."

Congress, creeping in the shadow of last November's election, is in the mood to cut heavily into social programs.

But while many Democratic chairmen in the House are looking for compromises, trimming their budgets here and there is hope of mercy. Perkins defiantly led his committee two weeks ago to recommend an increase in spending to $42.4 billion—$3.9 billion over President Carter's proposed budget, and $18 billion more than Reagan wants.

Republicans were furious. "He is one of the most bullheaded members of Congress," said John Erlenborn (R-Ill.), who sits on Education and Labor. "He smiles and clutches your arm, but watch out. He would do anything to get his way. Almost everyone in his district gets a benefit check. The more money he can shovel out, the more godlike he appears. He's considered a deity in eastern Kentucky. He has a deity complex."

In the hollows of Kentucky's 7th Congressional District, places with names like Feisty, Rowdy and Troublesome, "Carl D.," as they call him, is a legend.

When he grew up in Hindman in the '20s, the son of a local attorney, eastern Kentucky was still like a frontier. As a boy, he would drive his mules over the mountains to the railhead to pick up passengers and guide them across dirt roads to town at $1.50 a head.

He still drives mules, and the first picture a visitor sees on the wall of his Washington office is of Perkins, dressed in an oversized coat and floppy hat, holding the reins of a mule team with a cart of hay behind him. "I broke those mules myself," he says proudly. "Now I've about wore 'em out."

Nearly every weekend, Perkins goes to his district, often to his 86-acre farm in Hindman, where he chops wood, castrates hogs and visits with the neighbors. Sometimes he drives, as he did regularly until he retired his beat-up Ford Falcon a few years ago with 167,000 miles on the odometer.

Perkins' programs came not from the studies of social scientists, but from his own experiences. At 19, after two years at Kentucky's Alice Lloyd College, he worked as a teacher for $50.62 a month.

"I had watched all the teachers leave for Detroit, where they could get better salaries," he said. "So I sponsored federal aid to education for years . . . My uncles were stonemasons, and I used to go up in the hills with them. I watched the youngsters in school who took manual training and got jobs. That's why I'm sold on vocational education."

And many of Perkins' neighbors were men who slept upright in their chairs lest they suffocate from the coal dust encrusted in their lungs. When he graduated from the University of Louisville Law School, he labored over workmen's compensation claims and found there was little reward for years of suffering in the mines.

"Perkins' Private Pension Plan," Erlenborn

dubs it, recalling that when the benefits were first set up they were to cost no more than $50 million a year. Since then, however, Perkins pushed through amendments loosening eligibility—black lung is hard to prove without an autopsy—and the claims of 187,000 miners and dependents (15,000 of them in Perkins' district) will cost $2 billion next year.

The Reagan administration at first saw black lung as a juicy target, but officials have laid low since March 9, when 5,000 miners marched on the White House with signs saying, "Must Miners Die to Prove Black Lung?" It now seems likely that changes will be aimed at increasing contributions to the program from coal companies.

A Perkins campaign is an anachronism in an age of computers and media consultants. His main tactic is to drive madly around the district, usually alone, stopping at country stores and filling stations and often merely at a mailbox by the road and shouting up the hollow, "Mr. Jones? This is Carl Perkins. I'm running for Congress again."

A master at helping his people get their roads graded or their food-stamp applications approved. Perkins knows thousands of constituents by name. While he's a little vague on the younger generation, his first question is always "Who's your daddy?" and he'll inevitably be friends with at least a second cousin.

He spends less than $5,000 per campaign, which means he doesn't have to file statements with the Federal Election Commission. But he does anyway, ignoring FEC forms and sending in piles of itemized handwritten expenses on graph paper.

"Bruce Lockhart, Airport, Lexington, Ky. 40501, candidate's car, dead battery—$5" is one item in his 1980 report. Another: "Bailey's restaurant, Hazard, Ky. 41701, steak for candidate—$13.55."

But when it comes to the federal pork barrel, Perkins isn't stingy. His district is dotted with schools, courthouses, airports and reservoirs, all monuments to Perkins' ability to wring dollars out of Washington. However, his dams have shoved poor farmers off their ancestral lands, while Perkins ignored the fact that the floods the projects were designed to alleviate came largely from lax strip-mining laws.

Nonetheless, Perkins, with his ruddy complexion and beguiling off-center grin, wins elections by more than 70 percent of the vote. The last time, Republicans did not even bother to field an opponent.

In Congress, Perkins' more urbane colleagues call him "Pappy" behind his back, and snicker at his pronunciations, especially when he takes on government "raggalation."

On occasion, when he whistles into the microphone during a debate, congressmen leaning over the back rail start mimicking the whistle until, as one observer put it, the House chamber sounds like "the bird cage at the National Zoo."

Some are taken in by the down-home style. Benjamin F. Reves, a Perkins aide, remembers that Perkins once told him, "'I'm a pretty fine feller to play dumb.' He trades on that," Reeves said. "But city slickers find themselves with one foot in the air, while Perkins and the train are long gone."

However, Perkins is widely admired for his honesty and, above all, his tenacity. He was the first committee chairman to hold open mark-up sessions. Reporters marvel that he runs his office like a country store—anyone can walk in and listen to whatever business he's conducting.

Perkins has never taken a junket, in fact he hasn't been abroad since he fought in World War II. "He's been here 33 years, but none of the Washington polish has tainted him," said one committee staffer. "He feels it would be disloyal to the people he represents if he weren't exactly like them."

Perkins arrives at the Rayburn building at 7 a.m. when the doors of other offices are still shut tight. He has been known to walk in to work from Alexandria after a blizzard, when the roads are closed.

Single-minded when he wants to pass a bill, his marathon hearings begin at 8 a.m. and last into the night over the feeble protests of fellow committee members.

During a 1972 House-Senate conference on student loans, which lasted for weeks of late-night sessions, he forced colleagues to stay up until 5 a.m. until he got his way. The day after the bill was reported he collapsed from exhaustion and was briefly hospitalized.

Panetta and other Budget Committee members who sparred with Perkins for months over spending cuts last year are bracing for the new battle.

"Perkins and his committee ought to be telling us where the legitimate cuts can be made," Panetta said. "But instead, he's in the trenches fighting a war. Perkins won't take no for an answer. No matter what doors you're closing, he's coming in a window or a side door."

Perkins, however, insists he's ready to compromise. "I don't want to be hoggish," he told a budget task force, adding that he'd accept "reasonable" cuts, perhaps 10 percent. But as for deeper cuts, Perkins confided in his soft Kentucky drawl, clutching a new acquaintance's elbow, "We're going to fight every inch of the way."●

TAIWAN MAY INVEST IN ANACONDA

● Mr. BAUCUS. Mr. President, I would like to bring to the attention of my colleagues an interesting development in our continuing efforts to save the smelter and refinery at Anaconda and Great Falls. As you will recall, the Anaconda Co. suddenly decided several months ago that it could not afford to keep these facilities going and therefore, it would close them up. Instead, it plans to ship its ore to Japan for smelter and refinery operations.

At the same time as we are doing that, we in the Senate are immersed in a major problem—the U.S. automobile industry. I do not need to describe the issue, but suffice it to say that something is wrong when we have to export our ore to Japan for processing at the same time as the Japanese freely send us their cars, all manufactured in Japan with Japanese labor. On top of that we have a serious balance of trade problem with Japan.

It is therefore with considerable pleasure that I bring to the attention of the Senate a much more positive approach: I have been investigating over the past several months the possibility of obtaining some replacement investment in the Anaconda operations. I am pleased to say that my initiative with Taiwan has elicited a positive initial response. I, of course, recognize that such a major investment needs a great deal of study and such decisions cannot be made thousands of miles away without full analysis.

But at least the Taiwanese have responded positively to my initiative. The Taiwan Metal and Mining Corp., an entity closely tied to the Government of the Republic of China, has indicated that it is definitely interested in the Anaconda facilities and wishes to send over its representative for further evaluation.

Taiwan has a trade imbalance with the United States; its response in this instance is to say it must make every effort to see how it can help the United States redress that balance, including bringing jobs and investment money to our country. Taiwan needs copper, and recognizes that the United States is a secure source of supply. They want to work closely with us. The combination of factors leads to a positive approach to problem solving, rather than confrontation and inflexibility.

I believe that this approach is the one we should be encouraging. Some may work out, and others will not. But none will work out if we do not make the effort to encourage such activities.

Mr. President, as we study various trade proposals before us in an effort to improve our balance of trade, let us not forget the importance of investment as return flow of money. We cannot remain isolated in the world, and when foreign investment can come in, where it is welcomed, and create jobs and revitalize our economy, we should work toward that objective. Obviously, Taiwan's interest may in the end prove not feasible, but let me at least commend the people of Taiwan for responding positively to such suggestions. Such investment in the United States is good for them, and it is good for us. I hope it does materialize.●

REALISM IN WORLD AFFAIRS

● Mr. KENNEDY. Mr. President, I wish to commend to my colleagues a very perceptive and compelling article by Arthur Schlesinger, Jr., which appeared in the February 23 issue of the Wall Street Journal. Entitled "The Soviet Conspiracy and World Unrest," it sets forth a realistic view of instability and conflict in the world and reminds us of the dangers of reducing international events into the simplistic terms of United States-Soviet competition.

Professor Schlesinger's analysis of current U.S. policies toward El Salvador is particularly relevant. I agree with him that it is essential to pursue a multilateral political solution instead of military escalation for this tragic conflict in Central America. "Unilateral action is the road to disaster," he points out. "Whatever we do in El Salvador, let us do it on a multilateral basis."

Mr. President, I request that the full text of Professor Schlesinger's article be printed at this point in the RECORD.

The article follows:

THE SOVIET CONSPIRACY AND WORLD UNREST

(By Arthur Schlesinger, Jr.)

"Let us not delude ourselves," Mr. Reagan told The Wall Street Journal during the campaign. "The Soviet Union underlies all the unrest that is going on. If they weren't engaged in this game of dominoes, there wouldn't be any hot spots in the world."

One had hoped that this was campaign persiflage. For it expresses a hopelessly erroneous conception of the way history works. There was unrest in the world long before there was a Bolshevik Revolution; there will be unrest long after Brezhnev and his gang

are forgotten. If the Soviet Union did not exist, Iraq and Iran would still be at war; Israelis and Palestinians would still be at each other's throats; there would still be no peace in Northern Ireland, Cambodia or South Africa—and there would still be civil war in El Salvador.

These "hot spots" are not imported by a diabolical Kremlin into otherwise placid and happy communities. The world is already overflowing with intense local antagonisms, deeply rooted in historic hatreds, religious tensions, class animosities, tribal feuds—and long predating the Cold War. Certainly the Soviet Union exploits such antagonisms when it can do so at low cost. But supposing that without the Kremlin there would be no hot spots gives the devil considerably more than his due.

Yet there are disquieting indications from Washington that Mr. Reagan's conspiracy theory of world unrest, far from being campaign persiflage, may become the basis of foreign policy. Consider, for example, the curious episode of General Haig and the terrorists. In his initial press conference our new Secretary of State announced that the Soviet Union was the controlling force behind international terrorism. This revelation roused some skepticism since communists are often the targets of terrorist attack, as in Italy, and since the Red Brigades, the PLO, the IRA and other notable terrorist outfits hardly require Soviet encouragement.

WARS OF NATIONAL LIBERATION

The New York Times accordingly asked the State Department, the CIA and the Defense Intelligence Agency for the evidence. The several agencies said they were unable to document the Secretary's charge. The Times quoted one official: "There's just no real evidence for it." Abundant evidence exists that the Soviet Union trains people for "wars of national liberation"—i.e., insurrections and guerrilla wars—but that is not what the Secretary was talking about.

The conspiracy theory seems about to dictate a new course in Central America. The Reagan administration is reported to have decided that Moscow is responsible for the civil war in El Salvador. El Salvador is a country of less than 5 million people divided between a small and inordinately wealthy oligarchy and a desperately poor class of landless laborers. With "the most rigid class structure and worst income inequality in all Latin America," according to a recent article in Foreign Affairs, El Salvador has been in a state of intermittent revolution for at least half a century. In 1932 the army killed 30,000 peasants in putting down a rebellion against the oligarchy.

Trouble in El Salvador is manifestly not the creation of the Cubans or the Russians. It is only the latest installment in a recurring revolt against bad conditions.

The insurgent front certainly includes extreme Marxist factions along with Social Democrats and dissident Christian Democrats. Even the moderates are doubtless ready to accept arms from Cuba, Ethiopia and Vietnam. This should not surprise nor unduly alarm us. Two centuries ago American revolutionaries accepted aid from France; this did not prove that they were disciplined agents of European monarchy, only that they were fighting for their lives. The State Department white paper demonstrates arms deliveries; it only asserts, but hardly demonstrates, political control.

This is the situation the Reagan administration now proposes as the test case to display its "resolve" to punish Soviet expansionism. El Salvador, it is said, will determine our future attitude toward the Soviet Union. It will also be our measure of the fidelity of our European allies. This is placing a lot of weight on a shaky case. The Soviet Union can no more control events in El Salvador than we can control events in Poland: Revolution has a life of its own. As for our European allies, they have responded cooly to the idea of El Salvador as the test case against Soviet expansionism. If we think we know more about El Salvador than our European allies on the ground that we are closer to the scene, we must not forget that Latin American countries still closer to the scene disagree with us.

One wonders whether the real problem in Washington today is not simply frustration. We cannot do anything about real Soviet aggression in Poland or Afghanistan, so we must show how tough we are by cracking down on fancied Soviet aggression in El Salvador. The more venerable among us will recall the similar situation in the first months of the Eisenhower administration, when John Foster Dulles, unable to carry out in Eastern Europe his campaign pledge to "roll back" Soviet expansionism, decided to carry it out in Guatemala. With the CIA's help, Dulles portrayed a rather ineffectual democratic regime in Guatemala as the spearhead of Soviet aggression in the western hemisphere and in 1954 engineered an American coup.

The Eisenhower administration triumphantly got rid of the hapless Arbenz government. It did not get rid of the troubles of Guatelama.

The Reagan administration would be well advised to calculate most carefully the costs of U.S. commitment to a military solution in El Salvador. Washington's intervention on behalf of the Fourteen Families would convince those working for change throughout Latin America that the new American administration is irrevocably against them. It would alarm our European allies, who do not accept the conspiracy theory of global hot spots and figure that Salvadoran peasants might be in revolt simply because they find poverty and injustice unendurable. It would align the United States once again with right-wing repression, dissipate whatever remains of the influence we have won as a champion of human rights and hand a cheap propaganda opportunity to our adversaries.

Nor would it even assure military victory. As we escalate our support, the Cubans and others will find means to escalate theirs. There will be bitter fighting in the hills. Then what do we do if our client regime fails to end the insurgency? Put in a new regime, as the Russians did in Afghanistan? And, if that regime fails, send in troops, as the Russians did in Afghanistan? El Salvador might well become our own Afghanistan. And, if the right with our assistance finally succeeds in crushing the insurgency, the result would only be, as it was in Guatemala, to restore the old oligarchy to power—and to guarantee a new revolution in another decade.

Nor would success make the Russians change their ways, since they have long since assumed that the United States can lick El Salvador.

THE DANGER OF SUPPOSING

Instead of roaring off on its own, the Reagan administration would be better advised to begin by the closest consultation with friendly governments who have a better feel for the situation than we have: Mexico, Costa Rica and Venezuela. We ought long since to have learned that danger of supposing that we understand the interests of other countries better than they do.

No doubt Latin American counsel would be somewhat divided. The Christian Democratic government in Caracas, for example, has fraternal ties with the Christian Democratic president of the Salvadoran junta; the Accion Democratica opposition has a different slant. So do the Mexicans. They all agree, however, in rejecting a military solution. Let us at least listen to the countries most directly threatened before imposing our own pet theories on them. Does anyone really suppose that Mexico, Venezuela and Costa Rica are not as intelligently determined as we are to safeguard the hemisphere from the Soviet Union? Unilateral action is the road to disaster. Whatever we do in El Salvador, let us do it on a multilateral basis.

Despite our President's hot-spot theory, the Soviet Union is really not the cause of all the troubles on this tormented planet. Violence is endemic in the Third World, and we cannot regard each outbreak as a summons to the American fire brigade. Every revolution, every change in political and economic arrangements, every assertion of belligerent nationalism is not necessarily a mortal threat to the security of the United States. History has endowed our century with a host of distempers, most of which are beyond our power to prevent and our wisdom to cure.

I remember Lord Harlech, the British ambassador to Washington 20 years ago, wondering about the American passion in that period to rush into the midst of a civil war in the Congo. "It seems to me," Lord Harlech wisely said, "that every country has a right to its own Wars of the Roses."●

TRIBUTE TO HOBART TAYLOR, JR.

● Mr. BENTSEN. Mr. President, I want to pay tribute to a fellow Texan who served this Nation with high distinction.

The career of Hobart Taylor, Jr., was marked throughout by achievement, obvious ability, and a sense of dedication to the values that are finest and most noble in this great country of ours.

Mr. Taylor was a talented attorney known for his abiding commitment to the cause of equal justice and equal opportunity. He earned high marks for his performance as a special assistant to Vice President Johnson and later as an associate counsel to the President.

Mr. Taylor was a director of the Export-Import Bank from 1965–68; after his service with the Bank he returned to the private practice of law and served as a board member of several major corporations. In addition to his private sector activities, Mr. Taylor found time to remain extremely active and effective in civic affairs.

In short, Mr. President, his career was an inspiration to all who knew him and his family. I join his family in mourning a distinguished American.●

CRS GRADUATE INSTITUTE

● Mr. HATFIELD. Mr. President, I take this opportunity to commend the Library of Congress Congressional Research Service for a successful Graduate Legislative Institute, recently held in Charlottesville, Va. at the Federal Executive Institute.

The three-tiered program that has been put together by the staff of member and committee relations, in conjunction with their colleagues in the regular CRS Research Divisions, offers an excellent opportunity for congressional staff to become familiar with legislative process and the materials available to assist all Members of Congress. The Graduate Institute is the last in the series, offering a comprehensive participatory vehicle for staff to use in their study of the congressional process. The

Institute becomes a mock congress with both house and senate moving from committee hearings to conference report; passing legislation that spurs the interest and piques the curiosity of the participating staff. This Institute utilized a major piece of agricultural legislation that dealt with issues as far ranging as price support programs, alcohol fuels, and our future relations with the country of Mali.

Wide-ranging material and expert support staff are essential for the success of such a program, and for this reason one of our own, Assistant Parliamentarian Al Frumin made a special Saturday trip to Charlottesville to act as the presiding officer and parliamentarian for the CRS senate. He indicated to the members of the mock senate his overall favorable impression of the ability of the staff to understand and use the archane rules and procedures of this body, and to actually work toward passage of the placebo bill.

I believe the Senate should commend Mr. Gilbert Gude, director of the Congressional Research Service, and his staff for the continually excellent service they provide to the Congress of the United States. Through programs like the CRS Graduate Institute, they are able to provide the training our staffs need to make us more effective in the work of the Senate and more responsive to the needs of our constituencies.

Thank you.●

NOTICE OF DETERMINATIONS BY SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that there be placed in the CONGRESSIONAL RECORD notice of a Senate employee who proposes to participate in a program, the principle objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Joel Johnson of Senator PERCY's staff, to participate in a program in Ottawa on April 15 and 16, 1981, sponsored by a privately supported Canadian educational organization, the Centre for Legislative Exchange. The purpose of the program is to study Canada's recently announced national energy policy.

The committee has determined that participation by Mr. Johnson in the program in Ottawa, Canada, at the expense of the Centre, is in the interests of the Senate and the United States.●

● Mr. HEFLIN. Mr. President, the Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Robert J. Reynolds of Senator WALLOP's staff, to participate in a program in Ottawa on April 15 and 16, 1981, sponsored by a privately supported Canadian educational organization, the Centre for Legislative Exchange. The purpose of the program is to study Canada's recently announced national energy policy.

The committee has determined that participation by Mr. Reynolds in the program in Ottawa, Canada, at the expense of the Centre, is in the interests of the Senate and the United States.●

THE STEEL INDUSTRY COMPLIANCE EXTENSION ACT OF 1981

● Mr. METZENBAUM. Mr. President, today I am cosponsoring S. 63, a bill to help revitalize our Nation's steel companies by providing them 3 additional years to comply with Federal air pollution regulations. This legislation will not jeopardize the critically important national goal of clean air, but will help a vital U.S. industry deal with a unique capital shortfall problem.

S. 63, by extending Clean Air Act compliance deadlines, will free up capital that steel companies would otherwise have to spend for pollution abatement. Without this extension, the beleaguered steel industry will be unable to afford the costs of modernization. And without modern plants and equipment, U.S. steel producers will be unable to compete effectively with the more efficient Japanese and European steelmakers. More American jobs will be lost in an industry already plagued by numerous plant closings and massive layoffs.

That is unacceptable.

Over the past decade, the steel work force in this Nation has declined by close to 20 percent. Last year, the situation was particularly bad. In 1979, more than 560,000 workers were employed by U.S. steel companies. Last year, there were 60,000 fewer jobs. In Ohio, one of the Nation's largest steel producing States, more than 14,500 steel jobs have been lost over the past 10 years. And last year, in Ohio's Mahoning Valley alone, more than 5,000 steelworkers lost their jobs because of plant closings.

Mr. President, my State of Ohio, and the economy of the Nation as a whole and our national security, can ill afford any further declines in the U.S. steel industry. This industry can and must enter into an intensive revitalization program to increase its productivity, open new job opportunities, and prevent a further contraction in employment.

But revitalization will be expensive. According to the American Iron and Steel Institute, accelerated plant modernization could cost as much as $7 billion annually. The hard-pressed domestic steel industry simply cannot generate sufficient capital to meet these huge investment costs while paying out an estimated $1 billion per year to meet Federal pollution control requirements by the Clean Air Act's 1982 deadline.

Mr. President, S. 63 provides a sensible solution to the dilemma facing the steel industry without jeopardizing the goals of the Clean Air Act. A 3-year stretchout of pollution control requirements would be granted by the EPA on a case-by-case basis. And each extension would have to be accompanied by a specific agreement by the steel company to spend the freed capital only on the modernization of existing facilities. In most cases, more modern equipment will mean cleaner operations.

Under S. 63, the steel industry would still be required to comply fully with the requirements of the Clean Air Act by 1985. But this bill will help the steel industry out of its capital shortfall jam. And most important, it will save thousands of American jobs.

Last week, the Senate Committee on Environment and Public Works ordered that this bill be reported favorably. I hope that the full Senate will now move expeditiously to enact this important legislation.●

INTERNATIONAL HUMAN RIGHTS LAW GROUP

● Mr. PELL. Mr. President, at the time of the confirmation hearings for Secretary of State Alexander M. Haig and U.N. Ambassador Jeane Kirkpatrick, the members of the Foreign Relations Committee received a very thoughtful communication from the International Human Rights Law Group. This distinguished organization of lawyers and legal scholars pointed out that human rights is not a new or recent concern in U.S. foreign policy. Indeed, as the International Human Rights Law Group's letter notes, as long ago as 1904 President Theodore Roosevelt was protesting the Armenian massacres, while in 1906 Congress memorialized the Imperial Russian Government over the pogroms against the Russian Jews. Traditionally human rights has enjoyed strong bipartisan support, and, indeed much of our current human rights legislation was supported by and signed into law by Presidents Nixon and Ford.

I was gratified by Secretary Haig's response to a series of questions suggested by the International Human Rights Law Group which I asked Secretary Haig to respond to at the time of his confirmation hearings. In his answers, Secretary Haig stated his support of provisions of the Foreign Assistance Act linking U.S. assistance to a country's human rights record. In response to separate questions from Senator PROXMIRE, Secretary Haig stated that ratification of the Genocide Convention "would unquestionably be helpful" for the United States in various international fora.

As the Foreign Relations Committee prepares for the confirmation hearings of Dr. Ernest Lefever for Assistant Secretary of State for Human Rights and Humanitarian Affairs, I would like to share with the Senate the thoughtful letter from the International Human Rights Law Group, Secretary Haig's response to the questions suggested by that group, and Secretary Haig's response to the questions on the Genocide Convention submitted by Senator PROXMIRE.

The material follows:

INTERNATIONAL HUMAN
RIGHTS LAW GROUP,
Washington, D.C.

HON. CHARLES PERCY,
Chairman, and Members of the Senate Foreign Relations Committee, Washington, D.C.

DEAR MR. CHAIRMAN AND MEMBERS OF THE COMMITTEE: The widespread public discussion regarding the place which the implementation of human rights among nations has in United States foreign policy impels us.

each a person whose career has been dedicated to the advance of individual rights, to write you and each member of the Foreign Relations Committee of the United States Senate in connection with the forthcoming hearings on the nominations of General Alexander Haig to be the Secretary of State and of Dr. Jeane Kirkpatrick to be the United States Ambassador to the United Nations.

We are concerned that the endorsement of human rights as one of the important factors in our relationship with foreign nations is being perceived by some as a recent aberration and a misguided policy.

As all Committee members are aware, as long ago as 1904, President Theodore Roosevelt protested the cruelties imposed on Armenians in Turkey; in 1906 the United States Congress memorialized the Russian Government to express its shock against the pogroms inflicted upon Russian Jews. In 1973, during the administration of former President Richard Nixon, this tradition of expressing concern for human rights abroad received full articulation in an amendment to the Foreign Assistance Act which declared that:

"It is the sense of Congress that the President should deny any economic or military assistance to the government of any foreign country which practices the internment or imprisonment of that country's citizens for political purposes."

In the following year, a Congressional Subcommittee reported:

"The human rights factor is not accorded the high priority it deserves in our country's foreign policy . . . Unfortunately, the prevailing attitude has led the United States into embracing governments which practice torture and unabashedly violate almost every human rights guarantee pronounced by the world community. Through foreign aid and occasional intervention . . . the United States supports those governments."

These Congressional findings aroused the nation's concern that the United States neither be identified with nor support governments which grossly violate the human rights of their people. One of the major laws enacted in response to that concern was the 1976 amendment to the Foreign Assistance Act of 1961 which provides that assistance may not go:

"To the government of any country which engages in the consistent pattern of gross violations of internationally recognized human rights, [except where such assistance] will directly benefit the needy people in such country."

Since then, more than twenty-five laws have been enacted which take into account the observance of internationally recognized human rights before a government receives United States aid, security and military assistance, trade benefits, or support for loans through international financial institutions, the Overseas Private Investment Corporation and the Export-Import Bank.

These laws, as stated in Section 502B of the Foreign Assistance Act, have been enacted "in accordance with . . . international obligations as set forth in the Charter of the United Nations and in keeping with the constitutional heritage and traditions of the United States . . ." While still recognizing other important policy considerations, these laws raise legitimate and important issues of international concern which contribute to our long term national security interests as well as to world peace.

It is in this context that we call upon you, in the exercise of your constitutional responsibility to give your advice and consent to the appointment of the Secretary of State and of the Ambassador to the United Nations, to obtain from these nominees assurances that they will faithfully execute these legislative provisions and continue to regard respect for human rights as one important factor in international relations.

Respectfully yours,

——— ———.

RESPONSE OF ALEXANDER M. HAIG, JR., TO QUESTIONS SUBMITTED BY SENATOR PELL FROM THE INTERNATIONAL HUMAN RIGHTS LAW GROUP

Question 1. Every President since Harry Truman and every Secretary of State since George Marshall have endorsed U.S. ratification of the Genocide Convention. This Committee was unable to consider taking action on the Convention this year due to a number of other important issues. Whether or not we will be able to consider the Convention this year, we are of course interested in your views on the U.S. becoming a party to the Genocide Convention as well as the four other human rights treaties which President Carter submitted to the Senate in February 1978. These are the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights, the Racial Discrimination Convention and the American Convention on Human Rights. Do you endorse ratification of the Genocide Convention and these other human rights treaties?

Answer. I have addressed the question of the Genocide Convention in response to a written question from Senator Proxmire.

The other human rights treaties submitted to the Senate may also contribute to the development of the rule of law in international relations. Their provisions are, for the most part, entirely consistent with our own Bill of Rights and U.S. law. As with the Genocide Convention, U.S. ratification would be helpful in international fora where we have been severely criticized for our failure to become a party to these treaties, and would permit us to help shape this area of the law. These treaties also contain provisions for review of compliance by the States parties. I find such provisions to be generally helpful, but I am concerned whether the actual implementation of the treaties by means of the compliance review procedures, particularly those at the United Nations, has been fair and impartial. We will study those procedures and the actual practice under them before formulating our position on these treaties.

Question 2. President Gerald Ford signed into law provisions of the Foreign Assistance Act which provide that assistance may not go: "To the government of any country which engages in the consistent pattern of gross violations of internationally recognized human rights (except where such assistance), will directly benefit the needy people of such country."

This remains the law today. What are your views regarding this provision?

Answer. In general I support this provision of the Foreign Assistance Act. I do not believe we should, other than in the most exceptional circumstances, provide aid to any country which consistently and in the harshest manner violates the human rights of its citizens.

However, in drafting this legislation it was recognized that exceptions might arise. Indeed, the provision cited in the question was subsequently amended to provide for such exceptional circumstances. Under such exceptions, the legislation now states, the President can certify "in writing to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that extraordinary circumstances exist warranting provision of such assistance."

I believe it is important for those conducting our foreign policy to have such flexibility to act in the best interest of our country.

Question 3. Throughout its history, the United States has striven to be a symbol of liberty and justice. This is what our country symbolizes for the world, apart from its role as a nation with economic and military might. In competition with an ideology and a political system which suppresses individual freedom, isn't the democratic concern for human rights in our foreign policy a significant weapon in that competition? Doesn't it tarnish our image and weaken our appeal to freedom-loving peoples when we give aid and comfort to regimes which deny human rights to their people?

Answer. The United States and a relatively small number of countries throughout the world have been fortunate enough to develop in social and economic circumstances contributing to the protection of human rights on a broad scale. Our own commitment to human rights is a central aspect of our society and the way in which we present ourselves to the world. We must seek to pursue policies that will contribute to the enjoyment of human rights in other nations as well. This is one of the key principles on which our foreign policy should be conducted.

Nevertheless in formulating our foreign policy, we continuouusly balance a wide range of other fundamental interests and values as well, including our security and our economic well-being. I believe this process of balancing competing interests and arriving at policy decisions which promote the long-term and fundamental objectives of the United States is at the heart of foreign policy. We must have underlying principles but how we turn these principles to action in specific circumstances requires continuous judgment and reassessment.

Question 4. While there may be specific criticism or alterations of the current human rights policy which may be justified, isn't it important to recognize as well the accomplishments and benefits of that policy that were not minor. Particularly with regard to developing nations, the United States has become more identified with ideals such as liberty and justice. In this hemisphere alone, Peru, Equador and the Dominican Republic have established democratic governments. In Panama and Honduras, steps have been taken in that direction. In the long run, shouldn't the United States be identified with the trend toward democratic developments instead of with those governments that suppress the growth of democracy by harsh and cruel methods?

Answer. I believe that U.S. support for the principles of liberty, justice, and human rights has contributed to the favorable political developments illustrated in the question by helping to create an atmosphere conductive to democratic development in Latin America and elsewhere in the world. I agree that the United States benefits by identification with democracy. I do not consider it an either/or proposition, however. Identification with democratic development, which flows from our beliefs and traditions, should not in itself preclude association with governments whose views on this issue differ from ours. For one thing, there are numerous considerations that enter into any determination as to the kind of relations we should have with any given country. For another, it should be borne in mind that by deciding a priori not to have relations with any government with whose policies we might not agree, we risk diminishing—sometimes to the point of losing—our ability to influence change in the direction we seek.

In the sum, I certainly believe we should remain true to our own traditions, and encourage democratic development wherever we can. But in determining the nature of our relationships with any government, we should look very carefully at the full range of our interests in that country, including national security and other considerations, and act on the basis of that overall evaluation.

Question 5. Last year a federal court held that a foreign national in the U.S. could seek the assistance of U.S. courts in obtaining a judgment against a police official of Paraguay who had tortured to death a Paraguayan youth. (*Filartiga* v. *Pena*, 00 F. 2d. 00 (2d Cir. 1980)). The Department of State in an advisory brief requested by the U.S. Court of Appeals for the Second Circuit, unequivocally stated its position, which was adopted by the court that "today a nation has an obligation under international law to respect the rights of its citizens to be free of official torture." (Brief p. 3). This tenet reiterates one of the bases of U.S. legislation restricting economic and military assistance programs. It is also a theme raised by officers in the field when approaching governments which violate this international law of human rights. What policies would you continue to ensure respect for this statement of the law?

Answer. I believe that international legal scholars generally agree that all nations have a legal obligation to refrain from torture, including torture of their own citizens. Negotiations are presently under way to develop a multilateral treaty affirming this obligation. I favor the participation by the United States in efforts to protect human rights through such international cooperation and advancement of the rule of law. With respect to U.S. assistance to other countries, I agree that human rights is an important factor to be taken into account in determining whether the national interest is served by providing particular assistance to a particular country. At the same time, I believe it is important that the United States not attempt unilaterally to impose rigid standards which disregard realities and our own interests.

RESPONSE OF ALEXANDER M. HAIG, JR., TO QUESTIONS FOR THE RECORD FROM SENATOR WILLIAM PROXMIRE

Question (a). In view of the fact that the Genocide Convention has been supported by every Secretary of State and every President since the Truman Administration, do you intend to recommend that the Senate give its approval to the Convention?

Answer. I understand that no formal action is required by the Executive Branch on the convention. We will, of course, be prepared to resubmit the necessary implementing legislation at the appropriate time. The Convention has been before the Senate since President Truman requested advice and consent in 1949. Presidnt Nixon's renewal of that request in 1970 was made as a matter of policy and was not legally necessary.

Question (b). In addition to the reservations land amendments proposed by Senate Foreign Relations Committee, do you recommend any additional changes to the Convention before passage?

Answer. The Committee has recommended that the U.S. ratification be accompanied by three understandings concerning the interpretation of the Convention and one declaration concerning the need for enactment of implementing legislation before the U.S. instrument of ratification is deposited. None of these statements would involve any change in the Convention; they do provide useful clarification of U.S. obligations. Although I have not studied the matter carefully, I do not anticipate a need for any further recommendations in this regard.

Question (c). Will you formally request the advice of the American Bar Association, the Defense Department, and the various organizations representing ethnic, religious and racial groups, as part of your review of the Genocide Convention?

Answer. The American Bar Association, the Defense Department and numerous organizations of ethnic, religious, and racial groups have endorsed U.S. ratification of the Genocide Convention. Their views are on record with the Committee.

Question (d). Do you believe that passage of the Genocide Convention will enhance the image of the commitment of the United States to basic individual rights in the various international forums in which we participate?

Answer. Ratification of the Genocide Convention would unquestionably be helpful in various international fora where the United States has been criticized for its failure to ratify the Genocide Convention. This is ironic because the United States was a leader in the post-World War II effort to conclude this Convention as an expression of revulsion to the Holocaust and as a deterrent to recurrence of such crimes against humanity.

Question (e). Will you agree to send your recommendation on the Genocide Convention to the Senate early in this year?

Answer. Subject to the approval of the President-Elect, the Administration will submit formal recommendations at the earliest possible date.●

TAKING STOCK OF THE ECONOMY

Mr. ROBERT C. BYRD. Mr. President, as Congress nears adjournment before the 2-week Easter recess, I believe it is important to reflect on the state of the economy. As Members return to their States and meet with representatives of business, labor, and consuming public, I believe we will learn that many people are concerned that the recovery may be sputtering.

The twin evils of high inflation and high interest rates continue to inhibit sustained economic growth in this country. While there have been some positive signs on both fronts, it is clear that these problems will not abate simply as a result of positive expectations on the part of many administration officials.

INTEREST RATES

Over the past several months we have seen some welcome moderation in the level of interest rates. The prime rate has fallen to 17 percent, a level which most of us never dreamed could be viewed as an improvement. Over the last month, the rate which the Government has to pay on Treasury bills had been falling. At this week's T-bill auction, the 6-

month rate jumped to 13.8 percent, a leap of almost 1½ points.

Home mortgage rates remain at an intolerably high level of about 15½ percent. It is absolutely impossible to envision a fully employed housing industry as long as mortgage rates remain this high.

Given the truly adverse impact of high interest rates on so many vital sectors of our economy, one must question the wisdom of the Federal Reserve's recently announced intention to reduce further the growth of the money supply. Most economists believe that the current level of money supply growth is already too low to accommodate significant, sustained economic growth. Tight monetary policy simply cannot solve the underlying causes of inflation—higher energy prices and the wage spiral.

INFLATION

Increasing energy prices continue to drive our inflation rate ever upward. The Consumer Price Index increased at slightly more than 1-percent rate in the month of February. All but three-tenths of a percent of this increase is attributable to higher energy prices. As we know, the administration's January decision to immediately and completely deregulate the price of oil and oil products was a major factor in the energy price increase.

In March, the producer price index increased at an annual rate of almost 16 percent. Again, energy prices were the major contributor to the increase.

In the backdrop of such developments, I simply cannot see anything in the administration's economic plan which will reduce the CPI to 6.2 percent in 1983, as it currently predicts. By comparison, the Congressional Budget Office is projecting a CPI increase of 9 percent in 1983.

ECONOMIC GROWTH

During the fourth quarter of 1980, the GNP grew in real terms at about a 4-percent annual rate. Most analysts believe that the economy has continued to grow more or less at that rate during the first quarter of 1981.

However, indicators suggest that the second and/or third quarters of this year may see a significant slowdown in the rate of growth. Industrial production fell five-tenths of 1 percent in the month of February after 6 successive months of increase. The index of leading economic indicators fell three-tenths of 1 percent in the month of February, the third consecutive drop in the index.

While far from conclusive, these developments and others do create cause for concern. They suggest that a tax cut designed to spur job creation and productivity is a priority.

UNEMPLOYMENT

The unemployment rate continues to hover around 7.3 percent. Of course, certain States and regions are doing considerably better or worse than this national average. For example, my State of West Virginia has an unemployment rate of about 9.8 percent.

We should be concerned about the disparity among States, regions, and industries. I am concerned that the "broad-brush" approach of the administration's economic program will fail to address some of the severe problems experienced by troubled industries or areas of the country.

CONCLUSION

When we return from the Easter recess we will be faced with major decisions on the President's budget dealing with tax cut levels, spending cuts, and the size of the deficit.

Primary among these concerns will be the size and the focus of the tax cut. I hope that Members will use the opportunity of this recess to solicit the views of constituents on the economic decisions which we soon must make.

I wish all of my colleagues and their families a joyous, productive, and restful Easter holiday season.

CONCLUSION OF MORNING BUSINESS

Mr. STEVENS. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

PRO FORMA SESSION ON FRIDAY, APRIL 10, 1981

Mr. STEVENS. Mr. President, it is the intention that the session on Friday of this week is purely a pro forma session to meet the requirements of the resolution of adjournment. We will have no business transacted. There will be nothing at all transacted on Friday other than a pro forma meeting to comply with that resolution.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 9:30 tomorrow morning.

The motion was agreed to; and at 5:50 p.m. the Senate recessed until Thursday, April 9, 1981, at 9:30 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 8, 1981:

DEPARTMENT OF AGRICULTURE

Seeley Lodwick, of Iowa, to be Under Secretary of Agriculture for International Affairs and Commodity Programs.

William Gene Lesher, of Virginia, to be an Assistant Secretary of Agriculture.

C. W. McMillan, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation.

Seeley Lodwick, of Iowa, to be a Member of the Board of Directors of the Commodity Credit Corporation.

William Gene Lesher, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation.

FEDERAL AVIATION ADMINISTRATION

J. Lynn Helms, of Connecticut, to be Administrator of the Federal Aviation Administration.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

Raymond A. Peck, Jr., of District of Columbia, to be Administrator of the National Highway Traffic Safety Administration.

DEPARTMENT OF COMMERCE

Joseph Robert Wright, Jr., of New York, to be Deputy Secretary of Commerce.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF COMMERCE

William H. Morris, Jr., of Tennessee, to be an Assistant Secretary of Commerce.

FEDERAL HOME LOAN BANK BOARD

Richard T. Pratt, of Utah, to be a Member of the Federal Home Loan Bank Board for the remainder of the term expiring June 30, 1981, and for the term expiring June 30, 1985.

SECURITIES AND EXCHANGE COMMISSION

John S. R. Shad, of New York, to be a Member of the Securities and Exchange Commission for the remainder of the term expiring June 5, 1982, and for the term of 5 years expiring June 5, 1986.

EXTENSIONS OF REMARKS

THE UTILITIES AND NUCLEAR POWER—HOW FREE THE MARKETPLACE?

HON. MARILYN L. BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mrs. BOUQUARD. Mr. Speaker, I think it is important to call the Members' attention to some background which is vital to their understanding of the proposed fiscal year 1982 budget for energy research and development. In reviewing the administration's energy research and development budget, it becomes clear that in most energy supply areas the administration has severely reduced funding below that of prior years, a notable exception being the proposed budget for nuclear energy. The Reagan administration has actually recommended an increase over the previous administration's proposed fiscal year 1982 budget in the nuclear energy R. & D. area primarily to provide for funding of the Clinch River breeder reactor.

Many of my colleagues have expressed dismay and even anger at the fact that particular energy technologies of interest to them have been subjected to major budget cuts while nuclear energy has not. This dissatisfaction has resulted in various proposals for alternative fiscal year 1982 energy budgets, some of which ignore the real promise of energy technologies. While arguing on the one hand that free market forces are not adequate to support the development of other energy technologies, many are critical of what they perceive to be the failure to apply the administration's free market philosophy to nuclear energy. It is this point which I wish to discuss, for there is a great deal of confusion on this matter.

It should be obvious to all of us that the free market approach, to whatever extent it is valid, can only apply in circumstances where a free market actually exists. In evaluating the nuclear energy R. & D. budget then, we must ask, "Is there a free market which can support the development of nuclear energy?" and second, "Is this development in the national interest?" I believe that the answer to the first question is "No," that a free market does not exist, and to the second question, the answer is a resounding "Yes," as has been supported by study after study by prestigious private entities and Government-sponsored groups.

The free market climate does not exist for the development of nuclear energy for several reasons: (1) Electric utilities are heavily regulated monopolies which are not permitted to operate in the free market. The driving force behind any private investment in nuclear energy is the ability to sell nuclear powerplants and to use them to generate electricity for sale to the public. Electric utilities are the purchasers of electric power stations and the producers of electricity for public consumption. (2) Electric utility regulatory bodies, which control the ability of utilities to purchase nuclear powerplants, finance research and development, and earn a rate of return on investment, have become so restrictive that in general a utility is not able today to build any central station facilities, much less a nuclear station, and of course, no allowances are made for research and development and financing of nuclear demonstration projects. (3) Free market forces in nuclear energy have been severely impacted by the onerous regulation of this energy source by the Federal Government. The Government has taken the approach that private industry cannot be trusted with this technology on its own. Unfortunately, Federal involvement has nearly made it impossible to develop nuclear energy because of the lack of predictability in licensing nuclear plants. (4) The free market depends on the ability to estimate financial risk and make business decisions on the basis of risks and benefits. In the case of nuclear energy, in addition to licensing problems discussed in (3) above, schizophrenic Federal policy has resulted in the withdrawal of Federal support of a number of private or semiprivate nuclear ventures. These include: Withdrawal of permission to operate the Barnwell nuclear reprocessing plant, attempted termination and prolonged delay of the Clinch River breeder reactor project, closing of the uranium enrichment order books in the early seventies, increased restrictions on export of nuclear technology and materials, and identification of nuclear energy as an energy source of last resort.

It seems clear that free market forces are unable to operate in this environment. Because of these peculiar and severe limitations on the free market in the case of nuclear energy, it is imperative that the Federal Government continue its support, particularly in the area of research and development and demonstration of advanced technologies. There are basically three choices before us. One would be to establish a true free market environment for the development of nuclear energy. A second would be to continue Federal support of this technology, fostering where possible private support through Federal guarantees. And third, to do neither of the above and to close off nuclear energy as a viable resource for our Nation. I suggest to you that the latter chocie would be tragic. It seems clear to me that in the near term, the second choice is the only one open to us and it should be actively pursued if serious consequences are to be avoided.

A key factor mentioned above impacting the free market character of nuclear energy, is the financial health of the electric utilities. For a variety of reasons their ability to raise capital has diminished significantly and the ability of many utilities to meet near-term electric energy requirements is in serious doubt. In addition, we continue to burn a million and a half barrels of oil a day for generating electricity, oil which could be displaced by new coal for nuclear facilities if these facilities could be built. This tragic set of circumstances can only be reversed through an aggressive and positive policy on the part of the administration and the Congress to assure the financial health of our utilities. We must recognize that there are many who are actually seeking the destruction of the utilities and there will be resistance to any change that would improve their circumstances.

However, the purpose of these remarks is to point out the lack of a free market environment as it relates to nuclear energy. The following is a condensed version of a report of an informal advisory task force made to the DOE transition team in December of 1980, by representatives of the utility industry and several economic entities. This report addresses the financial condition of electric utilities and I commend it to the attention of all Members of the House.

REPORT OF AN INFORMAL TASK FORCE TO THE ENERGY TRANSITION TEAM

THE DECLINING FINANCIAL STATUS OF THE ELECTRIC UTILITIES

As a result of their inability to recover their inflation-driven costs, the Nation's electric power companies, upon which the country relies for 75-80 percent of its electric power requirements, are now in one of their most difficult periods financially. Their finances are now so poor that as a group they are unable to undertake the massive new investments required to discharge their public service responsibilities in the future.

The electric companies do not have and cannot raise the money to build the new generating stations which should be started

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

now to assure adequacy of power supply in 10 or 15 years, when the needs of a growing population and an expanded workforce will require far more generating capacity than is now available or under construction. They cannot plan for meeting the new energy requirements in connection with the programs for improving the productivity of U.S. industry. The proposals for reducing the Nation's oil import dependence by substituting coal for oil and gas in utility boilers have bogged down because of the inability of the utilities to raise the billions of dollars needed to convert their oil and gas burning generating plants to coal firing, a conversion process which typically would require expensive coal handling equipment, vast amounts of coal storage, additional equipment to control air pollution, and much more. Clearly, it is in the national interest to assure that utilities are permitted to earn enough money to discharge the responsibilities of providing the electric supply for a growing society, and for doing so in a way consistent with national security and sound environmental standards.

The reason for the poor financial condition of the utilities is not that our society is less dependent on electricity than in the past. On the contrary, the share of energy delivered in the form of electricity grows from year to year. It is now at its highest point, roughly 30%, and is predicted to rise to about 50% by the year 2000. Electricity consumption increases annually, not so fast as in the past, because of conservation, higher prices and business recession, but nevertheless at a rate which attests the essential vitality of the electric power industry. No, the reason lies in the fact that the price of electricity is controlled at both the wholesale and retail levels by government regulatory agencies, and that these agencies have been unable to cope with the impact of long-continued inflation on utility costs. These agencies are the Federal Energy Regulatory Commission in Washington for sales at wholesale, and the 51 state regulatory agencies—variously called public utilities commission, public service commissions and commerce commissions, among other titles—for the retail sales, which account for more than 90 percent of utility revenues. The state agencies are sometimes referred to collectively as the "PUC's".

A recent study of the 50 largest electric utility companies, by Argus Research Corporation of New York, traces the decline in the financial health of the electric utility industry in the nine years 1972-80, inclusive, the last year being partially estimated. During this period the PUC's on average allowed a rate of return on common equity (in effect, on the investment of the owners of the common stock) which started at 12.5 percent in 1972 and rose gradually to 14.3 percent in 1980. This increase has clearly failed to keep abreast of the rising cost of money, but at least the trend reflects a small awareness of the trend of money costs and of the revenue needs of the regulated companies. What is shocking is that the actual rates fixed by the Commissions in the recent years of rapid inflation have not permitted the earned returns to come even close to the allowed returns. Indeed, the discrepancy between the allowed or purported returns and the returns which the utilities were able to realize has increased year by year. In 1980 the allowed return was 1.8% above that in 1972, but the earned return was 1.3% below that earned in 1972. In 1972, the difference between allowed and earned returns was only 0.2 percentage points; in 1980 the discrepancy has grown to 3.3 percentage points.

In 1980, new bond money has cost the utilities, on the average, about 12⅛%; the cost of common equity money has, of course, been much higher, and the prime rate for bank debt has ranged from 10¾% to 21%. Today the rate is 21% and is expected to go even higher. Yet in this year the utilities on average have earned only 11% on their common equity. It is obvious that no business can continue indefinitely if it must raise large amounts of capital at higher cost than it is allowed to earn. And, in recent years, the electric utilities hae been compelled to raise nearly $4 billion of new common equity money every year—one half of all new issue common stock sold in the U.S.—virtually all of it at stock prices well below the book value of the common equity (almost ⅓ below, on average) and hence at the expense of diluting the investment of present shareholders.

There are two points to keep in mind in connection with this dismal financial picture. In the first place the electric companies, unlike most other industries, cannot stop spending when new investments become unprofitable. Their major need for new money is in connection with generating plant construction, and such plant has a construction cycle (lead time) of 10-15 years. It is not easy to stop construction of a plant once it is started, both because the output will be needed by the utility's customers by the time the plant is completed, and because the money already poured into plant construction, measured in hundreds of millions of dollars, is at peril if construction should stop. Interruption of construction, moreover, always adds greatly to the plant's ultimate cost, and thus to the cost of electricity sold to consumers.

The second point is that the financial returns mentioned above, low as they are, are overstated. These are not cash earnings; in large part they are merely book entries, because the prevailing way most PUC's treat the moneys invested in plant which is still under construction is to attribute earnings to them, without including the investment in the base on which cash earnings are permitted. This is the so-called AFC treatment or AFUDC—Allowance for Funds Used During Construction. These paper earnings, which were a negligible part of total earnings in the sixties and earlier, when the rate of inflation was low, had become 30% of total return on equity by 1972, and almost doubled again—to 58%—by 1980. More than half of the meager earnings of stockholders in 1980, therefore, consisted of a book item, and much of the cash for dividend requirements had to be raised by issuing new securities.

The irony of the regulatory failure to allow reasonable electric utility rates is that it is counter-productive to the interests of consumers. An immediate effect of low earnings and earnings of low quality is to increase the financial risks of investors, and thus lead to the down-grading of securities by the rating agencies. Downrating, in turn, means that the bonds must carry higher interest rates, a charge which is passed along to consumers. Such down-grading has become a familiar phenomenon in the utility scene. In the first 11 months of 1980 alone, there were 34 down-gradings by the two best known rating agencies, Moody's and Standard & Poor's and only a single upgrading. The bonds of many utilities are now rated at levels so low that many institutional investors are barred by law from purchasing them, and interest rates must be raised in order to sell the securities within a much smaller market. These additional capital costs force rate increases which otherwise would not be necessary, without improving the financial condition of the utilities or their ability to raise money on a low cost basis. An equally serious result of limited capability to raise money is the inability of the utilities to make the investments required in order to achieve the optimum economies of service.

Why are the PUC's (with only a few exceptions) so remiss in allowing the utilities an opportunity to realize reasonable earnings, when it is demonstrable that an electric utility in sound financial health is far better able than a financially straitened company to hold down its money costs, to build economically for the future, and to participate in government programs for conversion of oil-burning plants? In the long run a utility earning reasonable returns can provide better service to its consumers, at lower rates. The rub is that to bring utilities up to a reasonable earnings level requires early rate increases, and the benefits materialize only over a period of time. It is hard to persuade consumers that a rate increase now is in their long-run interest.

Utility rates are fixed by the PUC's in judicial type proceedings in which any consumer or consumer group may testify. These are the only prices in our society over which the owner has no control, at the same time that he is required to maintain a high standard of service and somehow to raise vast amounts of new money. Indeed, the electric power industry is the most capital-intensive of all American businesses. It may be that the average consumer understands that he is not well-served by a losing business, but the opposition to rate increases has now become professionalized. In the name of the consumer many groups and agencies have sprung up, assisted by lawyers, technicians and public relations experts, who use every device to prevent or delay rate increases, including exploitation of all the media resources to build up consumer hostility to such increases, or at least the public perception of such hostility. In this environment of vociferous opposition to fair rates, the PUC's as a group lean over backwards to avoid being labelled as "pro-utility".

Moreover, the technical and complex nature of the rate-making proceedings lend themselves to uncertainty and delay. Thus the PUC's will typically take from one to several years to decide a rate case, exclusive of the time required for judicial review if the decision should be appealed to the courts. Meanwhile, inflation eats away at the utility's earnings, and the rate increases, when they come, are based on stale data which no longer reflect current costs. Under utility regulatory procedures, the revenues lost on account of delay are never recovered.

The decisions in rate cases involve two elements. One is the level of the rate of return to be allowed, and the other is a set of rates which are prescribed for the purpose of yielding the allowed return. Under the pressure to avoid rate increases while preserving an appearance of fairness, the PUC's purport to allow far higher earnings than the actual rates they prescribe will yield. Thus, they turn one face to the utilities and the courts with return allowances at one level, and another to the public with rate schedules which could not possibly produce the purported returns. In 1980, as mentioned above, this discrepancy amounted to 3.3 per-

centage points, the difference between a purported allowance of 14.3% and a realized return of only 11%.

We recognize that the PUC's are under great pressure, sometimes from governors and legislatures as well as from organized groups who claim to speak for the public, to hold rate increases to a minimum. There is a rapid turnover among utility commissioners, and dovetailing return allowances with prescribed rates is not an exact science. Many may believe that the rates they fix will yield the returns they allow. Whatever they may think, the discrepancies are large, crucial to financial solvency, and growing.

Clearly, public utility regulation as now practiced has proven itself unable to cope with the pressures of inflation. It cannot preserve the ability of the electric utility industry to serve the interests of its consumers, much less those of the investors who have poured hundreds of billions of dollars into utility investments, and who are continuing to pour in new money by the billions.●

LEGAL SERVICES REAUTHORIZATION

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. RAILSBACK. Mr. Speaker, my Subcommittee on Courts, Civil Liberties, and the Administration of Justice yesterday concluded 7 days of hearings on the reauthorization of the Legal Services Corporation. I would like to share with my colleagues the thoughts of PETER RODINO, chairman of the Judiciary Committee, regarding the need for this reauthorization, and therefore submit the following article:

THE NEED TO SAVE LEGAL SERVICES FOR THE POOR AND THE ELDERLY

(By Peter W. Rodino, Jr.)

During the 32 years that I have served in the House of Representatives I have come to cherish my associations with the House Judiciary Committee, second only to my associations with my family. As Chairman of the Judiciary Committee I have learned—and relearned anew in each session of Congress—that if a free society is to survive, equal justice must be more than a slogan emblazoned on the marble walls of courthouses. It must be a living force which permeates the disparate groups in our society and unifies our people. For just as in a wholesome family, no member ought to be estranged, under a good government no people ought to be alienated from equal access to justice.

Fundamental to my role as the Chairman of the Judiciary Committee is the fact that I am a Representative and life long resident of Newark, New Jersey—a city which more than most has seen the ravaging affects of the alienation of people from each other. Over the years we have seen the alienation of immigrants and their children from the prevailing order, of blacks from whites, of the poor from the more affluent. In recent years we have also seen the growing alienation in families themselves, especially the alienation of the elderly from the young, and the cruel isolation of those frail elderly who are estranged from their families and warehoused in nursing homes.

For all of these reasons I was saddened and dismayed when the present administration adopted the recommendation of Mr. David Stockman that our entire national legal services program be totally dismantled. As a result I have introduced a bill which is now being considered by the House Judiciary Committee. My bill, H.R. 2506, would extend the authorization for appropriations for the Legal Services Corporation for three additional years. It would also retain for fiscal 1982 a funding level of $321.3 million, identical to the level for 1981.

Now that the issue of access to justice for the poor is again before the Judiciary Committee I recall that in the 93rd Congress, when the relationships between the Committee and the executive branch were subjected to their severest strain, there was unified bi-partisan support in the Congress for President Nixon's proposal for the establishment of the Legal Services Corporation. As President Nixon noted on May 15, 1973: "Legal assistance for the poor, when properly provided, is one of the most constructive ways to help them to help themselves . . . (and) justice is served far better and differences are settled more rationally within the system than on the streets."

With hearings underway on this subject I am hopeful that President Reagan will recognize that the move to destroy legal services is unwarranted, unfair, and unwise. I have been gratified by the fact that the Republican members of the Subcommittee considering my bill, including my colleagues Congressmen Railsback of Illinois, Butler of Virginia and Sawyer of Michigan, have already informed the President of their opposition to the loss of a federally funded legal services program. It is also encouraging to me that among the supporters of the program are the American Bar Association and several other bar groups as well as a number of public and private organizations, and private citizens.

With respect to the problems of the elderly in particular, I very much appreciated the strongly supportive testimony already given to the Subcommittee by the National Retired Teachers Association/American Association of Retired Persons. After reviewing their testimony I am convinced that projects such as the National Senior Citizens Law Center and the Legal Council for the Elderly are playing a significant role in assisting older persons to receive the benefits to which they are legally entitled—benefits which can only be obtained by equal access to justice.

In 1980 alone more than one half million elderly persons who otherwise would have been denied access to justice were provided with legal assistance. It was especially touching to me to learn of story after story of elderly persons besieged by a maze of complex bureaucratic obstacles to their obtaining the benefits which we in Congress have voted to provide for them. These include problems involving housing, food, social security benefits, medicare, medicaid, age discrimination in employment, fuel assistance, as well as disagreements concerning taxes, regulations for nursing homes and retirement benefits. The need to represent the poor in all of these highly specialized areas, areas which are usually not within the normal scope of practice of members of the private bar, is indisputable.

The work of legal services on behalf of the elderly is of course only one example of the important work being done through the legal services program in every section of the United States, both urban and rural. The national legal services program, though primarily funded through the Legal Services Corporation—which administers grants and monitors its grantees—is basically a local program. Each field program is a private non-profit organization which is directed by a local board whose composition is 60 percent lawyers and one-third clients from the service community. There are limited resources and so priority setting is conducted at the local level with input from the private bar and client community. The initial goal of "minimum access": that is, two attorneys per 10,000 poor persons, has just been completed. This is a modest goal of access to the justice system, since there are approximately 14 attorneys per 10,000 people across the nation. But for the poor this goal provides minimum access to the basic necessities of life—food, shelter, clothing, and education.

More than 2 centuries ago Edmund Burke rose often in the House of Commons of the English Parliament to plead that if the British Empire was to survive it would be essential to provide equal access to justice—not only for the American colonies, but also for the impoverished people of Ireland and India. He argued that such people could never be long ruled by the force of the King's army but that instead, they could be governed only by what Burke referred to as the "majesty of the law."

In 1981 it saddens me to realize that we again need to reaffirm the importance of equal access to the law on behalf of the poor, the elderly, and the disabled. But I for one will maintain hope that Congress will continue to give bi-partisan support for our nation's legal services program. To do less would do violence to our past history as well as our future.●

EFFECTS OF THE REAGAN ENERGY BUDGET

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. CONYERS. Mr. Speaker, within a month of the publication of the Reagan administration's budget package, close observers were able to detect at least three areas of weakness, contradiction, or danger. Students of the budget were quick to point out that, contrary to the administration's professed intentions, its plan contained nothing that promised a solution to the inflation problem. After all, the Reagan budget assumes a nearly $50 billion budget deficit and, in removing all restraints on defense spending, was likely to add far more to both deficit spending and inflation.

The administration's defense budget, which calls for a nearly 25-percent jump in obligational authority in 1982 over 1981, was the second major flaw in the Reagan approach. As students of defense spending have since pointed out, the Reagan defense budget will aggravate inflationary pressures in an industry already overburdened by wage pressures and material shortages; crowd out badly needed invest-

ment capital that civilian sectors require; and deepen the already skewed economic growth in certain regions and at the expense of economic depression in others.

Robert Engler, the distinguished author of the "Politics of Oil" and "The Brotherhood of Oil," now lays out the errors of the Reagan energy budget in a paper, "Private Enterprise Unlimited," that was commissioned by the budget study group of the Institute for Policy Studies. Since the energy sector poses the greatest danger in the short run to consumers and the economy in general, I urge my colleagues to give careful attention to the Engler analysis that follows:

PRIVATE ENTERPRISE UNLIMITED: THE PRESIDENT'S ENERGY BUDGET

(By Robert Engler)

The press heralds the no-nonsense take-charge style of the new administration in moving to right the troubled economy. But a reading of the budget prescriptions in "America's New Beginning: A Program for Economic Recovery" and in the Office of Management and Budget working papers (the "Stockman hit list") which preceded this revised budget provides minimum assurance as to the likely effectiveness, let alone fairness, of the national revenue sought. President Reagan's objectives appear straightforward: tax cuts of $50 billion for next year are to stimulate investment and inflation-free growth in the private sector which will put all Americans back to work productively. These are to be matched by some $50 billion in cuts of federal appropriations, heavily in areas where government intervention and regulation discourage business initiative.

The energy provisions suggest how little has been learned from the experience of the past decade. Many of the seemingly hard-nosed facts about the domestic economy emerge as ideological conjecture supportive of corporate rule over energy. The international dimensions are based on a perilous geopolitics for American global domination. An unabashed paean to the profit system and to those skilled in tightening the belts of others, the Reagan budget reflects a trained innocence as to how energy is actually managed and who pays what for its costs. The consequence of its bold steps backward is a meanness toward the growing number of citizens who neither share nor can anticipate sharing appreciably in the benefits of the economy. The perverted priorities of the budget presage regional and mass social explosions at home and military confrontations abroad.

Candidate Reagan identified government as the problem rather than the solution. Its meddling in the marketplace had brought on our energy crises. His pledge to turn private enterprise loose evoked images of oil and coal operators drilling and digging with liberated abandon to ensure abundance for the American way of consumption. But the race to remove what is identified as the burden of public government is not accompanied by any recognition, let alone lessening, of the burden of corporate government upon consumers and taxpayers.

To the contrary, controls on the price of oil from "old wells", already slated to be removed later this year, are to be lifted now. All oil prices are to be brought up to the OPEC level. The remaining administrative ceilings on natural gas, long since weakened in response to industry pressures, are also viewed as obstacles to economic revitalization. The major constraint to their immediate phasing out is recognition that gas prices and profits will rocket out of sight, carrying with them much of the popular support for the illusory free market and conceivably the Republican Party's voting base.

The assumption has been that higher prices would provide the clearest non-bureaucratic signal to consumers. While the captains of energy are to have their confidence restored through the removal of controls, the "profligate citizen" is to be taught through his wallet that his wanton desires must be brought under control. National energy consumption has been dropping perceptibly. Yet prices continue to spiral. Heating fuel costs have risen at least 25 percent since the election and gasoline prices have gone up about 20 percent—far beyond what the administration had predicted would result from decontrol. Scant attention is paid to the regressive impact upon different sectors of the population. To those whose limousines clog mid-Manhattan $2 gasoline will just give their chauffeurs easier curbside parking. For the growing number of people who find energy costs (built into almost every purchase) already taking over 25 percent of their disposable income, the cutting back is most likely to be on food and health care.

Basic to the case for higher prices have been the twin assumptions that there is a shortage of energy and that the industry needs every incentive to end it. The new profits would provide the necessary investment encouragement, just as the removal of governmental restraints would offer "psychological" reassurances. There obviously is no reading of the trade journals which continue to report gluts in the oil market. Nor is there any analysis of the present capital resources of the energy industry and how this capital is allocated. Over 40 percent of all manufacturing profits in the United States go to the oil corporations. They occupy six of the top ten positions (by assets) among all industrial enterprises. Exxon's net profits for 1980 were $5.7 billion on revenues of $110 billion, an increase of 32 percent over the previous year.

The soaring prices of the past decade have not led to significant new production in oil and gas. Oil corporations define their need and stockholder obligations as attractive investment opportunities for this tremendous capital. These are not necessarily found in drilling more wells or building new refineries. Nor do their growth policies suggest that their primary mission is to expand employment or revive deteriorating regions. They increasingly move to take over all energy forms and to become active in non-energy arenas of the world economy. Their control over the price of energy enables the corporations to generate most of their capital internally. American consumers are their chief investors. Yet they remain with minimum leverage for the disposition of these resources.

That leverage is now to be reduced even further. Antitrust and divestiture measures, never the most successful of instruments against market domination, are to be phased out. The Federal Trade Commission, for example, which since 1973 painstakingly has been constructing a monopoly suit against big oil, has been notified by the OMB that its budget is be halved. Should this warning prevail, most FTC antitrust activities will end within a few years. The industry's ability to keep supply down and prices up will go unchallenged—a condition known as the free market in Reaganspeak.

With removal of federal controls over the allocation of oil, refineries and regions whose limited purchases are of diminishing interest to the major suppliers will have difficulty in finding dependable independent sources. Small gasoline stations and their dealer-mechanics will become increasingly rare along the road as part of the design "to restore market forces."

The Department of Energy, although generally most loyal to the oil and aerospace industries, is targeted for abolition. Immediate reductions in its budget are in its information-gathering, environmental effects research and regulatory functions. DOE conservation programs are to be cut back since individuals and businesses "are already making substantial conservation efforts . . . which will be accelerated by oil and gas decontrol." The development and implementation of building and appliance energy consumption standards are to be eliminated.

A recent investigation by a subcommittee of the House of Representatives concluded that the department has been quite lax in ascertaining that a substantial amount of "old oil"—oil still under control—has been "miscertified" (a DOE term) and sold at the much higher price allowed "stripper" oil. The cost to the consumer was placed at $1 billion in 1979 and as much in the first half of 1980. "We used to call that cheating," commented chairman Bob Eckhardt (Texas), since defeated.

Public financing to encourage the development of renewable alternative energy such as solar and geothermal, now relatively slim in the overall picture of federal energy involvement, is to be cut sharply. The Solar Energy and Energy Conservation Bank is to be eliminated even before it gets under way. Alcohol fuels and biomass are to lose their loan subsidization so as not to "overstimulate production and adversely affect food prices." The familiar ideological justification is that the market should determine the entry of new technologies and enterprises. The consequence is unconditional surrender to the energy industry's timetable as to when it is appropriate to introduce new supplies and forms. As always, the prime consideration is the maintenance of price and market domination.

To preserve the appearance of evenhandedness, DOE funding of private demonstration plants for synthetic fuels is to be reduced. But this may turn out to be a bureaucratic sleight of hand, for the energy corporations will continue to receive from the Synthetic Fuels Corporation loan guarantees, scaled down somewhat, for synfuel projects.

Nuclear energy, meanwhile, receives a new lease on life. Its development is to go forward, with projected increases in federal subsidies and a speeding up of the licensing process for generating electricity. Little concern is voiced for the high economic costs certain to be borne by consumers who pay for the construction as well as the energy. The haunting and unresolved questions about community safety and environmental degradation are played down.

Workers in the energy industry are not to be assured any lease on life. Black lung compensation for miners is to be scrutinized and reduced so as to preclude "welfare payments for those not truly medically disabled." There are to be further cutbacks in OSHA's review of industrial safety conditions. Hard-

earned gains toward a more livable workplace are thus to be reversed as major social costs are shifted to coal miners and refinery workers. Their communities are to serve as unquestioning energy colonies of a revitalized America. Their faith in capitalism apparently does not require any shoring.

Compassion for the poor and the near-poor who find themselves unable to pay for energy is to be rationed.

There is little in the proposed budget that is supportive of geniune conservation of energy resources. And there is less which redirects capital, private or public, into areas which might ultimately produce thoroughgoing energy efficiency and savings. To do this would be to invade the domain of the private corporation and undermine its prerogative to opt for what is most profitable. Chrysler is still helped to produce cars, despite the market signals about the consumers' ability and desire to purchase them. No terms are set as a condition of continued loans for more socially desirable production—as for example, buses that run.

Mass transit aid is to lessened, thus subsidizing the auto industry and furthering energy waste. Capital grants for new urban mass transit construction are to be viewed skeptically and such less capital-intensive means as car-pooling is recommended instead. "Improvements in intercity highways and widespread availability of air travel since 1960 have, in effect, eliminated the need for and utility of railroads," the OMB concluded. "While part of the country's heritage and history . . . [they] . . . have little place in a federal budget which is heavily in deficit." Each Amtrack train must meet stringent tests of operating cost effectiveness. Fares are to be increased sharply, subsidies slashed and marginal service chopped. "With the President's decontrol of gas and fuel prices, the cost of driving or flying will increase. Thus, Amtrack passengers are less likely to object to paying higher fares."

Many may have difficulty in noting dramatic change from Carter days (save perhaps in the deemphasis upon conservation) in public policy or in the impact upon their family budgets. But fleecing of the public by private enterprise is now elevated into high principle as well as practice. Gone is the lip service to populism. Where once much of corporate manipulation took place backstage—although admittedly the curtain was quite transparent, as for example, industry advisory committees, consultants and revolving door personnel controlling the work of nominally public agencies—now it is to be in the open. No ambiguity or conflict between development and stewardship is to hamper the efforts of the Department of the Interior. The public domain, comprising one-third of the nation's land area and containing perhaps one-half of remaining fossil fuels, is to be a supermarket for private leasing under this agency's sympathetic eye. **The potential for genuine competition or for public development of energy on a public timetable in harmony with the national interest is abdicated. This mortgaging of the nation's future becomes a subsidy of incalculable worth to private enterprise, once more in the name of freedom.**

For critics, his budget should exorcise the allures of soft and sunny paths inviting barefoot entry into the promised land of decentralized energy and government. It underscores the urgency for ending the acceptance of energy as a commodity, vulnerable to the profit collaboration of the international corporations and overseas producers. (See Robert Engler "Letting Big Oil Do It," The Nation, October 25, 1980.) Energy policy must be placed within the framework of a democratically planned economy whose budget is the product of public debate and control. This might be the beginning of a genuine economic reconstruction in which renewable fuels, manageable technologies and ecological principles are significant components. Such alternatives cannot bypass a sustained political challenge to military Keynesianism and to private power over energy and investment. That may come about only when enough people mobilize the political will to do so.●

CIVIL DEFENSE

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. SKELTON. Mr. Speaker, recently, I had the opportunity to speak to a graduation class at the Emergency Management Institute at Emmitsburg, Md. I was most impressed with the career development courses offered as well as the professionalism that I noticed. While I was there, the graduating class presented me a resolution dealing with civil defense and protection of our citizens.

I insert a copy for the benefit of the Members of Congress:

EMI PHASE IV DECLARATION: PROVIDE COMMON IDENTITY FOR AND STRENGTHEN U.S. CIVIL DEFENSE EMERGENCY MANAGEMENT

Whereas current U.S. strategic military strength has limited deterrent value because the USSR knows Americans have inadequate Civil Defense, and

Whereas failure of the United States to maintain an adequate Defense has encouraged and failed to respond to the continuous buildup and preparations of the USSR to fight, win, and survive a nuclear war, and

Whereas the window of maximum vulnerability for survival of the United States and its people in a preemptive Soviet nuclear attack is over a period of the next 5 to 10 years, and

Whereas to reverse these conditions, adequate U.S. Civil Defense is required forthwith as an integral and vital part of national defense and survival, and

Whereas the New Administration is pledged to create a Strategic and Civil Defense that will protect the American people against nuclear war at least as well as the Soviet population is protected: Now therefore be it

Resolved by local and state directors and coordinators, et al. representing 46 jurisdictions and activities from 27 states here assembled (in the final Phase IV of professional career development in emergency management and civil defense) that our national leadership support the President's Platform Pledge and:

(1) Fund Civil Defense that will protect our people forthwith!

(2) Immediately implement the mandatory use of our easily identified, already available, universally recognized red, white, and blue Civil Defense logo at the federal, state, and local level as mandated by the U.S. Congress in the Federal Civil Defense Act of 1950, included in section 44 of the Code of Federal Regulations, Chapter 1, Federal Emergency Management Agency, section 306.3 (prescribed insigne) patent 129797 (United States Congress)!

(3) Adopt a singular, nationwide, common identification—namely the "Office of Civil Defense Emergency Management (OCDEM)" to be used by all Civil Defense organizations and relate to the full scope of our mission at the national, state, and local levels! OCDEM shall mean, on the national, state and local levels of government Civil Authority preparing for and the carrying out of the preparations for wartime, manmade, and natural disasters and abnormal emergencies, to save lives and protect property, and to restore normal activities as soon as possible.

(4) Strengthen U.S. Strategic and Civil Defense capabilities so as "to provide for the common defense" as mandated in the Constitution of the United States.●

HOPKINS APPLAUDS LEXINGTON HERALD

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HOPKINS. Mr. Speaker, the news media, rightly or wrongly, sometimes suffers labeling by politicians as being, individually, either a "Republican station" or "a Democrat newspaper."

One of my hometown papers, the Lexington Herald, is a self-professed Democrat paper, both in its editorial philosophies and political endorsements.

The Lexington Herald did not endorse Ronald Reagan in his bid for the Nation's highest office—yet, here we read an editorial that could have been written by any one of the Republican Members of Congress.

It says what the Reagan administration has been espousing for months: Many big spenders passed ill-conceived legislation that led to the belief Uncle Sam should provide for citizens' every whim. The editorial goes on to point out the so-called budget cuts will not gut programs, but they will merely reduce increases—and, on top of these reductions, the budget will still represent sizable increases in nondefense spending.

I enclose a copy of the editorial that appeared Thursday, April 2, 1981, in the Lexington Herald:

REAGAN'S PROGRAM: WILL SYMPATHY ACCOMPLISH WHAT POLITICS COULDN'T?

As soon as the agony of Monday was over, as soon as it became apparent that President Reagan was recovering from the wound afflicted by a would-be assassin, the speculation began. What effect would the incident have on the fate of the president's economic program?

In an effort to blunt the edge of the knife that's cutting into the budget, the myriad of special interest who benefit from government programs had lately increased their criticism of Reagan's proposals. Understand-

ably, however, the shots fired outside the Washington Hilton muted that criticism earlier this week.

As might be expected, there was an immediate outpouring of national sympathy for the wounded president. And, to go a step further, there must also be an increased sense of admiration and respect for a 70-year-old man who took a bullet in his lung, walked into a hospital under his own power, joked with physicians as they were about to perform surgery, and was back signing bills into law the next morning.

It is probable that the nation will feel more secure with Reagan after this uncommon display of coolness, physical toughness and, yes, plain intestinal fortitude—not to mention humor—in the midst of what must be the ultimate personal crisis.

Surely, none of this will be lost on the president's critics, on Capitol Hill and elsewhere. But how long their criticism will be suspended is uncertain. Equally uncertain is how much effect the episode will have on the economic package now before Congress. Rep. Charles Rangel, D-New York, a critic of that package, expressed his opinion that if Reagan's program passed as a result of the attempted assassination, it would have an adverse effect on the nation for decades to come.

Said he: "The sympathetic support is going to blur the real issues, the impact of the cuts, the inequities of the tax reductions."

Perhaps the attack on Reagan's life will speed the passage of his program; perhaps not. But if it does, it would be well for Rep. Rangel and others of his ilk to recall that the federal programs they now hold so dear were passed—in large part—by the wave of sympathy generated by the assassination of President Kennedy. Many of those programs, although designed with the best of intentions, proved ill-conceived. They led to the endemic belief that the federal government should provide for the every need of the nation's citizens—as the phrase has it, "from cradle to grave." That, in plain terms, is the erroneous belief Reagan is trying to rectify.

It would also be well for critics to be accurate in their criticism. The wailing and gnashing of teeth over so-called "budget cuts" that will "gut" programs is fundamentally misleading. Financing for very few programs is actually being reduced. The Reagan budget for next year—in non-defense spending—represents a sizable increase over the current budget.

What Reagan, in fact, did was reduce the rate of increase proposed in an irresponsible 1982 budget submitted by Jimmy Carter—a budget that would have raised federal spending by as much as $100 billion, and certainly would have raised everyone's taxes to pay for the ostentation.

Although many government programs would benefit from actual spending reductions—or outright elimination—all Ronald Reagan has done is attempt to restore some semblance of fiscal sanity, and apply the brakes to the rate of increase in spending.●

LETTER TO JESSICA

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. GREEN. Mr. Speaker, the holocaust was a horror and a tragedy of worldwide dimensions that can never be adequately described. Its totality is made up of millions of individual experiences of loss and survival. The central message we must all learn from it is that we must never forget what occurred so that the world will never allow another holocaust to happen.

This message of remembrance is most appropriately brought to us by the survivors of the holocaust, and their emerging second and third generation family members. I was particularly moved by a letter written by Rita and Steven Meed to their infant daughter Jessica which was reprinted in the Jewish Week-American Examiner just 1 year ago. Dr. Steven Meed is the son of Vladka and Benjamin Meed, with whom I have worked in my capacity as a member of the United States Holocaust Memorial Council and theirs as leaders of the Warsaw Ghetto Resistance Organization (WAGRO).

This letter beautifully illustrates the link that connects three generations of families affected by the holocaust—the survivors, their children, and their children's children. I am sure that Jessica Meed will treasure this as she grows older. I am very pleased to place this in the CONGRESSIONAL RECORD for the benefit of my colleagues.

A LETTER TO JESSICA

DEAR JESSICA: I'm writing to you, and to your brothers and sisters when, God willing, they join you in this world. I hope, on these pages, to put into words, the turmoil of feelings and expectations I have for you.

You were born a survivor.

I remember, just after you entered this world, I called home, "Mom, we just had a girl, and we named her for your sister." My mother began to cry and could not speak for several minutes.

When you were born, you brought back to life the names of both your grandmothers' sisters. And you were special, because your birth meant that there would be a new generation that stems from the survivors.

And, through you, you brought back to life the million of Jewish children whose lives had turned to acrid smoke and heaps of shoes before they could have grown and had their own children.

And my mind leaps back and forth, confusing the past with the present, until it is all part of the same blur.

When you eat, or cry out because you are hungry, I sometimes see the starving children of the ghettos, in the Umshlagplatz, on the trains to Treblinka, on the platform.

And when you don't eat, and leave your food untouched, I think of how such a morsel would have been devoured, or divided, in the ghetto.

"WHO WOULD HIDE US?"

And when you cry, or laugh out loud, I wonder what it would have done to you to stifle those noises.

And when I watch you sleeping, I wonder what it would be like to lose you. Who of our friends would hide us, who would take you in, could I abandon you to another family, or have you taken from me. . . . I could never, I would follow you to the trains.

But I forget, you do not know yet about the trains. . .

You were born a survivor.

And as you grow older, you will hear words like martyrs, and Holocaust, and kedoshim, and the Warsaw Ghetto. And there is no way to shield you from these words, for they are a part of your parents' life, as they are a part of their parents before them. You will grow up knowing witnesses of the Holocaust, your grandparents. Will you understand? Will there be horrors and nightmares?

"Daddy, wake me. There are Nazis in the room!"

How will I teach you about the Holocaust, and when should I start, and why should I bother at all? Shall I impose it on you, or shall I wait until you come to me and ask?

But, what if you never ask me?

"HOW CAN ONE BE GENTLE?"

No, I cannot wait to tell you, although I will try to be gentle, if I can. However, how can one be gentle, when talking about such awesome destruction? Nevertheless, learn of the Holocaust you shall, for it is in your family, and is a part of your heritage.

Jessica, you shall be here, God willing, throughout this century, and well through the next. And it will become your responsibility in turn to be witness. A witness to the survivors. A witness to the witnesses.

At a time when the Holocaust will be mythologized, or worse yet, forgotten, you will be able to say,

"My grandmother was there. It was real. It happened."

And perhaps, if we are fortunate, you will retell the stories of heroism, and note with pride how the Jews helped each other, and remained human, and went through a hell and how the survivors then rebuilt their lives, and gave us life.

Because, Jessica, I am very afraid it will all be forgotten.

You will ask, as all children do. Why?

Why did these people hate the Jews?

Why were they killed?

Why must their memory be kept alive?

Then, I cannot answer you with logic. Words and thoughts fail me.

I can only answer. Because it must be done. Because the six million were our family. Because they were our cousins, and aunts and uncles, whom you will never have. They were a rich and complex cultural life that you will never appreciate, because it is gone.

Because they spoke our language, Yiddish, which you will not speak. And our literature, and art, and history, and ideals. Your very heritage, which was torn away from us.

RICHNESS OF OUR LEGACY

And you shall receive, as the family heirloom, not a set of Sabbath candlesticks, for none were saved, but the whole richness of our people's three-thousand-year-old legacy. And because you touched those that were there, your grandparents, and were touched by them, yours is a richness that others may not feel. It is yours to share in, and to share with others.

You were born a survivor.

And yet, when you come of age, the sense of loss will be greatly diminished. You will not be so very different from the others around you, for you will come into a world of family. Your great-grandfather held you, and already you have cousins and uncles and aunts.

The severed twigs of Jewish life put down their own roots, and grow and flourish.

The differences from other Jews and other people that your parents felt, and your grandparents lived with, that your

great-grandparents died for, with their children. These differences may not be important to you.

Your grandparents hoped that through their children, the scattered remnants, the Shearith Haplaita, would survive. And your parents hope, that through their children, the Jewish people will survive.

And here, Jessica, are my fears.

That you will be a good person, of this I have no fear.

That your life will be a long and happy one. I can only hope.

But that you remain a Jewish daughter, and in turn raise your children as Jews . . . that, dear Jessica, I worry for. For what will Judaism mean to you? How will it be desirable enough, and attract enough, and important enough, for you to cherish it and pass it on to your own children?

NO QUESTION OF IDENTITY

How shall I transmit it to you, for it to have meaning. For me it was easier, for I am the son of survivors. There was no question of identity. I was Jewish. My parents were Jewish, they had nearly been murdered, because they were Jewish. Their families were murdered, because they were Jewish. And they spoke Yiddish, as my parents' friends spoke Yiddish, and I and my friends spoke Yiddish.

And as we grew up, we discovered that we may be the last of the Yiddish-speakers, the remnants of East European Jewry, and that we had a special responsibility, to preserve Yiddish, and Jewish life.

Some of us did, but most of us did not.

And you were born a survivor, a member of the family of the Shearith Haplaita.

But if you are to remain a survivor depends on two things:

How well I can instill in you a reverence for your heritage and your people.

And after I have done all that I can,

What you then do for yourself.

Jessica, and my other children, my hope is that when you are older, and read this, it will make sense to you. For it is only through you, that we, the survivors, can ever survive.

With our love,

YOUR FATHER AND MOTHER.●

HOUSE HONORS FEDERAL EMPLOYEES

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. BARNES. Mr. Speaker, yesterday the House of Representatives took a very rare step. It passed a resolution to honor three dedicated Federal employees who performed in an exemplary manner during last week's near-tragedy outside the Washington Hilton Hotel. Given the current climate of opinion regarding the Federal work force, I think it is useful for Members of Congress to realize just how important public service is to the operation of the Government. And it is also inspiring to see that, despite the cheap shots and political rhetoric at their expense, there are still examples of courage, dedication, and professionalism within the ranks of public employees.

Mr. Speaker, I include in the RECORD a recent Washington Post column by Mark Shields which makes this point very well:

[From the Washington Post, April 4, 1981]

Very Special Agents

(Mark Shields)

Jerry S. Parr, 50, lives in Gaithersburg and works in Washington. For the past 18 years, he has been a Secret Service agent; for the last two of those years, he has been special agent in charge of presidential protection. That was Jerry Parr, on Monday's videotape, thrusting himself into the line of fire so he could shield the president and shove him into the limousine.

Timothy J. McCarthy, nine years in the Secret Service and only 31, was the agent who immediately occupied the position between the president and the gunman. He assumed his post and absorbed a bullet through his liver.

In 17 good years on the Washington police force, Thomas K. Delahanty, 45, has earned a file full of commendations as well as the respect of his colleagues. While protecting the president of the United States, he was hit by a .22 bullet that had to be removed from his neck, not far from his spinal column.

The medical reports are encouraging. Both McCarthy and Delahanty, like press secretary Jim Brady and the president himself, are doing better than was at first expected. Maybe, we have begun to hope, after the suffering they and the rest of us will be able to celebrate their survival and recovery.

That's the way it was last January when 52 Americans returned home after spending two Christmases in cruel captivity. After their suffering, there was a celebration filled with fitting tributes to the patriotism and the guts of those Americans who had persevered. Those deserved testimonials must have been especially welcome to the men and women of the career Foreign Service. Foreign Service personnel have had very little experience in accepting public praise. Ridicule and mockery have been their regular fare: the cookiepusher and striped-trousers set are not spoken about respectfully.

For some reason, we have overlooked the one demographic characteristic shared by 51 of the 52 repatriated Americans with Jerry Parr, Timothy McCarthy and Thomas Delahanty. It has nothing to do with race, region, religion or reading scores. Most generations and both sexes were represented in this very non-homogeneous group of 54 American heros. All of them, of course, did their jobs. They fulfilled their responsibilities, and then some. And each and every one of the 54 is—are you ready?—a public employee.

Public employees—that indolent subspecies that candidates and commentators love to attack. You know the mindless public employees: You could line up an office full of them and clean their ears with one long Q-tip. Over and over we have been told that if public employees are not incompetent, they are indifferent and surly. And if they are not mindless sloths, then they have to be zealous meddlers, feverishly regulating American business right out of business. You've read of them, those faceless bureaucrats who've never met a payroll.

It's been a long time since any politician talked publicly the way John Kennedy did in his first state of the Union speech, when he said: "Let the public service be a proud and lively career." Not many of today's winning candidates borrow that line from JFK. In fact, along with WASPs, public employees must be the last remaining group in our society without its own anti-defamation department. Both those groups are attacked with regularity and without fear of reprisal. If half the things muttered about public employees were spoken about any religious or racial group, the speaker would be dismissed as a hopeless bigot.

So what of the 54? Are they simply rare exceptions? Then so, too, must have been Col. John Glenn, Sen. Arthur Vandenberg and Gen. George Marshall because they were all public employees. Dwight Eisenhower was a public employee and so was Warren Christopher when he negotiated freedom and so was Secret Service agent Larry Buendorf on Sept. 5, 1975, in Sacramento when he took a Colt .45 away from a Charles Manson disciple who was trying to murder President Ford.

Of course, there are indifferent, incompetent and surly public employees. Too many of them in fact. But surliness and incompetence are not entirely alien to our vaunted private sector either.

The next time we see a picture of a fire fighter risking his life to save a child or hear about a government worker's risking her career to blow the whistle, let's remember that both of them are public employees. And the next time someone starts in with the predictable blanket indictment of public employees, simply remind him of three names he should recognize: Jerry Parr, Timothy McCarthy and Thomas Delahanty.●

A LIFETIME OF CARING

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. YOUNG of Florida. Mr. Speaker, occasionally you get to know someone you want to tell the whole world about. Someone who contributes more to life than they get out of it or someone who dedicates their every effort to others without regard for their own personal well being.

I have known someone like that for years. Her name is Louise Graham and she is from St. Petersburg, Fla. She is 78 years old, has the energy of someone 20 years younger and until recently, nobody outside her neighborhood knew of her accomplishments. My local newspaper has recently published a story by Bettinita Harris entitled "A Lifetime of Caring." It is about Louise and her lifelong dedication to retarded children in my community. I am submitting the text at the end of these remarks for the benefit of my colleagues.

Louise has been a real inspiration to me and her efforts on behalf of those retarded children in St. Petersburg who need help is a living memorial to all who see wrong in this world and try to right it.

[From the St. Petersburg Evening Independent, Jan. 26, 1981]

A LIFETIME OF CARING

(By Bettinita Harris)

She has served the dependent, the defenseless her entire life. Working for their needs. Caring when no one else did. And nothing, absolutely nothing, has been expected in return.

Mrs. Louise Graham sits comfortably on her enclosed front porch, occasionally tugging at her blue sweater—tugging, the way one does when comfort is trying to be obtained.

Her hands, her face, her body have been whittled into a woman of 78.

She reaches over to the divan, picks up a photo album and places it on her lap. Handling the album as a loving mother handles a newborn babe, Mrs. Graham slowly turns the pages.

As she looks at the pictures, memories of her work with the mentally retarded, the blind are conjured, transforming her face into a picture screen that reveals her life as Florence Nightingale.

"When I look over my life, I just don't see how I did it," Mrs. Graham says, looking up from the album. "I've waded through the mud; I got tired plenty of times. But, I have a great Teacher and a great Doctor up there. Every time I needed just a little more strength, I reached up and grabbed it."

It was one day in 1952 that Mrs. Graham visited her husband's (the late Grant Graham) cousin at American Legion Hospital for Crippled Children (now All Children's Hospital). When she walked onto the ward for black children, she noticed none of the children's hair had been combed.

"I combed everybody's hair and cleaned them up. I made up my mind I would be there every Sunday to clean them up and take them into the recreation area of the hospital."

"I am only one. But still I am one. . . ."

For more than a decade, she juggled her life, Taking care of her own three children. Working as a hotel maid. Attending classes at Gibbs Junior College. Volunteering at the hospital. Running her workshop.

One day Dr. Joy Adams, hospital director at that time, summoned Mrs. Graham into his office.

"Louise," he said, "I have a name I want to call you because of the work you're doing for the hospital. It's corny, but, I'd like to call you Florence Nightingale because you're doing what she has done."

She pauses for a moment with staring eyes, as if her mind were rewinding film on a projector in an attempt to relive the scene. Suddenly, she fast-forwards and continues turning pages.

With the help of Dr. Adams and local funeral directors, the Florence Nightingale Circle Inc., a volunteer service group that functioned at the hospital, was formed.

"By that time, I was going to the hospital two and three times a week. This lady I used to work with at the hotel asked me, 'Why are you always running up to that hospital doing all that work and not getting paid?' "

She folds her arms and shakes her head in disgust. Anger temporarily flashes across her face.

"They need me there," Mrs. Graham recalls telling the woman. "When it's my time to go down there—I'm going. I'll quite this job before I quit the one at the hospital."

She chuckles briefly and tugs again at her sweater. Puts the album on the divan. Picks up a stack of papers yellowed by years and places them on her lap.

"When Jesus left here, He left a job for us to do," Mrs. Graham says. "He said He'd send the Comforter. That Comforter is the Holy Spirit. The Holy Spirit has guided me and led me to help my children."

". . . I cannot do everything. But still, I can do something. . . . "

In November 1964, Dr. John Presley, then director of Sunland Center at Fort Myers, was speaking at a meeting of people who were interested in helping retarded persons.

In the crowd was Mrs. Graham.

Presley told the crowd his definition of a workshop.

"Take a table, two chairs, two children. Put something on the table for them to make. Show them how to make it. After they have done it, you have a workshop. If you can sell what they have made and give the children part of the money, you really have a workshop."

"I knew a lot of families who had retarded children," Mrs. Graham recalls. "(The children) sat at home all day long. They weren't doing anything.

It wasn't long after that meeting that Mrs. Graham cleaned out her garage to begin the Louise Graham Shelter Workshop. Two or three days a week, mentally retarded children—some nonverbal and not toilet trained—would gather in Mrs. Graham's garage for arts and crafts.

"There are so many people in the world who think retarded people's lives are finished. Life is not over for these people. They just need somebody to stop and help them."

When word of Mrs. Graham's work spread, more people started attending her workshop.

"We had to move many times over the years," Mrs. Graham says, looking through her papers. "I remember one Christmas when we were at the YWCA on 15th Street. They were having a big to-do and they told me, 'Mrs. Graham you're going to have to find somewhere else to go. If people came in and saw those kids they would be scared.' "

Mrs. Graham didn't utter a word. She gathered her things and left.

"People just don't understand. These people want to be loved just like anybody else."

The workshop has moved to several locations for one reason or the other. At one point, Mrs. Graham found her workshop back in her garage.

"I didn't stop. I kept going."

Mrs. Graham became director of the playground recreation program for the handicapped for the St. Petersburg Summer Enrichment Program in 1962. She was an active member of the Pinellas County Association for Retarded Children and Adults. She worked with the Florida Council for the Blind in setting up an educational recreation program for sightless children and adults.

"People told me I should stop. Sometimes I thought I couldn't go on. Just when I thought I was at the last, my strength was renewed. I couldn't stop; they needed me."

In September 1974, Mrs. Graham had a stroke that left her temporarily paralyzed on her right side.

"The doctor told my family I wouldn't live past January 1975 (the same year Florence Nightingale Circle Inc. found a permanent home at 1885 11th St. S). Well, it's 1981, thank God, and I'm still here. The doctor told me to ease up and I have. I am 78 years old. Seventy-eight years old. But I'm still going," says Mrs. Graham, president emeritus of the circle which is a development training program that provides the facilities to help 62 mentally retarded adults.

Over the years, Mrs. Graham has accumulated numerous awards for outstanding civic work. She received a sterling silver charm bracelet for over 40 years of service as a deaconess at the Bethel Metropolitan Baptist Church.

"I have plenty of these awards from different organizations," Mrs. Graham says, carefully sorting the stack of papers lying on her lap. "It's nice. It shows that people appreciate you.

"Some people like to say, 'I've got this and I've done that.' I don't like to do that. I don't like too much praising and publicity. I want people to do.

"So many people have told me that I've done so many things. But, I didn't do it. If it hadn't been for the help of people in the community, I couldn't have done a thing.

"I know that I'm going to close my eyes one of these days. I don't always think or talk about it. But, I keep telling the people who are interested in the mentally retarded that the work must go on, the work must go on.

" '. . . And because I cannot do everything, I will not refuse to do something I can do.' "

—Edward Everett Hallis.●

SMALL BUSINESS MOTOR FUEL MARKETER PRESERVATION ACT OF 1981

HON. EUGENE V. ATKINSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. ATKINSON. Mr. Speaker, I would like to commend my colleague, BERKLEY BEDELL, for holding hearings on the Small Business Motor Fuel Marketer Preservation Act, H.R. 1362. The need for these hearings and for this legislation is clear from any analysis of retail gasoline market trends. These hearings are even more important now that the recent decontrol of oil and gasoline prices is likely to create greater market upheaval and squeeze many of the owner-operator service stations out of business.

It is important to note that most owner-operated retail gasoline stations are small businesses which are run by local businessmen, and as such are responsive to the needs and trends of the local community. They generally provide personalized service and as such are exemplary of the spirit of private initiative and personal financial risk which typifies small businesses across the country.

In the last decade, these small businesses have been gradually squeezed out of the retail gasoline market. They have had to compete with stations owned by their own suppliers, the refiners and major oil companies. They are placed at an immediate disadvantage since the major oil companies control entire vertical portions of the market from oil wells to pipelines to refineries to gas stations. To make make matters worse for the independ-

ent gasoline retailer, the refiner-owned stations can squeeze the small businessman out of the market by predatory pricing practices and by disrupting supply of gasoline to the independent retailer. This is exactly what has been happening since 1972, in which refiner-owned stations have increased their share of the market threefold.

The recent decision to decontrol prices of gasoline was accompanied by announcements by many major oil companies that they will discontinue supplies of gasoline stock to independent dealers in entire regions. This will put even more independent retailers out of business.

I urge swift consideration of H.R. 1362. This legislation will prevent this continued restraint of trade by requiring the 16 major oil companies to divest their holdings in retail gasoline sales. It will provide Small Business Administration loan guarantees for purchase of the divested stations by local businessmen. It will also prevent predatory pricing and supply disruptions from putting too many more independents out of business. Enactment of this needed legislation will be a great benefit to the free market system and to the consumers of America.●

WORLD FOOD DAY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. GILMAN. Mr. Speaker, today I am joining with my colleague, the distinguished gentleman from Illinois (Mr. SIMON), in introducing legislation commemorating October 16, 1981, as World Food Day. I would also like to take this opportunity to commend the gentleman from Illinois for his long record of commitment and hard work toward alleviating the problem of global hunger and malnutrition; a record which has served as an inspiration to me and to many of our colleagues.

I would also like to commend Ms. Patricia Young, coordinator, National Committee for World Food Day, and chairwoman, board of directors, Community Nutrition Institute, and other individuals and groups working with the committee who have joined together to raise public awareness about chronic hunger and malnutrition.

In my work as member of the House Committee on Foreign Affairs and the Presidential Commission on World Hunger, I have come to recognize the many dimensions of the critical hunger problem which plagues lives of hundreds of millions of individuals throughout the world and bears directly on the security of our Nation and the international community.

I have come to learn also that central to developing a comprehensive strategy to alleviate world hunger and assist developing nations in advancing on the road to self-reliant, self-sustaining development is the need to increase public awareness about this problem.

Two public opinion polls conducted for the Presidential Commission on World Hunger demonstrated that the American people show strong support for maintaining and even increasing U.S. assistance to the world's hungry. These public opinion surveys indicated, however, that there is a need to educate the American public about the complexities of hunger, the scale of the problem, and the realities of U.S. involvement, because hunger seldom captures widespread public attention except in times of crisis or dire emergency.

I am confident that World Food Day and the related programs undertaken to inform the American public about global hunger and malnutrition will make a significant contribution to our public education effort.

Accordingly, I urge my colleagues to support this legislation commemorating October 16, 1981, as World Food Day, and I request that the full text of this measure be inserted at this point in the RECORD:

H.J. RES.—

Joint Resolution to authorize and request the President to issue a proclamation designating October 16, 1981, as "World Food Day"

Whereas hunger and chronic malnutrition remain daily facts of life for hundreds of millions of people throughout the world;

Whereas children are the ones suffering the most serious effects of hunger and malnutrition, with millions of children dying each year from hunger-related illness and disease, and many others suffering permanent physical or mental impairment, including blindness, because of vitamin and protein deficiencies;

Whereas, although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups, notably among native Americans, migrant workers, and the elderly, remain vulnerable to malnutrition and related diseases;

Whereas the United States, as the world's largest producer and trader of food, has a key role to play in efforts to assist nations and peoples to improve their ability to feed themselves;

Whereas a major global food supply crisis appears likely to occur within the next twenty years unless the level of world food production is significantly increased, and the means for the distribution of food and of the resources required for its production are improved;

Whereas the world hunger problem is critical to the security of the United States and the international community;

Whereas a key recommendation of the Presidential Commission on World Hunger was that efforts be undertaken to increase public awareness of the world hunger problem; and

Whereas the 147 member nations of the Food and Agriculture Organization of the United Nations designated October 16, 1981, as "World Food Day" because of the need to alert the public to the increasingly dangerous world food situation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating October 16, 1981, as "World Food Day", and calling upon the people of the United States to observe such day with appropriate activities.●

THE CONSEQUENCES OF THE REAGAN DEFENSE BUDGET

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. CONYERS. Mr. Speaker, the defense budget proposals of the Reagan administration have to be carefully examined in terms of their impact on inflation, the potential squeezing out of capital investment funds needed in the civilian economy, and the accelerating cost over the next several years to the Treasury.

There has been too little attention paid to these defense proposals, and I recommend that my colleagues take a close look at the following analysis of the Reagan defense budget written by Marcus G. Raskin. Mr. Raskin is a cofounder of the Institute for Policy Studies in Washington, D.C., author of numerous books including the "Politics of National Security," and a lifelong student of defense and foreign policy issues. The following analysis, "The World Policeman Defense Budget," is part of a larger study of the Reagan budget that was commissioned by the Institute for Policy Studies:

THE WORLD POLICEMAN DEFENSE BUDGET

The Reagan administration's defense budget is an astounding document. Those who had hoped that Caspar Weinberger, known as Cap the Knife when he was Secretary of H.E.W. under Nixon, would exercise a conservative restraining hand on the Defense Department's claims for the tax dollar, have been sorely disappointed. Cap the Knife became Cap the Swordsman, sabre rattling, using statistics comparing Russian-American defense expenditures in an irresponsible way (the Russians spend 50 percent more than we do in American dollars as if such comparisons can be made) and fueling the juggernaut of war preparation without purpose or need. In fiscal year 1982 the average family of four will pay $4,000 in taxes for the defense system. By fiscal year 1984 the Department of Defense will spend 32.4 percent of the total U.S. federal budget. This doesn't include other national security items which will bring expenditures up another 15 percent of the budget.

In his testimony before the Senate Armed Services Committee The Swordsman informed us that we can no longer "afford to temporize any longer in the face of Soviet threat; the time for taking our time (in

building up war preparations) has ended." The Reagan administration's language on defense spending has hit a note of hysteria which is reminiscent of the worst drum beating one found among cold war liberals during the Eisenhower and Kennedy administration. Gone is the approach of President Eisenhower, who both knew the limits of power and the enormous costs to a military strategy which assumes that anything and everything can be done. And gone is the language of deterrence and the technocratic language of the defense intellectual now to be replaced by belly bumping with the Soviet Union. Says Weinberger, we intend to have a defense strategy "which permits us to take full advantage of Soviet vulnerabilities." And we intend to reinforce our presence all over the world for our "interests" and those of our allies and friends. We intend to be present in the Gulf and in Southwest Asia. Apparently the Reagan Administration seeks to maintain military loyalty by overthrowing virtually all restraints and talk of prudentiality in the use of force.

For purposes of grounding one should remember the debates on the defense budget and the American military stance in the world. At the tail-end of the Nixon Administration and the beginning of the Ford Administration the Department of Defense sought to increase its counterforce capability while controlling its appetite for expenditures on the limited war level. This restraint lasted approximately 18 months. The reason for restraint is well known. The military thought that after having lost the war in Viet Nam, being unable to field an armed force because of rebellion in the ranks of the army and navy a non-interventionist Congress would not take kindly to strategies that seemed grounded in American military involvement around the world. The political highpoint of defense modesty occurred during the Carter campaign of 1976. In the primary Carter took the line that $15 billion should be cut from the defense budget. When he became president Carter concluded that a seven billion dollar cut, which he had advocated in his election campaign was not appropriate. By the time he left office Carter had moved from a three percent a year absolute increase in the defense budget beyond inflation (negotiated with the Joint Chiefs of Staff) to a five percent a year increase beyond inflation.

This number was politically derived through a deal which Carter thought he had cut for support of the SALT II treaty with conservative senators who fenced with him and said that this would be their price for support of SALT.

Under Harold Brown's direction the defense capability increased from 13 to 16 army divisions, from 22 to 26 tactical air wings. Then U.S. increased its troop strength in West Europe by 44,000. It moved as quickly as the human, industrial and technological resources allowed in increasing nuclear weapons production a day to six, building the new Trident submarine, Trident I and II missiles, the development of ground launched Cruise missiles and the MX.

The final Carter Defense Budget projected a trillion dollars to be spent over five years for military weaponry, procurement, and staffing of the Defense Department. Not exactly peanuts. It now appears that missiles, tank and aircraft carriers wrapped in jelly bean coating are easier to eat and indeed even more of them can be swallowed then those found in peanut shells.

The Swordsman put it this way to the Senate Armed Services Committee:

"Mr. Chairman, we are asking for a supplemental appropriations of 6.8 billion dollars in Total Obligational Authority (TOA) for FY 1981 and a 25.8 billion dollar amendment to the FY 1982 budget request for TOA. These represent increases of four percent and 13 percent, respectively, over the budget and the program we inherited. In terms of real growth, our 1982 budget request is nearly 15 percent over the revised 1981 level. Included in these totals are 2.3 billion dollars for FY 1981 and .9 billion for FY 1982 that we estimate are necessary just to fund the programs in the Carter Budget."

With this budget the Reagan administration seeks to "augment or accelerate ongoing programs, change the current force capability in prepositioning, sea lift and replenishment, communications and electronics." The Swordsman says that the immediate readiness for war-capability will cost 2.8 billion dollars in FY 1981 and 8.7 billion dollars more in FY 1982. These funds include having on hand resupply equipment and stocks "for prepositioning or for foreign assistance." The funds will stop the age-old system of cannibalizing "some equipment to keep other equipment operational."

In other words, while due obeisance is paid to securing the efficient use of material and men, The Swordsman and The Communicator will be unintentionally encouraging waste and duplication of military equipment. The Air Force will also have its readiness inititatives which are to be increased by one billion dollars in FY 1981 and 2.7 billion in FY 1982. When we examine the actual expenditures, whether they are for airlift forces, or to procure war reserve munitions spare parts, or to dust off two battleships and one carrier, filling the so-called power vacuum in the Indian Ocean, or to build another 8600 tactical wheeled vehicles in the 1¼ ton range or to increase the number of M-1 tank production to 90 per month by 1985 or an additional 1.0 billion made available beyond the accelerated production of A-6e, f-1, 4 ch-53Es and P-3c, etc., one should be fully aware that this conservative administration is riding the Trojan horse of military Keynesianism. What cannot or won't be done through either transfer payments to achieve some measure of redistribution and fairness in the society, or what would not be done through full employment measures or public enterprise, (the actual and correct way to attain more supply and public participation in production), the cold war system of ballooning the arms budget is being used as a way of keeping a level of unemployment from growing. As The Swordsman disingenuously put it, "Therefore, the largest increases we are seeking are for modernization—2.0 billion in FY 1981 and 13.7 billion in FY 1982. This intensified modernization effort is the Defense Department's contribution to the revitalization of our industrial base." (emphasis added). By increasing the defense budget over 15% in one year, it will be possible to co-opt some labor unions, corporations and military scientists in the enterprise as the rest of the economy is cut to ribbons. It goes without saying of course that this policy is inflationary. The more goods and human resources which are made available to the military will inflate the price of similar goods and services to civilian buyers. As the Wall Street Journal wrote in a somewhat nostalgic article in 1980, "Defense spending * * * is the worst kind of government outlay, since it eats up materials and other resources that otherwise could be used to produce consumer goods."

The Reagan Administration is in effect making the same mistakes of the Johnson-Charles Schultze budgetary policies during the Viet Nam war. In that case Johnson refused to raise taxes or issue controls in a period of high defense spending. That error began the era of high inflation, unbalanced budgets and misallocation of expenditures and resources between the public and private sectors. A return to an international belly bumping strategy will adversely affect the American economy and security just as it did during the Viet Nam war. Why is this strategy being pursued?

The Reagan Administration views the Soviets as weak, and that in any face-downs the United States will be able to re-establish itself uncontestably as the premier power. It is thought that through confrontations it will also bring together greater dependence of various nations on the United States, especially those in the alliance. Futhermore, the U.S. is again toying with the rollback strategy as a means of getting the Soviets to give the United States a free hand in Latin America namely with Cuba. Cuba is the major target of American national security policy among the Right and under a sphere of influence theory the Reagan Administration believes that Russia would "trade" Cuba for Poland. Whatever the various likely scenarios or bureaucratic impulses which occur over the next several years each one of them calls for a much larger defense and national security budget on every level of the volume spectrum. Thus, there are substantial increases for the purpose of carrying out a counterforce strategy, which is objectively unattainable, but subjectively will give courage to some in the Administration and the Senate to carry out more extensive military activities in the Third World. There is emphasis on rapid deployment to ensure ideological regularity and a new emphasis on a worldwide base system to protect access to oil and other strategic materials.

It is worthwhile to note that the strategy and national security budgets now fostered by the Republicans fly in the face of most conservative thought and practice about arms spending. It may come as a surprise to liberals and radicals, but conservatives feared that large defense budgets would destroy capitalism without war. This was the major reason that Herbert Hoover favored and initiated disarmament talks in 1930. A generation later at the close of the Korean war Senator Robert Taft of Ohio insisted to Eisenhower and his cabinet that the defense budget be cut to approximately 16 billion dollars. Taft believed that large defense budgets give people in power ideas of things they can do with force which the Korean war showed could not be done.

Senator Everett Dirksen urged that the U.S. limit military activity abroad by relying on proxies.

It does not matter what it is called; the fact of the matter is that the defense budget, the war preparation motion, is a worldwide calamity which must be interrupted as quickly as possible. The present defense budget is a hopeless drain on the American economy, and will conspire to get us into war because of the cost of keeping such a huge weapons and force structure. (We should not forget the fact that one reason nuclear weapons were used by the U.S. on Japan was fear of Congressional reprisal for having spent $2 billion on nuclear weapons research. As James F. Byrnes

said, such an expenditure would not have been understood if they were not used.) The Reagan budget's increases in military assistance accompanied by attitudinal shifts puts us into being hostage to other nations. The signals that are passed by Reagan and Haig are clear and unmixed. Under the guise of anti-terrorism the U.S. will back every tin horn dictator that waves the flag of anti-Sovietism and militant authoritarianism. A whiggish sensibility should tell us that it is enough to say "no" to a defense budget which generates such imprudence.

But to say "no" we should proceed with a limited and clear strategy of national security and defense which is consistent with U.S. needs, international law and equity, ever mindful that other nations have expansive tendencies and who are prepared to use the fig leaf of socialism or liberation as their cover.

In the past few years various defense budgets have been presented as alternatives to the consistent increase of arms spending. These alternatives have usually been predicated on a view of strategy which assumed the use of nuclear missiles and weapons as a deterrent force, (in 1960 it was believed that 100 missiles were enough to deter the Soviet Union). These budgets also assumed that the United States was locked into a trigger defense of NATO and West Europe. Now, however, there is considerable question whether the United States can or should defend West Europe against Soviet attack.

West Europeans favor a détente with the Soviet Union and do not have much of an interest in accepting American Pershing and Cruise missiles. One reason is that they view this "gift" as a not very subtle plan to exclude the U.S. from strategic war with the Soviet Union. They have also shown little interest in raising their defense budgets. (Apparently the Danes, French, Germans, Norwegians, etc., have less of a flame for freedom than does the United States.) In the United States there are those who now argue that the United States should no longer hold the same premises of defense of West Europe, first because of its cost and second because the United States has other interests in the Third World which it has to defend. One national security analyst, William Hauser has said, "If we want worldwide capability, we are going to have to reduce our forces in Europe. We deployed them in 1949 to protect a war prostrated West from the Soviet Union's massive armies. That forward, linear strategy which made sense then has become nonsense in the face of European strength and Soviet global mobility."

For other reasons non-interventionists support the view that Europeans within the context of arms limitations agreements should pick up much more of the costs of their own defense. Present U.S. defense costs for NATO are computed at $65 billion a year by the Institute for Policy Studies' Budget Study Group.

The non-military interventionist position is predicated on a reversal of the present national security policy. It decries the braggart and the foolish. It does not assume that we would keep other nations guessing about our intentions as if we are hysterics, bullies or cowards. It is also predicated on a truth that is often forgotten in the making of policy and defense budgets. It is that nuclear war and war itself is an excrescence of civilization, not its highest point. It is also predicated on the belief that each particular conflict in the world should be used as a basis for developing a "common law" of how to deal with conflict through international organizations that do not spur military conflict. Finally, a prudent national security system is predicated on the idea that people have more to do with their lives than sizzling in nuclear war or frittering them away in preparing for war with a projected Department of Defense military budget in FY 1984 that will reach $249.8 billion. Whether one believes in more or less public spending, the first task is clear. We need a new set of precepts and a more clearly defined mission for our military forces.

The first precept is that a national security policy for the United States must defend its land, people and institutions. Second, the U.S. cannot assume that military alliances should remain in tact. Shifting alliances always occur among nation-states. Consequently, the U.S. would do better to understand the importance of limiting its military commitments to alliances. It should move to reconstitute a Military Committee of the UN to prepare a world security arrangement. Meetings on a transnational level should go forward to limit the spread of official and unofficial terrorism, the arms race and arms shipments.

The third precept is to understand that the national security policy is not a secret play activity of a ruling group held together by narrow economic interests or Manichaean fantasies of good and evil.

If these precepts are followed the defense budget can be trimmed since it will fit into a prudent view of U.S. aims in the international arena. Civilians will not make impossible demands on a military that will fail because of imperial burdens the citizenry will not support.

Should the U.S. have bases abroad and if so must they be paid for by the U.S. if the purpose of these bases is to defend others. For example, should the U.S. continue its bases in Korea and the Philippines? The U.S. would save between one and three billion a year if it cut its military presence in South Korea and the Philippines.

European nations are in better shape to shoulder the defense burden than the United States. If there is no interest then there should not be such interest from the U.S. The savings in terms of changing the alliance structure would be mammoth.

Finally, there are other budgetary limitations that should be made in any case:

1. Excess defense profits tax with strict profit limits on defense contracts.

2. No corporation to pay more than a GS 18's salary for those involved in defense contracts. Thus, no defense corporation's salary schedule should be beyond the GS scales.

3. Analysis of the armed forces reserves with a view to stabilizing their size and not using this system as transfer payment supplement.

4. The present costs of energy use by the Pentagon is 9.3 billion dollars. The federal government should be its own supplier through a government owned energy corporation. In the meantime two savings have been put forward. Cheaper fuel and reduced thrust takeoffs.●

TALKING TO JACK ANDERSON

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. McDONALD. Mr. Speaker, some of our newer colleagues may be unaware of the dangers in talking to Jack Anderson or one of the strange creatures employed by him that visit congressional offices. Those of us who have been here for some time know that Anderson does not interview someone to get a story, as would be done by a responsible journalist, but instead uses the interview as a fig leaf to cover an already written story.

A classic case of this technique appeared a few weeks ago under Anderson's byline in Parade magazine. Anderson interviewed the daughter of the late Senator Joseph McCarthy. His pretense was a desire to obtain her views on the father that had died when she was a little girl. The article as written contained little of her views. Instead, Anderson used the opportunity to regurgitate his oft repeated attacks on Senator McCarthy. These ranged from the usual misstatements about Senator McCarthy's fight against communism to a charge that he died of alcohol abuse. As a medical doctor with considerable experience in surgery, I can tell you that the operation performed on Senator McCarthy would not have been undertaken if there had been evidence of liver damage from alcohol abuse.

Jack Anderson used to parade himself as a friend of Senator McCarthy. He boasted that he had been a guest at the Senator's wedding. The character of this man, Anderson, can be judged by his betrayal of the trust placed on him by the young daughter of the late Senator.

Those of my colleagues who have been with me in the House for the last 6 years will remember that I have had occasion in the past to reveal much of the unsavory record of Jack Anderson. His lies, his wiretaps, his burglary of the office of a U.S. Senator, and other such activities have been laid out in considerable detail. And, it is no surprise to anyone when Anderson uses the technique of an "interview" to hook on a previously written false story. However, this Member of Congress would like to express the strongest indignation against Anderson's abuse of the trust of the young daughter of the late Senator.●

HUMAN RIGHTS IN ARGENTINA AND REPEAL OF 620B

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. BONKER. Mr. Speaker, several weeks ago the Reagan administration announced its intention to ask Congress to repeal section 620B of the Foreign Assistance Act, which prohibits assistance and sales of military equipment to Argentina. This approach is in line with numerous state-

ments of the administration that American foreign policy priorities are being reversed—human rights being demoted and antiterrorism being promoted. What that really means is that some totalitarian Communist regimes will be publicly criticized but authoritarian governments of the right will be wined and dined at the White House. The danger in this course of action, which is morally wrong and politically unwise, is that we will be perceived as good friends and allies of repressive regimes around the world; for example, Chile, South Africa, South Korea, and now Argentina.

In 1977, sanctions were applied to Argentina for a reason. There were extremely serious violations of human rights in that country. Since the military seized power in 1976, approximately 15,000 people have been victims of involuntary disappearances. On numerous occasions I have met personally with the anguished families of the disappeared. All they ask for is news about their loved ones. But the only response has been silence, cruel ridicule, intimidation, and more repression.

It is reasonable to assume that at some point sanctions in most situations must come to an end. The question is, Have we reached that point in regard to Argentina? In my judgment the answer is a resounding "No." I will continue to oppose any policy that alines the United States with a regime that practices, aids, and abets state terrorism.

If Reagan administration officials had read the report on Argentina in the State Department's country report on human rights practices; if they had read the reports on Argentina by the Nobel Prize winning organization Amnesty International; if they had read the report of the United Nations Human Rights Commission working group on disappearances; if they had read the 266-page report on Argentina by the Organization of American States' Inter-American Commission on Human Rights, a Commission that has distinguished itself in the hemisphere by its objectivity and fairness in advancing human rights; and if they read the reports on Argentina by the International Commission of Jurists; they would not be making silly statements such as:

> We want good relations with Argentina. Any abnormality in relations is due to a large extent to the public position this country took regarding human rights practices in that country.

Very little has changed in Argentina to warrant a change in our relationship. Disappearances continue; tortures continue; harassments of human rights activists continue; repressive acts against legitimate dissent and peaceful assembly continue; and state supported terrorist activities against exiles and dissidents in complicity with other intelligence services continue.

The Reagan administration, which has identified terrorism as a major problem in the world today, is once again alining the United States with a regime that practices terrorism against its own people.

If Reagan administration officials are really concerned about terrorism, they should not be giving support to a regime which engages in that activity. Double talk and double standards are no substitute for lack of policy.

How does the administration propose to encourage Argentina to account for the disappeared, to release its political prisoners, to cease the practice of torture, and to restore political and civil rights to the Argentine people?

In a recent meeting with the new President of Argentina, I expressed to him my hope that his new beginning might also be a new beginning for freedom and human rights in his country. I told him I would like to see the normalization of relations between our two countries. But without some tangible evidence of real improvement in human rights conditions; without an accounting of the disappeared; without amnesty for over 1,000 political prisoners that have been held without charge for over 5 years; and without free elections and restoration of civilian government, and normalization will be difficult.

President Viola has a rare opportunity to return Argentina to the ranks of those civilized nations that respect, protect, and nurture the rights of their citizens. I pray he succeeds. Until then, no person of good conscience can support the administration's efforts to repeal 620B.

I would like to commend to the attention of my distinguished colleagues an editorial from the Miami Hearld of April 5, 1981, entitled "U.S.-Argentina Thaw Should Have Its Price."

The editorial follows:

U.S.-ARGENTINA THAW SHOULD HAVE ITS PRICE

There is no doubt that the United States, Argentina, and hemispheric stability all could benefit from warmer relations between the two countries. The question is on what terms those relations should be improved.

The Reagan Administration clearly is more cordial to Argentina's military government than was the Carter Administration, and the feeling is mutual. President Reagan warmly received Argentina's then-President-elect Roberto Viola in March. Mr. Reagan wants Congress to resume arms sales to Argentina.

The best way for the Reagan Administration to justify this course is to push General Viola to move his nation toward democracy in deed as well as word.

General Viola was sworn in last week for a three-year term as president. Respected for his political ability, he was selected by his fellow generals to succeed Gen. Jorge Videla, who stepped down voluntarily.

The transfer of power is part of a plan that the ruling military is calling "the Process of National Reorganization," or "the Process." As Herald staff writer William R. Long reports, its stated goal is "stable democracy." There is no timetable for elections.

Relations between Argentina and the United States became stormy because the Carter Administration, like much of the world, was revolted by the human-rights abuses of the Argentine military after its coup against President Isabel Peron in 1976.

From then through 1978, the armed forces caused the "disappearance" of at least 5,000 and perhaps as many as 25,000 persons. Torture was common, as was dropping people into the Atlantic Ocean from U.S.-made military helicopters.

The Argentine military government no longer cites leftish guerrilla activity as an excuse for political repression. The "disappearances" have been greatly reduced since 1979.

The Reagan Administration views improved relations with Argentina's and other repressive governments as a pragmatic consideration of relative evil. It seems to agree with the Argentine military that in any and all circumstances the greatest evil is communism.

Argentina may be moving slowly toward democratic rule, as promised. President Viola has appointed some civilians to his government, whereas his predecessor had none. The Argentine military may be serious about "the Process."

The Reagan Administration should encourage Argentina to account for the "disappeared" as the next step toward closing a heinous chapter of Argentine history. And overall, the price for the support of the Reagan Administration should be continued and clear progress toward democracy for the 26 million Argentines.●

ATLANTA'S TRAGEDY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. RODINO. Mr. Speaker, I want to join the gentleman from Georgia, Congressman WYCHE FOWLER and the other of my colleagues in expressing my thoughts on the terrible situation in Atlanta.

The mystifying tragedy of the killings of 22 black children in Atlanta is a national disgrace that sends shock waves to every corner of our country. Beyond the immediate concern that we all feel for the citizens of Atlanta, these killings raise the question: Can America afford to continue on its present course of increased violence?

Without a greater commitment by everyone to help prevent crime, we risk developing an attitude in which killing becomes an acceptable part of our society.

Stopping crime will take a moral commitment; an intellectual commitment; and a financial commitment.

Last month I joined Congressman TOBY MOFFETT in sponsoring legislation to provide $1.8 million in emer-

gency law enforcement funds to help the city of Atlanta apprehend and prosecute the person or persons responsible for the deaths of the 22 black children. I was pleased by the Reagan administration's actions, shortly after we introduced the bill, which sent nearly $1 million to Atlanta for social services for Atlanta's children, and then $1.5 million in Federal help to the law enforcement effort in that city.

I believe this sad situation has shown that there must be a national program in place to provide some form of Federal assistance to State and local governments on a targeted basis. As chairman of the Judiciary Committee, I will be looking for ways to develop such a program, and I know that the chairman of the Judiciary Subcommittee on Crime, my friend and colleague from New Jersey, Mr. HUGHES, will give this matter his attention.

But the solution to America's crime problem will not be found in Federal assistance alone. The responsibility for reducing crime in our country must be borne by a wide range of factors—our court system, our economy, our neighborhoods, our schools, and our families.

I, for one, will work to find ways for the Federal Government to help.

Now, I join with my colleagues in praying for the families in Atlanta especially those who have lost loved ones.●

LIBRARIANS ATTACK CETA CUTBACKS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HAWKINS. Mr. Speaker, the administration plans to eliminate some 330,000 Comprehensive Employment and Training Act (CETA) jobs by the end of this fiscal year. It is fairly easy to foresee the disastrous effects this elimination will have for these workers and their families. However, the ripple effect of these cuts is not so clear. In testimony before the Elementary, Secondary and Vocational Education and Postsecondary Education Subcommittees on April 7, 1981, numerous witnesses stated the tremendous problems these CETA cuts would cause for the libraries of this Nation.

Libraries already face 25- to 30-percent cuts in Federal aid. To eliminate the assistance provide for by CETA funds and workers, will create enormous hardship for our libraries. A literate and informed society is in the Nation's interests. As the following excerpts of testimony show, CETA plays and important part in enabling libraries to effectively serve our people.

"The cuts proposed for postal subsidies, CETA public service jobs, and for cultural programs are going to have a definite impact upon libraries."—Delia Martinez, Chair, White House Conference on Library and Information Sciences Task Force.

"To make the books and resources available to users requires personnel to order, acquire, and process them as well as funds to purchase and to share them. Proposed elimination of the CETA public service program has the potential to reduce the personnel pool needed to perform the important tasks necessary to making information available efficiently and economically."—Bob Carmack, Dean of Library Services, University of South Dakota, Vermillion, S. Dak.

"Another library program, LEARN, funded by CETA, is training CETA enrollees to use the library education and job information centers independently as an initial access point for employment seeking activities. This program has met with highly favorable response from CETA clients and trainers. It is an indication of the types of cooperative ventures which federal support has made possible.

Cuts in other Federal programs, aside from LSCA, will have negative effects on libraries throughout the country . . . CETA Title II-D and Title VI cuts will eliminate positions in libraries of every type and size."—Laura Chodos, Member, New York State Board of Regents.

"We have relied on federal funding for salaries for personnel, and cuts in these programs would hurt us all. These cuts also come at the same time that the Comprehensive Education and Training act is being wiped out. This CETA program has been used widely and well in many kinds of libraries, but I would like to tell you about some of its special contributions to us at The Chicago Public Library (CPL).

Even with recent cuts, we have, at the CPL, some 260 people now on the CETA program. Many of our most valued staff members, now paid with local funds, are alumni of the CETA program. Some started with us as recent college graduates unable to find employment, and they have found, in the library, not only employment, but satisfying careers, so they have gone on to become librarians and returned to us as excellent professional staff members, often especially well qualified to bring library service to the city's poverty areas.

Our success rate is high with CETA personnel, since the experience of library employment has encouraged many to acquire the career information they need to become good workers. In my own office, I am proud of the fact that a young woman who came as a CETA junior library clerk acquired the skills and, perhaps as important, the moral support to earn herself a position in the library's personnel office on a permanent basis. But we are not going to be able to absorb into our shrunken numbers of employees the CETA personnel we will lose this year, and they are not going to have had time to prepare themselves for the work or education that could make them self-sufficient and productive." Peggy Sullivan, President, American Library Association.●

MILITARY INSTALLATION CONTRACTING CONTROL ACT

HON. MARVIN LEATH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. LEATH of Texas. Mr. Speaker, today, I have introduced a bill which will put the practice of contracting out of industrial activities at military installations in this country in a better perspective and will insure that the readiness of our forces is not jeopardized. For some time now, there has been much concern in the Congress over implementation by the Department of Defense of Office of Management and Budget Circular A-76. This circular mandates conversion of industrial type work in the Government to contract by the private sector where conversion will prove cost effective. Over the past several years, many activities of all services have been converted to contract by private companies. While there has been some success and cost savings in this program there have also been instances of abuse, buying in by contractors and hardships placed on faithful Government employees forced out of jobs they have held for years. I have been concerned by all of the happenings in this program, but most of all, I am concerned about its present and future impact on our readiness to go to war or respond to an emergency. When an installation commander converts most of his support activities to contract he loses flexibility. I cannot be convinced that a commander without control over his support activities has the freedom or ability to respond to an emergency or mobilization mission. A contractor's incentive is profit. This incentive may not necessarily coincide with the goals of an installation commander. Consequently, when such activities as combat helicopter maintenance is converted to contract, I believe the services begin to tread on very dangerous ground. For this reason, I am sponsoring this legislation to give the services the flexibility in this area which I believe they need. Specifically, this legislation would prohibit conversion to contract of a function if in the judgment of the military service such conversion would have a significant adverse effect on the ability of a commander of an installation to meet mobilization or emergency contingency missions or to meet anticipated requirements at the installation in time of war. Adoption of this bill will show that this Congress understands that contracting activities in the military services should be looked at in a different manner than those in other Government branches. Cost savings alone should never be the sole factor when making decisions on de-

fense matters. In this case, the ability of the installation concerned to respond to an emergency should be the controlling factor. This legislation will insure this. I urge all Members to join with me in supporting this bill.●

HOBART TAYLOR DIES; ACTIVE ROLE IN CIVIL RIGHTS ACT

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. DIXON. Mr. Speaker, all of us were saddened to receive the news of the recent passing of Hobart T. Taylor. This man was truly a pioneer for blacks in American Government. During the early 1960's, he served as an adviser to both Presidents Kennedy and Johnson, and had a vital role in the formulation and development of the landmark Civil Rights Act of 1964.

During the civil rights movement, Hobart Taylor showed the importance of having a voice both inside and outside the system. His legacy is that individuals of courage and commitment can take the challenge of serving at the seat of power and thereby promote constructive change.

The Washington Post recently published an article detailing some of the many accomplishments by Hobart T. Taylor, and I would like to share it with my colleagues.

[From the Washington Post, Apr. 6, 1981]

HOBART TAYLOR DIES; HAD ACTIVE ROLE IN CIVIL RIGHTS ACT

(By Maureen Joyce)

Hobart T. Taylor Jr., 60, an attorney and former director of the Export-Import Bank who was one of the top blacks in government in the Kennedy and Johnson administrations, died Thursday at Layford Cay in the Bahamas. He had suffered for the past two years from Amyotrophic Lateral Sclerosis, also known as Lou Gehrig's disease.

Mr. Taylor played an active role in the implementation of the 1964 Civil Rights Act, which he considered one of his most satisfying accomplishments, while serving as an aide to President Johnson.

The son of a wealthy Houston businessman and Johnson political supporter and who was a former Detroit attorney, Mr. Taylor was appointed by President Kennedy as special counsel to the President's Committee on Equal Employment Opportunity shortly after Kennedy's Inauguration in January 1961. He helped draft the executive order establishing the committee and served as the committee's executive vice chairman when Johnson, then Vice President, served as chairman of the committee.

In 1964, when President Johnson named him an Associate Counsel to the President, one of his top advisory staff positions, Mr. Taylor served concurrently in both positions for a year before Johnson appointed him a director of the Export-Import Bank of Washington in 1965.

Mr. Taylor resigned in 1968 to enter private law practice here. He was a partner with the Washington law firm of Dawson, Riddell, Taylor, Davis and Holroyd until 1979, when he became counsel for Jones, Day, Reavis and Pogue, another Washington law firm.

He served on the boards of directors of a number of U.S. corporations, including Aetna Life Insurance, A&P, Standard Oil of Ohio, Eastern Airlines and Westinghouse.

Born Dec. 17, 1920, in Texarkana, Tex., Mr. Taylor graduated from Prairie View College in Texas. He earned a master's degree from Howard University in 1941 and a law degree in 1943 from the University of Michigan, where he edited the law review.

Before coming to Washington in 1961, he served as research clerk for the Chief Justice of the Michigan Supreme Court, as assistant prosecuting attorney and corporation counsel for Wayne County (Detroit), Mich., and was senior partner of his own law firm in Detroit.

Mr. Taylor, who lived in Middleburg, Va., received four honorary degrees and numerous awards and commendations for distinguished public service.

He was an official of the Democratic National Committee and the NAACP and a board member or trustee of several educational institutions. An art collector and music lover, he also was a vice chairman and trustee of the Wolf Trap Foundation for the Performing Arts.

Mr. Taylor served on the Commission on Postal Service and the Commission on Executive Exchange in the Carter administration.

Survivors include his wife, Carol; two sons, Hobart III and Albert; two stepchildren, Edward Rader and Teresa Warner, and his mother, Charlotte Wallace Taylor of Houston.

The family suggests that expressions of sympathy be in the form of contributions to the Hobart Taylor Jr. Memorial Fund at Baylor University Medical College in Houston.●

COMPETITION GOOD FOR AUTO INDUSTRY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HUBBARD. Mr. Speaker, a recent editorial in the largest newspaper in my district, The Paducah Sun, Paducah, Ky., of which Fred Paxton is president and Jack Paxton is editor, touches on a subject that is one of the foundations of our American society—competition. This particular editorial, written by editorial editor, Don Pepper, merits the attention of my colleagues. The editorial follows:

HIGHER PRICES TO CONSUMERS IF RESTRICTIONS ON IMPORTS ARE ENFORCED

There is considerable sentiment and agitation for restrictions on imports of Japanese automobiles. President Reagan is said to be considering such a move.

If quotas are imposed, here's what we can expect:

1. Freed of meaningful competition from abroad, U.S. automakers will raise the prices of their cars.

2. Japan will retaliate by restricting imports of some American products. Auto makers and auto workers will be helped at the expense, not only of Japan, but of other American industry and other American workers.

3. The American public will be forced to buy cars at artificially high prices. The amount of money they will have available for other things will be reduced.

4. Pressures to ease the extravagant regulatory burden on American car manufacturers will subside.

5. Auto workers will be relieved of pressures to modify contracts under which they earn 60 percent more than the average of other American workers.

It's estimated that quotas might save 20,000 Detroit jobs at a cost to consumers of $1 billion—$50,000 a job.

With the rebate programs they have been featuring recently, the auto companies have been able to make modest improvements so far over their disastrous 1980 sales year. That proves that Americans will still buy American cars if the price is right.

To end the competitive forces on the government and the auto unions to make that price right would be to postpone the real solution to the problems of the auto industry.●

KIMOCHI INC., OF SAN FRANCISCO

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. JOHN L. BURTON. Mr. Speaker, on Sunday, May 17, 1981, Kimochi Inc., will celebrate its 10th anniversary of providing social services to the elderly of San Francisco. For many years, I have worked closely with this admirable organization which provides much needed services in an efficient and sensitive manner to the Japanese American community.

Kimochi Inc., a grassroots, nonprofit organization conceived by Sansei—third generation Japanese Americans—in 1971, was initially oriented to serving the social, psychological, and physical needs of the Issei—first generation Japanese Americans. Since then, Kimochi has developed the concept of an intergenerational approach to good communication and sensitivity within the Japanese American community. Promoting the philosophy of the young caring for the elderly and the young learning from the elderly became the impetus in establishing a viable service organization. An equally important philosophy of Kimochi is to serve the elderly from various social, religious, and economic backgrounds.

With the emergence of the Sanseis' strong ethnic identity and coupled with Niseis'—second generation—struggles with racism of the concentration camp experience and discrimination in employment and housing, the Sanseis in Kimochi made a commitment to addressing the needs of the aging in the Japanese American community.

Kimochi's goals are to promote the general well-being of the elderly

through increased socialization and help foster and maintain their independent lifestyles through the provision of supporting social services. The evolvement of information and referral, translation assistance, congregate and home-delivered meals, transportation, escort, outreach, telephone reassurance, housing, and other services was a direct result of filling needs and gaps in the social service system. Hence, the development of an alternative bilingual/bicultural service delivery model has been proven successful within the Japanese community. The strength and beauty of this model is that it is governed and operated by the community it serves.

As Kimochi looks toward the future, the ultimate priority is feeling (Kimochi) to keep a sense of caring for one another. Kimochi looks forward to the challenges in the years ahead.●

THE FAA COLLISION AVOIDANCE SHAM

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. JACOBS. Mr. Speaker, the following article speaks and speaks shockingly for itself:

GUEST EDITORIAL—THE FAA COLLISION AVOIDANCE SHAM

(By James Pope)

Back in 1971 FAA Administrator Jack Shaffer created an Office of General Aviation whose staffers were to act as intermediaries, facilitators and champions for general aviation pilots and operators in matters involving the FAA. One of the men assigned to that small group, and who was eventually to be named acting assistant administrator for the office, was Jim Pope. A solid choice.

Pope was an active pilot, an ATP, with over 5,000 hrs. in fixed and rotary wing aircraft. Before joining FAA he'd worked as the state pilot for the governor of Nebraska, and later went into business for himself, designing control devices for light aircraft. An engineer by formal training, Pope holds 12 STCs.

Because of the eclecticism of the general aviation office, and because of his own energy, Pope became involved in and privy to a variety of FAA policy, administrative and research matters over the years. One program which was of particular interest to him was the search for a workable system for collision avoidance. In 1975, he says, FAA received proof that private industry had invented just such a system, which was generically known as the Airborn Collision Avoidance System—ACAS. But despite clear evidence of ACAS's reliability, affordability and availability, FAA has chosen to put it aside, and develop its own collision avoidance system, one which will be ground based.

And when that FAA system is finally in place—a time still years away—Pope says it will not offer as much protection as the ACAS would have five years ago.

Pope was quite vocal about this and other similarly sensitive subjects during his tenure at FAA headquarters in Washington, and shortly after Langhorne Bond abolished the Office of General Aviation in 1978, Pope found himself reassigned to the FAA regional office in Seattle, where there was virtually nothing for him to do. Nothing.

That did it. He went public with his tale about FAA's ACAS coverup and earned himself offical recognition as a government "whistle blower." He's requested a complete investigation of the whole affair, and now that there are some new faces in Washington, he may discover that he's succeeded in igniting a powderkeg.

Fall has spawned a multi-billion dollar program for the control of air traffic that essentially guarantees an ever increasing pattern of mid air collision, such as the PSA disaster that occurred in San Diego in 1978. And rather than fulfill its mandate to promote aviation safety and commerce, the agency has gone to considerable lengths to hide from the Congress and the public the fact that an industry-developed device is available that would eliminate the mid-air threat.

What possible reason could FAA have for such unconscionable behavior? The answer is simple: self propagation. Put in FAA vernacular it comes out, "The flight paths of all aircraft must eventually be controlled from the ground by the FAA Air Traffic Control System." Any concept or device that deviates or detracts from that corollary is dispatched with all possible haste.

CONGRESSIONAL DIRECTIVE

Nine years ago in response to a Senate subcommittee directive, FAA scientists conducted an extensive two year evaluation of all Airborne Collision Avoidance Systems (ACAS) that had been designed and developed by private industry to serve as collision avoidance back ups in case of ATC system failure. Technical analyses, cost studies, and exhaustive flight tests proved conclusively that each one of the three candidate systems—built by McDonnell-Douglas, RCA, and Honeywell—were effective in nullifying the mid-air collision problem. Even better, the cost for such protection was just $1180 per aircraft.

Those preliminary reports were heresy to the peoples servants at 800 Independence. FAA quickly awarded two new contracts designed to produce data which would support the conceptual superiority of the DABS/IPC, another collision avoidance system which the agency had in-house. (IPC, by the way, has been re-acronyzed and is now known as ATARS, for reasons unknown.)

One contract called for an analysis of all mid air collisions during the previous eight years, and determining the relative effectiveness the various collision avoidance systems might have had in averting them. The second study contract called for analyzing near-misses in a similar manner.

Both studies were completed by July 1976 and a briefing was given to a hand picked group of FAA scientists and engineers. The analysts reported that during the previous eight years, there occurred 228 mid air collisions which might conceivably have been prevented had some sort of collision avoidance system been operating.

How many of those 228 mid airs might have been prevented by today's ATC system? A credible 118.

How many might have been prevented if 100 DABS/IPC sites had been functioning in the ATC system? A commendable 178.

Well then, if 300 DABS/IPC sites were operational, how many mid airs might have been avoided? An astounding 190, the analysts reported.

The FAA men were getting everything they'd hope for.

But then a bomb came visiting. For the analysts—none of whom were FAA employees—went on to report that had ACAS been installed in each of the crashed aircraft, all 228 mid-airs might have been prevented. All 228! What's more, the second report confirmed that ACAS would also have prevented every near miss as well.

The audience was stunned. The words, the statistics were blasphemy. The two reports were promptly and unceremoniously trash canned, and for a long time agency officials denied they had ever existed. Fortunately, one set of the reports did survive, having made an unobtrusive, hasty exit from the conference room.

FAA's bungling, bull headed promotion of DABS/IPC might be regarded as a typically self serving bureaucratic exercise. But it is much more serious than that. It is frightfully expensive; total costs for development, installation and operations of an DABS/IPC (ATARS) network is now estimated at a staggering $5 billion. Versus zero tax expenditure for the industry developed ACAS, remember.

Moreover, the $5 billion would buy very little real protection because if or when the FAA system is developed, it will be ground based. Thus it will provide no more back up protection to ATC system failure than what was available in San Diego on Sept. 25, 1978 when a collision between PSA 727 and a Cessna 172 left 144 innocents dead.

THE ANSWER

If ever there was a doubt, FAA's shameful, irresponsible conduct in the ACAS affair should be proof enough that the time has come to clean house. With an ax.

First, DOT should be abolished, for it is nothing but a giant ant hill teeming with superfluous second guessers. By axing DOT, its several sub-administrations, including FAA, would be free to attend more effectively to the job at hand.

Second, redirect FAA back to its primary role of enhancing aviation safety and shift the "promotion of air commerce" to free enterprise, where it belongs.

Third, wrench all the multi-billion dollar R&D projects from the tainted hands of FAA. Kill any program that seeks to reinvest the wheel, is in competition with private industry, or is an out-and-out boondoggle. The programs that survive this harsh, honest review should then be turned over to NASA, an agency that has demonstrated its qualifications to conduct legitimate research.

Fourth, direct the establishment of an ACAS national standard which would serve as a back up to the ATC system. The standard should provide for flight data input necessary for the operation of a Cockpit Display of Traffic Information (CDTI), long endorsed by airline and corporate pilots. Such a device would give all essential flight information to those who shoulder the ultimate responsibility for aircraft safety—the pilots.

The technology and the validation for such a program currently exists. The concept could be mandated by Congress within a week. Such swift, intelligent action could save taxpayers over $1 billion annually and, oh yes, would eliminate the mid-air collision.●

EQUAL APPLICATION OF AUTOMOBILE SAFETY STANDARDS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. DINGELL. Mr. Speaker, I am urging our colleagues to support and cosponsor legislation introduced today by our colleague, ELWOOD HILLIS, myself, and several other Members of the House that would eliminate the discrimination in the U.S. automotive marketplace as it pertains to the safety regulation requiring automatic occupant restraint systems on passenger cars.

The bill would require passenger cars offered for sale in the United States to comply with the existing motor vehicle occupant restraint safety standard in the same model year, 1984, effective September 1, 1983.

It leaves the standard in place to improve safety for motorists and corrects the compliance schedule in accordance with today's automotive marketplace conditions.

This legislation is the most sensible and reasonable approach to amend the National Traffic and Motor Vehicle Safety Act to provide for the equal application to all manufacturers of motor vehicle safety standard 208. This regulation currently requires passenger cars of different wheelbase sizes to be equipped at different stages during the next 3 model years with automatic occupant restraint safety protection systems.

The bill defers the effective date of the regulation, motor vehicle safety standard 208, until September 1, 1983, which is the start of the 1984 model year. This will equalize the competition in automotive production, financial investment, and sales as all manufacturers selling passenger cars in the United States would have to comply at the same time.

The regulation change is required as the 208 standard as it exists discriminates against the large and intermediate size passenger cars which are mostly produced by domestic manufacturers and which must comply first before the smaller cars, the vast majority of which are foreign produced, must comply in model year 1984.

Secretary Lewis of the Department of Transportation has issued a 1-year delay in the 208 standard as it affects large cars, but that is not enough to remove the disadvantage to our domestic industry. American large and intermediate size cars must, under the Secretary's plan, still meet the 208 regulation in model year 1983, a year before the largest volume of foreign cars need to comply.

With the domestic manufacturers having suffered a $4.3 billion loss in 1980, while facing the ongoing, $70 to $80 billion, 5-year changeover to small car production, Mr. HILLIS' legislation, if promptly enacted, would contribute toward providing more certainty and balance in the marketplace.

It would help avoid further economic and employment disruptions and there are substantial cost savings to manufacturers and consumers that would be attributed to this change in the safety standard's schedule.●

A MATTER OF STRATEGIC IMPORTANCE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. BROWN of California. Mr. Speaker, over the years, many of my colleagues have heard my frequent speeches in support of more research and development work on underutilized crops. More specifically, I have frequently spoken in glowing terms about guayule, a small, semiarid shrub that produces natural rubber and is native to the American Southwest. After years of trying to convince the Federal Government to undertake a guayule development program, I authored a guayule commercialization program that was enacted in the 95th Congress.

Little has been done with this authorization in the executive branch in spite of the tremendous promise that this plant holds for water short areas of this country. The only funding has come from the Department of Agriculture, and that occurred only after much prodding. The Department of Commerce, a partner in this commercialization effort has never requested funding, although some discretionary funds were made available this year.

Now, the Department of Defense and the Federal Emergency Management Agency (FEMA) are interested in this plant. Natural rubber is a strategic material that is supplied wholly by imports. Our strategic stockpiles are dangerously low and to purchase the rubber in the marketplace would cost many millions and drive the price of natural rubber extremely high.

What these agencies are considering is establishing a guayule industry in the Southwest to grow the natural rubber required to fill the stockpile needs. The money invested in establishing such an industry would be less than making the required purchases of natural rubber and would have the added benefit of establishing what could become a major new industry. We could save on natural rubber import costs, work toward cutting our petroleum use—our synthetic rubbers are petroleum based, and create new jobs throughout the Southwest and in the tire manufacturing areas of America's industrial heartland.

We will be hearing much more about this desert plant in the coming months and I want all of my colleagues to know more about guayule. Accordingly, I am reprinting two articles on the subject, one from the Wall Street Journal, and the other from the Los Angeles Times. The articles follow:

[From the Wall Street Journal, Mar. 27, 1981]

SCRUFFY DESERT PLANT, ONCE VITAL TO UNITED STATES IS BOUNCING BACK

(By William E. Blundell)

CASA GRANDE, ARIZ.—Bill Klink surveys cultivated rows where seedlings peep at the desert sun from between clods of earth. "You're looking at a new industry—maybe," he says.

Mr. Klink is a partner in Agri-Business Research Corp., a Scottsdale, Ariz., company that specializes in growing experimental crops on arid lands. His 30-acre planting here is guayule (pronounced why-oo-lee), a scruffy, three-foot desert shrub with spikey, blue-gray leaves, a long and checkered history, and increasing economic importance.

Some big companies are getting interested in guayule. So are whole tribes of Indians. A federal agency is aching to spend money on it. Its seeds sell for up to $1,000 a pound. Some nations view it nervously, others hopefully.

Guayule, native to northern Mexico and southwest Texas, is generating all this interest because it is 10% to 20% rubber by weight. Nobody needs natural rubber more than the auto-crazy U.S., which grows none of its own and imports a quarter of the total world supply—almost $1 billion worth a year, making natural rubber the nation's most expensive resource import after oil. The tire industry also uses a lot of synthetic rubber, which is generally produced from oil and therefore is becoming increasingly expensive.

PRIMARY SOURCES

Most of the nation's natural-rubber supply comes from rubber-cartel nations in politically unstable Southeast Asia, and the rubber companies in the U.S. are edgy about that. A couple of coups or an invasion, says an official of one tire maker, and the already-unhealthy U.S. industry could be in even worse trouble. Finally, even without coups and invasions, there soon won't be enough hevea, or tree rubber, to go around.

Demand is outstripping supply, and the long growing cycle of the rubber tree makes it impossible to increase production quickly. Goodyear Tire & Rubber Co., the biggest rubber importer and main partner in the guayule venture here, sees a world-wide shortage of more than 500,000 tons of hevea within 10 years.

Enter guayule—again. Getting rubber from the innocuous little shrub may be the oldest new idea around. The Aztecs chewed the plant and made rubber balls out of it, and a group led by financier Bernard Baruch and including such fat cats as John D. Rockefeller and Daniel Guggenheim used it to produce half the nation's modest rubber requirements in 1910.

But, eclipsed by cheaper and more abundant tree rubber, the industry soon died. In 1930 an Army major named Dwight Eisenhower urged its revival, but his advice was ignored until World War II, when the Japa-

nese cut off hevea from Southeast Asia, and the U.S. had to launch a crash guayule program. After the war, however, all 32,000 acres were burned or plowed under.

Now, with shortages looming and rubber prices more than tripling in the past decade, the "orphan of the desert," as it has been called, may yield a permanent industry at last. Hardy, requiring little water, amenable to genetic improvement and harvestable two or three years after planting, it could grow on up to five million desert acres in the Southwest. Eventually it could fill all U.S. natural-rubber needs and form a living stockpile as well. Almost a third of its rubber is in the roots, which survive to send up new shoots after the bush is lopped off.

But the guayule industry, such as it is today, is still a sleeping beauty waiting for the kiss of the prince.

There are a lot of reasons. Tire firms know how to extract rubber from the bush with hexane. Firestone Tire & Rubber Co. has a laboratory-scale processing unit going, and Mexico is operating a pilot plant in Saltillo extracting rubber from wild shrubs. But the economics of a commercial-scale plant are still murky.

Then there is what one Goodyear executive calls "the chicken or egg problem." Big companies don't want to build multimillion-dollar plants to process guayule unless they are assured of sizable crops nearby. But harvested guayule won't keep for long, and farmers don't want to risk planting thousands of acres without assurance that a processing plant will be there to buy the stuff. Apparently no one wants to chance a farm-to-market venture alone.

"No clear leadership is evolving in the commercialization of guayule, and this is a real constraint," says Kennith Foster, associate director of the Office of Arid Lands Studies at the University of Arizona.

Instead, everyone wants Washington to end the Alphonse-and-Gaston act with a dollop of federal aid to speed guayule along. "For less than $100 million, the government could have itself a nice little industry in five years or so," Mr. Klink of Agri-Business Research Corp. says hopefully.

He and others believe the investment would be more than repaid in the benfits to the balance of payments and in the creation of new jobs. They also note that just such aid created the synthetic rubber industry from scratch in World War II.

But a peacetime government has been divided within itself over funding guayule. The Interior Department has pushed for a program because it wants to ease poverty and unemployment on Southwestern Indian lands. The National Academy of Sciences strongly recommended a federal role in a 1977 report, and the next year Congress authorized spending of $30 million on the bush.

But no new funds were appropriated, and the Agriculture and Commerce Departments, charged with running the program, have chosen to lavish their budgets on other things. "They spend a lot of time arguing over who'll buy the coffee for the next guayule meeting, but that's about it," says one disgruntled researcher. Less than $3 million from all government sources has been spent on guayule since the act was passed, says William Miller, an Interior Department development specialist.

So attention now has shifted to the Federal Emergency Management Agency, keeper of the nation's strategic stockpiles. The FEMA has only 119,000 tons of natural rubber in its larder, far below the 850,000 tons it needs, and it can't buy any more without seriously disrupting a world market already affected by tight supplies and high prices.

With congressional approval, the FEMA can also provide money for domestic ventures to produce needed materials. Last year, it proposed a 10-year, $200 million guayule project, including a commercial-scale plant to process 25,000 acres of the shrub, but the Office of Management and Budget shot down the idea. Since then, however, congressional concern over supplies of strategic materials has been mounting, and President Reagan just announced the first purchases for the strategic stockpile in 20 years. He also said other measures to expand domestic supplies were being considered. The FEMA, heartened by the change in attitude, is expected to resubmit its proposal for guayule.

Even if the plan is rejected again, and government support never exceeds present levels, development probably will only be slowed, rather than killed. "It isn't a matter of if guayule is commercialized, it's a matter of when," says Mr. Foster of the University of Arizona.

Most analysts believe that the price of natural rubber can only go up, adding to guayule's appeal. Because synthetic rubbers, which account for 70 percent of the world rubber use, are made from oil, their prices have climbed steeply, and they couldn't fill much of the looming rubber-supply gap anyway. The natural product has heat resistance and other qualities that synthetics lack, and natural rubber is still indispensable in tire making.

Some products, including aircraft and heavy-equipment tires, must be made almost entirely of natural rubber. And radial passenger-car tires currently taking over the market require more natural rubber than standard types. "We could easily use more natural rubber in products, but it would be difficult to go the other way and use more synthetic without a decline in quality and performance in critical uses," says John Lawrence, Goodyear's manager * * *.

[From the Los Angeles Times, Mar. 27, 1981]

GUAYULE PUTS SNAP IN RUBBER RESEARCH

KANSAS CITY, MO.—A rubber supply that has not kept up with current demand, an unsettled international scene and the rising cost of petroleum-based products have sparked an interest in a native American desert shrub as a possible natural rubber source.

Guayule, pronounced wy-OO-lee, is a two-foot-high shrub that grows wild in the semi-arid plateaus of the southwestern United States. Lately it has become a focus of research and experimentation by scientists and the federal government in the search for a new, domestic source of natural rubber.

The United States' supply of natural rubber is in a precarious position. The demand for natural rubber is increasing at a steady rate and experts estimate it will outstrip supply by the next decade.

Since the mid-19th Century when great Britain introduced the Hevea rubber tree into it colonies, Southeast Asia has been the major world source of natural rubber.

In recent years political unrest and the ravages of war in Vietnam and Cambodia have taken their toll on the rubber plantations. But the United States is still dependent on Southeast Asia for that rubber.

Dr. Edward Lawless, head of Kansas City's Midwest Research Institute Technology Assessment Section, said that while synthetic rubber is an alternative, it is a petrochemical product relying on increasingly costly oil.

Furthermore, synthetics do not have all the qualities of natural rubber, which is preferred in applications that demand high elasticity, resiliency, tackiness and low heat buildup.

The combination of these factors has led to an increased interest in guayule, a renewable source of rubber that can be produced domestically, as a major source of rubber.

Because of this interest, the National Science Foundation sponsored a study by the University of Arizona and Midwest Research Institute to assess the implications of the development of a new U.S. agribusiness based on guayule technology.

Lawless concluded that the benefits of full-scale guayule production would be many and the cost and risks small.

On the local level, Lawless said that guayule commercialization would have little effect. Guayule would be grown mainly on land that has been farmed with little success or on selected irrigated lands. The shrub can survive on 5 to 10 inches of rainfall a year, but does best with 15 to 25 inches.●

REAGAN CUTBACKS ADD TO UNEMPLOYMENT AND SOCIAL ILLS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HAWKINS. Mr. Speaker, we are continuously told by administration's spokesmen that we must sustain deep and painful cutbacks in domestic programs to attack inflation and increase economic growth. We are piously informed that the administration has a mandate from the voters to drastically reduce Federal spending. I submit that the mandate from the voters, if there is one, is to reduce unemployment, reduce inflation and expand economic growth. The Reagan economic proposals will not accomplish these objectives. These proposals are dangerously deceptive.

A recent analysis of the Reagan spending cuts provided to the Education and Labor Committee by the Wharton Econometric Forecasting Associates found that the spending reductions would increase the number of unemployed by 1,750,000 people. This economic and social disaster would provide only a miniscule decrease in inflation—less than three-tenths of 1 percent.

The respected economist, John Kenneth Galbraith, gave the Congress last week a sober and alarming appraisal of the administration's proposals. "The legislative action now under consideration is radical in conception and dangerous in social effect," Galbraith told the Education and Labor Commit-

tee. He said that the planned massive reduction in spending and cuts in taxes, coupled with increased defense spending, can only lead to a continuing budget deficit.

The resulting reliance on a tight money policy to contain inflation—

Works only as it induces the recession that is the counterfoil of the supply-side economics now so much under discussion. No one has yet devised a means for having a vigorously expanding economy and an economically depressive tight money policy at the same time.

Professor Galbraith came before the committee with a plea for caution or conservatism in the face of alarming social consequences if the drastic cuts in programs aiding the poor are sustained. "Concern about the effect of such cuts should not be confined to liberals; it should be the deep preoccupation of all who value social tranquility and peaceful development."●

DEFENSE SPENDING

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, April 8, 1981, into the CONGRESSIONAL RECORD:

DEFENSE SPENDING

The nation is about to begin the largest program of military spending ever to take place in peacetime. Under President Reagan's proposals, defense spending will grow an average of 9 percent per year in real terms during the early 1980's. The President hopes to spend more than $1 trillion on defense between now and 1985.

The idea of increased military spending meets with little dissent in Congress. The reason is that the armed forces of the Soviet Union show no sign of slowing their own relentless expansion. In the congressional debate to come, however, a few words of caution are in order. The frantic bidding up of the defense budget is a deeply flawed way to try to improve our military posture. More funds for defense will result in better defense only if the money is spent for the right things. I support increased military spending, but I will insist that Congress be especially careful not to license waste in the name of national security. Despite the mood in Congress, the armed services must not escape budgetary discipline. I am persuaded that substantial savings can be found in the defense budget, and I am encouraged that Defense Secretary Weinberger, who has a reputation for budgetary restraint, agrees.

Most of us realize that the defense of the nation is an expensive undertaking. Defense spending is high because we choose to defend ourselves as far from our shores as possible, believing the added margin of safety to be more important than the added cost. We choose to defend ourselves with advanced technology, demanding the latest in military hardware despite the high cost. The gathering of intelligence is also costly for us because our major adversaries have closed their societies to foreign scrutiny. Much of the force that drives the defense budget is clearly legitimate, but not all of it is. Opportunities for economy and positive change present themselves in many quarters.

Strategy: Some critics believe that we lack a comprehensive military strategy based on our varied national interests. Our huge and growing arsenal of nuclear weapons counterbalances the threat of nuclear attack by the Soviet Union, but it also siphons off precious resources that could be used to bolster our sagging conventional forces. The Soviets' nuclear capability is not the only (or the most immediate) problem we face. Others are increasing turbulence in the developing world, weaknesses in many of our allies, and our own reliance on imported oil and minerals. A comprehensive military strategy is one that takes all such problems into account and then allocates limited resources accordingly. It is a strategy that is determined by, and does not itself determine, the primary objectives of our foreign policy.

Politics: Political interests in Congress are often the cause of military misspending. For purely political reasons, Congress will sometimes direct the armed forces to buy a weapon or keep a base open even when military planners strenuously object. It has been estimated that $5 billion could be cut from the defense budget if legislators stopped seeking unjustifiable outlays for the benefit of their own districts and states. Congress must work harder to see that national security prevails against politics when it decides on defense spending.

Industry: Cost overruns in contracts, long delays in deliveries, and sloppy or faulty workmanship are signs of failure in our defense industry. In the view of many specialists, the current condition of the industry may not allow it to absorb greater defense spending efficiently. Purchases of fewer and costlier weapons during the past few years have left the industry in a state of lower productivity, hampered by the aging of facilities and plagued by shortages of skilled labor and strategic materials. Red tape and last-minute changes in design are sources of constant frustration to defense contractors. Basic policies of procurement are badly in need of reform. In such circumstances, any attempt by the industry to meet sharply rising demand might lead to rapid inflation in the cost of production and further delay in the delivery of goods and services.

Waste: Waste in defense spending is documented. A congressional report published last year cited dozens of instances. Investigators found that the armed forces fail to collect proper payment from countries which receive American arms and training. Millions of dollars are wasted each year when damaged military equipment is not returned to depots for repair. Poor recordkeeping and inadequate security permit theft from storage facilities. The report detailed many other problems beyond these, including the purchase of overpriced equipment, payment to contractors for work not performed, too great a dependence on complicated weaponry, and gross inefficiency in the warehousing of materials and supplies. Because of inter-service rivalry, built-in incentives to spend, and the sheer size of the military, annual losses may reach $15 billion.

Allies: Our allies must carry an equitable share of the defense burden of the West. We spent 5.2% of our gross national product on defense, the NATO allies contributed an average of 3.3%, and Japan gave about 0.9% in 1979. We should not accept the idea that it is our job to defend those who do not defend themselves. Also, we and our allies need to use more standardized weaponry and equipment in order to reduce duplication. We wring our hands at growing Soviet military power, but we are still unwilling to have our industry lose a contract for the sake of a unified defense.●

SENIOR CENTER WEEK

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. BIAGGI. Mr. Speaker, today I am pleased to introduce a house joint resolution which designates the second week of May as Senior Center Week. I offer this resolution to complement one introduced in the Senate by our former colleague CHARLES GRASSLEY, who now serves as the junior Senator from Iowa.

I am proud to be an original member of the House Select Committee on Aging where, I might point out, Senator GRASSLEY served with great distinction. In this capacity I have been deeply involved in the multitude of issues which involve the elderly. As chairman of the Subcommittee on Human Services I have had a special interest in senior centers, and I consider it more than fitting that we pay special tribute to senior centers and the wonderful people—men and women—who operate the centers.

May of each year is designated as Older Americans Month. It is a time when we as a nation pay tribute to our fastest growing population group. Today for the first time in our Nation we have more people over 60 than under 10. In the last decade, we saw a 16.7-percent increase in the number of elderly. The trend will continue, well into the next century.

Senior centers are an integral part of our Nation's policy for the elderly. Today there are more than 8,000 senior citizen centers operating in all parts of our Nation. They are run in large cities, small towns, and everywhere in between. They operate in church halls and school gyms; you find them in old warehouses and even some mobile units. Wherever they are, they have one thing in common—they promote the well-being of senior citizens.

The Older Americans Act, a piece of legislation which I am closely associated with, recognized the value of senior centers when it established a separate title to develop what are known as multipurpose senior centers. These were to be one-stop centers, where seniors could go and get a myriad of services from nutrition to counseling. This program continues today under the auspices of title III-B of the Older Americans Act, and I intend to make

sure that senior centers remain a prominent part of the Older Americans Act of the future.

I consider it a fitting tribute to senior centers and their dedicated personnel that we designate a week in their honor. It will provide us with an opportunity to focus attention on the important work they do on a daily basis and how much they contribute to the well-being of our seniors. A senior citizen population which can remain active—associating with friends and being provided with important services—is a healthy senior citizen population.

As we explore future policy options for tomorrow's elderly, let us make sure that we give proper attention to senior centers. They are complementary, in a very real sense, to our efforts to promote alternatives to institutionalization for our elderly. They provide the types of preventive services which are so critical to our elderly. Senior centers are good for our Nation and I am proud to sponsor this resolution to pay them the tribute they so richly deserve.●

MARYLAND DAY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. DYSON. Mr. Speaker, recently the entire State of Maryland marked its birthday by a fantastic celebration at Maryland's first State House in St. Mary's City, Md., on March 29, 1981.

Those of us in attendance had the uncommon opportunity to listen to former State Senator J. Frank Raley, Jr., expound on the history of Maryland and the principles of justice and equality that have been the cornerstones of this great State for 347 years.

Mr. Speaker, I would like to share Senator Raley's remarks on that historic day with the House.

When one comes to St. Mary's City at this time of year, in March, to celebrate Maryland Day, there is still much of the deadness and chill of winter; but, the suggestion of spring is in the air and we know that soon spring will be here and will come forth bringing new life and new beginnings to this magnificient land, with all of nature's power and glory. Perhaps it was coincidental that the little band of Englishmen, our Maryland forefathers, left England in November. Since I have not studied climatic charts, and prevailing winds or navigational limits of that time there may have been this or other practical reasons for the November departure and a March arrival, but I hope not. Rather, could their leaving in November be designed by the destiny of history—that they should depart from the old world as nature's cycle was coming to an end with winter approaching and arriving and coming ashore for a beginning on this continent, to this place on the eve of spring's renaissance? I like to think it was planned by destiny that the Maryland colony was planted, with its new ideals and hopes, it coincide with the coming of spring, sending forth dramatically its power and glory.

347 years have passed since that day, on the eve of spring, and in that time astounding change has taken place—from colony—to province—to State—to Nation, there has been built and created with sweat, tears, and blood, a republic. How did this happen? Was this only the culmination of practical arrangements made possible by the opportunity of a new continent's resources? Or, was it something more? Our common experience tells us the republic could not have endured the crisis, made the adjustments, met the challenges and pursued our destiny as a community of free people, if based merely and only on practical arrangements. The spirit of the Republic, as embodied in its institutions, consists of a blend of prudence and imagination, of caution and creativity, of principle and practicality, of idealism and realism about the governing and self-governing of men. It calls for constant regeneration faithfully passing from generation to generation the ideal, resting on the premise that our power, is the servant of justice. It has been built, as James Madison termed it, "by an action of the heart".

And the debate never ends and the task is never over. While the issues are different with the times, there is always before us the test—always new challenges to the ideals of this republic that each generation must protect, defend and expand and always to remain faithful to the full promise of the republic by answering the question, "that power is the servant of justice?"

The challenge takes many forms and appearances and is inherent in almost every political debate. Is government simply a mechanical arrangement to do the least, except to arbitrate and to keep the warring self-interest factions in a sort of order and in which power serves interest? Or, does government have a purpose beyond that? Is government to concern itself with fairness, justice, and virtue where power is the servant of justice?

The St. Mary's Colony made an uncommon contribution to, what I believe is this basic strength of American democracy, a sense of justice, resting on the opinion of the people. Those who came ashore on that March day were relatively ordinary; they attained no great fame; they are unknown, outside of a few Maryland historians and their many descendents, but they brought with them powerful ideas! They came with the ideas of 1000 years of the development of English parliamentary law—they were influenced by the new scientific discoveries of Galileo and Da Vinci; the Renaissance had awakened them, and they brought the humanist traditions of the philosopher Erasmus to Sir Thomas Moore to the first Lord Baltimore. Imperfectly developed and untried, and hardly understood, their ideas were only a hope that the renaissance of man was beginning; That he was to be unbound and unbundled, as they tried to free themselves from the tyrannies of intolerance, ignorance, and prejudice, to come and find a place and build, where they could live in peace, justice and harmony with each other.

This was the beginning—it was a beginning in a narrow form, but nevertheless, an uncomparable step as a policy of government to practice tolerance, and it lasted for only a short time. But the republic to come was taking root. It would be another 139 years before the Revolution, a multiplicity of ideas, new and radical, taken out of the theory books of the philosophers, had sprung out and begun to be applied to practical affairs in these Colonies on the coast of North America. None are more important than the Maryland Colony's contribution that brought forth and rooted in this new land, the ideal of tolerance and civility in the conduct of man's affairs. Through the colonial period, through the revolution, through the crises and developments in our history, this colony of Maryland and then as the State of Maryland, while if not brilliant, stood stable, injecting into the national life a quiet tolerance that comes from the inner security of the conviction of the ideals brought to this continent and planted at this very place. The Maryland Colony answered the question: That the power of government is to be the servant of justice.

In 1984, it is planned to celebrate here, in a large way, the 350th anniversary of the founding of Maryland. I am glad Governor Hughes and the Legislature is supporting this. In a democracy, where the very existance of a workable government rests on the opinion of the people, it is well to pause now and then, to celebrate. But, in addition to the celebration, I would add to review where we started, where we come from, and what it is that sustains the Republic in the context of the Maryland Colony's contribution. Is it possible that in the plans for 1984 there can be a place for the projection and celebration of the ideals of this Colony that helped build the Republic? Can there be raised for all to see the terrible ordeal of decisionmaking in building a just society where power is the servant of justice—not the servant of justice. It is important, I think, because each generation has the responsibility to keep, preserve, and expand what has been passed on to them. Perhaps we do not always value what is priceless when it has been given and received easily. But, it is these value questions to which answers must be resolved every day throughout this land, cloaked in practical issues and on which decision must be made either in justice or for interest. While these concepts can't be reconstructed like a building or a farm, it is the legacy of this Colony, our priceless and precious heritage.●

REGULATION OF THE BROADCAST INDUSTRY

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. BROWN of Ohio. Mr. Speaker, the future role of the Federal Government in regulating the radio and television industry is a matter of concern to Congress, the broadcasters, and the public. On March 24, Mr. Dan Morris, president of the Ohio Association of Broadcasters, presented his views on several of these issues to the Ohio congressional delegation, U.S. Senators, and Federal Communications Commissioners.

I would like to take this opportunity to present his comments on this important matter:

REGULATION OF THE BROADCAST INDUSTRY

As you know, broadcasters and government officials give each other lots of attention. I suppose some is welcome and some is not, from both our perspectives. For example, we could do with much less regulatory attention.

In fact, broadcasters are now regulated by 37 federal agencies. The agency closest to our heart, of course, is the Federal Communications Commission. In all seriousness, I must say we have experienced FCC Commissioners, such as those with us tonight, who have been committed, well-intentioned, and reasonable. But we have disagreed, especially with their outgoing Chairman.

For example, the FCC recently acted to "deregulate" radio. We welcomed relief in that action from some required paperwork, some procedures, and some artificial percentage standards. But, ambiguous regulatory obligations—such as ascertainment—remain. They must be clarified or—better yet—deleted by legislation for true deregulation. And, what we seek is only what we've earned through documented performance. For instance, the FCC's own studies show broadcasters have consistently provided far more news and public affairs programming and fewer commercials than any government regulations demand. Clearly, deregulation legislation is imperative. Both radio and television have earned it.

One final comment about the FCC. Have you ever had trouble tuning in a station, or hearing one clearly? Those kinds of problems, we feel, could increase because of another FCC proposal—a proposal to narrow the space that separates radio stations. If the United States, pursues this FCC suggestion in the upcoming international allocations conferences, we may well ruin radio reception and more interference among stations. Worse yet, many of our audiences—your constituents—may have to buy new radio receivers. Many current radios are not compatible with the FCC move to reduce the space between stations. This action is commonly referred to as the 9KHz proposal. And, in television, the FCC has proposed squeezing in or "dropping-in" more TV stations as well with serious consequences for more home interference. Why the FCC wants to squeeze in more stations is curious, since 97 percent of all U.S. households now can receive 4 or more TV stations, and two-thirds of our households can receive seven or more TV stations. And, just this week, the total number of radio and TV stations topped the 10,000 mark. This number doesn't even include cable!

With these issues, we ask you to raise three basic questions: Has the FCC done its technical homework on these proposals? Has the FCC considered these issues in a related, systematic way or in piecemeal fragmented fashion? Will these proposals diminish radio and television service to the public?

One fact that all of us can agree on is the vast change taking place in communications technology. Satellites, cable, lasers, computer technology, video discs are no longer just topics for the future. They are quite real current developments in the electronic world.

Increasingly affected by these innovations, Ohio broadcasters seek only one thing: fair compensation from those who use our program product. We ask for even-handed action to assure that what your constitutents now see and hear for free over-the-air does not become the exclusive province of those who charge each viewer-listener for each program. The Judiciary Committees of both Houses should act on copyright law to assure that cable pays fairly for its use of broadcast programming.

Speaking of programs, you of course are used to hearing and watching news and music on our stations. Once again, like the worst re-run, comes the 1981 version of the record companies' grab for more profits. They call it performers' royalty legislation. Though broadcasters now pay royalties to authors, composers, and the like, and promote these artists through airplay, they want some more . . . through a legislated percentage of our radio & TV receipts. This could mean more money going out of your districts and amount to an unfair assessment on us.

Finally, for the Sixth consecutive year, we are forced to call your attention to the lack of clarity in our license renewal standards. Our stations are up for grabs every three years in license renewal. But, criteria for renewal judgment remain clouded and are jolted into inconsistency by case decisions. Legislation is necessary to clarify these criteria so we know what will bring a reasonable expectation of renewal. The broadcaster who faces renewal now is much like the Congressperson who experiences redistricting, then can't get anyone to tell him what his new district boundaries are!

In closing, let me say we appreciate your attention to our concerns, and will do our best to be responsive to yours through our continuing contact.

We're grateful for the service you render to all your constituents and again salute your performance and your commitment to the public interest.

Thank you, Mr. Speaker.●

CONGRESSIONAL SALUTE TO JOSEPH AND BIANCA HANCOCK

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. ROE. Mr. Speaker, on Saturday, May 2, the residents of the city of Paterson, my congressional district and State of New Jersey will join with the membership of one of our most prestigious Italian-American organizations, the Nineteen Hearts Society of the Federation of Italian Societies, in testimony to the good works of two distinguished citizens, community leaders and good friends to all—the Honorable Joseph Hancock and the Honorable Bianca Hancock, a husband and wife team of distinction, whose personal commitment and lifetime of good deeds in service to the people of the city of Paterson have earned them the highly coveted annual award of the Nineteen Hearts Society of the Federation of Italian Societies.

Mr. Speaker. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to Bianca and Joe Hancock and share the pride of their children—sons Michael Frioli, Neal, Michael, and David; daughter Jeanne Oliver; son-in-law Dr. Ronald Oliver; daughters-in-law, Angela Frioli, Sharon, Karen and Laurie; and seven lovely grandchildren—as they celebrate a milestone of achievement in their family endeavors.

Mr. and Mrs. Bianca have, by their example and many accomplishments in civic, community, and charitable endeavors, personified a quality of leadership, dedication, and sincerity of purpose that have truly enriched the cultural endeavors of our community, State and Nation.

Joe, with the inspiration and assistance of his first lady Bianca—and vice versa—together have provided outstanding and responsible service to our people. Their personal commitment to the economic, social and cultural renewal of the community and State of their residence is applauded by all of us.

Mr. Speaker, Joe and Bianca have been actively involved in the business community in separate careers. Mr. Hancock, after 35 years with the Wright Aeronautical Corp., retired in 1975. Mrs. Hancock had been supervisor/trainee for over 10 years with the Barbizon Co. Bianca is well known as a most proficient couturiere, for the cast of the Paterson Lyric Opera Theater under the direction of noted artist Armen Boyajian. She is presently legislative aide to the Honorable Vincent "Ozzie" Pellecchia, distinguished member of the New Jersey General Assembly representing the 35th district of our State.

We are proud to boast that Bianca and Joe are lifelong residents of the city of Paterson in my congressional district and active members of the most revered Blessed Sacrament Church. They graduated from local schools—Joe attended St. Mary's High School where he played varsity basketball and baseball under the superb expertise of Jerry Molloy; Bianca attended school No. 18 and Eastside High School.

During World War II, Joe served our country with distinction, placing his life on the line for our people with the Armed Forces in the European theater. Among his military decorations, he received the highly esteemed Bronze Star and Purple Heart awards of honor.

Mr. Speaker, in presenting its distinguished community service awards to Joe and Bianca Hancock, the Nineteen Hearts Society of the Federation of Italian Societies wishes to particularly commend their many years in service to the entire Paterson area community.

Recognizing the importance of sports in the development of the character and physical fitness of our youth, Joe has willingly and unselfishly contributed many, many of his leisure hours coaching the young people of Paterson in various athletic endeav-

ors. He has also made an additional substantive contribution to the people of our community through his dedication and devotion to the needs of our veterans. Joe is a proud member and past commander of the Riverside Veterans Association and a lifetime member of the Disabled American Veterans.

Bianca is a charter member and past president of school No. 18 PTA and the Riverside Veterans auxiliary. In addition to her many contributions to social and civic improvements projects of the city of Paterson, she has served as community captain for many charitable fundraising campaigns—the March of Dimes, American Cancer Drive, Multiple Sclerosis Association, to name but a few. She now serves as Paterson's third ward political leader and commissioner on the Passaic County Board of Elections.

Mr. Speaker, Bianca and Joe Hancock have achieved in their lifetime the respect and esteem of all of us who have had the good fortune to know them. It is to their modesty in their achievements, their outstanding expertise in their chosen fields of endeavor, the warmth of their friendship and sincerity of purpose in the American way of life that I join with the Nineteen Hearts Society of the Federation of Italian Societies in seeking this national recognition of their service to our community and fellowman.

We are especially appreciative of their many contributions to the quality of life and well-being of our citizenry. For their personal commitment and lifetime of good deeds in service to our people we do indeed salute two outstanding individuals, good friends, and great Americans—the 1981 Community Service Award Honorees of the Nineteen Hearts Society of the Federation of Italian Societies—the Honorable Joseph Hancock and the Honorable Bianca Hancock of Paterson, N.J.●

SALUTE TO JOHNNY MIZE

HON. ED JENKINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. JENKINS. Mr. Speaker, earlier this spring the Veteran's Committee of the Baseball Writers of America voted to induct John Robert "Johnny" Mize of Demorest, Ga., into the Baseball Hall of Fame. I arise on this occasion to offer my personal salute and tribute to this man who lives in the hills of north Georgia.

Finally, memories of "the big cat" will be enshrined in Cooperstown, N.Y., in August of this year.

What a pleasure this is to congratulate Johnny Mize on being selected for this long overdue honor. Longtime baseball fans in north Georgia have gingerly lost one of their favorite subjects for which to offer their personal gripes—and rightfully so.

"The Big Cat"—Mize's nickname because of his quick bat which was in contrast to his hulking 6-foot, 2-inch frame—lives now in his old hometown of Demorest in Habersham County where he first gained fame as a young first baseman with Piedmont College and various amateur and industrial league teams around northeast Georgia.

Mize's lifetime statistics are astounding even compared to today's players. In 15 seasons with the St. Louis Cardinals, New York Giants, and the New York Yankees, he achieved a batting average of .313, struck 359 home runs and batted in 1,337 runs, which is still the second highest total in the National League.

Mize spent his last 5 years mostly as a pinch hitter for Casey Stengel's perennial Yankee champions. He retired from pro baseball in 1953 at the age of 40.

Mr. Speaker, I have had the great pleasure and profound honor of being with Johnny Mize on several occasions during the past few years. I have a great respect for his personality as well as his atheltic talents. As a youngster reared in a baseball-oriented family, Johnny Mize was always admired.

He is one of the last of his breed—a guy who played baseball because he loved it and it did not really matter whether he was playing for Piedmont College or the New York Yankees.

Mize joins two other Georgia natives in the Baseball Hall of Fame—Ty Cobb and Jackie Robinson. I would submit without reservation that Johnny Mize complements the Georgia delegation in this regard.

Mr. Speaker, Johnny Mize has rightfully received the recognition that he richly deserves, and I am offering my personal salute to this fine gentleman. Thank you.●

GETTING TOUGH WITH MOSCOW

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HARKIN. Mr. Speaker, a key foreign policy question confronting the Reagan administration concerns the priority to be accorded human rights in the conduct of our international relations. That issue is the subject of extensive and vigorous public debate today, and justifiably so. Whether the current White House and State Department leadership realizes it or not, human rights decisions will have an enormous impact on our foreign policy performance, for better or for worse. The question calls for careful consideration and political sophistication.

With this thought in mind I invite your attention to a speech delivered at Meridian House on March 10 by Judge Thomas Buergenthal on "Human Rights and the U.S. National Interest." Judge Buergenthal is the dean of the Washington College of Law of the American University. He is also the sole American judge on the Organization of American States' Inter-American Court of Human Rights, as well as the president of the recently established Inter-American Institute of Human Rights, in San Jose, Costa Rica. I might also add that during World War II, as a small child, Tom Buergenthal was one of the unfortunate inmates of the infamous concentration camp at Auschwitz. Both by personal experience and professional training he is uniquely qualified to address the human rights issue.

Judge Buergenthal's message should be heard by liberals as well as conservatives, by Democrats as well as Republicans. He deplores both the Carter administration's righteous rhetoric on human rights and the Reagan administration's misconception of a strong human rights policy as one which has purely moral but very little if any political significance. He also sees the Soviet Union and what it stands for as the most serious threat to U.S. national interest, a threat which is not only military and subversive, but ideological. Buergenthal makes clear his own support for a strong human rights policy on moral grounds. But his main point is that such a policy is also in our own national interest, in terms of sheer Realpolitik, regardless of any moral considerations whatever. By respecting and promoting human rights for people everywhere, including the second and third worlds, we make it clear in what we do and say that we identify with their aspirations. Human rights can be a mighty weapon in our worldwide political and ideological confrontation with the Soviet Union. None will be more pleased than Moscow's rulers if we fail to use that weapon effectively and consistently. I fervently hope that the leaders of our Government will take these wise words to heart.

HUMAN RIGHTS AND THE U.S. NATIONAL INTEREST

(By Thomas Buergenthal)

Ladies and gentlemen, few other U.S. foreign policy initiatives have been as misunderstood and as poorly articulated as has our human rights policy. The level of debate on this subject has been and continues to be sophomoric, and that is true of the arguments of its proponents and its opponents. Part of the blame rests with President Carter and the fact that he promoted the policy with the righteous rhetoric of a fundamentalist sermon so that much of the

discussion of the subject took on a moralistic tone. And the few efforts that were made by the Carter Administration to justify the policy to the public in terms of our national interest did not get much of a hearing.

The current Administration falls into a similar trap. Its spokesmen criticize and reject a strong human rights policy because they see it as having purely moral but very little, if any, political significance. They view it as a propaganda tool to be used against the Soviets, but not to criticize our allies. They argue that totalitarianism of the left is worse than the repression of the right practiced by some of our allies. They contend that the U.S. faces a formidable adversary in Soviet expansionism and cannot afford the luxury of being the moral policeman of the world, imposing its own values on the rest of the world; that the U.S. needs allies and cannot afford to alienate friendly anti-Communist governments even if they are repressive. In short, they contend that what we need is to balance our commitment to human rights against foreign policy assets.

I agree that the Soviet Union and what it stands for presents the most serious threat to the U.S. national interest. But the threat is not only military or subversive, it is also ideological and it must therefore be confronted on the ideological level as well. In today's world, ideology is as much a weapon as is sophisticated weaponry. A sound human rights policy provides the U.S. with an ideology that distinguishes us most clearly from the Soviet Union and seriously undercuts the ideological appeal of Communism. It is the only ideology, the only dream, if you will, that the people of the U.S. share with the vast majority of the people of the second and third worlds. The quest for human rights and human dignity is a phenomenon of contemporary life of universal dimensions and immense significance in the struggle between East and West. And those who do not grasp its significance do not know much about the world we live in and the forces that shape it.

All over the world human beings are dying, human beings are being tortured, human beings disappear, are being imprisoned, and are held in insane asylums—all because they believe in the human rights and freedoms the American people take for granted. To suggest that we are imposing our values on others by promoting human rights in other countries, be it against totalitarianism or oppressive regimes, is to reveal one's arrogance and ignorance. If we do not grasp the political and emotional significance of the human rights movement, we shall forefeit the only real competitive advantage we have in the struggle to contain Soviet expansionism and counteract its influence in the developing world.

The human rights policy which the U.S. followed in the past six years—it all started with Congressional action in 1973-4, with President Ford's strong support of the human rights provisions of the Helsinki Final Act, and President Carter's enthusiastic espousal and promotion of human rights—has had a significant impact. In Latin America, for example, it contributed to the establishment of democratic regimes in Peru, Equador and, for all too short a period in Bolivia. It ushered in a liberalization process in a number of other countries in the hemisphere; it led to the entry into force of the American Convention on Human Rights and the establishment of the Inter-American Court of Human Rights. And, most importantly, the U.S. began to lose the image it has had in the hemisphere as a government which allies itself with and supports oppression in Latin America. The U.S. began to be seen as a country willing to identify itself with the aspirations of the people of the region. This realization opened up democratic alternatives in the hemisphere—one no longer had to choose only between Communism on the one hand and rightist oppression on the other.

Please do not misunderstand my emphasis on the political benefits to the U.S. of a strong human rights policy. I believe in human rights because I believe it is criminal and immoral to deny human beings their basic rights and to violate them with impunity. It doesn't much matter, however, whether U.S. policymakers share my convictions. If they believe that morality has no place in foreign policy, so be it. Let them, therefore, assess the foreign policy benefits of a strong human rights policy in purely Realpolitik terms before they scrap it.

I have already spoken of the comparative advantage we have in this sphere over the Soviets. If the U.S. wants to exploit this advantage, it has to have an ideologically neutral human rights policy. By this I mean that it has to express its opposition to violations of human rights with equal fervor, whether or not the violations are committed by the left or the right. The policy to be effective has to be credible and it can only be credible if it is ideologically neutral. People all around the world have to see that the U.S. stands for human rights—not only for human rights in the Soviet Union, but also in Central America, in South America, in Africa, and in Asia. If instead we close our eyes to violations by our friends and criticize only our adversaries, we will have reduced the policy to a mere propaganda tool—and the world will know it for the hypocrisy it is. And it will not be a foreign policy asset.

All this is not to say that there are no other foreign policy interests that the U.S. must take into account. Human rights should not and cannot be the only issue decisionmakers have to take into consideration in shaping foreign policy. It needs to be treated as an important foreign policy concern, however, and to dismiss it as moral claptrap is to do serious harm to the U.S. national interest.

A word about intervention which always pops up in discussions about human rights. There is the argument, for example, that it is a violation of international law for one country to compile reports on the state of human rights in another country and to publish these reports. It is also contended that it is illegal intervention for one country to complain publicly that another country is violating human rights. That is nonsense, ladies and gentlemen, both under general international law and under our own hemispheric international law. I don't know of any international lawyer of stature who would seriously espouse that thesis today.

As a political matter, moreover, it is an much intervention for the U.S. today to identify itself with a government that engages in serious violations of human rights as it is to disassociate itself from that government and to take a public stand against those practices. The political reality is that a superpower simply cannot avoid intervention by association; we have to face up to this fact. Given this reality, the only serious issue is whether we are perceived as intervening by identifying ourselves with a repressive regime or by expressing our opposition to repression. I believe it is not in the U.S. national interest to support or be identified with repressive regimes whether of the left or the right.

Those opposing an effective U.S. human rights policy argue that it contributes to the demise of governments friendly to the U.S. In my opinion, this is a simplistic view of the impact of the policy. It is rarely ever a question of the demise or survival of a regime. If a government friendly to the U.S. engages in repressive practices, U.S. policy, if properly managed and articulated, can move the government, over time, either towards more repression or towards less repression. The best example of this phenomenon occurred since the new Administration took over. It was perceived, rightly or wrongly, as opposing human rights, and immediately some governments in the hemisphere began to crack down on human rights activists, not because they had suddenly become a threat to the regime, but because the time was ripe. Most of the once friendly governments lost to the U.S. side were lost because of their long history of repression and our identification with those regimes; they were not lost because of our human rights policy.

Of course, I do not believe that the U.S. should "destabilize" governments, but I believe that it can and should make its influence felt. As a matter of fact, as a superpower, particularly in this hemisphere, it cannot avoid making its influence felt, and the only issue is whether it will opt for a policy that is in the U.S. national interest or detrimental to it.

To conclude, ladies and gentlemen, what worries me most about our current policy direction is that the Administration appears to have decided upon a serious foreign policy change without having thoroughly examined the question whether in fact the U.S. national interest is advanced or harmed by a strong human rights policy. What we have heard thus far on the subject are slogans. What is lacking is substantial evidence and analysis.

I, for one, believe that it would be a serious political blunder for the U.S. to abandon a policy that identifies us with the aspirations of the people of our hemisphere and the world. Given our own political system and traditions, a credible U.S. human rights policy can enjoy the support of the American people, do some good in the world, and advance our national interest. That is why I believe that it needs to be preserved.●

NATIONAL FLOOD INSURANCE TESTIMONY

HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. GOLDWATER. Mr. Speaker, yesterday, I testified on the national flood insurance program before the Subcommittee on Housing and Urban Development. Many of my constituents were victims of water-initiated landslides which are not covered by the program. I therefore promptly introduced legislation to correct this discrepancy, and am working hard for its passage.

I insert the full text of my testimony:

Mr. Chairman, thank you for this opportunity to appear before the Subcommittee on Housing and Urban Development to testify on the national flood insurance program.

As you are aware, the national flood insurance program is a Federal program enabling home and business owners to buy flood insurance at a reasonable cost. In return, communities carry out local flood plain management measures to protect lives and new construction from future flooding. Over 17,000 of the 20,000 potentially eligible communities are now participating. There are over 2 million policies currently outstanding, and almost $94 billion is insured. A vital Federal program, national flood insurance paid over $274 million in homeowner and business loss as the result of over 43,000 claims nationwide. However, almost one-sixth of those claims were not paid for various reasons. One of those reasons is that the national flood insurance program does not cover flood-initiated landslide damage, despite the fact that flood-induced landslides are one of the most devastating consequences of flood disasters. Did you know that landslides annually cause more measurable damage in more States than any other natural hazard except expansive soil, riverine flood and tornado? And it is estimated that landslide damage to buildings will soar over 130 percent between 1970 and the year 2000. Loss of life from landslides in the United States alone averages between 100 and 150 persons annually.

Because of rain in recent years, many States have suffered severe flood damage. The rain in several areas initiated large earth movements which destroyed both homes and property. Many homeowners, who purchased a national flood insurance policy, believed they were adequately protected against flood and flood-related disasters. Now however, after the flooding, holders of national flood insurance, many of whom were required to purchase the insurance, are putting in claims for the first time. And they are discovering it is pretty much worthless. The way the legislation was written, the policies do not cover any landslide that is caused by flooding or a great accumulation of water as a result of extensive rains. In southern California, for example, of the 1,230 claims filed with the national flood insurance program in 1980, about one-fourth of all claims were denied coverage because the victims suffered water-induced landslide damage. The program apparently exempts landslide from coverage, and will only pay for mudslide, or mudflow in agency interpretations. The difference between the two is a highly technical distinction made by a geologist, and very often geologists will disagree.

Although the National Flood Insurance Act of 1968 originally did not contain language on mudflows and mudslides, the Housing and Urban Development Act was extensively amended the following year. These revisions are contained in the Housing and Urban Development Act of 1969. Section 409(f) contains the language:

"It is therefore the further purpose of this title to make available . . . . protection against damage and loss resulting from mudslides that are caused by accumulations of water on or under the ground."

It seems very clear that the intent of the national flood insurance program is to protect local homeowners against floods and flood-related disasters. It should therefore make no difference whether an earth movement, caused by flooding, is termed a "landslide," a "mudslide," or a "mudflow"; the national flood insurance purchaser should be protected.

As you can see from the chart, landslide damage affects all States in the Union; predominately, Texas, New York, Ohio, Pennsylvania, Maryland, California, and Illinois. Much of this landslide damage is caused by flooding, but such coverage is unavailable under the national flood insurance program. In fact, landslide coverage is not offered by domestic insurance carriers either. And landslide victims generally don't qualify for Federal or State aid, unless a major disaster is declared.

At this time, I'd like the subcommittee to see pictures of water-induced landslide damage. These pictures, taken by the homeowners themselves, not only show the damage to their homes, but the severe damage to their property as well.

National flood insurance claims often develop into hair-splitting confrontations that are beyond common understanding. As one of my constituents wrote to me, "How can the average person know precisely the difference between mudslide and landslide, what the hazard is in relation to the policy, and whether to buy or rely upon the insurance?"

Local areas have done their part in implementing effective programs to reduce landslide destruction. For example, prior to 1952, control on hillside grading and development in Los Angeles was limited. In 1952, following severe winter storms, an improved grading code was adopted. The grading regulations were revised in 1962 to provide an even more restrictive code, and to specify responsibility for geologic and engineering participation in design, construction, final inspection, and certification of a grading project. The procedures and controls received a stern test with the winter storms of 1968–69. After the extensive flooding and landsliding, the Los Angeles Department of Building and Safety examined the damage to various sites. It was found that the damage to sites developed before 1952 was nearly 50 times greater than to those developed after 1962.

I have introduced legislation, H.R. 1531, which would amend the National Flood Insurance Act of 1968 to provide insurance coverage for damage caused by flood-related landslides. I ask that the subcommittee give all due consideration to this important piece of legislation. Thank you.●

WHITEY ULRICH—1981 HISTADRUT AWARD HONOREE

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. PATTERSON. Mr. Speaker, it is with great pleasure that I ask my colleagues to join with me in recognizing Mr. Whitey Ulrich, the Orange County Trade Union Council's 1981 Histadrut Award honoree.

Histadrut is an award presented each year to outstanding men and women of the labor community who exemplify a spirit of brotherhood and friendship toward the nation of Israel. Funds raised through Histadrut are people-to-people funds and are targeted directly to specific health, education, social, and cultural exchange programs.

It is fitting that this year's Histadrut Award should be presented to Whitey Ulrich for his career of service to his fellow man truly reflects what Histadrut is all about.

Whitey is perhaps best known to those involved in the labor movement as president and chief executive officer of U.F.C.W. Meat Cutter's Local 551, or as vice president of the Orange County Central Labor Council. In addition to these professional activities, however, Whitey is also actively involved in his community. He is a member of the Orange County United Way board, vice president of the Fountain Valley Gridiron Boosters Club, and ruling elder at the Wilshire Presbyterian Church.

Mr. Speaker it is an honor to ask my colleagues to join with me in congratulating "Whitey" Ulrich—an outstanding man of labor and a respected member of his community—as the 1981 Histadrut Award honoree.●

A MASSACRE AT THE RIO LEMPA

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. WEAVER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 7, 1981.

SPEAKER OF THE HOUSE,
House of Representatives.

DEAR MR. SPEAKER: The Reagan Administration is charting an ominous course in its policy toward El Salvador. The alarming accounts of saturation bombings, body counts, armed guerrillas, and an escalating American committment involving troops, tanks, helicopters, and other weaponry is only too frighteningly familiar.

U.S. involvement in El Salvador has not proven to be a moderating force within that country. In fact, as the enclosed article so graphically illustrates, we are supporting a junta which is all too successful in driving growing thousands of old men, women, and children out from their homes and into teeming refugee camps. The article, which I am submitting for enclosure in the RECORD, is written by Alex W. Drehsler and appeared on the front page of the Portland (Oregon) Oregonian on March 26. The massacre it describes and the many tragedies that are its consequence should provoke Americans to question: Did we not learn our lesson in Vietnam?

Sincerely,

JIM WEAVER,
Member of Congress.

[From the Portland Oregonian, Mar. 26, 1981]

Eight days ago, San Diego Union reporter Alex Drehsler, in Central America on special assignment for ABC-TV's "Nightline," visited the Honduran town of Santa Rosa de Cepan, where he spent the evening with a

Honduran activist priest, 56-year-old Fausto Milla.

While Drehsler was with Milla at his home last Wednesday evening, March 18, a source called the priest to inform him that many Salvadoran refugees had been killed by Salvadoran and Honduran troops near the Honduran border town of La Birtud.

Drehsler and the others then walked for an hour to a village near the border, Los Hernandez. It was there that they saw the aftermath of the alleged events of the day before.

For the next 24 hours, Drehsler interviewed persons involved in the event—62 in all. Among the thousands of persons he found in the area were guerrillas, refugees, victims of the attack, relatives of individuals lost in the confusion of events, medics and doctors from an international relief organization, Doctors Without Borders.

Drehsler's story is a compilation of these interviews and of his on-the-scene observations.

SALVADORANS TELL HORROR OF RIVER ATTACK

(By Alex Drehsler)

LOS HERNANDEZ, HONDURAS.—At least 50 persons—primarily women and children—were killed as Salvadoran refugees fleeing government troops were caught in a cross fire between Salvadoran and Honduran soldiers, according to witnesses of the attack.

It was reported that up to 8,000 refugees poured through a guerrilla-created gap in a Salvadoran army encirclement in Cabamas province in an attempt to escape the violence of the on-going war between government soldiers and leftish insurgents.

However, survivors said, when they reached the Rio Lempa, which forms the border between El Salvador and Honduras here, they were met by machine-gun and mortar fire from Salvadoran forces and, on the other side of the river, gunfire from Honduran soldiers.

Spokesmen for the Salvadoran and Honduran armies denied the reported attack occurred. The U.S. Embassy in San Salvador said it would investigate the alleged incident.

It was the second reported incident of mass killings along the Honduran-Salvadoran border in less than a year. Last May 14, opponents of the Salvadoran government say, some 800 fleeing refugees were slaughtered at the Rio Sumpul, a few miles from here.

The events that led up to what refugees call "the massacre at Rio Lempa" began Sunday, March 15.

That day, guerrilla sources said, Salvadoran army and air force units attacked insurgent-held territory in the northern province of Cabamas, along the Honduran border, as part of a continuing government offensive against the country's rebels.

As approximately 1,500 soldiers began their attacks on nine guerilla-controlled towns, Honduran soldiers, according to refugee and relief organization sources, took up positions along their side of the river. Beginning at 6 a.m., according to refugee sources, the first of scores of mortar shells were fired into the insurgent towns. Twice that day, they said, the Salvadoran air force dropped payloads of large bombs, possibly 150- and 300-pound versions, on the towns.

On Monday, March 16, the bombing intensified. The army continued advancing from its base, the town of Victoria, and managed to reach the outskirts of Santa Marta and other towns, where, according to guerrilla sources, the soldiers ran into stiff resistance.

On Tuesday, March 17, according to refugee accounts, Salvadoran army troops and members of ORDEN, a government-sponsored paramilitary organization, began burning the cornfields and houses near the besieged towns in an attempt to smoke out the insurgents.

Marxist-Leninist guerrilla commanders in the area held a meeting Tuesday evening to decide what to do about the worsening situation. Their evaluation was that they and the approximately 10,000 civilians in the province, mostly peasants, were surrounded. According to guerrilla sources, it was decided by the insurgent leaders to abandon the province, but not before evacuating the civilians to neighboring Honduras.

To do this, the guerrillas had to break through the government lines. According to rebel sources, a courier was sent to Chupamiel, a guerrilla stronghold on top of a mountain about four miles away in neighboring Chalatenango province.

The guerrilla commander of Chupamiel, a 23-year-old peasant named Fernando, reportedly sent a contingent of approximately 20 men and women into Cabanas to break the government circle. The guerrillas of Chupamiel later related that, armed with Belgian made assault rifles and U.S. made M-16's, they broke through the government lines and opened up a narrow corridor through which the civilians were evacuated.

Led by guerrillas, approximately 8,000 peasants began the 10-kilometer exodus to the border early Wednesday, March 18.

The refugees, primarily old men, women and children, reached the Rio Lempa along with the guerrilla contingent at 6 a.m.

Refugees and international relief officials painted this picture of subsequent events:

As the peasants crossed the river, a Salvadoran air force reconnaisance plane was seen in the sky. Minutes later, a helicopter gunship and two jet fighters appeared.

A helicopter attacked the refugees and guerrillas with what appeared to be a mounted 50-caliber machine gun.

Eleven children and four adults drowned in the river in their desperation to cross to safety.

Twenty-five children were separated from their families and got lost in the hills on the Salvadoran side of the border.

Two little girls were machine-gunned to death on the Salvadoran banks of the river.

A middle-aged woman who managed to cross over to Honduras got only 20 feet from the river before she was killed.

As those fleeing the Salvadoran troops began to climb up the hill on the Honduran side, Honduran soldiers opened fire on them. Doctors Without Border relief agency representatives said four persons were killed.

The refugees said that they were attacked all day Wednesday. they related that they were bombed, mortar-shelled and machine-gunned most of the day, but most still continued to attempt to cross the river.

By the time the flood of people subsided Thursday morning, March 19, a count by this reporter showed that at least 8,000 Salvadorans had been packed into a huge cattle corral in the Honduran village of Los Hernandez.

According to refugees and medics, at least 50 persons—mostly women and children—were killed in the melee. According to lists made by priests at the scene, many persons still are missing and feared drowned or dead in the jungle.

In the Salvadoran capital of San Salvador, Col. Alfonso Cotto, spokesman for the Salvadoran army, dismissed the reported mass killings as "completely untrue, completely removed from reality."

Cotto said that topographic conditions around the Rio Lempa—a river he described as the biggest in the nation—"do not permit" the kind of all-out military action described by refugees.

In fact, Cotto said, the only time soldiers have been active in the area of the alleged killings was in skirmishes with subversive forces, not in major battles.

The reported massacre, he said, "is part of an international, orchestrated campaign to disfigure the image of the Salvadoran armed forces and our nation."

Cotto said the campaign also involved the alleged incident last May at the Rio Sumpal, in which foes of the Salvadoran government claim that 600 fleeing refugees lost their lives.

"We were even accused of throwing children into the air at the Rio Sumpul and using their bodies for target practice," he said. "That is just as false as the Rio Lempa 'massacre'."

Howard Lane, a spokeman for the U.S. Embassy in the Salvadoran capital, said Tuesday that the Salvadoran press had carried nothing on an incident at the Rio Lempa, and that a call by the newspaper was the first time he had heard of it.

But several hours later, Lane said the embassy planned to dispatch an investigator to the Rio Lempa.

However, Lane cautioned, reports of other alleged massacres "have been made out of whole cloth."

"It is a well-known fact that these villages in the north are guerrilla strongholds," he added. "It is awfully hard to separate people with guns from people without guns."

While Lane stressed he did not know what happened at the Rio Lempa, he suggested that guerrillas could have been mixed in with escaping citizens. "The stories of massacres depend on your point of view in telling them," he said.

In the Honduran capital of Tegucigalpa, Maj. Julio Pavon, spokesman for the Honduran army, issued a "categorical denial" of the reported participation by his nation's troops in an incident at the Rio Lempa.

"It is inconceivable that my nation's army would perpetrate such an action," he said.

Pavon added that Honduras has enough problems at home without getting involved in the problems of other nations.

However, Honduran radio stations broadcast accounts of the alleged incident early this week, and the first published report appeared Tuesday on page 30 of a local newspaper, said Chris Arco, spokesman for the U.S. Embassy in the capital city of Tegucigalpa.

Arco said none of the accounts mentioned a death toll.

In Washington, Joe Reap, a State Department spokesman, said he had no knowledge of the alleged incident.

After the alleged attack at the Rio Lempa, survivors reported that Honduran peasants took in as many of the refugees as they could. The Salvadorans had not eaten in four days. Dozens more were wounded, according to relief agency doctor and medic accounts. Some of the children were ill with pneumonia and bronchitis after having been without food or shelter for four days.

Physicians from the Doctors Without Borders organization turned an adobe house into a makeshift clinic.

Working with virtually no supplies, the doctors began attending to the most serious-

ly ill and wounded. Some were beyond help, however. A 3-year old girl and a 5-year old girl died of pneumonia.

An American priest, the Rev. Earl Gallagher, of Brooklyn, N.Y., who has been based in Honduras since 1970, drove to the border with several Honduran priests from the Honduran interior last Wednesday as soon as they heard reports of the events transpiring on the river.

Gallagher, 36, is a member of the Capuchins, a missionary branch of the Franciscans. He said he spent most of the day carrying children across the river, while ducking bombs, mortar shells and bullets.

Last Wednesday evening, survivors of the alleged attack said Honduran soldiers arrested 21 Salvadoran refugees, all men. One of them was turned over to the Salvadoran National Guard, 12 were taken to the nearby Honduran town of La Birtad and the remaining eight had disappeared, according to relatives of those allegedly arrested.

Last Thursday, at the site of the river crossing, thousands of articles of clothing littered both banks, the corpse of a middle-aged woman was lying on the Honduras side. Across the river, on the Salvadoran side, the corpses of the two little girls still were visible.

A tall, skinny man, looking for his son, stripped down to his underwear, walked to the edge of the water, cupped his hand to his mouth and yelled, "Salvador, my son, it's your father. I'm here to help you cross. Come out, my son. Come to papa."

There was no reply from the Salvadoran side. As the man walked away from the river, he said to no one in particular, "He's dead."●

ENERGY AND INFLATION

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HARKIN. Mr. Speaker, the Reagan administration is ignoring the most urgent task we face if we are to have a chance of halting inflation: We must stop the rising cost of energy.

The President is fond of blaming rising Federal deficits for inflation. He has given two major speeches on the economy as President and in both he laid the blame solely at the deficits' door.

But consider this: During the past 4 years (1977-81), Federal deficits rose by $18 billion over the preceding 4 years (1973-77). During that same time, the cost of fossil fuel imports jumped by $130 billion—seven times as fast.

Of course, Federal spending and Federal deficits have helped feed inflation—most economists, however, agree its role as small—and we must trim them. But it is equally clear that the real problem—the major problem—is not deficits. It is the cost of energy.

We must solve our energy problems, end our dependence on the OPEC price gougers, develop new, cheaper sources of energy, and become energy self-sufficient.

Instead of grappling with those problems, the President wants to send us in a head-long gallop in exactly the opposite direction. For example, he wants to end the Energy Extension Service, an important program which helps Americans learn the facts about how they can conserve energy. He wants to end our alcohol fuels program. He wants to cut drastically our efforts in solar, wind, and geothermal energy development.

But he wants to increase our reliance on oil and nuclear energy—the two most expensive power sources we have, regardless of whether we buy it at home or abroad.

That is why Congress will be asking questions, despite the fact that the Reagan administration seems to be trying to stampede Congress into buying its legislative package, in total, with no questions asked.

Mr. Speaker, either the Reagan administration does not understand our energy situation or it is deliberately misrepresenting the facts. Either case will have disastrous effects on our economy and on the American people. That makes it all the more incumbent upon the Congress to scrutinize Mr. Reagan's proposals carefully and play the major role in developing a national energy policy.●

OCTOBER 16, 1981—WORLD FOOD DAY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. SIMON. Mr. Speaker, today, I am introducing with my colleague, BENJAMIN GILMAN, a joint resolution calling on the President to proclaim October 16, 1981, as World Food Day. This proclamation would be consistent with the action taken by the United Nations and would support a recommendation from the President's Commission on World Hunger calling for greater public education on how we nationally, and within the international community, begin to come to grips with increasing food shortages. Although we have made real progress in this country in reducing malnutrition, hunger, and life problems resulting from these conditions. But as the world food situation becomes more serious, we here at home must begin developing new strategies to deal with food shortages here and abroad. Designation of a "World Food Day," and participation by many Americans in the variety of activities that will be planned in many communities, puts us on the road toward coming to grips with this problem in a realistic and compassionate way. I urge my colleagues to join us in sponsoring this resolution:

H.J. Res. —

Joint resolution to authorize and request the President to issue a proclamation designating October 16, 1981, as "World Food Day"

Whereas hunger and chronic malnutrition remain daily facts of life for hundreds of millions of people throughout the world;

Whereas children are the ones suffering the most serious effects of hunger and malnutrition, with millions of children dying each year from hunger-related illness and disease, and many others suffering permanent physical or mental impairment, including blindness, because of vitamin and protein deficiencies;

Whereas, although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups, notably among native Americans, migrant workers, and the elderly, remain vulnerable to malnutrition and related diseases;

Whereas the United States, as the world's largest producer and trader of food, has a key role to play in efforts to assist nations and peoples to improve their ability to feed themselves;

Whereas a major global food supply crisis appears likely to occur within the next twenty years unless the level of world food production is significantly increased, and the means for the distribution of food and of the resources required for its production are improved;

Whereas the world hunger problem is critical to the security of the United States and the international community;

Whereas a key recommendation of the Presidential Commission on World Hunger was that efforts be undertaken to increase public awareness of the world hunger problem; and

Whereas the 147 member nations of the Food and Agriculture Organization of the United Nations designated October 16, 1981, as "World Food Day" because of the need to alert the public to the increasingly dangerous world food situation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating October 16, 1981, as "World Food Day", and calling upon the people of the United States to observe such day with appropriate activities.●

RABBI AND MRS. FRANK STERN, A CARING AND SHARING COUPLE

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. PATTERSON. Mr. Speaker, I am most pleased to bring to the attention of my colleagues here in the House of Representatives the outstanding achievements of Rabbi Frank Stern and Muriel "Cookie" Stern, and to take this opportunity to commend them both for their many years of dedicated service within the Jewish community. On Saturday, May 16, the congregation of Temple Beth Sholom, the oldest synagogue in Orange

County, Calif., will host a special recognition dinner honoring the Sterns for their 10 years of outstanding leadership.

Rabbi Stern's active concern and genuine devotion extends from his native California to Ohio, Virginia, Europe, and Israel. He taught, lectured, inspired, and guided students and congregations around the world. And all who have been fortunate enough to hear him speak have come to appreciate his mastery of Hebrew literature and the wisdom of his message.

Rabbi Stern's leadership and organizational talents have been clearly demonstrated, from his association with the Hebrew Union College as one of its founding students, to his formation of Temple Sholom's first Chador youth leadership program.

Always accepting the challenge to help Jewish congregations, Rabbi Stern's service includes membership in the Central Conference of American Rabbis, the Pacific Association of Reform Rabbis, and the Rabbinic Advisory Committee of the United Jewish Appeal national organization. Currently, he is on the executive committee of the Jewish Federation of Orange County. Previously, he was a director of the Jewish Family Service of Orange County, vice president of the United Way of Orange County North/South, and served an unprecedented four terms as president of the Orange County Board of Rabbis.

Muriel "Cookie" Stern renders an equally productive and vital service to the community in the multitude of religious activities that this couple share together. "Cookie" possesses the same intensity and interest, as well as serving as a spiritual confident in all that she does for the community. Her concern for education and the handicapped and disabled developed while teaching at the Hebrew Union College, where she met and married Rabbi Stern, also a teacher. Most recently, she received a special award from the Orange Unified School District for her dedication to helping people in the religion schools. She is a member of the Women's American Organization for Rehabilitation Through Training, Hadassah, and the Temple Sisterhood. And she also has served as vice president of the women's division of the Jewish Federation, and presently is chairing the federation's education program.

Temple Beth Sholom is indeed fortunate to have these two talented teachers and concerned community leaders, Rabbi and Mrs. Stern, among the congregation's membership. I now ask my colleagues to share with me in honoring these two very special individuals for their combined dedication and devotion to their community.●

GRAVE RESERVATION OVER THE NOMINATION OF JOHN B. CROWELL, JR.

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. WEAVER. Mr. Speaker, two separate articles published in the Eugene Register-Guard on Friday, April 3, 1981, both expressing grave reservation over the nomination of John B. Crowell, Jr., as Assistant Secretary of Agriculture for Natural Resource Agencies. I submit the articles to be printed in the RECORD:

[From the Eugene (Oreg.) Register-Guard, Apr. 3, 1981]

CROWELL'S BIASES DISQUALIFY HIM

The Senate should reject John B. Crowell Jr.'s nomination to become assistant secretary of agriculture in charge of that department's natural resource agencies.

That is not a job for a person with an almost overwhelming potential built-in conflict of interest and preconceived notions that federal resource management policies developed through experience and extended debate are suddenly all wrong.

President Reagan's nominee is the former general counsel for Louisiana-Pacific Corp., the nation's largest purchaser of federal timber. Moreover, he has openly declared that he favors substantial reduction of proposed wilderness areas within the national forests—as well as tripling the amount of timber being taken from those forests.

The Carter administration—acting on the basis of a seven-year U.S. Forest Service "roadless area review and evaluation" (RARE II)—recommended that 15 million acres of national forest lands be designated by Congress as wilderness, 11 million be given further study and 36 million be managed for multiple uses ranging from recreation to timber production.

Congressional action involving 6 to 7 million acres proposed for wilderness has yet to be completed, and nearly 6 million acres are still being studied. The largest of the RARE II "left-overs" are in Oregon, California, Washington, Idaho, Montana and Utah.

Crowell told the Senate Agriculture Committee this week: "I am as concerned as anyone that future generations of Americans have available to them the same bountiful abundance generated from our forests, farms, soils and water that we enjoy."

But he added that he would not "sit idly by while others advocate and pursue policies which will result in our own generation's having to forego the bounty of our forests."

According to Gannett News Service reporter Norm Brewer, Forest Service personnel have already begun identifying commercially valuable expanses of national forests recommended for wilderness designation by the Carter administration—apparently anticipating a change in marching orders under the Reagan administration.

If confirmed, Crowell would of course be bound to follow general policies established by Congress. However, he would be the man directly in charge of the Forest Service. A Wilderness Society spokesman has understandably likened that prospect to having "a very hungry fox . . . guard our national forest chicken house."

Crowell's mind-sets are disquieting. He has exhibited enthusiasm for stepping up national forest timber harvests far beyond President Reagan's budget recommendation to hold the cut steady at 11.9 billion board feet. The potential for increasing the yield, he told Brewer last week, "is really mind-boggling."

Moreover, Crowell would be working in tandem with Interior Secretary James Watt, who champions more "aggressive" exploration for minerals in wilderness areas—and increased utilization of timber on public lands under his control, including, presumably, extensive O&C timber stands in Western Oregon.

Oregon's Sen. Mark Hatfield has advocated designation of 1.8 million acres of national forest lands in this state as wilderness, half again as much as the Carter administration recommended. Both he and his sometimes more environmentally oriented Senate colleague from Oregon, Bob Packwood, have worked diligently to ensure the long-term stability of this state's economy through sound management of the national forests that are its greatest natural resource.

Crowell, despite 20-plus years as an Oregon resident, obviously does not share the senators' established views that an unsustainable spate of federal timber cutting could undermine this state's economic future and that preservation of carefully selected wilderness areas could be more beneficial in the long run than promiscuously opening them to commercial exploitation.

Accordingly, it is indeed strange to read in Steve Forrester's column from Washington (below) that Hatfield appears to favor Crowell's assumption of executive authority which he would use to oppose, and possibly to obstruct, basic legislative decisions regarding the national forests.

As Oregon's voices in the Senate, and as Republicans of stature there, Hatfield and Packwood should work to prevent Crowell's nomination—and, if they succeed in that, to guide the President to a better nominee.

AGRICULTURE POST NOMINEE'S OBJECTIVITY QUESTIONED

(By Steve Forrester)

WASHINGTON.—If ever there was a sub-Cabinet nominee whose reputation preceded him to Capitol Hill, it is Portland lumberman John Crowell.

Crowell appeared before the Senate Agriculture Committee this week to be confirmed as President Reagan's assistant secretary of agriculture for natural resources and environment.

Because of his prior association with the Louisiana Pacific Corp., his involvement in lawsuits challenging the small business set-aside provisions of federal timber sales and his skepticism about the current level of timber harvest on the national forest, Crowell has been painted by the environmentalists as a "timber beast."

Crowell obliged the environmentalists during his confirmation hearing by suggesting that timber harvests from the national forests could be increased from the current level of about 11 billion board feet annually to 35 billion board feet annually. He also reiterated his belief that old growth timber in the Northwest should be harvested more rapidly.

The Agriculture Committee is expected to recommend Crowell's confirmation. But environmentalist organizations have been lobbying hard against it, so there will likely be some opposition when the nomination reaches the Senate floor.

The only surprise in Crowell's hearing was his ignorance of the recent Japanese request that the U.S. and Canada reduce their exports to that country by 50 percent—a story the Wall Street Journal and other newspapers reported in late February. "You haven't heard that the Japanese want us to reduce lumber exports by 50 percent?" asked Sen. Alan Dixon, D-Ill.

"No." replied Crowell.

Sen. Walter Huddleston, D-Ky., ranking Democrat on the committee, asked Crowell what he would do about issues on which he might be compromised by prior business association. "I have given my word that I will excuse myself from and have no role in decisions or making policy that is new or different from existing small business set-aside provisions of timber sales," Crowell said.

Sierra Club spokesman Brock Evans took issue with Crowell's pledge to stay away from affairs that would affect his former employer. "This nominee's background is not so broad. It reflects a very specialized, although valuable, interest," Evans said.

"We are pleased to have learned of Mr. Crowell's recusal statement, in which he has pledged to recuse himself from those affairs of his previous employers and from the small business set-aside program," Evans continued. "While we welcome the statement, we are not sure which programs within the Forest Service will be affected by that recusal statement. There is very little within the realm of forest management and timber utilization which does not affect Louisiana-Pacific to a greater extent than any other corporation."

Three environmentalist organizations showed up to oppose Crowell's nomination: the Sierra Club, the Wilderness Society and the Natural Resources Defense Council. The National Wildlife Federation urged the committee to be sure Crowell had divorced himself from prior business dealings, but did not oppose his confirmation.

In their attacks on Crowell, environmentalists suggested that the Portland lawyer would seek to revise regulations promulgated last year under the National Forest Management Act. Those regulations pertain to all manner of forest policies, including a limit on the size of clear-cuts, which Crowell believes to be too small.

When Sen. Richard Lugar, R-Ind., asked, "Why is there this intensity of opposition to your appointment?" Crowell said that it was because of his skepticism regarding wilderness and his willingness to depart from the even-flow doctrine regarding old growth forests.

But Crowell added that he could develop and maintain communication with those groups which opposed him. "I would hope that as a result of hearing my views in more detail in this hearing today and as we have an opportunity to communicate with the groups who oppose me today, those groups will feel more comfortable about my job performance than they do today," he said.

Introducing Crowell to the committee, Sen. Mark Hatfield, R-Oreg., said the nominee would "strike a happy balance at the heart of Gifford Pinchot forestry." Pinchot was first chief of the Forest Service.

Making reference to Hatfield's prediction, Peter Kirby of the Wilderness Society told the committee that Crowell "does not strike a balance. On the contrary, it is an unhappy, strident, pro-timber philosophy that has characterized his entire career."

"Whose interest is being served and will be served?" asked Kirby. "We have a great fear that the objectivity and the professionalism of the Forest Service will be put in jeopardy by his (Crowell's) prior association."

Tom Barlow of the Natural Resources Defense Council said that Crowell "has tried to keep the National Forest Management regulations as weak as possible."

Describing his transition from legal counsel to Louisiana Pacific to assistant secretary of agriculture, Crowell drew a parallel with a lawyer who becomes a judge: "The position to which I have been named will require a similar adaptation on my part, but obviously it is a change that is not only possible, but natural, for a lawyer. I can do no more to assuage the concerns of those who are worried about my open-mindedness other than to say that representatives for their viewpoints will always be able to receive a fair hearing from me."

But judges don't have deeply interested constituencies as Crowell will in his role as chief U.S. timber policy maker. He will also be the focus of soil conservation issues.

Crowell said all the right things about divorcing himself from prior associations. But, if confirmed, he will be watched as few sub-Cabinet officers have been watched in recent years.●

A POEM BY NINA MAE FORDE

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. FRANK. Mr. Speaker, the Honorable Foster Furcolo, a former Member of this House and a distinguished former Governor of the Commonwealth, recently brought to my attention a poem by Nina Mae Forde, a constituent of mine.

The poem expresses the essence of our people's diversity of background which has in it the common thread of support for the goal of freedom, a keystone of our country's existence.

At this point in the RECORD, I insert a poem by Nina Mae Forde and commend it to the attention of my colleagues:

To America they came!
And to America they come!
The people from other lands
Where they all were born!
Some of different color,
With many varying creeds,
Each group with its thoughts
Of what they think they need!
We of long time generations,
Here in this free land,
Try so hard to welcome
Those, who do not understand
How, on down thru the ages
We fought to make us free,
And now our country's freedom
Is for all who would believe
And help us work together.
In this blessed land we trod,
A country like no other
Inspired by Love and God!●

SILVERFINGER—PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. McDONALD. Mr. Speaker, on April 1, 1981, I placed part I of this item in the RECORD. It appeared on page 6138. This second part of the article which appeared in Playboy of July 1980 again confirms that the machinations of the Commodity Futures Trading Commission did in the Hunts on silver and caused the price to fall abruptly.

Again, I wish to note that this second part consists of pertinent extracts from the article and is not complete:

SILVERFINGER

[From Playboy Magazine, July 1980]

The identify of the new big buyers remained a secret through August and September, but what happened to the price of silver did not. Having risen slowly but steadily all year, the price suddenly jumped from eight dollars to over $16 in only two months' time. Part of the price explosion was undoubtedly attributable to the voracious demand of the big buyers. But, as the CFTC itself later observed, the demand was also consistent with the world-wide demand for precious metals as a hedge against inflation and unstable politics. Gold prices had already been surging upward for months. Silver had remained relatively underpriced, but was catching up. On October third, it closed at $17.88 per ounce.

Both the Comex and the C.B.O.T. flew into a panic. Trading frenzied, then dried up as small investors scrambled for cover amid rumors that the new big buyers included the Hunts. Exchange officials grew increasingly anxious. The big buyers kept buying futures, but they also kept taking delivery as their old contracts matured. The warehouses of the two exchanges held only 120,000,000 ounces of bullion, and that amount was traded in the month of October alone. The Hunt Saudi partnership itself took delivery on some 40,000,000 ounces. Combined with the Hunts' earlier purchases, this gave the group ownership of 62 percent of the stock in the Comex warehouse and 26 percent of the stock in the Board of Trade's vaults. International Metals also traded some of its futures for another 28,000,000 ounces of silver not held by the U.S. exchanges' vaults. Conditions looked ripe for a "squeeze": that situation where there is simply not enough bullion available to meet the strict delivery terms of the contracts.

At that point, the CFTC and the officials of the two exchanges decided to have a little talk with the Hunts. Explaining that they feared a squeeze, the exchange officials asked them if they would consider selling some of their silver. The brothers' answer was no. What was more, they said, they intended to keep buying silver and to keep taking delivery on it. They thought silver was still a good buy, even at the new high prices. Besides, as Bunker put it with typical understatement. "If you sell, you get into a tax problem."

But Bunker's assurances that he was willing to cooperate as much as possible appar-

ently mollified the CFTC officials; the C.B.O.T., however, concluded that it was time to act. In a move aimed directly at the Hunts and the other big buyers, the Board of Trade raised the margin requirement and declared that silver traders would be limited to 3,000,000 ounces of futures contracts. Traders with more than that would have to divest themselves of their excess futures holdings by mid-February 1980.

With that, the battle lines were drawn. Bunker let it be publicly known that he thought the C.B.O.T. was changing the rules in the middle of the game, and vowed to fight the limits all the way. Privately, he regarded the C.B.O.T.'s action as another conspiracy against him by the Eastern establishment. And for once, he had a good prima-facie case.

The boards of both the Chicago and the New York exchanges were composed not only of "outside" directors but also of representatives of the major, usually Eastern based brokerage houses. Later testimony would reveal that nine of the 23 Comex board members held short contracts on 38,000,000 ounces of silver. With their 1.88-billion-dollar collective interest in having the price go down, it is easy to see why Bunker did not view them as objective regulators. At the same time, though, the C.B.O.T. restrictions made Bunker even more bullish on silver, because, as he put it, "they show a silver shortage exists."

Bunker appeared to be right. Through November and December, the price of silver rose faster than ever. By the last day of 1979, the price reached an astronomical $34.45 an ounce. Meanwhile, the Hunts' silver holdings kept increasing. By the end of December, the Hunts and their Arab partners held 90,300,000 ounces of bullion that the CFTC knew about and another 40,000,000 ounces the Hunts had stashed in Europe. The Hunt group also held about 90,000,000 ounces' worth of silver futures, most of them due for delivery in March on the Comex in New York.

By this time, the CFTC became concerned that the silver positions held by the Hunts and the Conti group were "too large relative to the size of the U.S. and world silver markets." Subscribing to the philosophy that the futures market was not a substitute for the cash market, the commission determined that the time had come to stop Bunker's perverse buying spree. A meeting to decide what to do was set for January 8, 1980.

Then the Comex stepped in. On January seventh, the exchange announced new position limits restricting traders to no more than 10,000,000 ounces worth of futures contracts. The effective date of the limits was set for February 18. The day after the Comex announcement, the CFTC announced that it was backing the exchange's new limits.

Bunker was incensed. "I am not a speculator. I am not a market squeezer," he protested. "I am just an investor and holder in silver." Taking the offensive, he accused the exchanges and the Government of destroying the U.S. silver market by changing the rules in the middle of the game. "The market will move to Europe," he predicted ominously. "The silver market in this country is a thing of the past.

Strangely enough, the price of silver fell only one day in the wake of the Comex announcement, then started climbing even higher. Part of the reason for the continued price spiral, according to an after-the-fact analysis by the CFTC, was that Bunker kept buying silver. On January 14 and 16, the Hunts made agreements to take future delivery on 32,500,000 ounces of silver (mostly in London) at various dates that spring. The largest of those contracts were with Englehard Minerals. On January 17, silver hit a record high of $50 an ounce.

Bunker could hardly be incensed about that. On that one day, the worth of the Hunts' silver-bullion holdings was nearly four and a half billion dollars. Since most of that silver had been acquired at less than ten dollars an ounce, they had a profit of over three and a half billion dollars. Bunker and Herbert had made nearly as much money in the past six months as their late father had made in his entire lifetime—at least on paper. Of course, if Bunker actually sold all that bullion, he would face enormous tax consequences. The trick now was to figure a way to utilize those huge gains without having them decimated by the tax man.

As Bunker pondered that, the exchanges decided to impose their most stringent restriction yet. On January 21, the Comex announced that trading would be limited to liquidation orders only. There would be no more futures buying. The game was closing down.

The next day, the price of silver plunged to $34, a drop of ten dollars in a single day. It stabilized shortly after that, and remained in the mid to high 30s for the rest of the month. But in February, the price began to slide downward again. By that time, silver was literally coming out of the woodwork. In response to the new high prices, old ladies had been selling their tea sets. Families had been hocking their silverware. Coin collectors had been divesting themselves of their collections. In January and February alone, an estimated 16,000,000 ounces of silver coins and an additional 6,000,000 ounces of scrap silver had come onto the market. With the price of silver now dropping, some of those small sellers and small investors began complaining to the CFTC about the exchange restrictions.

Bunker, meanwhile, remained as bullish as ever. "Why would anyone want to sell silver to get dollars?" he asked in amazement. "I guess they got tired of polishing it."

Prudently or not, Bunker practiced what he preached. In early February, the Hunts took delivery of 26,500,000 ounces of bullion from the Chicago exchange. That brought the brothers' total group holdings (including their partnership with the Arabs and their European silver stash) to slightly over 155,000,000 ounces. Instead of selling his futures, most of which were set for delivery in March, Bunker simply rolled them forward into the months of May and September. He also bought a $4,250,000 stake in Goldfield, a silver-mining concern, and a six-and-a-half percent stake in his own silver broker, the Bache Group. In late February, the Hunts made headlines in Dallas for an unusual precious-metals-based employee-benefits package. The plan provided that Hunt employees could take their bonuses in silver, gold or cash, whichever was highest at the time the benefits were paid out. That was not the act of a man who believed the price of silver was going to crater.

Neither were the things Bunker was doing behind the scenes. In late February, with the price now hovering in the low 30s, Bunker began another global search for a silver-buying partner. Despite the recent price slippages, the prospects looked good. The Kuwaitis and the Bahrainis in Gulf Investment had sold their silver near the top of the market for an estimated $22,000,000 profit. Elated by their success, the group was ready to get back in the market again. They proposed a new venture in partnership with Bunker to be called Gulf Precious Metals. The intention of this new group was to raise another $500,000,000 to buy more silver; of that total amount, Bunker would supply 10 to 20 percent.

There followed a series of meetings in Paris, the Persian Gulf States and Texas. One of the meetings took place in Dallas on February 26. Among those in attendance were Mario Araktingi, a Greek Arab who advises the Saudi royal family on investments; Mohammed Ishmael, a director of the Arab bank in Paris; Sheik Mahfouz, the Saudi banker and Connally client; and the Hunt brothers, Bunker and Herbert. After the gathering, the Arabs flew off to Bermuda, home base of International Metals, then turned around and went back to Dallas for another meeting with the Hunts.

Meanwhile, with the ready cash of Placid Oil, the Hunts were making several large nonmetal investments. Placid bought the oil reserves of a company called Bodcaw for $190,000,000 in cash, then purchased $100,000,000 in stock in oil-rich Louisiana Land and Exploration Company. After that, Placid bought a 9.6 percent stake in coal-rich Gulf Resources and Chemical Corporation, then announced a $350,000,000 tender offer for the rest of the stock. Gulf Resources' board voted against the tender and the Hunts backed off.

Then rumors circulated that the Hunts had an even more prodigious take-over target: Texaco. Like cornering a modern market, taking over one of the Seven Sisters was almost too absurd for most people to think about. By one estimate, taking over the whole company would have cost ten billion dollars at prevailing market prices. Even the Hunts, with an estimated four billion dollars in paper profits in silver, would be hard pressed to make that kind of play. But by that time, it seemed like anything was possible for the Texas brothers. So, while the purchases of Texaco stock by Placid were never confirmed, the rumors continued to circulate.

At the same time, the price of silver continued to drop. On March third, it was at $35.20 an ounce; but by March 14, it was down to $21. One reason for the price drop was the rapidly spiraling interest rate; that not only strengthened the dollar but also raised the cost of buying on margin. Another reason was the fact that at January's $50 price, there were fewer and fewer people left who could afford to buy silver. Still another reason was the fact that world tensions had eased a bit—and the flight into precious metals as a haven from the apocalypse finally slowed.

For Bunker and his Arab partners, the continuing price drop spelled enormous trouble. It meant, for one thing, that the value of their already delivered silver bullion was decreasing rapidly. At $21 an ounce, the Hunts' silver was worth nearly two billion dollars less than what it had been worth a few weeks before. That meant so much less collateral available for new silver-buying loans. Even worse, the declining prices meant that the Hunts had to keep coming up with more cash margin money to maintain their futures positions, which were in the 60,000,000-ounce range. By late March, their margin calls at Bache were in excess of $10,000,000 per day.

Still confident that silver prices would turn upward again, Bunker refused to sell out. But despite his optimism, prices continued to drop, and the margin calls continued to mount. Everything finally came to a head on March 25, 1980. Bache called Dallas that afternoon to inform the Hunts of a $135,000,000 margin call. Herbert responded with a stunner:

"We can't make it."

The Bache people could hardly believe it. Had their biggest client reached the end of the rope? Still reeling from the thought of it, the Bache men told Herbert they would have to begin liquidating the Hunts' contracts. Herbert indicated that they should go ahead if that was what was required.

The next day, Bache sold off $100,000,000 of Hunt bullion. It also contacted the CFTC. Bache told the commission that the Hunts' account carried an equity of only $90,000,000 and that the brothers would probably lose another $86,000,000 in the next day's trading. Combined with other recent losses of $40,000,000, that left a deficit in the Hunts' account of some $36,000,000. More important as far as the rest of the world was concerned, it was the kind of news that raised the specter of a full-scale financial disaster. Word that the Hunts' losses had imperiled the stability of a major brokerage house could drive the market into a panic.

CFTC chairman James Stone sounded the alarm to the Government's financial heads of state. A short time later, fearing the worst, Stone, Volcker, SEC chairman Harold Williams and Deputy Treasury Secretary Robert Carswell began a round-the-clock silver-market monitoring session.

That same day, Bunker suddenly turned up in Paris. At eight P.M. Paris time, which was two P.M. in New York, he released a remarkable announcement to the press via a Paris agency. His statement said that he and four Arab partners had acquired "more than 200,000,000 ounces of silver" and that the group was putting up its hoard to back the sale of silver bonds. The statement went on to say the bonds would be distributed through "big European banks" (though it did not name any) and promised that the bonds would be in denominations of varying size, so as to attract small investors as well as large ones. Bunker's statement disclosed that his partners in the silver-bonds venture were Prince Faisal bin Abdallah, Sheik Al-Amoudi, Mahmoud Fustok (a Saudi contractor and advisor to the prince) and Naji Nahas, the Brazilian Lebanese who had purchased silver with the Conti group.

The announcement carried a host of intriguing ramifications. On one level, it appeared that he had achieved his dream: the creation of his own separate economy. Just as the governments of the world had issued currencies by virtue of the metal they owned, Bunker and his Arab partners were now planning to issue their own "real" money, even as the governments of the world were now issuing paper with no metal behind it.

In reality, Bunker's announcement carried a far more desperate message. The silver-bonds arrangements were obviously incomplete, or he would have been able to name the banks involved. With silver prices dropping and a personal financial debacle in the offing, Bunker was apparently making a last-ditch confirmation of the fact that he was still bullish on silver.

The next day, Thursday, March 27, the silver market collapsed. The price of silver opened that day at $15.80 per ounce. Then rumors started circulating that the Hunts had a one-billion-dollar margin call and they were not going to be able to meet it. Subsequent rumors said that Bache was on the verge of going under. The price of silver plummeted to $10.80 an ounce. The debacle spilled over into the stock market on the strength of an additional rumor that the Hunts were selling off huge stock shares in Louisiana Land, Gulf Resources and Texaco. The Dow-Jones average dropped a staggering 25.43 points, hitting its lowest level in five years. It looked to many like the sky was falling.

About that time, a second wave of rumors hit the streets. The Hunts would be able to meet their margin call, after all. The price of silver remained at its $10.80 level, but the stock market rallied incredibly. Bargain hunters and other buyers brought the Dow-Jones back up to only 2.14 points below the level at which it had begun the day.

Shock waves from the silver crash reverberated around the world. For the little guy, there was reason for rejoicing: The break in silver prices was one of the first big price downturns in a long time. For investors who had gone short on silver, it was a time for raking in big profits. Armand Hammer, chairman of Occidental Petroleum, for one, reported a gain of $119,000,000 in silver's slump. For investors who had followed the Hunts, there was reason for jumping out of windows: They lost millions that they could afford to part with far less easily than could Bunker and Herbert. But even for those who had remained on the side lines, there was reason for grave concern. There had not been a day like Black Thursday since the Great Depression.

As the world press tried frantically to reach him, Bunker made himself unavailable for comment. Shortly after making his silver-bonds announcement, he left Paris on a plane to Saudi Arabia to consult with his Arab partners. Having been billions ahead, he was now staring at billions in losses. The only thing he said before taking off was, "It'll all come out in the wash."

Bunker's prediction turned out to be more accurate than he might have wished. Instead of repeating Black Thursday's debacle, silver prices rallied to $12 an ounce the next day. But Bunker and Herbert Hunt found themselves with some of the biggest losses in U.S. financial history. Since January, the value of their silver bullion had depreciated by nearly four billion dollars. Because most of that silver had been purchased at under ten dollars an ounce, they were actually still a little bit ahead on their bullion purchases. But they had taken a tremendous beating in the futures market and on silver contracts they had purchased when prices were in the $35-an-ounce range. The exact extent of the Hunts' troubles was hard even for them to determine, but it quickly became clear that their outstanding debts were in the one-and-a-half-billion-dollar range, including a $665,000,000 delivery contract with Englehard that they could not meet.

With much of their holdings pledged as collateral on loans that, in turn, had been used to buy silver, the Hunts and their bankers were in a double bind. The more the price went down, the more they owed, and the less their original collateral—their silver—was worth.

On the Sunday following Black Thursday, Bunker flew in from Saudi Arabia to meet with Herbert and the Englehard people in Dallas. Since Bunker was fatigued, Herbert did most of the talking, and most of what Herbert had to say sounded pretty grim. Among other things, he informed the Englehard men that all the Hunts' silver was already pledged as collateral on loans, or, as he put it, was "all under water." Such a predicament might have seriously upset other mortals, but not Bunker Hunt. Confronted with his multibillion-dollar troubles, he simply observed that "a billion dollars isn't what it used to be."

Despite their ability to remain calm, the Hunts did not succeed in working out a deal with Englehard in Dallas. So that afternoon, they and the Englehard men flew to Boca Raton, Florida, where the heads of the nation's largest banks had gathered for a meeting of the Federal Reserve City Bankers Association. Volcker happened to be in town to give a speech to the association, and upon hearing of the Hunt-Englehard problem, allowed that he had no objection to their trying to negotiate a loan, despite his earlier disapproval of lending for commodity-speculation purposes.

Through the night and into the wee hours of the morning, the Hunts and the Englehard men negotiated with the bankers. Volcker sat in on some of the talks and, at one point, even appeared with a shirt over his pajama top to check on the status of the negotiations. But even under the benign gaze of the Federal Reserve Board chairman, the bankers could not come to terms with the Hunts. The brothers' maze of debts, commitments and interlocking collateral was just too complicated. As one participant put it "There were just too many loose ends,"

Nevertheless, by the time the sun rose, the Hunts and Englehard had managed to reach an accommodation. Under the terms of the deal, the Hunts agreed to give Englehard 8,500,000 ounces of silver and a 20 percent interest in their Canadian oil properties in the Beaufort Sea. Although carried on the books as worth about $275,000,000, the Beaufort Sea properties have a potential worth estimated at $600,000,000 to $750,000,000. But the wells there have yet to come on production and it may be years before they do. At this point, the Hunts just don't know how much their deal with Englehard will cost them.

With the completion of the Englehard agreement, negotiations for a loan to the Hunts picked up again. Fearing that the Hunts' inability to pay their silver debts might cause more major tremors in the nation's financial system, Fed chairman Volcker gave his tacit approval to a plan to bail the brothers out. Under the terms of the deal, a consortium of banks, including First National Bank of Dallas and Morgan Guaranty of New York, has agreed to lend 1.1 billion dollars to a partnership composed of the Hunt brothers and Placid Oil, the most viable entity under the Hunt family corporate umbrella. The partnership, in turn, will use the money to pay off the Hunt brothers' silver debts.

The Hunts' loan does not come cheap. As collateral, Placid has mortgaged substantially all of its oil-and-gas properties in Louisiana and the Gulf of Mexico; those properties make up roughly one half of the company's six billion dollars in assets. In addition, Bunker and Herbert have contributed collateral in the form of 63,000,000 ounces of silver bullion and coal properties worth an estimated $480,000,000. They have also agreed not to speculate in the silver market until the 63,000,000 ounces of silver they have contributed to the partnership have been sold off.

On top of all that, Bunker and Herbert have also had to make some costly internal family financing arrangements. Fearing that Placid, the family jewel, might be left holding the bag if silver prices declined further, the Hunt sisters insisted that the boys put up even more of their own property to secure Placid's interest in the silver partnership. Along with their brother Lamar (who participated in the silver deal to a much lesser extent than did his brothers), Bunker and Herbert have mortgaged their race horses, furs, fine paintings, coin collections, jewelry and cars—as well as more oil and real-estate properties. The bottom line is that in trying to prove themselves even greater money makers than their late father, the Hunt brothers have ended up putting the better part of the family empire in hock.

At this writing, the future of both Nelson Bunker Hunt and the silver market remains very much up in the air. Many analysts believe that at $12–$14 an ounce, silver is now drastically underpriced. While prices may not shoot through the $50-an-ounce mark again any time soon, there is a good possibility they could climb back up to the $20–$25 range. If that happens, the Hunts could easily pay off their silver debts and even wind up with some tidy profits.

On the other hand, if silver languishes or drops even lower, the Hunts could lose hundreds of millions more. In addition to worrying about the price, they have to pay interest on their 1.1-billion-dollar loan at the rate of $500,000 per day, which works out to more than $180,000,000 per year. The Hunts also have to deal with a market that knows they must sell. Even if silver is going up in the long run, that selling will inevitably drive the price downward in the short term, and the market appears to be waiting for that to happen. Finally, the Hunts may well have to cope with even more silver than what they have put into the partnership with Placid. They claim that they have only 63,000,000 ounces left. But their huge purchases in 1973 and 1974 seem to have been lost in the calculations. The brothers may actually hold another 40,000,000 ounces of silver in their European stash. But as long as prices remain depressed, that extra hoard does them little good.

Whether or not these dark clouds turn out to have a silver lining, it is more than likely that the brothers will be able to pay off their debts one way or another. The sheer size of their nonsilver holders makes bankruptcy a most remote possibility. For Bunker, the worst part of all this is not his losses but the increasing amount of public disclosure and Government inquiry the Hunts have been subjected to in order to pay off their debts. According to his friends, the stress of these developments has caused Bunker's legs to sweat and even made him lose a little weight.

Yet, as one associate says, "For a man who has just lost billions, he looks remarkably calm—but then, he's like that." Down but far from out, Bunker remains bullish on silver. He fully expects that prices will rise and that his financial situation will take care of itself. He also believes he may have grounds for a lawsuit against the commodities exchanges for changing the silver-buying rules. As he put it in a recent appearance before a Congressional investigating committee. "The game is not over."

The people who know Bunker Hunt best don't doubt that for a minute.●

AGENT ORANGE STUDY

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. RAILSBACK. Mr. Speaker, I am introducing a bill to require the Secretary of Health and Human Services to arrange for an independent epidemiological study of persons exposed to the chemical dioxin used in the herbicide, agent orange, to be conducted by the National Academy of Sciences (NAS).

I first became aware of the problem when I was contacted by a constituent, Mrs. Judy Fellner, whose husband served in Vietnam from March 1967 to March 1968. Not only did her husband die at the age of 35 from heart disease, but her first-born child after his return is suffering as a result of having three kidneys. According to Mrs. Fellner, both the child's pediatrician and urologist felt her husband's exposure to agent orange may possibly have caused the defect.

Later, after talking with several Vietnam veterans in my district, I became even more concerned about the effects of exposure to the chemical dioxin contained in agent orange. Many veterans told me that they felt they should be compensated by the Federal Government. They risked their lives in Vietnam and now they and their families are suffering. They feel the Government does not want to spend the money on compensation and that results from a Veterans' Administration study, mandated by Congress, would not be credible since the VA is too concerned about the expense of compensating veterans.

Determining whether veterans should be compensated is extremely difficult. Conclusive results justifying compensation to veterans and their families have not been made, so many are paying high medical bills without help from the Government. We must determine whether exposure to low doses of dioxin does cause long-term health problems to those exposed and their children.

Determining whether low doses of dioxon have long-term health effects has been the thrust of several industrial and Government studies. Thousands of industrial workers in the United States and abroad have been exposed. About eight major accidents have occurred worldwide. Some chemical companies, such as Dow Chemical Corp., is conducting its own study of employees. The Kittering Toxicology Laboratory is studying Monsanto workers. The Australian equivalent of our Public Health Service is studying Australian veterans. The Air Force is studying approximately 1,200 ranch hands who sprayed the herbicide in Vietnam. A study is being conducted to determine the effect on citizens and workers in and near a Seveso, Italy, plant which exploded in 1976 and released large amounts of the chemical into the atmosphere. So, obviously, many people have been exposed and much concern is being displayed. However, the work is diffused, and no conclusive findings have resulted.

That is why the National Academy of Sciences recommends a study of a broader population than veterans. To really determine the long-term effect of both high and low doses of dioxon, a population comprising industrial and military people must be conducted. I feel the National Academy of Sciences is the best organization to conduct such a study.

Although I am encouraged by congressional interest resulting in a request for the VA study, I am concerned by the fact that the VA does not now have credibility. Whether the judgment is warranted is not important. The veterans do not feel they will be treated fairly. So, I am introducing legislation authorizing the National Academy of Sciences, at the request of the Secretary of Health and Human Services, to conduct an independent epidemiological study of persons exposed to agent orange. The NAS is an eminent scientific organization and does not have a credibility problem. It will look at health effects on a broad scale from a strictly scientific viewpoint. Such a study could be extremely helpful in determining if compensation to Vietnam veterans and their families is appropriate.

For the convenience of Members and interested persons, I have included the text of the bill:

SECTION. 1. (a)(1) The Secretary of Health and Human Services (hereinafter in the Act referred to as the "Secretary") shall arrange, in accordance with section 2, for the conduct of an epidemiological study, based on available information and information furnished in accordance with section 3, to determine if and to what extent there may be long-term adverse health effects in humans from exposure to any of the class of chemicals known as "dioxins" produced during the manufacture of the various phenoxy herbicides, and in other processes including the herbicide known as "Agent Orange". Such study shall give particular attention to individuals who served as members of the Armed Forces of the United States in the Republic of Vietnam during the period of the Vietnam conflict but may include others who have been or may have been exposed to such chemicals when such inclusion is feasible and appropriate.

(2) The study required by paragraph (1) shall be continued for so long after the submission of the first report under section 4(b) as the Secretary determines to be reasonable in light of the possibility of developing through the continuation of such study significant new information on the long-term adverse health effects in humans of exposure to dioxins.

(b) The Secretary shall arrange, in accordance with section 2, for the conduct of a comprehensive scientific analysis of the ex-

isting literature covering other studies relating to whether there may be long-term health effects in humans from exposure to such dioxins or other dioxins.

SEC. 2. (a) The Secretary shall request the National Academy of Sciences (hereinafter in this Act referred to as the "Academy") to design, monitor the performance of, and analyze the data from a controlled epidemiologic study and perform a review and analysis of all pertinent scientific literature as required by section 1 under an arrangement whereby the actual expenses incurred by the Academy directly related to the study and analysis will be paid by the Secretary. Performance of examinations or interviews will be coordinated by the Academy but performed by other appropriate institutions. If the Academy agrees to such a request, the Secretary shall enter into such an agreement with the Academy.

(b) If the Academy is unwilling to conduct the study required by section 1 under such an arrangement, then the Secretary shall enter into a similar arrangement with another appropriate public or nonprofit private entity to conduct such a study and analysis.

(c) Any arrangement entered into under subsection (a) or (b) for the conduct of the study required by section 1(a) shall require that reports on the study be submitted within such time as the Secretary may require to meet the requirement of section 4(b). Any arrangement entered into under subsection (a) or (b) for the conduct of the literature analysis required by section 1(b) shall require that the analysis be completed and reports on the study be submitted within such time as the Secretary may require to meet the requirement of section 4(a).

SEC. 3. The Secretary may request relevant information required by section 1(a) from any agency of the Federal Government, and the head of any agency from which such information is requested shall promptly furnish such information to the Secretary.

SEC. 4. (a) Not later than 12 months after the date of the enactment of this Act, the Secretary shall submit to the appropriate committees of Congress a report on the literature analysis conducted pursuant to section 1(b).

(b) Not later than 24 months after the completion of the protocol for the study required by section 1(a), and annually thereafter until the study is completed or terminated, the Secretary shall submit to the appropriate committees of the Congress a report containing—

(1) a description of the results thus far obtained under the study (including supporting data and other materials provided by the entity that conducted the study);

(2) the recommendations, if any, of such entity for legislative and administrative action; and

(3) such comments on the results of the study and recommendations for legislative and administrative action as the Secretary considers appropriate.

SEC. 5. The study and literature analysis required to be conducted by section 1 shall be conducted in lieu of the study and literature review and analysis required to be conducted by section 307(a) of Public Law 96-151 (93 Stat. 1097).●

TRIBUTE TO THE BLACK WAR VETERANS OF THE UNITED STATES, INC.

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. FAUNTROY. Mr. Speaker, I want to bring to the attention of this great body, the establishment of an organization committed to enhancing the welfare of our Nation's war veterans. This new organization is the Black Veterans of the United States, Inc., which has pledged to actively assist veterans in securing all their entitlements while telling the Nation of the contributions blacks have made in maintaining American freedom, even though we were not always beneficiaries of that freedom.

I invite you to join me in extending a helping hand to this and other veteran's organizations in securing the rights veterans have earned, at the same time that we work to retain adequate funding for those programs which have truly assisted America's service men and women.

For your information, I would like to submit a list of officers of the Black Veterans of the United States, Inc., and an outline of its goals and objectives.

BLACK WAR VETERANS OF THE UNITED STATES, INC.,

List of officers: Rudolph Christian, National Commander; Vernon Johns, Jr., Chief of Staff; Edward Young, Quartermaster, Maurice Godley, Public Relations; Maxine Cade, Chief Counsel.

Board of advisors: Dr. Glenwood P. Roane; Edward Jackson; Henry Powell; Dr. Overton Johnston; Rev. Royal J. Nickens, Sr.; Tyree P. Felder, III; Dr. Charles F. Christian.

The Black War Veterans is a non-profit organization made up of veterans who served during the following periods of war, April 6, 1917 through November 11, 1918, December 7, 1941 through December 31, 1946, June 27, 1950 through January 31, 1955, and August 5, 1964 through May 7, 1975.

The purpose of the Black War Veterans of the United States are Charitable, Patriotic, and Educational, to maintain true allegiance among its veterans to the Government of the United States and to uphold its Constitution and Laws; to foster true Patriotism; to establish and strengthen comradeship among its members, to maintain and proclaim the instititions of American freedom; to preserve and defend the United States from all enemies, whomsoever; and to perpetrate the hallowed memories of all those who have given the full measure to devotion to those ideas.

The Black War Veterans of the United States has two main objectives:

First, to focus on the delivery of all medical, social, employment, benefits and other support services to veterans in general in an effort to improve the efficiency of delivery thereof to black war veterans by providing technical assistance and guidance through counseling to those black veterans re-entering American's maintream of society as well as to those who are presently here; and

Second, to show the contribution of Blacks in the defense of the United States, "Our Black War Heroes from 1916 to 1981—the Missing Pages in U.S. History." For example, few Americans realize that the first Soldier to die in America's fight for freedom was a Black man, Chrispus Attucks, Boston, Massachusetts, 1770.

Membership shall be conferred to (a) men and women who served honorably in any branch of Armed Forces of the United States during the above periods, and (b) any eligible person not within the jurisdiction of a post or on active duty in the Armed Forces.●

FRANCIS X. HAYES ON PLAIN ENGLISH IN NEW JERSEY

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. GUARINI. Mr. Speaker, the State of New Jersey is this year embarking on a significant course in the movement to make laws and consumer contracts understandable to the average citizen. The advent of "plain English" laws is a step that has been long overdue and I am particularly proud of the fact that New Jersey, under the able leadership of Gov. Brendan Byrne and Assembly Speaker Christopher Jackman, has enacted a model plain English law.

With efforts to enact plain English requirements at the Federal level beginning to gather wide support in Congress, I would like to share with you the experience we have had in New Jersey.

My good friend, Francis X. Hayes, an attorney from Jersey City, N.J., has long been a recognized leader in the plain English movement. Mr. Hayes recently wrote a very insightful and informative article regarding the use of plain English in New Jersey law. I recommend the Hayes article to you as instructional and inspirational.

COPING WITH THE PLAIN ENGLISH LAW: A LAWYER'S BOOKSHELF

(By Francis X. Hayes)

October 16, 1981 should signal the beginning of the bitter end of turgid legalese in New Jersey. On this date the New Jersey Plain English Law becomes effective (except for insurance companies, which have a reprieve until 1982).

Five states have adopted plain English laws, but only New Jersey's law severely impacts upon lawyers in their private practice. The law states that a consumer contract must be written "in a simple, clear, understandable and easily readable way." Each of these standards has a particular meaning and function in the psycholinguistic field. Another article I am presently preparing discusses what the legislature may have meant by these standards, and what linguistics and English professors think these abstract words mean.

The law relates only to consumer transactions, but it is very broad. It applies to leasing or licensing of real or personal property, the obtaining of credit, insurance coverage, borrowing money, purchases of real or personal property, and contracts for services, including professional services (retainer agreements); provided that any of the above are obtained for personal, family or household purposes.

Consumer contracts include "writings required to complete the consumer transactions." In plain English this means that those impossible forms you have to fill out in order to be reimbursed by your insurance company will have to be clear, understandable and designed to be easily filled out. It also means that the myriad of documents required at a real estate closing will have to be clear and understandable. Even if a power of attorney is required in a real estate of financial transaction, it will have to be clear and understandable.

No wonder Assembly Speaker Christopher Jackman, the sponsor of the bill, boasted, "this bill will revolutionize the legal profession."

But not quite. The law, as finally passed, does not apply to professors of legal writing and it definitely does not apply to nonconsumer transactions, though I'll warrant that many a small businessman wished it did!

The act does provide guidelines that may be considered by a court or jury in determining whether a consumer contract is simple, clear, understandable and easily readable. It must be emphasized that these are guidelines, not mandates, which merely spell out things that cause obfuscation and difficulty of understanding. In general, the law is quite flexible and equitable.

For example, use of technical words or words of art are not automatically violations of the act. It is a defense to a suit under the act if one can prove that he tried in good faith to comply with the act. Most important of all, even if a consumer contract is not in plain English, the act does not give the consumer a right to void the contract, or right of refusal to pay, in an action to enforce the contract.

The banking industry in New Jersey generally supported the plain language legislation because it eliminates one of the standard defenses when a consumer is sued on a loan or has his car repossessed. No longer will the consumer be able to assert that he did not understand the transaction.

There is no requirement that consumer contracts be written at any particular reading level. The legislature adopted a general standard because it felt courts and juries could decide from a common sense view if a consumer contract was in plain English, i.e. from the context and all the circumstances. Juries and courts have had no difficulty in coping with abstract concepts, such as deciding whether a person is negligent, or whether a person is guilty of careless driving. I have enough faith in judges and juries to anticipate they will be able to determine with the same sort of common sense whether a consumer contract is in plain English.

If experience in other states is any guide, there will be little litigation under this act unless lawyers approach the act as a legal project rather than an English project.

With this general background in mind, what books, articles and reference materials are available to help the New Jersey lawyer kick the habit of inflicting cruel and unusual punishment on the mother tongue? Although a simple, straightforward concept, plain English (or plain language—gobbledygook is not confined to the English tongue) is one of the least understood concepts in jurisprudence. It is ironic that plain English laws, designed to remove confusion, have become such a confusing subject, primarily due to the ignorance of the bar as to what plain English is all about.

The first book on your bookshelf should be David Mellinkoff's classic "The Language of the Law," a Little Brown and Co. paperback, 1963. Professor Mellinkoff's book is the definitive work that traces the origin, development and use of legalese. This 526-page book has over a thousand footnotes, 23 pages of bibliography, and is the rarest of legal books because it is sprightly and wittily written, informs and entertains.

A 90-page paperback "Plain English for Lawyers," by Richard C. Wydick, Carolina Academic Press, 1979, is also must reading. Wydick, the dean of the University of California Law School, begins his book with the blunt statement that "we lawyers can't write plain English" and then proceeds to tell us pithily how to do so. This book is the legal Strunk and White. I am sure you have read "Elements of Style" in college, and by all means you should reread this book!

Thought I do not agree with Rudolph Flesch's readability formula, his series of books on simple and clear writing should be on your bookshelf, particularly the "Art of Readable Writing," and his latest book "How to Write Plain English: A Book for Lawyers and Consumers," published in paperback, 1979 by Harper and Rowe. This latest book takes fifty of the most complex and convoluted sections of the Internal Revenue Code and puts them in plain English. Flesch proves that it can be done. His before and after illustrations are fascinating and he has credibility because he was a lawyer in Germany before coming to this country.

If you wish to understand the philosophy and root motivations of the plain English movement, read Fred Rodell's "Woe Unto you Lawyers," Jeremy Bentham may be the great-grandfather of plain English, Cardozo and Holmes the grandfathers, but Fred Rodell is the father and godfather of plain English. His enduring classic, published in 1939, was recently republished in paperback by Berkley Press, and his message is still being preached to new generations of lawyers. I wonder if lawyers would pan him so unmercifully today, as they did when his book first came out in 1939. Rodell's book may raise hackles under your collar, but I personally feel that it is the most insightful and prescient book on law and lawyers I have ever read.

Though I do not agree with the solutions he proposed to the perceived problems, I make no apologies for otherwise being a dyed-in-the-wool disciple of Rodell (concerned with the ends of law and not all-consumed by the means), and I credit him along with Karl Llewellyn and Jerome Frank for shaping my attitude and perspective on law and lawyers. Mao Tse-Tung is the only person I know of, besides Shakespeare, who carried out Rodell's solution, and look what's happening in China today.

Finally, another classic is Reed Dickerson's "Fundamentals of Legal Drafting," published in 1965 by Little Brown. This book is a treasure trove for any lawyer who desires to draft lucid laws, regulations or legal documents. Professor Dickerson is the author of numerous law review articles that are critical of existing legal writing and drafting courses. Hopefully, our New Jersey law schools will soon institute pragmatic and sensible courses in legal writing and drafting.

I counted in the Index of Legal Periodicals over 500 articles on plain English and legal writing, dating back to 1940. There are over 750 articles in the Readers Guide to Periodical Literature.

The most even-handed popular press article explaining why lawyers write as they do can be found in "The State of the Language," University of California Press, Berkeley, California, 1980. This article, written by David S. Levine, an ex-Time Magazine staffer and now a practicing lawyer, is a penetrating legal analysis of plain English, which itself is written in plain English.

Two of the better legal articles are Mellinkoff's article on the language of the Uniform Commercial Code, 17 Yale Law Journal 696, and a scholarly, informative article by Professor Jeffrey Davies of Rutgers-Camden Law School, published in 63 Virginia Law Review 6 (1977). Davies article is entitled "Protecting Consumers from Overdisclosure and Gobbledegook." It sets forth the most comprehensive summary of the issues raised by plain English.

It was fun to browse in the Index of Legal Periodicals. I came across an article on a plain English will, and a sharp rebuttal to the article. I came across articles on plain English trusts, and fascinating articles on plain English deeds and mortgages.

I did not come across an article on plain English briefs, but I going to do an article on some of the plain English briefs going to do an article on some of the plain I have filed before the Supreme Court and the Appellate Division; and maybe I will make the index!

I did come across several articles on plain English opinions, or maybe I should say understandable and non-so-windy opinions. Justice Mark Sullivan wrote an article in the New Jersey Law Journal, Sept. 14, 1978, urging clarity and brevity in court opinions. He did not say whether he was just as impatient with long-winded briefs. As Rudolph Flesch is fond of saying, it is easy for lawyers to hide important legal principles in a thicket of words.

Flesch tells the story about a warranty that had buried in its verbosity the requirement that the warranty be conditioned upon mailing or delivering the product to the factory. The product was a baby grand piano.

An article by Associate Justice George Smith of the Arkansas Supreme court also caught my attention. It was titled "A Primer of Opinion Writing for Four New Judges," 21 Ark. L. Rev. 197. Justice Smith would take away the machine guns from judges—opinions that contain little more than the rat-a-tat-tat of citations. This 15-page article should have a priority position on every judge's plain English bookshelf.

But perhaps the best article for a judge's shelf is found in 18 TR Law Guide 330. It is called "Word Games Judges Play," and was penned by Chief Justice Kenneth J. O'Connell of the Oregon Supreme Court. The moral of this masterpiece is that even the plainest of words can be misused because some judges do not understand the function words and language perform in the communications of ideas and the analyses of problems. See the famous, or should I say infamous editorial "Happy Talk" in the New Jersey Law Journal, Nov. 29, 1979, and my reply, Dec. 13, 1979, in a letter to the editor.

Justice O'Connell describes such word games as slanting the facts in such a way that the conclusion follows inevitably, the use of strong and emphatic adjectives and adverbs (clearly without merit) that

hammer the reader into submissiveness (Mellinkoff describes this as the pompous language of the law), and "The Hideout Go Seek Game"—so clear there is no need to cite authority. There are many other games catalogued in this priceless article. Really, it is a short course on law, which echoes Rodell's approach—too often lawyers and judges regard words, especially abstract words, as having substance and meaning without relation to the real world in which they are used.

After analyzing all the statements of the New Jersey State Bar Association and the lawyers who testified on the plain English bill, I have become convinced that the legal profession, including the judiciary, is badly in need of training in semantic analysis. How can we use words, which are our only working tools for solving realistic everyday problems, without a working knowledge of semantics.

I would suggest that reading the literature on semantics is more important than the advance sheets. All the plain English laws in the world will not solve our language problem until lawyers understand what words and communications are all about.

There are several excellent style books and general books on good writing, such as the "Reader Over Your Shoulder" by English authors Robert Graves and Alan Hodge, Random House (1979) and "Simple and Direct" by Jacques Barzun. The books by Edwin Newman, William Safire and John Simon are good antidotes for the diseased English that lawyers, bureaucrats and educators write.

In a class by itself is "The Grammatical Lawyer" by Morton Freeman, published by the American Law Institute. Incidentally, I counted over a thousand cases in the decennials where adversarial ethics permitted suits to be brought because of dangling participles or misplaced modifiers, and misplaced and erroneous punctuation marks.

For the lawyer who must learn that words and their meanings are not just something found in a dictionary, it is essential to read "Language in Thought and Action," by S. I. Hayakawa, a paper back published by Harcourt-Brace (1964). It would be helpful to read an insightful essay entitled, "Law and Persuasion, The Language Behavior of Lawyers," 108 U. of Pa. Law Rev. 35. In this essay Professor Walter Probert of the University of Florida Law School presents a semantic explanatory review of the symbolic and emotive functions of words and the verbal and nonverbal environment of words. Remember good doctors do more than treat the symptoms; so too with plain English. You cannot deal with plain English unless a lawyer understands what language and words are all about. Unfortunately, too little attention has been paid to this subject.

For nuts and bolts training in the art of writing plain English, lawyers can secure help from the Document Design Center of the American Institute for Research, 1055 Thomas Jefferson Street, Washington, D.C. 20007, I highly recommend the publications of this Institute, which is a nonprofit research institution staffed by some of the most prominent linguists in the United States. It puts out a free monthly publication called "Simply States," which discusses the latest developments for people who are interested in improving public communication.

The Institute has issued excellent papers and reports on plain English, such as "How to Draft More Understandable Legal Documents," "What is 'Plain English' Anyway?", and many other publications and reports that are available at modest fees from the Institute.

I wish to explain the lack of footnotes and the colloquial and personal style of this article. I happen to agree with Rodell that footnotes only distract the reader and make reading more difficult. For Rodell's irreverent thoughts about footnotes, see "Goodby to Law Reviews," 23 Virginia L. Rev. 38.

If I be faulted for too personal a style for a sober journal like this—my defense is that I, Frank Hayes, created and wrote this article and I do not think I should be neutered or forced to write so impersonally that these "thousands of black marks on white paper" (definition of words) may just as well be considered by the reader to come from outer space.

Although I do not agree with Flesch that you should always write as you talk, I believe that a judicious blending of the colloquial and the formal makes for the best readable writing.

No one criticizes lawyers when they talk. It is only when they put pen to paper that a Jekyll-Hyde change takes place.

Congenital disease, I suppose.

Unlike the other professions, which require physical acts, law is solely a profession of words. So lawyers should love language and words, but generally lawyers are too lazy to use a Thesaurus to find the right word. Using a string of almost right words, or repetition, is not preciseness in my book.

Plain English laws do not change any substantive legal rights and legal duties, nor do such laws diminish the flow of legal ideas. In a nutshell, all they say is that complex legal ideas do not have to be communicated in complex and convoluted language.

To borrow from a great President, lawyers have nothing to fear about the plain English law except fear itself.●

SIDNEY MEYERS TO RECEIVE THE DISTINGUISHED CITIZEN AWARD

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. WAXMAN. Mr. Speaker, I would like to bring to the attention of my colleagues the work of Samuel Sidney Meyers of Richmond, Va., and the tribute which is being paid to him by the Anti-Defamation League of B'nai B'rith on Sunday, April 12, 1981. The Distinguished Citizen Award which Sidney is receiving reflects the esteem in which he is held by his colleagues. A leader in the furniture industry, he is distinguished by his accomplishments in the business community and by his concern for the welfare of others.

President of the Heilig-Meyers Co., he has given to that enterprise more than four decades of dedicated service, and is a member of the board of the National Home Furnishings Association. Despite the demands of his professional life, he takes an active role in community life, and has held numerous leadership positions. He is a past president of the Beth Sholom Home of Virginia, and a past president of the Richmond Easter Seal Society. He is a member of the board of the Virginia Easter Seal Society, the Richmond Jewish Federation, the Jewish Family Services, the Richmond Jewish Federation Foundation, and the Richmond Ambassadors. He is also a trustee of the board of the Jewish Community Center and a member of the Rotary Club.

Sidney is admired by all who know him for his innovative and creative approach in confronting challenges, an approach which is mirrored by his constructive and his compassionate outlook toward his friends, associates, and his fellow man. Consistently, he has taught respect for humane values not merely by precept but by example.

Because of the outstanding work of a lifetime, I feel it is appropriate that we too recognize Sidney's accomplishments and contributions to society.●

GEN. ANDREW GOODPASTER: A GOOD NEIGHBOR

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. GILMAN. Mr. Speaker, in June of this year, my congressional district—New York's 26th—will be losing one of our most prominent citizens: Lt. Gen. Andrew Goodpaster who has served with distinction as the Superintendent of the U.S. Military Academy since June of 1977.

General Goodpaster has been much more to us than simply the Superintendent of our Nation's outstanding military academy at West Point; he has been a friend, the driving force behind many of the significant changes which have strengthened West Point and which have altered the profile of the Army officer going into the world after graduation.

General Goodpaster came to West Point in the midst of turmoil during the difficult period in 1977 when student morale was at a nadir because of the cheating scandal which rocked West Point, General Goodpaster took command of the situation and implemented some 90 percent of the changes suggested by the Pentagon to improve the quality of training at the Academy. Goodpaster's philosophical and intelligent assessment of the potentials and achievements of the Academy have contributed to making USMA the fine institution that it is today.

During the general's tenure at West Point, many significant developments have occured including the graduation of the first women cadets. General Goodpaster's leadership and character have made possible the transition be-

tween an all male school and a coed university.

Over the next few years, General Goodpaster will be fulfilling his service to our great Nation by going to Washington to advise the administration on the important MX missile project. At that time, I hope that my colleagues will have the opportunity to become acquainted with the general so that you may come to know him and experience firsthand his wit, wisdom, and clear vision of our Nation's future.

We in the Hudson Valley region will miss General Goodpaster when he goes south in June, and I want to wish the general every success in his future endeavors, much health and happiness to both he and Mrs. Goodpaster along the way.●

DEMOCRATIC VIEW ON ECONOMIC AND TAX PROPOSALS

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. COELHO. Mr. Speaker, yesterday marked the first major address by the new chairman of the Democratic National Committee, Charles T. Manatt of California. Speaking before the National Press Club of Washington, D.C., Mr. Manatt gave an excellent articulation of the Democratic Party's views on the administration's economic and tax proposals.

Sympathetic to the physical condition of the President and delighted at the progress being made by the President and the others injured in the March 30 incident, Mr. Manatt pointed out that his critique of the Republican proposals was neither personal nor negative. As he has previously stated, the role of the loyal opposition is to speak out when the White House espouses policies the Democratic opposition views as contrary to its principles and its responsibilities.

I urge my colleagues on both sides of the aisle to take note of the points raised by Mr. Manatt in his speech:

REMARKS OF DEMOCRATIC NATIONAL COMMITTEE CHAIRMAN CHARLES T. MANATT

At the outset today, I want to express to you how deeply grieved we all are over the attempt on the life of the President. Whether Republican or Democrat, we all respect and support the person who holds the highest office in the land. Our concern is with President and Mrs. Reagan; and his speedy recovery is our prayer.

It is an outrage that anyone should even attempt such harm. It is, of course, far more lamentable that the President, his trusted aide Jim Brady, Tim McCarthy of the Secret Service, and Policeman Thomas Delahanty were, in fact, wounded in this act. We wish them all a speedy and complete recovery.

Just as we, as Americans, respect the Office of the Presidency, we also take seriously the political process and functions of Government. And it is about politics and Government that I want to speak to you today.

I take my hat off to my Republican counterparts for the campaign they have mounted. They have focused on the most attractive of themes. They have told this country that the Republicans have found a way to reduce inflation and balance the budget, and do it in a way that is equitable, fair, and not too painful.

Certainly, if they had the formula to do that, they should have their program passed. There is no question that this country wants an end to inflation. There is no question that if it can be done fairly and equitably and without the wholesale destruction of valuable Government services, it should be done.

But, the Republican proposals will not curb inflation. They will not be fair, equitable or painless.

Do the Republicans even believe that rhetoric themselves? I think not. The Republicans have a hidden agenda. In the name of fighting inflation and stimulating the economy, they are attempting to roll back 50 years of progressive tax and social policy. They want more for the rich and less for the average American family.

I have to thank Interior Secretary Watt for admitting the administration's real game plan. He said in New York a few weeks ago that "(the Republicans) will use the budget system to be the excuse to make major policy decisions and changes." It is the first time I have heard a member of this administration be so candid. It makes me think of John Mitchell's advice: "Watch what we do, not what we say."

I have long suspected that this administration was not out to cut programs because there was a budget deficit. The Republicans cut programs that help people because they just plain do not like those programs. The Republicans and their special interest friends would not like them even if the budget were running a surplus. They are simply trying to cover their tracks by stampeding people with talk of economic catastrophe.

Let me give you a couple of examples of how the Republicans are using their simple appeal of reducing the size of Government as a cloak to hide much tougher issues. When it comes to energy, the administration is not just following a leaner, slimmer version of our national policy. It is totally reversing field, putting money into nuclear power and taking it away from energy conservation and the development of alternate energy resources. That is not simply an exercise in number shuffling.

That is a major policy question that should be put squarely to the American people.

Every poll taken in the last year shows the American people want support for conservation and alternate energy sources.

The Republicans and the oil industry lobbyists read the papers as well as we do; they know they don't have the support. So what they can't get directly, they hope to get in the name of slimming government and balancing the budget.

Or look at the Legal Services Corporation. The administration basically wants to do away with it. Is it because they want to tighten the belt? No. Budget Director Stockman made clear that this cut is not a matter of money but of philosophy. Just 2 weeks ago he said that he does not "believe that there is * * * any basic right to legal services." I would like that issue put to an American people who believe in fair and equal justice. I'd like to see what they have to say.

The Republicans have also told American working people that this budget is painless; that it is in their interest. They're wrong, and I think they know they're wrong. Not only is there no safety net for the truly needy; there is no safety net for the average working family.

The administration proposes to gut the Middle Income Tuition Assistance Act; to take money from hard-pressed urban and suburban school districts by slashing money from the Elementary and Secondary Education Act; to cut mass transit capital grants by $1.4 billion next year and to phase out operating subsidies by 1985; to destroy trade adjustment assistance; and to give away our national park system. Who does all of that hurt? The average working family.

Nor is there any fairness in what the Republicans want to do. Cutbacks in minimum social security benefits, legal aid and the displaced homemakers program hurt women just because that are more economically vulnerable than men. The $900 million dropped from the veterans' administration budget asks veterans, particularly those from Vietnam, to be treated as second class citizens in the country for which they fought.

And all of these examples don't even touch upon cuts that hurt minorities, inner city dwellers, or farmers or calls for subminimum wage and the gutting of OSHA. There the agenda is not hidden at all.

In fact, the Republican budget is an attempt to place a vastly increased burden on State and local governments. It will place unbearable pressures on State and local taxes, which hit the average property taxpayer hardest.

In the next 3 years, as the impact to their policies become clear and the inequities become apparent, the Republicans will live to regret their early victories—and so will all the rest of us.

On the tax side of the picture, the Republicans' pursuit of their hidden agenda is even more blatant. They say Kemp-Roth will save the economy. The experts don't believe it. I don't believe it. We know Vice President Bush doesn't believe it.

The whole argument is just a cloak to take money from the vast majority of Americans and to give it to the rich. The family that earns $200,000 saves $23,500 by 1984. But if you earn $20,000 you are going to receive only $1,450. And when all of this is adjusted for "bracket creep" caused by inflation and this year's increase in payroll taxes, less than 1 percent of American families will save any money at all. And what do we get for this transfer of money to the rich? Nothing much.

The Joint Economic Committee just released a report showing that if we follow Kemp-Roth, the Federal deficit could reach $100 billion by 1984. So much for supplyside economics generating all that budget-balancing tax revenue. As Mo Udall said, "it is like diving into an empty swimming pool and hoping it would be filled with water before you hit bottom."

Indeed, the study concludes inflation does not drop substantially and the rate of capital formation as a percentage of GNP will be the same in 1984 as it is today. Why? The Republican tax program is not targeted. There is nothing which assures that the money the wealthy will save will be turned into savings and investment. There is no

quarantee of more jobs for American Workers.

There is simply no basis in history to suggest that giving ourselves an across the board tax cut will assist in abating inflation.

The central point in amending our tax policy must be to create more motivation for capital formation, to increase productivity, and to create more jobs and a larger GNP. That is how, on a significant scale, we can begin winning our battle with inflation. Tax reductions should be designed to get the greatest investment return for every tax dollar given up.

For instance small business must be the recipient of a substantial part of this new assistance. One clear example of how to target that assistance effectively would be to increase from $100,000 to $200,000 or $250,000, the level to which the lower corporate tax rate of 40 percent applies. That will directly strengthen the motivation of small business to invest and grow.

Similarly targeted changes in investment tax credits and depreciation will promote further corporate investment, create jobs, and increase productivity.

The entire Republican tax proposal simply gives enormous advantages to the wealthy and very little or nothing for middle and low income Americans. That is unfair and unwise. We must see that there is real tax equity. Bracket creep and additional social security payments don't matter to the highest income earners, but they are of major importance to everyone else. Whether it is social security tax credits or some other proposal, there must be real, rather than fake, help for the average American family.

When all is said and done, the Republican agenda gives to the rich but offers nothing to those who feel the pinch of inflation most. It does not call for sacrifice from those who are most able to pay but rather it makes life less worthwhile for those who need our parks, ride mass transit, or require college tuition assistance.

The Republicans have given up on the future in favor of the status quo. There is no hope for the working family in the Stockman view of the world. there is only cutting back and giving up. Just ask folks who can't afford to pay their heating bills or a college tuition. Just ask the young family who can't afford to buy their first home.

The ultimate failure of the Republican philosophy is that it does not see itself improving our lives. And, fundamentally, that is a message to most Americans that they cannot control their own destiny. Except for the very rich in our society, the average American can't assure a better life without a Government which provides a way to build a real and brighter tomorrow.

There are some things individuals simply cannot do—and that indeed can be done better by an efficient, effective Government. Was there any way to clean up the air or water before the Clean Air and Clean Water Acts? Was there adequate care for the elderly before medicare? Was there any financial assurance for senior citizens before social security? Was there any way to prevent hungry and malnourished children before the school lunch program and food stamps?

You know that the answer to each and every one of those questions is "no". And you and I know that the Republicans really have no good alternative except to complain that the Government should not be doing these things at all.

This ideologically-driven administration is tied up in knots by its own philosophy. It wants to make Government disappear even if the problems remain. It leaves itself no flexibility to find workable solutions. The current fascination with doing nothing will wear off, I predict, when we fully realize there is much that still must be done.

As Hubert Humphrey said:

"The moral test of Government is how it treats those who are in the dawn of life, the children; those who are in the twilight of life, the aged; and those who are in the shadows of life, the sick, the needy and the handicapped."

We share the vision of Hubert Humphrey. We reject the vision of Jesse Helms.

I stand here today and tell you that the Democratic Party is looking to the future. We are aggressively seeking out solutions to those issues that are going to matter most in the coming years. Just yesterday, Democrats on the House Budget Committee proposed an alternative approach to our Nation's economic challenges. The debate on the budget will demonstrate that there are real ways to make Government more efficient, to fight inflation, and to rebuild our economy.

The American people are fair. They are intelligent. They are pragmatic. The American people are going to ask in time whether this administration's real agenda serves their interest. I know what the answer will be. As a great Republican President once said, "You cannot fool all of the people all of the time." Their answer will be a resounding "no".

And when they make that decision, the political tide will change, and indeed, change in our direction.

Thank goodness.

And thank you.●

KEN CORY—1981 HISTADRUT AWARD HONOREE

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. PATTERSON. Mr. Speaker, it is with great pleasure that I ask my colleagues to join with me in recognizing Mr. Ken Cory, the Orange County Trade Union Council's 1981 Histadrut Award honoree.

Histadrut is an award presented each year to outstanding men and women of the labor community who exemplify a spirit of brotherhood and friendship toward the nation of Israel. Funds raised through Histadrut are people-to-people funds and are targeted directly to specific health, education, social, and cultural exchange programs.

Ken Cory, one of this year's two Histadrut recipients, has had a long and distinguished career as a public servant on behalf of the people of Orange County and the State of California. During his tenure as a State assemblyman, Ken was known as a friend of working men and women, a protector of consumer rights, and an advocate for public education. Now in his second term as State controller, Ken has continued to champion the cause of taxpayers and consumers.

Mr. Speaker, in presenting this year's Histadrut award to Ken Cory, the Orange County Trades Council recognizes a man of the highest integrity, and personal commitment to the service of his community. Through Ken's efforts the quality of life for all Californians has been made better.

It is, therefore, an honor to ask my colleagues to join with me in congratulating Ken Cory—an outstanding man of labor and a dedicated public servant—as the 1981 Histadrut Award honoree.●

SOCIAL SECURITY BANKRUPTCY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. McDONALD. Mr. Speaker, the present social security system can be identified at this time as wed with bankruptcy. Not only is this program's mismanagement and fraud perpetrated by the Congress of these United States going to cheat and irreparably injure many older Americans who have spent their lives paying into the system, but it is going to catapult the entire Government into bankruptcy as well.

The following excerpt from "The Ruff Times," April 1, 1981, by Howard J. Ruff, explains the crisis quite clearly. I commend it to the attention of my colleagues:

Welfare is money taken from one person and given to another. If you are retired, money was taken from your paycheck and given to people who were then receiving Social Security. Because of that, you feel it's right to take the money from present workers to give to you when you retire. Why don't you feel that way about all other taxes? (Maybe that's not such a bad idea.)

Here are the facts of life. This program, if sold as an insurance plan by private enterprise, would have its perpetrators in jail. The Social Security plan was a hoax and a fraud from its very beginning. Sometime in the Inflationary Eighties, the total money you will be paid from the Social Security System in one year will grossly exceed the total amount of all contributions you made during your lifetime. Where will all the extra money come from?

If you can't refute the following facts, you will have to agree with me.

1. There is no solution to the Social Security problem without limiting benefits to only those who need them. It needs far more money than it can collect, and your contribution has already been poured down the Federal rathole.

2. There is no trust fund, only government IOU's—promises to print money. When the money is printed, it dilutes the savings and purchasing power of every American. It (inflation) will take an avalanche of new money to meet all commitments if everyone accepts their check. If they do, where does the money come from?

The head of the US Social Security was recently asked if it were true that the Social Security System was in financial trouble. His reply was. "No! As long as Congress has the power to continue raising taxes, the Social Security System is in no danger." A more honest answer is, as long as the government has the power to print money, the Social Security System will not go broke. The money, however, will go broke.

3. $7½ trillion will be paid to Social Security recipients, at present payment levels, over and above that which is collected in FICA taxes from those same people, even with no inflation assumptions. That is more than the value of everything that everyone in American owns. Where will the money come from?

4. If the government merely indexes payments to keep them even with inflation, which it has done throughout the life of the program, the printing presses will have to run full time and then some, guaranteeing a ruinous inflation.

5. You did not "pay into the Social Security System." You paid into the Treasury General Fund. The government promised to give you that money back. They never intended to. They intended to print new money, or rip it off from future workers. They didn't keep it safe and secure and invest it for you. They spent it. This is a massive chain letter. You put your name on the bottom of the list and send your money to the guy at the top and hope that enough suckers will come in at the bottom so that you will receive yours when you get to the top.

I don't question that Social Security payments have benefited many millions of older people. Government CAN solve problems with money. But what about the cost of those solutions that will be borne by future generations? The Social Security people admit this by using such euphemisms as "the pact between the generations" to sugarcoat the fact that Social Security is not a contract with yourself, but a contract with later generations to pay you, as you have paid the previous generation. The core of the problem is that they promised you more than they will collect from you, more than can be collected from future workers, and more than can be paid without printing trillions of new dollars.

That's all wonderfully idealistic, but they are being kind at the expense of the collapse of the monetary system. The time will come when you will get $100,000 a year in Social Security benefits—but it won't be enough to live on!

You can argue all you want about how unjust it would be not to receive back money after having put money in. That is the essence of my point. It is immoral to promise that you can take out more money than you put in, yet that is precisely what happens, as payments are indexed to higher inflation.

There is a place in our society for taking care of those who cannot take care of themselves, but there is no place in my catalogue of moral positions for destroying the currency to pay those who do not need it.

We have shoved the bill for payment for this monstrosity onto our children and grandchildren, a form of "taxation without representation." Is that moral?

1. Slash the benefits. Bring outgo down to income.

2. Expand the economy several times faster, and increase the birthrate to provide more patsies to rip-off. That, of course, is impossible.

3. Print money, bringing the monetary system, Social Security, and everything else crashing down around our ears. That is the inevitable choice.

I am trying to be a realist. Many of our subscribers are not realistic about this emotional issue, mostly because they don't understand. Ignorance is deadly, as ignorance has brought our nation to its present precarious position.

The increases in Social Security payments will offset more than tenfold every Reagan budget cut. It is beyond and outside his control.

So, there you are folks. If Reagan gets his whole program, and then some (and his injury may increase the chances he will, just based on sympathy), it will only temporarily slow the rate of inflation below that which we would have had under Carter. Increased inflation will probably not take off before the fourth quarter of 1981, or possibly sometime next year, because of the recession and the slight slowing of the rate of increase in the federal budget.●

TAX CREDIT BILL

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. DINGELL. Mr. Speaker, I introduced a bill in the 96th Congress, H.R. 264, to correct an inadvertent omission in the 1978 National Energy Tax Act. My bill, which was subsequently cosponsored by 37 other Members, would have substantially benefited our Nation's energy conservation efforts and helped relieve the high energy cost burdens for millions of Americans. The Senate saw the wisdom of that bill and voted to insert its objective into the 1980 Crude Oil Windfall Profit Tax Act. However, it was comingled with other features and the conferees, in revising the windfall profit tax bill, dropped the objective of my bill.

Since I believe that that objective is sound, and should be again considered on its own merits, I am introducing it now. I invite other Members to cosponsor it and to help seek its early consideration and enactment. Please notify my office of your desire to cosponsor the bill.

BACKGROUND AND PURPOSE OF BILL

The National Energy Tax Act of November 9, 1978, Public Law 95-618, provided a 15-percent tax credit for expenditures on energy conservation measures, such as insulation, storm windows and doors, and so forth, up to $300 credit for a maximum expenditure of $2,000. The Congress in 1978 clearly intended, as shown by the conference report on that act (H. Rept. 95-1773, pp. 42, 43), that "owners and renters would be eligible for the credit." That credit applied to residences constructed prior to April 20, 1977, and was intended to provide an economic tax incentive to millions of people to insulate their homes.

However, the 1978 act imposed a condition that the residential unit on which the taxpayer made those expenditures must be the taxpayer's "principal residence." The taxpayer could receive the tax credit for making such insulation expenditures in his or her principal residence regardless of whether the taxpayer is the landlord or the tenant.

But that condition overlooked a real economic fact of life—namely—very few tenants would spend up to $2,000 to insulate a residence owned by someone else, just to get a tax credit of $300 or less.

Furthermore, the landlord would not get a tax credit for making energy conservation expenditures on a dwelling occupied by a tenant, because the dwelling would not be the landlord's principal residence.

Hence, the net effect of that condition is to eliminate the tax credit incentive that Congress intended for encouraging insulation of millions of homes occupied by tenants.

From an energy conservation point of view, it makes no difference whether 10 taxpayers spend $20,000 for energy conservation measures and receive $3,000 tax credit for 10 residences which are the principal residences for each of them—or whether the same amount of money is spent for the same kind of energy conservation measures and the same amount of tax credit received, by one taxpayer, for the same number of dwellings which are the principal residences of 10 different persons or families. And when the 10 residences are insulated, the total amount of the tax credits, and the reduction in tax revenues, are precisely the same in both cases.

My bill would allow the energy credit for every residential unit in which the taxpayer installs energy conservation measures, even though it is not his or her principal residence, so long as it is the principal residence of someone. The bill would thus provide the same tax incentive for insulating residences that Congress intended in the 1978 act, but with the assurance that every dwelling, whether occupied by the owner or by a tenant, will be within the coverage of the tax incentive, both legally and realistically.

This objective was adopted by the Senate when it amended section 201 of the Crude Oil Windfall Profit Tax Act, H.R. 3919, 96th Congress. But the Senate amendment went further. It abolished the principal residence requirement, in order to make the tax credit available for vacation homes, and so forth.

My bill retains the "principal residence" requirement because I believe, in view of the great demand for insulation materials, that it would be more cost-effective to encourage insulation of year-around residences than vaca-

tion and temporary residences, at least until the demand for insulation materials abates. But I see no justification for distinguishing between year-around residences occupied by owners, and year-around residences occupied by tenants as their principal residences.

Of course, my bill also provides that no taxpayer can secure double tax credits by virtue of the energy conservation tax credit provisions and the existing investment credit provisions of the Internal Revenue Code.

I made only one change in my bill. In the 96th Congress, it would have applied to residences constructed before April 20, 1977. Because of the general 3-year rule on amending tax returns, and in light of the considerable publicity accorded to my bill when it was introduced in January 1979, I have revised my present bill to apply to expenditures made on such residences after December 31, 1978.●

INTRODUCTION OF LEGISLATION REPEALING STANDARD 208

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. COLLINS of Texas. Mr. Speaker, today I am introducing legislation which would direct the Secretary of Transportation to repeal the Department's current regulation requiring the installation of passive occupant restraint systems.

During the last administration, the National Highway Traffic Safety Administration issued a regulation, Motor Vehicle Safety Standard 208, which would require automobile manufacturers to begin installing either airbags or automatic seatbelts in cars. The regulation requires installation of these restraint systems in large cars beginning in model year 1982, intermediate cars in model year 1983, and small cars in model year 1984. Since most large and intermediate size cars are manufactured by domestic companies, this implementation schedule means that manufacturers will have to install this equipment in their production several years before foreign manufacturers will be required to do so. Since the public has shown little or no interest in buying either passive belts or airbags, domestic manufacturers will be placed at a significant competitive disadvantage because of the implementation schedule.

Virtually everyone acknowledges that seatbelts, if worn, provide a good margin of safety in automobile accidents. The problem, of course, is getting people to buckle up. NHTSA proposes to solve this problem by requiring the installation of very questionable equipment. At the present time there are only two ways to comply with the standard.

First, the standard can be met by installation of passive seat belts; that is, the kind that automatically wrap around the occupant when he or she enters the automobile. These seatbelts are uncomfortable and inconvient, and General Motors' experience with them indicates that consumers may will tend to cut them out rather than having to deal with the inconvenience inherent with these kinds of seatbelts. If this is indeed true, the consumer is left with no protection at all. Further, passive belts cannot be installed on automobiles with bench-type front seats.

Second, an automobile could comply if equipped with airbags. Many Members will recall that the merits of airbags have been hotly debated in their Chamber on a number of occasions in the last few years, and this body has rejected airbags time and again. Still the agency insists on imposing this equipment—of questionable effectiveness and high cost—on the American consumer.

In 1979, the General Accounting Office submitted a report to Congress highly critical of the NHTSA's passive restraint program. Among other things, the GAO concluded that "the extent of the systems' effectiveness needs to be evaluated * * *"; that tests indicate "a potential danger from a deploying airbag for out-of-position occupants"; and that the EPA and the Department of Labor "need to assign high priority to sodium azide research." Sodium azide is the propellant used to inflate the bag. In the 18 months since that report was issued, the debate has raged on, but the research has not been done.

Further, the price tag on this untested equipment is not low. When the DOT regulations were first proposed in 1977, the agency estimated the unit cost of each airbag installation to be $112. The automakers disputed this figure. According to the recent GAO report on the airbag, the NHTSA estimate was based on assumptions that were not realistic. In fact, NHTSA manipulated industry cost estimates to arrive at its unreasonably low original estimate by leaving out vital systems to protect against accidental detonation.

Since 1977, the manufacturers have gained further experience in the engineering and design of the airbag systems that will actually be installed on mass production vehicles. Both GM and Ford now estimate airbag installation costs ranging from $600 to $850 per vehicle. And replacement after detonation would cost 2½ times the initial installation—well over $1,500.

Not only are airbags not fully tested and high in price, the traffic safety implication of bags is not clear. Airbags protect occupants only in frontal impacts. Frontal crashes, however, comprise less than 50 percent of fatal crashes, but the key is that the occupant has to be in the correct position for the airbag to be fully effective.

I want to remind my colleagues that the airbag affords no protection to front seat occupants when the crash involves a side collision, sideswipe, rear-end collision, or the rollover crash. Safety belts, I point out, protect occupants in all crash modes and offer continued security in second or third impacts after the airbag has deflated.

Crash test experts have raised serious questions about the effectiveness of airbags if the occupant is out of position, and particularly children, who, from my experience, are never in the correct position unless they are in the back seat and buckled in with the belts. Few children are in the safe position and belted in. Not only do airbags not protect out-of-position occupants and children, but the GAO investigations, referred to above, found that they could actually be life threatening, especially to children.

The GAO report contains some very disturbing results of tests run by General Motors, using young pigs as substitutes for children in airbag tests. The pigs were strapped in various positions that children are likely to be in. Apparently, a significant number (about 30 percent) of these pigs were killed due to internal injuries caused by the airbags hitting the abdomens of these animals, causing severe liver damage.

Over the last 4 years, NHTSA has made it high priority to get airbags into automobiles. But there are other techniques for reducing accident fatalities, such as road safety improvements, driver training improvements, increased enforcement of drunken driving and other traffic safety laws, and bridge reconstruction, to name just a few. This safety standard is just another example of the Government trying to provide individuals with more protection than they really need or want. Seatbelts are available in automobiles, and I am not suggesting that the manufacturer be allowed to remove them. If the consumer wishes to wear his seatbelt, it should be available for him. Further, I believe that the NHTSA should do a much more complete job of educating people as to why they should buckle up. If the Government had spent as much money to educate consumers on seatbelt use as it has on developing this standard, many thousands of lives would have been saved, and there would be absolutely no need to pursue the requirement that passive restraint systems be installed in motor vehicles.

The passive restraint provision in Motor Vehicle Safety Standard 208 is a nonsensical regulation. It should be

repealed. My legislation would do that, and I hope you will join me in supporting this bill.●

THE LIES OF HISTORY

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. McDONALD. Mr. Speaker, in criminal jargon, with regard to a criminal act, it becomes a conspiracy when two or more people plot to inflict that criminal act upon an individual, groups, a nation, or even the world at large. The more victims involved, the more heinous the crime.

I have always believed, in studying history, that there were conspiratorial forces at work, that led to the deaths of hundreds of thousands, if not millions, in both World Wars I and II. One need only read "The Final Secret of Pearl Harbor," by Adm. Robert A. Theobald, with introductions by Admirals Halsey and Kimmel to find out if we were deliberately brought into World War II. Then, after a period of almost 60 years, in 1973, Colin Simpson gave us the definitive exposé of what, who, where, and why America was brought into World War I. The title of his book, simply, "Lusitania."

I leave it to my colleagues to note the amazing similiarities, such as the breaking of the German code before World War I and the breaking of the Japanese code prior to World War II, and discern for themselves, whether a conspiracy existed.

One aspect of the sinking of the *Lusitania*, to psychologically condition the American people that the Germans had acted as barbarians in sinking the *Lusitania*, was the fact, later proved a lie, that the German Government had cast a commemorative medal for distribution to the German Navy and the public in general, to symbolize the greatness of the German nation.

The medal was even listed in volume XXIX, No. 5, May 1916 of the Numismatist, as having been struck on May 5, 1915, with the inscription indicating that "No Contraband," meaning no ammunition was on board the *Lusitania*. Nothing could be further from the truth.

The fact of the matter is, the *Lusitania* was sunk on May 7 and not May 5. Another falsehood perpetrated on the American people, was that the *Lusitania* was not carrying war materiel. Americans were under the impression that the *Lusitania* was a pleasure ship. And yet, the British Admiralty openly designated the *Lusitania* as a ship of war, and in fact, was carrying tons of ammunition.

To add more to "Lusitania," written by Colin Simpson, and mentioned earlier, I urge my colleagues to now read another chapter of verification as to the lies of history. The title of this chapter, which is XXI is simply, "The Lusitania." It is from the book, "Falsehood In War-Time," by Arthur Ponsonby, a member of the British Parliament in the year the book was published—1928. The chapter follows:

FALSEHOOD IN WAR-TIME

(By Arthur Ponsonby, M.P.)

XXI. THE "LUSITANIA"

The sinking of the *Lusitania* was a hideous tragedy and one of the most terrible examples of the barbarity of modern warfare, but, from the point of view of suffering and loss of life, was not to be compared with many other episodes in the war. The very crucial political significance of the catastrophe, however, gave it special propaganda value in inflaming popular indignation, specially in America. Here obviously was the necessary lever at last to bring America into the war. That Germany should not have recognized that this would be the result of such action on her part was one of the many illustrations of her total inability to grasp the psychology of other peoples.

From the point of view of propaganda it was necessary to show that the Germans had blown up a defenceless passenger ship flying the American flag and bearing only civilian passengers and an ordinary cargo. This was represented as a breach of international law and an act of piracy. The unsuccessful attempt to suppress certain facts which emerged leads naturally to the conclusion that other attempts were successful. No inquiry, such as the Mersey inquiry, conducted in war-time with regard to the action of the enemy, can in such circumstances be regarded as conclusive.

The whole truth with regard to the sinking of the *Lusitania* will probably never be cleared up. Four points may be considered here:

(a) Whether she was armed.

(b) Whether she was carrying Canadian troops.

(c) Whether she had munitions on board.

(d) Whether a medal was issued in Germany to commemorate the sinking of the *Lusitania*.

(a) On this point there was a conflict of evidence.

The *Lusitania* was registèred as an auxiliary cruiser. The Germans declared she was carrying concealed guns. This was categorically denied by the captain in the inquiry. "She had no weapons of offence or defence and no masked guns." Lord Mersey therefore found this charge to be untrue.

(b) The same may be said about the charge made by the Germans that she was transporting Canadian troops.

(c) These two denials would be readily acceptable, were it not for the fact that at first a denial and then a suppression of the fact she was carrying munitions was attempted.

"It is equally untrue that the *Lusitania* was carrying ammunition on its final voyage."—Daily Express, May 11, 1915.

In America there was a threat to expel Senator La Follette from the Senate because he had stated that the *Lusitania* carried munitions. But Mr. Dudley Field Malone, collector at the port of New York, confirmed this charge as true.

"D. F. Malone revealed that the *Lusitania* carried large quantities of ammunition consigned to the British Government, including 4,200 cases of Springfield cartridges. The Wilson administration refused to permit the publication of the fact. One of the principal charges upon which the attempt to expel R. M. La Follette from the Senate was based was that he had falsely declared that the *Lusitania* carried ammunition, and the prosecution of the Senator was dropped when Mr. Malone offered to testify on his behalf."—The Nation (New York), November 20, 1920.

It was eventually admitted that the *Lusitania* carried 5,400 cases of ammunition. The captain at the inquest at Kinsale said: "There was a second report, but that might possibly have been an internal explosion." The foreman of the Queenstown jury protested that all the victims were not drowned. "I have seen many of the bodies, and the people were killed; they were blown to pieces."

The ship sank in eighteen minutes, which accounted for the loss of so many lives. The Germans, in their reply to the American note, referred to this point and stated:

"It is impossible to decide, for instance, the question whether the necessary opportunity was given to the passengers and crew to escape, until it has been determined whether or not the *Lusitania* provided bulkheads and boats as ordered by the *Titanic* Conference for corresponding emergencies in peace-time, and whether or not ammunition or explosives carried in defiance of the American laws accelerated the sinking of the ship, which might otherwise have been expected either to get out the boats safely or reach the coast.

"Included in her cargo was a small consignment of rifle ammunition and shrapnel shells weighing about 173 tons. Warnings that the vessel would be sunk, afterwards traced to the German Government, were circulated in New York before she sailed"—The World Crisis, by the Right Hon. Winston Churchill, M.P.

(d) The event having been condemned as a barbarous act of piracy, it became necessary to show that the Germans gloried in it.

The first rumour was that a special medal had been bestowed on the crew of the U-boat which sunk the *Lusitania* as a reward for gallantry. This was dropped when the medal turned out to be a commemoration medal, not a decoration.

It was then stated that the German Government had had a medal struck in commemoration of the event, but after the armistice had it withdrawn from circulation. In 1919 it was found in a shop in Berlin. In 1920 a traveller in Berlin, Frankfurt, and other parts of Germany could find no one who had ever heard of it or seen it, whereas in England the medals were well known and very easily obtained. It turned out that the medal was originally designed in Munich by a man of the name of Goetz and represents the *Lusitania* as carrying arms. Goetz may be described as a cartoonist in metal; his work was not official, and his *Lusitania* medal had a very limited circulation. Few Germans appear to have heard of its existence. The large number of casts of the medal, which gave the impression here that they must be as common as pence in Germany, was explained by Lord Newton, who was in charge of propaganda at the Foreign Office in 1916.

"I asked a West End store if they could undertake the reproduction of it for propaganda purposes. They agreed to do so, and the medals were sold all over the world in neutral countries, especially in America and South America. After some initial difficulty

a great success was achieved. I believe it to have been one of the best pieces of propaganda."—Evening Standard, November 1, 1926.

The Honorary Secretary of the *Lusitania* Medal Committee stated that 250,000 of the medals were sold, and the proceeds were given to the Red Cross and St. Dunstan's. Each medal was enclosed in a box on which it was stated that the medals were replicas of the medal distributed in Germany "to commemorate the sinking of the *Lusitania.*" but many of them in England could be purchased without any box.

In addition to the medal, leaflets were circulated with pictures of the medal. In one case in Sweden a sentence was printed from the Kölnische Völkszeitung: "We regard with joyous pride this newest exploit of our fleet." This sentence had been torn from its context, and had been originally used in quite another connection.

It therefore became clear that:

(1) No medal was given to the crew of the German U-boat.

(2) No medal was struck in commemoration of the event by the German Government.

(3) The German Government could not have withdrawn a medal it never issued.

(4) A metal-worker in Munich designed the medal, which was always rare in Germany.

(5) The large number of medals in circulation was due to the reproduction of Goetz's medal in Great Britain.

The propaganda value of the medal was great, as Lord Newton admitted. The impression it created was absolutely and intentionally false.●

SPARE THE BUDGET AX FOR HANDICAPPED STUDENTS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. WALGREN. Mr. Speaker, as the House Budget Committee begins its work on the 1981 and 1982 budget, I have written the committee urging that they disapprove the proposed 25-percent rescission in funds for education of handicapped students, as authorized by Public Law 94-142. I believe that the failure to adequately fund this important program would represent a reneging of the commitment this and previous Congresses made to these special students.

When the Congress enacted Public Law 94-142 in 1975, we placed in law not only our commitment to help provide a free appropriate education for all handicapped students ages 3 to 21, we also reaffirmed our view that handicapped students have a right to equal educational opportunity. Public Law 94-142 offers important protections that we must continue to support. The law authorizes services to the handicapped at a level of 40 percent of the cost of education for nonhandicapped students. Yet Federal dollars—appropriations—have not begun to reach this level. Last year the appropriation of $922 million represented only 12 percent of the cost. In Pennsylvania, like other Northeast States, the Federal contribution is only 4 percent because the cost of special education is higher than other regions of the country.

The Council for Exceptional Children has documented that though we have identified and are serving an increasing number of handicapped students, there are many who are still unserved, particularly children in our cities, rural areas, migrant communities, and correctional institutions. There are waiting lists for children needing evaluation, particularly children with possible learning disabilities and emotional disturbances. In my district in Allegheny County, there are 250 to 300 learning disabled children waiting to be evaluated.

This is a unique program. Funding for this program, unlike many others, goes to the heart of the classroom. These funds are used for learning. They teach children how to talk, how to read, how to write.

Importantly, funds under this program go primarily to local schools, public and private. If we cut this program, we will see more and more students being institutionalized. In the current year, the Federal Government is contributing $200 per year per child. The cost of institutionalizing a child would range from $10,000 to $20,000. Many of these bills would be paid by other Federal programs—SSI, medicare and medicaid. Continuing to support Public Law 94-142 will be cost effective for the taxpayer—not to mention the value of opening doors in our schools for our disabled students.

Finally, I would like to point out that the Education of All Handicapped Children Act has a long bipartisan history. Aspects of the program are over 20 years old. It was a bipartisan effort that started the program and a bipartisan effort that modified it over the years. Congress took the initiative. Congress must sustain the momentum.

For these reasons, I have urged the committee to oppose any cuts in the program. We cannot back off from our commitment to those to whom we have made this important promise.●

GOSHEN HISTORIC TRACK BILL

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. GILMAN. Mr. Speaker, I am introducing today a bill which would direct the Secretary of the Interior of the United States to conduct a study to determine the most appropriate means of protecting the Goshen Historic Track in Goshen, N.Y.

Pursuant to this legislation, the Secretary will examine the feasibility of entering into cooperative agreements with the owners of the track to insure its preservation, purchasing all or a portion of the track for inclusion in the national park system for recreational and educational uses, and such other means of preserving the track as the Secretary may determine to be appropriate.

Mr. Speaker, I have been vitally interested in the future of the Goshen Historic Track for quite some time. This historic site is currently undergoing severe financial difficulties, and unless the Government steps in to preserve this vital part of our heritage, this resource will be lost to us forever.

The Goshen Historic Track was the site where harness racing, one of the oldest and one of the most popular spectator sports in America, first began. The track came into existance in 1838, and has been in continuous operation since then. In 1951, the Hall of Fame of the Trotter was established at the track and remains a tourist attraction to this day.

The 21-acre site of the track has been on the National Register of Historic Places since 1967.

Mr. Speaker, too often in this great Nation of ours, we have been penny wise and pound foolish in regard to our historic heritage. It is far more difficult for the United States to chart where we are going when we are not sure where we have been. It is incumbent upon us to strive to preserve for our children and for our grandchildren sites of importance to our heritage such as the Goshen Historic Track. A historic site is one resource which cannot be replaced once it is lost. I am hopeful that my colleagues will join with me in helping to save the Goshen Historic Track.

Mr. Speaker, for my colleagues information, I am inserting at this point in the RECORD, the full text of this proposed legislation.

H.R. —

A bill to authorize the Secretary of the Interior to conduct a study to determine the manner in which the area known as the Goshen Historic Track in Goshen, New York, can be protected

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Interior shall conduct a study to determine the most appropriate means of protecting the Goshen Historic Track in Goshen, New York. The Secretary shall examine the feasibility of—

(1) entering into cooperative agreements with the owners of the Track to insure its preservation;

(2) purchasing all or a portion of the Track for inclusion in the National Park System for recreational and educational uses; and

(3) such other means of preserving the Track as the Secretary may determine to be appropriate.

(b) The area referred to in subsection (a) as the Goshen Historic Track is the area of approximately 21 acres, situated within

Goshen, New York, which is bounded on the north by Orange Avenue, on the south by South Church Street, on the west by Main Street, and on the East by Park Way.

SEC. 2. There is authorized to be appropriated to carry out this Act such sums as may be necessary for fiscal year 1982.●

THE 208 STANDARD

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HILLIS. Mr. Speaker, I am today introducing a bill with 15 cosponsors which will change the schedule of compliance of the motor vehicle occupant restraint safety standard—the 208 standard as it is known—so that all passenger cars, foreign and domestic, large and small, will have to meet the standard in the same year—1984.

The 208 standard was first issued in 1977 under the authority given to the Department of Transportation by the National Traffic and Motor Vehicle Safety Act. The standard required large cars, beginning in model year 1982, to be equipped with some form of passive restraint, either airbags or automatic seatbelts. In 1983, intermediate and compact cars would be required to meet the standard; and in 1984, small cars would be included.

On Monday of this week (April 6), the Department of Transportation announced its intention to change the 208 standard schedule so that large cars would not have to meet the passive restraint requirement until 1983. The schedule for intermediate, compact, and small cars will be unchanged under the DOT announcement.

While we believe the new schedule by DOT is a step in the right direction, we do not feel it goes far enough. The bill we are introducing today would apply the 208 standard to all cars equally with compliance mandated in 1984.

Our bill has several advantages over the present 208 schedule. It provides substantial cost savings to consumers and manufacturers by making the new effective model year 1984. The Department of Transportation has estimated that just a 1-year deferral of the effective date for large cars would save the consumers of America between $50 and $70 million and further would save manufacturers between $31 and $43 million. The Secretary's cost analysis is based on an auto sales production model year of 1 million units of large-sized passenger vehicles equipped with the less expensive automatic belts in each car.

Under our bill, the savings to consumers and manufacturers would be substantially higher than those indicated by the Secretary's action of delaying compliance of large cars by only 1 year. By delaying compliance of large cars by 2 years, and intermediate and compact cars by 1 year, the savings would be considerably higher. These savings would assist in the rejuvenation of the domestic industry, provide manufacturers additional capital for retooling, and assist modernization efforts that are so desperately needed in the next few years.

Another advantage offered by our bill would be to improve the competitiveness of American-made cars with imports.

Since most imports would not fall under the 208 standard until 1984, the present schedule would give most imports a price advantage of perhaps several hundreds of dollars per car for one full model year over large, intermediate, and compact U.S.-made cars. With imports already capturing over 20 percent of the U.S. market, such an advantage would no doubt further contribute to the deterioration of the U.S. industry.

We are all aware of the controversy caused by the 208 standard. This is an issue which has been before the House on numerous occasions. However, it has never been resolved to the satisfaction of many Members. We believe the bill we are introducing today will lay the issue to rest once and for all. It continues to mandate the increased safety provided by passive restraints while addressing the concerns and needs of domestic manufacturers. This legislation is the most sensible and reasonable approach to problems of passive restraints yet introduced.

The domestic manufacturers have suffered a $4 billion loss in 1980 while facing the ongoing expensive changeover to small car production. The nationwide economic cyclical downturn, coupled with the loss of market shares to imported cars, especially Japanese manufacturers, have left the future of the U.S. auto industry in doubt. Therefore, the Energy and Commerce Committee, and particularly the Subcommittee on Telecommunications, Consumer Protection, and Finance, should hold hearings on the bill as soon as possible.●

NICARAGUA CUTOFF WARRANTED

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. SOLOMON. Mr. Speaker, on Thursday, April 2, I was engaged in a discussion over the merits on the administration's cutoff of aid to Nicaragua, and challenged by two of my collegues to come up with the hard evidence that the Nicaraguans were intimately involved in the flow of weapons and guerrillas into El Salvador. That evidence is contained in a briefing report issued by the State Department on February 23, 1981—Special Report No. 80. It would be too costly to reprint here, but I would like to assure my colleagues that such evidence does exist, and that I have sent copies to the two colleagues with which I had the discussion.

And while I am on the subject of the merits of continuing aid to Nicaragua, I would like to offer the following editorial which appeared in the Albany Times-Union on April 6, 1981. As this article points out, not only is Nicaragua involved in the instigation of leftist violence throughout Latin America, but the ruling Sandinistas have quickly become the most flagrant violators of human rights in the region.

The article follows:

BUSIEST PRISON

Human rights critics obsessed with the imperfections of El Salvador and Guatemala apparently haven't noticed that revolutionary Nicaragua has become, for its size, the pre-eminent jailer of political prisoners in Latin America.

At last count—compiled by Juan Esteban Gonzalez, director of Nicaragua's church-sponsored Human Rights Commission—the neo-Marxists Sandinista government was holding some 8,000 political prisoners.

By contrast, the rightist government of Chile, long a ritual punching bag for Latin leftists and American liberals, is currently detaining something less than 100 persons who might reasonably be considered political prisoners.

Of those imprisoned by the Sandinistas, about 6,500 are former members of the Nicaraguan National Guard that was disbanded by the new government after the overthrow of the late Anastasio Somoza in July 1979.

The Sandinistas had promised that all National Guardsmen would be released within a matter of months pending a routine screening process to identify guardsmen suspected of "war crimes" committed during the Nicaraguan civil war. Those assurances, made in August and September of 1979, have proved worthless.

The remaining 1,500 political prisoners are civilians arrested since the Sandinista takeover. They include some supporters of the Somoza regime, but also Social Democrats, other moderates, and persons bold enough to have publicly criticized the Sandinista's increasingly Marxist tilt.

For their pains, these dissidents have been incarcerated without trials in a network of 20 or so political prisons, four of which are located in the capital city of Managua.

The details of these and other human rights abuses, including documented cases of torture and execution, were pieced together by Nicaragua's Human Rights Commission, the same body that had earlier vociferously criticized the Somoza regime.

But even at the height of his power, Somoza had never dared to close down the commission or confiscate its painstakingly collected files.

The Sandinistas recently did just that, and without causing so much as a ripple in most of the Western press.●

BANKRUPTCY OF THE U.S. GOVERNMENT DEFINED

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. McDONALD. Mr. Speaker, a classic case of bankruptcy is defined when your debts exceed your ability to pay those debts. This is in fact where we are headed in this decade even if we pass Mr. Reagan's present budget proposal. Robert Kinsman succinctly and graphically explains this in this "Low Risk Advisory Letter," published March 6, 1981. Howard J. Ruff reprinted the explanation in the Ruff Times, April 1, 1981. I strongly recommend my colleagues read the selection. The article follows:

INTEREST ON THE NATIONAL DEBT, PUBLIC AND PRIVATE

At the beginning of this year, with the total federal government debt running about $930 billion, the interest payments alone were projected for the year at just over $93 billion (10.1 percent). Remember, that's interest alone.

Now, if there is no increase in the federal debt, except for accrued interest on it and interest rates on it don't increase at all (an impossibility since even Reagan is projecting a debt increase of $125 billion by fiscal year 1984), the interest payments alone will increase to over $185 billion per year by the spring of 1988. (This still understates the problem, as it makes very low inflation assumptions. HJR)

I realize that these numbers are so large we can't grasp them fully. But, perhaps this will help. The total currency in circulation in the U.S. right now is just under $132 billion. If the government had to use cold cash to pay the debt interest this year, it would use up 70 percent of the greenbacks in circulation! By 1988, it will need 40 percent more than the cash now available. Fortunately for the government (and unfortunately for us), the debt interest is paid by credits to bank accounts which involves a broader definition of money than just currency. The money is inflated, even without printing it.

The government debt is just a goodly fraction of the total debt of the nation. That figure totals $4.3 trillion now. And the interest on it is above $430 billion per year. That amount is more than the definition of total current U.S. money supply known as M1B ($418.5 billion).

In other words, if all of M1B was used to pay the interest on the debt in the country, we'd still come up short.

Now, are you ready for this? Without paying off some of that debt, and again assuming no increase in it except for the borrowed interest, and assuming a constant interest rate paid on the debt, the interest alone on the total debt will double to at least $860 billion per year by 1988. Most importantly, if the Fed doesn't increase our total liquidity (L, in their definition), by then we'll be using more than $1 of every $3 available in the country to pay that interest! (We're already using $1 of every $5.)

The Reagan program will have no effect on the numbers I've quoted, because it doesn't approach a balanced budget until 1984, and that's what's required to alter these figures. Without it (a balanced budget), the government corporations, municipalities, and you and I have to borrow to pay debt interest. That's what causes those figures to explode.

It is now certain that we'll have the same basic risks to our investments that we've had for the past couple of years: a collapse of the credit markets due to government borrowing, a runaway inflation, or a collapse of the debt, known as a depression.

The reason I say that we're still facing disaster risks, and believe that they'll be with us for another couple of years, at least, is a derivation of the above numbers. The way that the Fed has staved off disaster thus far is to monetize part of the debt: print more money. That is the irresistible temptation to avoid the ultimate disaster—a debt collapse followed by an economic collapse. The new money partly pays the interest on the debt. In the five years through 1980, the federal debt was up 61 percent, but total money available, liquidity (L), was up 71 percent.

The Fed will have to resort to a similar plan over the next several years, no matter what it says it will do. It cannot allow the debt or the interest on it to rise more rapidly than it can be financed. That means more money printing. That means more inflation. The financial roller coaster is still running. That means more of the same problems we've had.

The only way to postpone the day of reckoning on that kind of debt is to print money or create money through the banking system. We have lots of wild and wonderful ways of manufacturing money other than printing it and, if necessary, I am sure we will come up with other ways of creating money using good old American ingenuity and know-how.

Just remember that figure—by 1988 $860 billion will be required just to service our debt. That money when pumped out by the Federal Reserve guarantees a wild runaway hyperinflation. The only other alternative is a repudiation of debt and a refusal on the part of government and other debtors to pay interest. That will not be permitted to happen. People who don't make interest payments can't borrow again. They must inflate or die, and they will inflate.●

JAMAICA

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. LAGOMARSINO. Mr. Speaker, I wish to call to the attention of my colleagues the following article on Jamaica prepared by Alexander Kruger, policy analyst for the Heritage Foundation.

Excerpts from his study entitled "Jamaica After the Elections: Opportunity for Economic Recovery" follow:

JAMAICA AFTER THE ELECTIONS: OPPORTUNITY FOR ECONOMIC RECOVERY

INTRODUCTION

On August 6, 1962, the day Jamaica achieved its independence from Britain, the country's first Prime Minister, Alexander Bustamante, announced "the irrevocable decision that Jamaica stands with the West and the United States." This irrevocable decision held true for one decade (1962-1972), the most prosperous decade in the island's history. During this period, Jamaica became an attractive site for foreign investment, rapidly increasing the country's productivity and with it the Jamaican's standard of living. This prosperity came to an abrupt end following the victory of Michael Manley and the People's National Party (PNP) in the elections of 1972. Manley proceeded to implement socialist reforms which eroded the country's economic structure until the economy nearly collapsed in 1980. These reforms reduced the standard of living sharply and caused nearly half of all Jamaican professionals to flee from the poverty-stricken island. The recent election results in 1980, with the landslide victory of the pro-U.S. and free enterprise Jamaica Labour Party (JLP) leader, Edward Seaga, have once again brought hope to the Jamaican people for better times ahead. Under the Seaga Administration, Jamaica has the potential of becoming a viable free enterprise alternative to Cuba's communist model.

MANLEY'S ECONOMIC FAILURE

During its eight years in office, the Manley government almost completely destroyed the Jamaican economy. At the time of Manley's defeat, unemployment was running at more than 35 percent; the figure stood at roughly 50 percent among the nation's youth. Inflation had skyrocketed as well; prices had increased by 78 percent since 1977. Even for those who could afford Jamaica's exorbitant prices, it was still difficult to locate any commodities In fact, the scarcity of such staples as bread and soap reportedly was the cause of riots in Kingston supermarkets. Overall, Jamaica suffered a 25 percent reduction in its standard of living from 1972-1979.

Manley placed the blame for his nation's plight upon imperialism and the Organization of Petroleum Exporting Countries. In reality, however, much of Jamaica's economic turmoil was homegrown. Manufacturing output declined by 10 percent during Manley's last year alone. Agricultural production diminished, with the important banana crop having fallen 78 percent in volume since Manley assumed power. Overall Gross National Production had declined sharply since 1972. Only marijuana production increased, becoming Jamaica's principal source of foreign exchange. These developments derived largely from policies initiated by Manley during his eight years in power.

In his early years in office, Manley introduced a series of reforms under the banner of "democratic socialism"—measures ostensibly designed to decrease the island's still pervasive poverty, but which, coupled with Manley's pro-Cuban rhetoric, began to take the appearance of "creeping communism." Manley forced foreign mining companies to sell the majority of shares of their bauxite operations to the Jamaican government, and later introduced an expropriatory tax on bauxite exports. As a result Jamaica's share of world bauxite exports fell from 18 percent to 12 percent, with its net production declining by a third.

In a similar action, the Manley government nationalized eight of the island's twelve sugar plantations; since 1974, Jamaica's sugar production has fallen by 22 percent. Punitive tax policies, aimed primarily at the country's middle class, contributed to a massive exodus of educated Jamaicans. During Manley's two terms in office, an estimated 40 percent of Jamaica's professionals fled the island—primarily to Britain, Canada, and the U.S.

Manley's counter-productive socialist measures, combined with increased government size and spending, forced his government to seek loans to remain functioning. In 1978, Jamaica turned to the International Monetary Fund (IMF) for emergency relief. Over the course of the next two years, the IMF supplied Jamaica with $350 million, on terms which required that the Jamaican government pursue sounder economic policies. In 1980, however, when the IMF demanded that any new aid be accompanied by austerity measures, Manley terminated loan negotiations. As a result, the Manley Administration was unable to secure new loan agreements from any of the 100-plus commercial banks holding more than 1 billion dollars in Jamaican government debts. The loans the Manley Administration did obtain, $50 million from Libya and $43 million from European and OPEC nations, were insufficient to counter Jamaica's 1980 deficit.

Due to Jamaica's insolvency, foreign exchange reserves were depleted, making it impossible for manufacturers to import vital industrial commodities. This, in turn, exacerbated Jamaica's unemployment problem: from January 1980 through September 1980, 78 factories were forced to close, adding at least 5100 people to the island's unemployment rolls. According to the best economic surveys, per capita income in Jamaica fell about 40 percent during the Manley years.

FOREIGN POLICY UNDER MANLEY

Since 1974, Manley pushed his country closer and closer into the Soviet orbit, and developed particularly good ties to the Cuban government of Fidel Castro. Manley became a staunch supporter of Cuban interventionism in Africa and defended the placement of Soviet combat troops in Cuban bases. At the same time, he condemned the U.S. military presence in the area as "imperialism." Ironically, the Soviets have praised Manley's Jamaica as a true non-aligned country within the Third World.

Manley's hostility to the West extended beyond the North-South debate; he opposed Western society on a variety of social and political issues. In a speech before the Conference of Non-Aligned Nations in Havana on September 4, 1979, Manley declared: "We may call ourselves communists, socialists or humanists or simply progressive, but all anti-imperialists know that the balance of power irrevocably changed in 1917 when there was a movement and a man in the Great October Revolution, and Lenin was the catalyst and unmovable rock."...

CUBA AND JAMAICA

Manley's socialist economic policies, as well as his harsh criticism of the U.S., contributed greatly to the flight of talent from Jamaica. In order to replace the thousands of professionals that left the country, Manley sought help from Fidel Castro, who provided doctors, teachers and management personnel from Cuba. Manley tried to downplay the Cuban role, claiming that only 450 Cubans were working in Jamaica; opposition party (JLP) leaders claimed that an accurate figure would be closer to 5,000. Prior to Jamaica's latest election, Cuba's diplomatic delegation was the largest in Kingston, attracting criticism from both the Jamaica Labour Party and Jamaica's free press. . . .

Cuba also sought to play a role in Jamaica's internal security by training and indoctrinating a new police force comprised of PNP supporters (the Jamaican Home Guard) and a communist guerrilla-type brigade (the Brigadistas). The Home Guard and the Brigadistas had been built up to the point where they were nearly as powerful as the combined regular police and the Jamaican Defense Forces. The Home Guard and the Brigadistas, loyal to the People's National Party, provided that party with an excellent tool for political intimidation or a possible coup. The Jamaican Defense Forces and the local police force traditionally had been impervious to politicization. Manley, however, sought to change this by sending new recruits to Cuba for basic training and by procuring an increasing proportion of his armaments from Eastern bloc sources * * *.

THE 1980 ELECTIONS

On October 30, violence spread throughout Kingston as rival groups tried to keep their opponents from voting. This, however, did not prevent the majority of the Jamaicans from voting; the turnout reached 80 percent. Seaga and the Jamaica Labour Party won the elections by the largest electoral landslide in Jamaica's history by obtaining 57 percent of the popular vote. This made Seaga Jamaica's new Prime Minister and gave the JLP 51 out of the 60 seats in Parliament. The election turnout and the results clearly indicated disaffection with Manley's socialist pro-Cuban path and his poor economic performance.

Following the elections, the People's National Party opted to re-elect Michael Manley as the party leader and the next opposition leader. The PNP also reconfirmed Donald Duncan as secretary general of the party. Duncan, who is openly Marxist, stated he would not concede to the "fascist terror of Edward Seaga" and that "we now move into the next phase: revolutionary politics." However, Robert Niesh, chief of the Jamaican Army General Staff, cautioned "radical" forces opposing Seaga's government not to disrupt the country's reconstruction plans. Niesh further indicated that the 6000-man army and police forces have the capacity to face and combat any situation which might threaten Seaga's government. Winston Spaulding, Seaga's Minister of National Security, has "pledged all the assistance which the cabinet can afford" toward the security forces to decrease violence and crime in Jamaica * * *.

FOREIGN POLICY UNDER SEAGA

The Jamaica Labour Party's "Foreign Policy Guidelines" indicate that:

"Jamaica is regionally linked to Latin America and sub-regionally tied to the Caribbean, culturally, socially and economically. It is sentimentally bound to its African roots, politically grouped with the Commonwealth, the O.A.S. and the Third World; and economically involved with the trade and financial patterns of the industrial world."

This complex Jamaican inter-relationship with the international community has caused Seaga's government to assume a difficult, and at times conflicting foreign policy.

Although the Jamaica Labour Party government has stressed its desire "to have friendly relations with the governments of all countries providing they do not interfere in our internal affairs," the JLP has placed special emphasis on developing stronger relations with the United States. The first country visited by Seaga as Jamaica's new Prime Minister was the U.S. During this November 1980 tour, Seaga stated "we are ready to contain the expansion of Cubanism," and while he complained over the lack of any sound U.S. policy toward the Caribbean in the past, he praised the Reagan Administration by stating "we have had excellent vibes from the new administration" and that "the Reagan administration is coming to power at a very propitious time."* * *

The Jamaica Labour Party is implementing a pro-Western foreign policy, which will "combat the threat of alien ideologies" through an "improved life" propelled by "private initiatives" understanding "how essential to national development are profits, savings and investments." While Jamaica plans to incorporate a lower profile foreign policy, it will place greater emphasis on the Caribbean area, its "natural area of interest and influence," which in the past had been neglected. Even though Jamaica's foreign policy advocates "non-interference," it will nevertheless "commit itself to the struggle against racist regimes," and express "disapproval" over human rights violations.

SEAGA'S ECONOMIC RECOVERY PROGRAM

In October 1980, the Jamaica Labour Party announced its "National Programme for Reconstruction" to counter Jamaica's collapsing economy; this program consists of: "A number of major public sector projects, a set of policies to stimulate the private sector, programmes for improvements in agriculture, mining, tourism, manufacturing, housing construction and financial institutions as well as a range of initiatives to deal with the problem of unemployment."

This ambitious economic recovery program proposes a series of measures needed to increase the private Sector's capability of generating production and employment, and increasing export sales and revenues. To carry out this economic recovery program with private sector assistance, the Jamaica Labour Party government intends to decrease government regulations, provide tax incentives, "rationalize" the government's bureaucracy, insure the availability of raw materials and spare parts needed by factories, manufacturers and farmers, and provide funding for new projects in Jamaica. However, even though the Jamaica Labour Party government expects considerable private sector growth, it estimates it will take three years before Jamaica can "earn rather than borrow its way out of" its present economic difficulties. . . .

Due to Jamaica's insufficient financial resources, the Seaga government has placed special emphasis on the country's two principal legal sources of foreign exchange and revenues, the bauxite and tourist industries. The recuperation and expansion of both these industries are of critical importance to the island's economic recovery—particularly the tourist industry which has drastically deteriorated due to Jamaica's adverse image and violence.

To remedy the depressed tourist industry, the Seaga Administration has initiated a program to improve tourist services, including air transportation and tours; it is restoring historical sites and has begun an advertising campaign aimed at attracting tourists from abroad. The Seaga government has also enacted a program to increase Jamaica's bauxite markets overseas, particularly within the United States where the stockpile of bauxite is being increased for strategic purposes. Internally, the government has encouraged the country's two bauxite producing organizations, Kaiser and Reynolds, to expand their operations in Jamaica. . . .

U.S. POLICY INITIATIVES

With the elections of Edward Seaga as Prime Minister of Jamaica and Ronald

Reagan as President of the United States, Jamaica has the potential of becoming an attractive alternative to the Cuban centrally planned economy model within the Caribbean region. To assist Jamaica in confronting its devastated economy, the U.S. should provide financial assistance to rebuild the private sector and to meet Jamaica's most urgent requirements.

In the period following the rise to power of the Sandinista forces in Nicaragua, the United States provided over $100 million of assistance to this Marxist government. With the rise to power through free elections of a strong supporter of the free enterprise system, the United States should probably provide even greater assistance. Moreover, as indicated earlier in this paper, the U.S. provided significant support to the Manley government and thus the level of assistance provided to Seaga may provide a test case to indicate whether the Reagan Administration intends to encourage developing governments to follow more conservative economic and political policies. . . .

Although substantial U.S. government assistance programs may provide vital help in the immediate future, ultimately Jamaica must succeed on its own. Rather than becoming dependent on foreign grants, the Seaga government should primarily encourage private sector investment and development. The U.S. should use its various programs to encourage foreign investment in Jamaica. Such programs include the Trade and Development program or a possible use of OPIC insurance guarantees since Jamaica's per capita of GNP has fallen below $1,000. Moreover, the U.S. should work through the International Financial Institutions to provide loans to Jamaica.

The overall objective of U.S. economic policy toward Jamaica should be to encourage their government to reduce its role in the economy and attract both foreign and local investment. This policy should also include the elimination of protective tariffs so that the consumer need not bear the burden for high government costs or inefficient industries. However, due to Jamaica's deteriorated economy, these policies should be implemented through a transitional period graduating from the present government-controlled economy to a mixed economy, and thereafter to the ultimate goal of a free market economy.

Finally, Jamaica may confront some security problems. It must be remembered that Cuba has lost an ally with the defeat of Manley, and it may instigate subversion on the island to create difficulties for Seaga. To prevent this from occurring, the U.S. should provide Jamaica's security forces with the training and equipment necessary to counter any aggression which threatens Jamaica's society or government.

CONCLUSION

Few countries offer a better opportunity than Jamaica for the Reagan Administration to both signal a shift in foreign policy and implement on a global basis its general prescriptions for economic recovery. Under the previous Manley Administration, Jamaica aligned herself with Cuba and adopted socialist economic policies which brought the country to the brink of bankruptcy. Despite the foreign and domestic policies pursued by the Manley government, the Carter Administration provided significant financial and political support to Jamaica. This action contrasted sharply with policies pursued toward traditional allies of the U.S. in Latin America.

With the Caribbean now in economic and political chaos, the Reagan Administration has an opportunity to construct a new policy in the area built around nations which share our economic and diplomatic objectives. Jamaica provides a sound basis for constructing such a new policy by encouraging economic growth through the free enterprise system and creating new diplomatic initiatives to isolate the Castro regime and the Marxist revolutionary movements now disrupting much of Central America. If successful in achieving economic recovery, Jamaica can provide an excellent alternative model to Cuba for other countries in the region to emulate. At the same time, Jamaica can also contribute to bringing political stability and security to the most volatile area in the Western hemisphere.●

MARGARET MARTIN BROCK—"MRS. REPUBLICAN"

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. ROUSSELOT. Mr. Speaker, there is one person in California who has devoted so much time, energy, talent, and personal resources to the GOP in California that she has been named "Mrs. Republican" by her many friends.

The person is Margaret Martin Brock, and she is fantastic.

On April 6, 1981, Mrs. Brock was surprised by a reception honoring her at the Capitol Hill Club in Washington. Some of her friends were there, including most of the California Republican congressional delegation, who presented Mrs. Brock with a gold and china commemorative plate.

Mr. Edwin Meese, counselor to the President, and his wife, Ursula, also attended, along with Lyn Nofziger, Assistant to the President for Political Affairs; Mike Deavers, Deputy Chief of Staff to the President; M. B. Oglesby, special assistant to the chief House lobbyist and Dr. Fred Balizer, director of the citizens division at the Republican National Committee.

Others attending were Miss Jo Good, convention director at the R.N.C.; Mr. Fred Beibel, deputy chairman of the R.N.C., and his wife, Violet; Mr. Chuck Bailey, deputy chairman of the R.N.C.; Congressman JOHN LEBOUTILLIER from New York; Miss Nancy Sinnott, executive director of the National Republican Congressional Committee and several of Mrs. Brock's former interns.

Margaret Brock is a model member of the Grand Old Party. In the last three decades she has energetically supported Republican candidates in California and around the Nation.

In this day of a great new Republican Party, she is a key to our revival and a source of inspiration to all of us who know her, and know of her.

Mrs. Brock has also taken an active interest in the education of young people. Over the years she has worked for the Republican ideal of involving youth in the political and governmental processes.

She has made generous contributions to institutions of higher learning. She established the Margaret Martin Brock internship program in practical politics at Claremont Men's College, in which Congressman DAVID DREIER once participated. Margaret has devoted an incredible amount of time and energy to the political education of our youth, helping insure a healthy future for the GOP.

Mrs. Brock also had built and contributed the Brock House to Pepperdine University, Malibu, in which the president of the university and his family reside.●

GALBRAITH ON "EMPIRE"

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. STUDDS. Mr. Speaker, John Kenneth Galbraith recently authored a two-part essay on the decline of both United States and Russian imperialism during the past two decades. I believe these articles describe reality far more accurately than any statement emanating either from the U.S. Department of State or from the Kremlin. The theory that the two great powers are the only forces which count in this world ought to be credible by now only to those whose mental development ceased two decades ago. Sadly, voices in both capitals seem bent now on reviving this obsolete mythology, and the mistakes of each seem only to produce greater errors from the other. Such, tragically, is the formula by which great powers may be even more rapidly reduced.

I strongly commend those two essays to the attention of my colleagues.

[From the Washington Post, Mar. 17, 1981]

THINKING ABOUT IMPERIALISM (I)—20 YEARS OF DECLINE IN THE SOVIET EMPIRE

(By John Kenneth Galbraith)

There could be comfort of a sort these days in finding one subject on which the United States and the Soviet Union, or more precisely their governments, agree. And there is; it is that imperialism is the greatest international ambition and consequent threat of our time. Each government routinely accuses the other of imperial design—of present effort and future intention to extend its influence, will and political and economic system beyond its borders and most notably to the poor countries of Asia, Africa and Latin America. Reference to the imperialist powers, meaning the United States, is routine in Soviet official expression. In an early Cabinet meeting, President Reagan is reported as proposing that reference to the Soviet Empire become the

normal usage. During Secretary of State Alexander Haig's confirmation proceedings, the more common reference was to Soviet expansionism. This can be taken as a synonym reflecting the tendency to convert anything that is morally unacceptable into an *ism*.

But if, indeed, the Soviet Union and the United States are engaged in an imperial competition, it is surely the least successful in all history. In the last 20 years both have lost influence and suffered grave reverses beyond their borders. At most the effort has been to see who can lose what is called imperial power the least rapidly. By any calculation we have been losing less rapidly in this respect than the Soviets; and the largest part of our loss of influence has been the result of deliberate policy—of a well-considered effort to build up the economic and political independence of other lands. We are now, in some measure, surprised by the results of our own success.

I would like to turn first to the Soviet imperial achievement or nonachievement of these last two decades. Then in a second article I will come to our performance. And finally I will suggest the reasons, surprisingly similar in the main, why the external influence of both of the superpowers has been in decline, one obvious reason being that what is now called imperialism bears only the most pallid relationship to the forthright exercise of such authority in earlier times.

The year 1960 is a very good one on which to begin. World War II had been over for 15 years; its physical ravages had been repaired; the postwar pattern of international power and influence seemed fully established and totally stable; in that year, or more exactly a few months later, I became the servant of American imperialism as the ambassador to India. In 1960, any imperial strategist in Moscow, looking out on the world scene and ignoring some possible developing flaws, could only have reacted with the most intense satisfaction. The Soviet Union, incomparably the greatest power in Europe, was united geographically and in political and economic faith and system with China, the greatest power in Asia. Along the western marches, in turn, was a seemingly faithful band of communist states—East Germany, Poland, Hungary, Czechoslovakia, Rumania, Bulgaria, as well as the independent but still stolidly Communist state of Yugoslavia and the terra incognita of Albania. Similarly to the east the writ ran on to North Korea and North Vietnam. One marvels now to think of it; an imperium, as it seemed, extending from the Brandenburg Gate to the port of Haiphong. There had been nothing like it since Genghis Khan or, as the Russians might prefer, Rome itself. Quite possibly this structure was more impressively solid when viewed from the outside than from within. In any case, all American references were to the Sino-Soviet bloc; in those years Secretary of State Dean Rusk characterized China as a "Soviet Manchukuo" devoid of any of the essential aspects of sovereignty. All sovereignty belonged to Moscow.

But there was yet more. In Indonesia Sukarno was backed by a large and powerful Communist Party. Egypt, the most influential country of the Arab world, was recipient of an increasing flow of Soviet arms and advisers. As was Ben Bella in Algeria. There was support to Kwame Nkrumah in Ghana. In Italy and France, huge Communist parties seemed in impeccable subordination to Soviet command. Similarly smaller ones elsewhere. More important, perhaps, was the feeling everywhere in the poor lands that socialism was on the wave of the future. How could it be otherwise? Capitalism had not served to break the terrible bonds of poverty. There must be an alternative; the only available one was socialism or communism. Moscow, not Washington (or New York), had custody of the future.

One has only to recapture this past to see how great has been the fall—one made greater by statesmen who ascribed more unity than ever, in fact existed. Russia and China have split bitterly apart, one of the most formidable developments of our time. Rumania has developed an independent line that, on occasion, has involved overtures to Peking. Hungary has designed its own relatively liberal economic system. The case of Poland calls for no current comment. Albania has returned from an association with China to total ambiguity. Various of the Western Communist parties, and most notably that of Italy, have proclaimed their independence. In Indonesia the Communists were liquidated with a cruelty that no one anywhere could condone. The Soviet advisers have been expelled from Egypt. Tanks originally supplied by the Soviets ousted Ben Bella and returned him to the confinement that, by either the French or his own people, was his near-lifetime career. Nkrumah, unwisely absent from his country, was ousted. And in the poor countries of the world socialism has ceased to be the glowing alternatve to poverty—given the terrible weight of the latter, one might only wish that it were. As Marx himself foresaw, socialism becomes an alternative only after the arrival of capitalism. It is point to which I will return.

Against all this has been the Communist expansion—in Afghanistan to rescue a failing Marxist regime, a country as inhospitable to imperialism in the last two centuries as any in the world. And in Angola, where the MPLA regime is sustained by Cuban soldiers and, in a possibly much more practical way, by revenues from Gulf Oil. And in Ethiopia, where, as Evelyn Waugh once observed, the writ of governments has never run reliably very much beyond the airport, in his day the railway station. As a bastion of communism, Ethiopia is in exchange for Somalia, an earlier bastion of communism, now an outpost of the free world. Such is the 20-year record of the Soviet Empire. Expanisonism indeed!

In contrast with that of the Soviet Union, the 20-year record of the United States looks almost heroic. We were expelled from Indochina, but Indochina is a long way from being China. As the Soviets suffered in Egypt, so did we in Iran. Elsewhere our influence has yielded to the discovery of the OPEC countries that they could charge what the market would bear, something that should not have been a great surprise to a capitalist country, an opportunity that could have been discovered from a reading of our better economic textbooks. And, as in the case of Brazil, Mexico and perhaps even India, our influence has suffered from the growing self-confidence that goes with industrial (or agricultural) development. Most of all, it has suffered from the highly successful development of our advanced industrial allies and friends. But all this, as noted, we have sought. With all these countries we remain on reasonably friendly terms. Our disasters have been only in countries, South Vietnam and Iran, where we attempted a much closer military and political embrace. To a further contemplation of the American imperial record over the last 20 years I return in a further article.

Thinking About Imperialism (II)—American Power: Decline by Design

Twenty years ago, anyone looking at a map of the world would have had no difficulty in finding evidence of the imperial design of which the Soviet Union and the United States routinely accuse each other. There in the center, stretching from East Germany to North Korea and North Vietnam, was the Soviet domain, united in a political and economic system, all presumptively subordinate to the leadership of Moscow. Beyond, in Indonesia, Egypt, Algeria and in the Communist parties of Western Europe, were faithful sources of support.

Surrounding the great Sino-Soviet land mass were the acronymous expressions of American power—SEATO to the south and east, CENTO in the Middle East, NATO in the west. Supplementing these was a web of military alliances. In the organizations and the treaties, no one doubted the paramount role—political, financial and military—of the United States.

Outside this band of encircling alliances—the word "encirclement" was in common use in those days—lay a generally friendly community of nations. From Latin America came strong support for American purposes. By 1961, it was not possible to muster a secure majority at the United Nations to keep China, as a Soviet province, out. But it was still possible to get the votes to have admission declared an Important Question, which thus required a two-thirds vote. It was only a few years earlier that John Foster Dulles had accused those non-communist countries that stood apart from a formal alliance with the United States of an immoral neutralism. Even neutrality, if sufficiently inconvenient, can be an ism.

In an earlier article, I dealt with the misfortune that, in these past 20 years, has overtaken what map-viewing strategists call the Soviet Empire. Moscow and Peking have split apart; the Eastern European countries have become increasingly independent and assertive; ties with Indonesia, Egypt, Algeria and others have been severed; Eurocommunism has arrived. By comparison, the American decline, if indubitable, has been brilliantly in contrast.

SEATO and CENTO have gone, more or less literally, with the wind, for it was of that they largely consisted. Similarly the bilateral military arrangements. All were an aberration of the military and diplomatic mind. The politicians and governments united in these treaties had always enough immediate and pressing problems of their own without being much concerned with the seemingly far more theoretical danger from China or the Soviet Union. And there was danger for any politician in seeming to be too pliable as regards American policy. Pakistan was in many ways the center of this system, a member of both treaty organizations. But the Pakistanis were always much too practical to see their alliance and their arms as an instrument against the Soviets or the Chinese. Against any determined movement by the Red Army, they would not have lasted more than hours. But the arms were extremely useful against India, where, in fact, they were used in the border wars. In the end, the country once described as our most faithful Asian ally succumbed to its own geographical and ethnic division. It is hard to believe that

anyone can now regret the passing of the Dulles policy of military (or imperial) might derived from alliance with the indigent.

The North Atlantic Treaty Organization does survive. Here, too, as compared with 20 years ago, there is far less tendency to accept American leadership automatically. On matters ranging from trade policy with the Soviets to missile deployment, negotiation is now required where suggestion would once have served. But the singular feature of this change is that we sought it. In the years following World War II, we invested thousands of millions of dollars in the industrial rejuvenation of Western Europe, as we also accorded strong support to the industrial revival of Japan. Combined with the efforts of the countries involved, it was brilliantly successful—far more successful than anything achieved by the Soviets in the economically less advanced world of Eastern Europe. It was hardly to be supposed that this success would be unmatched by a similar development in European and Japanese political self-confidence and self-assertion.

There has been another aspect of our policy, equally deliberate but largely uncelebrated, that has contributed to the independent mood of our friends, and notably that of Germany and Japan. In the years since World War II, a huge share of our available capital has gone each year into relatively sterile military investment at home. In Germany and Japan, it has gone into the modernization and rejuvenation of civilian industrial plant. No one should doubt the difference that this has made. Those who argue automatically for any military outlay as a support to American strength should reflect on how much greater our prestige and power would be in the world if our industrial plant were in better condition than it is at present.

We have also lost the more or less automatic support for our policy from numerous of the countries of—as it is still called—the Third World. No longer do our signals bring an assured response at the United Nations or conferences convening elsewhere in the world. But, again, such independence was a purpose of our policy; on no point in the past 20 or 30 years was our rhetoric so loud and clear. That a new industrial power such as Brazil, a freshly endowed one such as Mexico, greatly affluent ones such as the members of OPEC, should now assert themselves with greater confidence can hardly come to us as a surprise. The green revolution in India (bringing a modest export surplus of grain in some recent good years), the considerable industrial development and the huge flow of remittances from its eager workers overseas have given that country an economic independence that was unimaginable when I left there 18 years ago. But nowhere has this movement away from the United States brought any appreciable alliance with or subordination to the purposes of the Soviet Union. The notion sometimes bruited that India, home of millions of the world's most passionate property owners, some of its most rapacious capitalists and myriads of its most undisciplined politicians, is somehow in the Soviet orbit is errant nonsense.

Passing over such examples of extreme ambiguity as Iraq, now in conflict with a hostile Iran; Syria, now a seemingly indispensable stabilizing influence on once indubitably capitalist Lebanon; Angola, where a Marxist government is sustained by Gulf Oil; and Ethiopia, which, to the extent that it is governed by anyone, has been lost in trade for Somalia, there have been only two incontrovertible cases of American reverse in the past 20 years. One of these is South Vietnam (along with Cambodia), and the other is Iran.

The parallel here and the lessons of the experience are wonderfully clear, although in foreign policy even less than in economics does experience triumph over preferred belief. Vietnam and Iran were the two countries of the Third World to which, as I earlier noted, we accorded the closest military embrace—in one, active and costly participation; in the other, an expensive intrusion of American equipment and advisers. In both, our influence was exercised through local leaders who in Vietnam were incompetent and corrupt and in Iran oppressive and disdained. In both, we reaped the consequences of this leadership. But not even Iran was lost to the Soviets. The Iranians ended up hating everybody.

The consequences of the close embrace are clear. They are the same for the Soviets—were the same in China—as for ourselves. If the local leadership is strong, effective and well regarded, it will not tolerate foreign domination. If it is weak, ineffective, unpopular or oppressive, it may accept foreign guidance or domination, but it will not be tolerated by its own people. That is the enduring fact of what, as I shall argue in another article, is rather fancifully called modern imperialism.●

A TRIBUTE TO ROGER LEWIS

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. NAPIER. Mr. Speaker, I would like to take this opportunity to congratulate a constituent of mine, Mr. Roger Lewis, on being named the recipient of the Special Handicapped Person Award of the Conway Today program.

Roger is a special person in many ways. Even though he suffers from a terribly debilitating disease, cerebral palsy, and is a quadraplegic confined to a wheelchair, he serves as in inspiration to those who know him by virtue of his involvement and determination. Roger works at the Conway Vocational Rehabilitation Center in Conway, S.C. as an inspector in quality control and as a timekeeper. He has also participated in the Special Olympics program on the local and State levels. It gives me a great deal of pride and pleasure to hold him up to our Nation as a symbol of the best that we are—strong, brave, capable of overcoming seemingly insurmountable odds, while striving for a better and brighter future.

Mr. Speaker, I ask unanimous consent that a concurrent resolution as adopted by the South Carolina State Legislature honoring Roger Lewis be included in the RECORD at the conclusion of my remarks.

A concurrent resolution to congratulate Roger Lewis of Horry County on being named the recipient of the Special Handicapped Person Award and to further commend him on being selected by the Governor's committee and mayor's committee on employment of the handicapped for recognition as Special Handicapped Person on the Conway Today program.

Whereas, Roger Lewis, a twenty-seven year old native of Horry County, despite being severely disabled, has been a productive worker at the Conway Rehabilitation Center for the past six years: and

Whereas, while Roger has disabilities of cerebral palsy, quadraplegia and speech impediment, he has worked diligently to adjust to these disabilities and as a result he has gained better control of his speech patterns and has increased his physical mobility; and

Whereas, through perseverance and a determination to be productive and self-reliant, he has been able to earn his way: and

Whereas, he has taken his role as timekeeper very seriously and he requires that all clients return to work on time and take their breaks in the alloted time frame; and

Whereas, he not only demands excellence of others but he is his own severest critic and sets the highest goals and standards for himself; and

Whereas, in addition to his outstanding work record, he has been involved in Special Olympics on the county, as well as statewide levels, and has won blue ribbons in the majority of these events: and

Whereas, because of his example of courage, determination and dedication, he has been recognized by state and local Committees on Employment of the Handicapped as an example and inspiration to other handicapped persons and is further proof that employers can rely on the loyalty and dedication of disabled employees. Now. Therefore.

Be it resolved by the House of Representatives, the Senate concurring:

That Roger Lewis of Horry County is congratulated on being named the recipient of the Special Handicapped Person Award and, futher, is commended on being selected by the Governor's Committee and Mayor's Committee on Employment of the Handicapped and for his recognition as Special Handicapped Person on the Conway Today program.

Be it further resolved that a copy of this resolution be forwarded to Mr. Lewis.●

INSTITUTE FOR POLICY STUDIES: PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. McDONALD. Mr. Speaker, the leaders of the Institute for Policy Studies (IPS) have been most irked by revelations of their long standing contacts with Communist-bloc diplomatic personnel with intelligence functions.

The 1976 murder of Orlando Letelier brought to light documentary evidence that Letelier, director of IPS's Transnational Institute project and who was also active with one of the IPS's spinoffs, the Center for International Policy (CIP), was receiving money from Cuba secretly via the

Cuban diplomatic pouch for covert actions in the United States.

The Letelier documents included letters to officials of the Americas Department of the Cuban Communist Party Central Committee. The Americas Department is responsible for coordinating subversion and terrorism in the Western Hemisphere. Its chief, Manuel Piniero, is a former top level D.G.I. intelligence officer. The woman who was supplying Letelier with money via the Cuban diplomatic pouch, Beatrice Allende, was the wife of a ranking official of the Americas Department, Luis Fernandez Ona. And in 1966-67, Fernandez had been the Cuban D.G.I. case officer for Che Guevara's terrorist group in Bolivia while Beatrice Allende was one of his couriers and agents.

As John Rees has reported in his overview of the Institute for Policy Studies, IPS contacts with officials of hostile foreign powers set in motion investigations by the U.S. counterintelligence services. I refer my colleagues to the article which follows published by the Western Goals Foundation:

The Institute for Policy Studies has used a variety of tactics to promote radical policy changes. Leftist organizers in the anti-Vietnam, disarmament, women's, black power, Chicano and other causes were brought in to speak and participate in seminars with Congressional and Administration staffers, academics and selected journalists.

Through the IPS leadership, contacts were made for some of these groups and individuals with the same Soviet-bloc diplomats—based both in Washington, D.C., and at the United Nations—who were already known to the Raskin-Barnett apparat.

These contacts with the officials of hostile foreign powers did attract the attention of the U.S. counter-intelligence services. However, it was the involvement of IPS with violence-oriented domestic revolutionary organizations that principally interested both the FBI and the Washington, D.C. police department.

IPS associates fueled these law enforcement interests during the late 1960s and early 1970s by their memberships in and assistance to such groups as the Weatherman faction of Students for a Democratic Society (SDS) and the Student Non-Violent Coordinating Committee (SNCC) which were involved in bombings. These activities, added to the role of IPS in helping organize Washington street demonstrations including the riotous attempt to "shut-down" the capital on May Day, 1971, generated continuing FBI and police intelligence investigations. In 1974, IPS, Raskin, Barnet and others filed a lawsuit against the Federal and local intelligence agencies. In the post-Watergate climate of hysteria, this succeeded in shutting down the FBI and local intelligence investigations leaving IPS free to develop its contact networks throughout the U.S. government and with hostile foreign powers unmonitored by any U.S. government agency.

Raskin, Barnet and a number of other early IPS members such as Gar Alperovitz and Arthur Waskow already had contacts in government from their employment in the Kennedy Administration and Congress. Early IPS memos show that the preferred technique was to place liberal Senators and Congressmen in contact with individuals active in promoting U.S. disarmament and accommodation with the Soviet Union in a relaxed academic or social setting. The nonconfrontational setting could be expected to make the government officials more receptive to the suggestions of the IPS members and their "outside" experts.

For example, in setting up IPS's "Seminar on National Security and Disarmament," key areas for discussion were to Science and Technology adviser; White House Budget Office officials; Pantagon aides to the Joint Chiefs of Staff; and State Department officials including Herbert "Pete" Scoville, a former CIA official then at the Arms Control and Disarmament Agency. IPS's activist invitees ranged from Edward Snyder, lobbyist for the Friends Committee on National Legislation, and SANE's Sandy Gottlieb to scientist Leo Szilard and Ben Seligman, director of research and education of the Retail Clerks International Association.

IPS recognized the obvious fact that control of the U.S. budget and economic policy is central to determining U.S. priorities whether in national defense, intelligence or any other area. In this context, it is significant that the director of the Joint Economic Committee of Congress, Richard Kaufman, became active with IPS in the 1960s and that through its Congressional friends, IPS arranged to be asked to do two lengthy studies of anti-defense "alternative" budget priorities in 1976 and 1977.

Cultivation of disaffected employees and officials of the Johnson and Nixon administrations brought at one level the formation of groups like Federal Employees for Peace. On a higher level, it brought IPS contact with individuals who supported for various reasons, a major change of U.S. policy on Vietnam, and an end to U.S. intervention against Soviet-supported aggression in the Third World. Such individuals who resigned or retired from the Defense, State and Justice Departments, National Security Council, and Central Intelligence Agency tended to gravitate to IPS.

The expertise of these individuals was utilized in a number of IPS projects. One of these involved the leaking and publishing of the Pentagon Papers stolen by Daniel Ellsberg. The documents included highly sensitive material which identified intelligence sources and which gravely damaged the security of top level U.S. diplomatic codes in addition to revealing to enemies aspects of the U.S. decision-making processes, U.S. estimates of enemy strengths, weaknesses and plans, and harshly undiplomatic assessments of foreign officials.

During the Nixon-Ford administrations, three IPS spinoff projects were developed that employed a number of IPS related former government officials and Congressional staffers. These included the Center for Defense Information (CDI) which lobbied against continuation of U.S. overseas bases, for removal of U.S. troops from South Korea, and against virtually every new defense system from the B-1 bomber through MX and cruise missiles to anti-tank neutron warheads and Trident submarines.

A second project, the Center for International Policy (CIP), promoted "non-interventionist" and "human rights" foreign policies. [Notwithstanding that the "human rights" foreign policy means intervening against countries friendly toward the United States while refraining from hindering the activities of Communist totalitarian states.] The third IPS spin-off is the Center for National Security Studies (CNSS) which has played a highly visible role in the crippling of the Central Intelligence Agency and the FBI's internal security programs.

Many of those affiliated with the CIP in 1976 went into policy-making roles in the Carter Administration, David Aaron, Senator Mondale's top aide on the Senate Intelligence Committee, went to the White House National Security Council; W. Anthony Lake, Joseph Nye, and Barbara Watson took major subcabinet posts; but William G. Miller stayed as staff director of the Senate Intelligence Committee and Tom Dine remained the Senate Budget Committee's Senior Analyst for Defense and International Affairs. [Severed from his post by the new Intelligence Committee Chairman, Senator Barry Goldwater (R-AZ), Mr. Miller is still a consultant to the Intelligence Committee.]

By paying political debts to what is termed the McGovern wing of the Democratic Party and to leading left-liberal Senators Edward Kennedy, Frank Church, and Vice-President Walter Mondale, the Carter Administration brought into the White House National Security Council, State Department, Treasury and other federal agencies a large contingent of these IPS associates.

Carter's major foreign policy fiascos can be attributed in varying degrees to these IPS associated policymakers. These disasters include the failed SALT II Treaty, the support for Soviet backed revolutionary terrorist movements in Rhodesia and South Africa the courtship of Algeria and hostility toward Morocco, the overthrow of the government of Nicaragua in favor of the Castroite Sandinistas, and the total lack of response to the Marxist, Soviet-backed coups in Grenada and the 1978 coup preceding the Soviet invasion of Afghanistan.

This group of officials includes Paul Warnke, chief SALT negotiator and now an IPS trustee; Sidney Harmon, IPS trustee at the time he was appointed Under Secretary of Commerce; James A. Joseph, Under Secretary of the Interior, and his deputy, Steven Quarles, now IPS lecturers; Mark Schneider, Deputy Under Secretary of State for Humanitarian Affairs; David Aaron, deputy head of the National Security Council; and W. Anthony Lake, director of the State Department's Policy Planning Staff, who is slated to lecture on the executive branch of government during the January-February 1981 session of the Institute for Policy Studies Washington School.

According to its 1979-80 Annual Report, the Institute for Policy Studies and its international program, the Transnational Institute (TNI) had a total budget of $1,616,000 for Fiscal Year 1980. The total income figure reported was $1,747,000.

The Samuel Rubin Foundation of New York has been the chief source of IPS funds for more than a decade. The chairman of the IPS board of trustees is Peter Weiss, president of the foundation. He is a leading international patent attorney and a member of the National Lawyers Guild (NLG), a radical lawyers organization formed as a Communist Party front which remains as the U.S. section of the Kremlin-run International Association of Democratic Lawyers (IADL).

Weiss's wife, Cora Rubin Weiss, an officer of the Rubin Foundation, received national notoriety for her pro-Hanoi organizing during the Vietnam war. As one of the top leaders of the Communist-dominated National Mobilization Committee to End the

War and its successor, the People's Coalition for Peace and Justice (PCPJ), Cora Weiss traveled abroad to Paris and Hanoi repeatedly to meet with Vietnamese Communist leaders. Mrs. Weiss's own organization, the Committee of Liaison, became a conduit for contacts between American prisoners of war in North Vietnam and their Families. Three POWs brought back to the United States by her group testified before the U.S. Senate that their release by Hanoi had been conditional on their making antiwar propaganda statements for the "Liaison" group. More recently she has directed organizations sending material aid to Hanoi.

Cora Weiss has been a quiet source for cash funding of key anti-Vietnam and leftist groups in her own right. The Weisses control a separate foundation which apparently receives its principal funding of some $50,000 a year from the Samuel Rubin Foundation. This organization, the Fund for Tomorrow, operates from the Weisses Bronx home. It succeeds their previous foundation, the Twenty-First Century Fund.

The late Samuel Rubin, a multi-millionaire philanthropist and retired chairman of the board of Faberge, used his fortune extensively to support medical research, the arts and various charities.

In 1935, the Comintern directed its parties into the "popular front," an era of "respectability." Communist Party members in the United States came out of the "underground" and openly enrolled as communists on the voter rolls for the 1936 elections. Among them was Samuel Rubin.

The Rubin Foundation not only directly funds IPS and its Transnational Institute subsidiary, it is also a major source of funding for various radical groups whose work may parallel or supplement IPS, and for the "independent" spinoff organizations within the IPS network.

For example, during calendar year 1979, the Samuel Rubin Foundation provided $10,000 to the Film Fund, which used the money to complete a 3-hour television film villifying the Central Intelligence Agency. CIA-defector Philip Agee, whose residency in Holland was facilitated by the Transnational Institute in Amsterdam, was a partner in the company which made the film and the featured "performer." Entitled "On Company Business," the film was broadcast in three installments over the taxpayer-funded National Public Television network in May 1980.

The Institute for Policy Studies has played a central role in the campaign to destroy the U.S. intelligence capability. IPS spawned the Center for National Security Studies (CNSS), the principal anti-CIA lobby on Capitol Hill. Marcus Raskin was instrumental in the transformation of Counter-Spy magazine from the rambling publication of a few isolated radical Vietnam war veterans into the mouthpiece of Philip Agee, whose continuous meetings with Cuban intelligence officers have been reported in the European and American press.

CNSS attempts to present an image as being a "reasonable" critic of the U.S. intelligence agencies despite its demands for total dismantling of covert action, a total ban on the recruitment and use of human sources of information, and termination of all domestic security investigations. CNSS was organized in 1974 by IPS's Robert Borosage and Morton Halperin. Halperin, a ubiquitous witness in the intelligence hearings whose suggested restrictive "reforms" were incorporated into Church Committee recommendations, flew to London in January 1977 to assist Philip Agee fight a deportation order. Agee said he was being deported because the British government believed he betrayed a NATO intelligence network collecting information about the Warsaw Pact. When Agee lost his deportation fight he went to Amsterdam. Dutch media reported that the TNI facilitated his entry.●

CUT DEFENSE SPENDING?

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. ASPIN. Mr. Speaker, I hear anguished cries that the Democrats in the House are preparing to cut defense spending. I am concerned, however, that we Democrats are preparing to roll over and acquiesce in the largest peacetime defense increase in history.

We are hearing stories about how it is going to be necessary to increase defense spending in the budget Democrats are fashioning in order to bring conservatives in the party on board. But what about others in the party. Our vote is also needed to pass the budget and I don't think it has sunk in yet what a massive increase in defense spending this really is.

What we are seeing is liberal Democrats on the House Budget Committee preparing to recommend the largest peacetime defense increase in the history of our Nation—larger, in fact, than even the wartime increases to pay for Vietnam.

The Democrats on the House Budget Committee, that terrible little group of nasty budget cutters, are proposing an increase of $45 billion in defense.

That $45 billion dollars would be an increase of 26 percent. The largest 1-year increase in the last three decades was 24 percent—and that was a wartime increase, the boost in spending to pay for Vietnam in fiscal year 1967. No peacetime increase even approaches the increase Democrats on the House Budget Committee are agreeing to.

I repeat, no peacetime military spending increase even approaches the increase Democrats on the committee are agreeing to this year.

What is $45 billion? What are we Democrats proposing to give to the Pentagon?

The $45 billion increase itself comes to:

Four times the size of the entire current food stamp program—$11.1 billion in fiscal year 1981 budget authority.

Six times the entire current program of Aid to Families with Dependent Children—$7.7 billion in fiscal year 1981 budget authority.

Thirty times the budget for the entire legislative branch, all those in the Senate and House not to mention the GAO, GPO, Library of Congress, Botanical Gardens and so on ad nauseum—$1.5 billion.

One-third higher than the total budgets for 6 of the 13 cabinet level departments—$34.8 billion for the Departments of Energy, Education, Commerce, Justice, Interior, and State.

Six times what the Federal Government spent in the State of Wisconsin in fiscal year 1980—$7.6 billion—for all programs including social security and the Postal Service.

That's what the $45 billion increase—increase—the Democrats are conceding amounts to.

We are doing this in the very same budget in which we are cutting everywhere else. As the table shows, we—that is, the Democrats on the House Budget Committee—are discussing cuts of 8 percent in unemployment compensation, 10 percent in AFDC, 13 percent in food stamps, 15 percent in student financial aid, and so on through the budget. These are real cuts. They are cuts from the current services budget—this is the budget that would exist if we just extended this year's program into next year.

By contrast there is no cut in defense. Defense spending increases dramatically over last year's current services level—both President Carter and President Reagan have increased defense, whereas President Carter to some extent and President Reagan to a greater extent have cut the other programs.

In only one comparison can it be said that the House Budget Committee is cutting defense. And that is no comparison with President Reagan's budget and the cut is peanuts. The cut in budget authority is $6 billion on a budget of $226 billion or 2.6 percent. In outlays under the House committee proposal defense spending actually goes up.

But what about a cut of 2.6 percent? Can any Member of this House say that the budget of any agency cannot be cut 2.6 percent? Is there any doubt that there is at least 2.6 percent worth of waste in that budget? Is there any doubt that when an agency's budget is increasing dramatically that the possibilities of waste also increase dramatically? Is there anyone who believes that we cannot cut that budget by 2.6 percent without hurting the national security of the country?

Of course not. It can be cut and cut more than we are doing.

These cuts are so small it might be asked why bother? Why bother fighting for these cuts if they are so miniscule? The answer is, I think, symbolism. When we are doing so much in the way of cuts for so many other programs to make no cuts in defense would be unacceptable. To make the tiny cuts that we have made, borders on being unacceptable.

As I say Mr. Speaker, there is talk of adding another $1 billion to defense to satisfy the conservatives. To that I have two questions. First, how much do we have to do to satisfy them? And, second, how are we then going to pass the budget without the liberals?

HOUSE BUDGET COMMITTEE INCREASES AND CUTS FROM CURRENT POLICY, 1982 BUDGET AUTHORITY

[Dollar amounts in billions]

	Current policy	Reagan Reestimated	House Budget Committee	House Budget Committee minus current policy as a percent of current policy
Defense	$175.20	$226.15	$219.60	+29.1
EPA construction grants	3.63	.....	.10	−97.2
UMTA	5.14	4.29	4.29	−16.5
CDBG plus folded-in programs (UDAG, DOE weatherization, solar bank, HUD planning, Rehabilitation loans, neighborhood self-help)	5.17	4.17	4.32	−16.4
EDA	.67	.05	.36	−46.3
Student financial assistance (Pell grants)	4.68	3.80	4.00	−14.5
Loan guarantees for students	3.44	2.65	3.13	−9.0
Unemployment compensation	23.38	21.44	21.59	−7.7
Food stamps	12.39	10.10	10.76	−13.2
Aid to families with dependent children	6.44	5.33	5.83	−9.5

●

"JOCKO" CONLAN

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. RUDD. Mr. Speaker, "Jocko" Conlan, whose son John B. Conlan, Jr., is a former Member of Congress, is a Hall of Fame umpire who officiated in the major leagues for 25 years. He recently visited President Reagan at a White House luncheon. The following article by the Arizona Republic's Verne Boatner is indicative of the type of man and great American "Jocko" is, and pays just tribute to a fine human being, one of the truly great men of baseball.

I ask unanimous consent to insert the April 2, 1981, article from the Arizona Republic by Verne Boatner at this point in the RECORD.

UMP FINDS BASEBALL AT HOME IN WHITE HOUSE

John "Jocko" Conlan, 81, was relaxing in his Paradise Valley home Monday when the telephone rang.

"Ronald Reagan has been shot," a friend said. "It's on the news."

Conlan, a Hall of Fame umpire who officiated in the National League from 1941 to 1965, rushed to his television set and, like millions of other Americans, sat mesmerized for hours by the bizarre unfoldings that could have resulted in the assassination of yet another American president.

"I couldn't turn it off," Conlan said. "It was terrible, horrible. I said to my wife, Ruth, 'That's a sin to have something like that happen to a man like Reagan.'"

As television played, and replayed, the gunman's attack, Conlan's memory fluttered back only three days to when Reagan had greeted him warmly at a luncheon in the White House with "Hello, Jocko. How are you?"

Their association goes back to the 1930s, when Conlan was playing for the White Sox and Reagan, then an aspiring young sportcaster, was re-creating baseball games of both the Chicago White Sox and Cubs with the aid of Western Union's terse play-by-play reports.

"We didn't know each other then," Conlan said. "I first met him at Loyal Davis' home years later. The doctor (who now lives in Phoenix) and I were pretty good friends because he used to come to games of the Cubs when I was umpiring and sit in a box right next to the Cub's dugout."

The Davises are parents of Reagan's wife, Nancy.

"When Davis invited me to his home, Reagan was there. The good doctor said, 'Ronald, Jocko's a good friend of mine in Chicago. He's an umpire.' Reagan said, 'Oh Jocko Conlan. I remember you when you were with the White Sox.'

"He (Dr. Davis) was a great neurosurgeon in Chicago and also a rabid baseball fan. He's also a wonderful and very thoughtful man. I remember when I lived on Mummy Mountain (in Paradise Valley), my daughter wasn't well and he came all the way over to see her from where he lives in Biltmore Estates."

Reagan and Conlan met a couple of other times over the years, at a banquet for Los Angeles Dodgers announcer Vin Scully and at a political meeting when Conlan's son, John, was a U.S. Congressman.

It was Reagan's idea to invite Hall of Famers to last Friday's luncheon at the White House. It was a prelude to the opening of the baseball season, when Reagan was scheduled to throw out the first ball Wednesday in Cincinnati.

The baseball commissioner's office and the Hall of Fame picked up expenses for those attending. Thirty-two members of the Hall of Fame showed up.

"He was so down to earth," Conlan said of Reagan. "He came right in, and I happened to be standing at a table next to him. He shook my hand, said 'Hello, Jocko,' and told me how nice it was of me to attend."

The luncheon lasted for about two hours. Reagan was the only speaker, except for a few closing comments by Baseball Commissioner Bowie Kuhn.

"Reagan just went out and told old-time stories of when he was announcing baseball," said Conlan. "He told of his experience—I think it was the 1938 World Series—when Billy Jurges (of the Cubs) popped up a foul ball just as the telegraph line went dead."

Reagan improvised, having Jurges foul off three or four more pitches.

"He made me look good," Reagan confided, chuckling. When Western Union service was restored, Reagan found that Jurges eventually did foul out.

One of the highlights of the luncheon, according to Conlan, occurred when Reagan opened up a present from Oakland A's Manager Billy Martin. It was a new A's shirt and cap.

"The President put on the cap and held the shirt across his chest," Conlan said. "He looked just like a ballplayer. He really got a great hand."

Afterward, the Hall of Famers lined up to be greeted by Reagan. A Marine guard asked for their names as they approached.

"But I think he (Reagan) knew everybody before the Marine told him," Conlan said, "because he called everybody's name right out.

"I told him, as I shook hands, that I was going to give a report to the good doctor (Loyal Davis) about him. He said, 'Do that, Jocko.'

"There was no question that it was his party. I thought it was a great gesture from the President of the United States to help baseball . . . and baseball played a good part in accepting his invitation.

"It was the best thing in years and years of my career in baseball. I never got a better thrill. The way he handled (the luncheon) made me know he still cared about the sport.

"It touched me, because baseball isn't going to leave me. And I'm not going to leave it, either."●

IF PRESENT TRENDS CONTINUE

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. JOHN L. BURTON. Mr. Speaker, world hunger and famine, energy shortages, environmental devastation, and international strife are predicted for the year 2000 by "The Global 2000 Report to the U.S. President" if present trends continue.

A constituent, Associate Prof. James C. Stewart, from San Rafael, Calif., has written an excellent and very thoughtful article on these critical problems facing Third World countries and the rest of the world. He has been involved in intensive study of the problems of the Third World nations for the past 20 years.

His article follows:

Recently our 10-year-old son burst into our bedroom in the middle of the night, crying hysterically: "Mon, Dad, wake up. A computer has malfunctioned and the earth is going to blow up!" It was not the first such nightmare he has had, but it certainly was one of the most vivid and terrifying.

I listen to those around me and read accounts in the press, and I am disturbed by how many people expect our current economic problems to be solved by a depression or a war.

I read "The Global 2000 Report to the U.S. President" and find well-informed predictions that if present trends continue the world in the year 2000—less than two decades from now—will be one of massive famine, energy shortages, environmental devastation, and international strife.

"If present trends continue . . ." And still we fail to act.

What is the value of our nation's wealth if this is the bleak, despairing world we have created for ourselves? What is the worth of our many achievements if even our children perceive the world to be poised on the brink of disaster?

E. F. Schumacher once observed that we are a society "rich in means and poor in purpose." It seems true that at this point in our history we lack a clear sense of direction, a dedication to common goals and ideals which would make us act to avert these potential disasters.

And yet if we fail to act, if we simply let "present trends continue," the future looks ominous indeed.

What can be done? First we must understand that our problems cannot be solved in isolation. For better or worse, we are now part of a global community and a global economy. Our fate is tied to the fate of billions of other human beings throughout the world. Our problems cannot be solved in a lasting way until many of their problems are solved.

Second we must recognize that the kind of security which is bought with armaments is a fragile, precarious security. It is not a security which brings much peace of mind. It is a hollow security in economic terms as well because it drains so many of our resources in the present and threatens to destroy so many more in the future.

Many habitual responses of the past—like spending more for bombs and guns—become less and less rational in the face of limited resources and a growing sense of our common humanity.

As an alternative, I would propose something on the order of a new "Marshall Plan"—the Foundation Recovery Plan mounted by the United States after World War II to help the war-devastated countries of Western Europe.

In this case the plan would be one of massive economic aid to Third World countries to help them combat hunger, disease, illiteracy and unemployment.

This new initiative would require a commitment of national will and resources on a scale similar to the Marshall Plan. Like that plan it would be undertaken for both practical and humanitarian reasons. Americans felt genuine humanitarian concern for the peoples of Europe after WW II, but there was also the practical consideration that if these nations were not given large-scale financial assistance the entire international economic order might collapse, plunging the world back into a 1930s-like depression and sowing the seeds for further war.

Similar consequences may face us soon if we fail to help the Third World countries.

But how can we talk about giving more at a time like this, with our economy in its present condition? And besides, haven't we already done more than our share for these nations? Actually, compared to other developed nations the amount we have given in the past has been only a small percentage of our GNP—currently about one fifth of one percent. We must also remember that our nation is far wealthier today than it was when the original Marshall Plan was undertaken.

The "massive" aid program I am advocating could be funded with only 1 percent of our GNP. This is a tiny fraction of our output, but is massive in relation to the economic needs of Third World nations. This amount alone would multiply our present aid by more than five times, from about $5.1 billion to about $26 billion.

To avoid some past problems of monetary aid, much of this assistance could be in more creative forms. One would be forgiveness of past debts, to include having the U.S. government pay debts which Third World nations owe to private American lending institutions. This would reduce their need for foreign exchange, would diminish their export orientation, and would strengthen U.S. financial institutions. Some of our Western allies have already taken the lead in cancelling the debts of Third World countries.

This aid could also be in the form of appropriate technology suitable for use in rural areas, such as fuel-efficient tractors, windmills, solar cookers, grain dryers, irrigation pumps, etc. Manufacturing such devices here and distributing them to Third World nations could increase employment both at home and abroad. The effect would be to increase meaningful employment and expand purchasing power for perhaps millions of people.

What other benefits might result from such a plan?

The United States might regain its position of moral and political leadership in the world. This would be an assertion of democracy on a universal scale, accompanied by a recognition of human rights and dignity and the need for economic freedom. This would be a commanding example for other developed nations to follow.

The plan would assist Third World nations in meeting the basic needs of their people—including food, health care and employment. This would lead not only to greater well-being for these people themselves but also to more stable governments, healthier economies, and reduced international tensions.

Finally, asserting our will as Americans to undertake such a plan might unite our own people in a common purpose. Already millions of Americans—for religious and humanitarian reasons—have committed themselves to the struggle to end world hunger and achieve international peace. Let us broaden these efforts and bolster them with a national policy dedicated to economic assistance, recognition of human rights and dignity, and achievement of a lasting peace.

If we have the courage and the will to act, the year 2000 may dawn on an era of unprecedented well-being for the Earth and all its people.

If only we wake up in time.●

HOW TO APPROACH MIDDLE EAST ISSUES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 8, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to bring to my colleagues' attention an excellent article on the Middle East written by Harold H. Saunders, former Assistant Secretary of State for Near East and South Asian Affairs in the Department of State, which appeared in the April 4, 1981, issue of the Christian Science Monitor.

Mr. Saunders says our policy problems in the Middle East cannot be dealt with piecemeal. He believes our problem in the Middle East today is not just the Soviet thrust toward the Persian Gulf, the Arab-Israeli conflict and resolution of the Palestinian issue, or assuring a steady flow of oil. It is all these issues and Mr. Saunders feels we do not have the luxury of addressing one part of the Middle East problem at a time.

Mr. Saunders argues that there is no substitute for negotiations and that the United States should not start the peace process over again but should build from Camp David a negotiating process which engages Israelis and Palestinians in practical moves toward peace.

He concludes that:

* * * moving the Arab-Israeli conflict toward resolution is a key to our strategic position in the Middle East. Peacemaking is power. When the United States shows its power as a peacemaker, its position in the world is strengthened.

Mr. Saunders retired from the State Department in February, 1981, and is now associated with the American Enterprise Institute for Public Policy Research in Washington, D.C.

His article follows:

THE MIDDLE EAST PROBLEM NOW

(By Harold H. Saunders)

The United States cannot deal with the Middle East problem piecemeal. Those who recommended that we do so risk a more dangerous Middle East.

The "Middle East problem" is not just how to meet the Soviet thrust toward the strategic Persian Gulf area. It is not just how to resolve the Arab-Israeli conflict or the Palestinian problem. It is not just how to assure a steady flow of oil.

The "Middle East problem" is all of these issues—and more. The challenge is to conduct a policy that deals with them all at the same time this area is undergoing profound social, economic, and political change.

We do not have the luxury of addressing one part of the Middle East problem at a time. And we cannot deal with each issue separately, even though we want to avoid specific linkage. They are all parts of one world view when seen from the Middle East.

The U.S. view of the Soviet threat starts from concern about Soviet control over the flow of oil to the free world. The Soviet invasion of Afghanistan underscores that threat partly because the turmoil in neighboring Iran tempts Moscow to set up a similar military position in Iran on the Persian Gulf.

The people of the Middle East are keenly aware of the Soviet military aggression. But the Soviet threat looks different through the eyes of moderate Arabs. They see USSR strengthening its own position by exploiting extremists groups in the region who thrive on instability. They know that instability is likely in one of the fastest-changing areas of the world today.

They see the Soviets using the Arab-Israeli conflict as another wedge for broadening their position. They see the Soviets taking a free ride by backing the frustrated Palestinian nationalists without really helping them.

They see the Palestinian problem partly as a security problem. To be sure, it is also the symbol to them of injustice and of Arab humiliation at the hands of Western imperialism. But Palestinians occupy key positions in many of the Gulf societies. And moderate Arabs see an unresolved Palestinian problem as a club the radicals can hit them with—especially if those moderates cooperate with the U.S.

They see the Soviets exploiting further Arab-Israeli fighting—another cause of instability.

Arab cooperation with the U.S. in blunting the Soviet strategic threat will depend on U.S. cooperation with Arabs in meeting the security threat as they see it—and in reducing causes of instability. As an unofficial Egyptian recently put it: "For you to define

the threat only as you see it and not to understand how we see it is intellectual imperialism. If you ignore the hopes and fears of our people, you cannot expect to be strong here."

The Soviet threat looks different through Israeli eyes, too.

Israel is naturally preoccupied with security on its immediate borders. Israelis have normally left the Soviet military threat to the U.S.

The immediate security threat, as Israelis see it, is from Arab states which they believe reject Israel's existence. Israel sees Moscow backing some of those Arab states to improve its own position.

Apart from Egypt, Israelis do not always see that some Arab states fear Soviet objectives as much as Israelis do. They are uneasy seeing the U.S. in too close a relationship with powerful Arabs—even to check Soviet pressures.

The heart of Israel's long-term security lies in recognition and acceptance by other states in the Middle East—as well as the undoubted ability to defend itself. Israel's security requires a sound resolution of its conflict with the Arabs.

If we ignore the view that security is threatened as much by an unresolved Arab-Israeli conflict as by direct Soviet aggression, many Middle Easterners will go slow in security cooperation with us. They will eventually try to force us to pay attention to the threat as they see it by using economic pressure or military force.

The way to win cooperation is not to think of security as mainly a military problem. If we do, we will get much less than the cooperation we seek—on both security and economic matters. The way to win security cooperation is to define the threat broadly as others see it while preserving our own global perspective. If we do, we will get much more of the cooperation we seek.

How do we address the security problem as Middle Easterners see it?

There is no question that most leaders in the Middle East expect the US to check the Soviet's military. They will, therefore, listen carefully to our strategic thinking. Their ability to cooperate, however, will depend on local and regional issues.

For the Arabs, reducing tension which the USSR can exploit requires dealing convincingly with the Palestinian problem. For moderates, this means developing an opportunity for Palestinians to determine their own future in an honorable way that would enable them to live at peace with their neighbors.

For the Israelis, security begins with Israel's own military strength to defeat any Arab attack and with the US security umbrella. It also requires reducing potential military danger from the West Bank. Eventually it requires Arab recognition of Israel and readiness to make peace.

Some Israelis talk of a Palestinian state as potentially a Soviet-supported threat to Israel. These real security concerns often become tangled with the objective of some Israelis to make all the West Bank part of Israel.

In the eyes of Middle Easterners, dealing with security and the strategic balance requires dealing with the Arab-Israeli conflict.

The Camp David framework set up for the first time a negotiation in which the Israeli security and Palestinian interests are on the same agenda. The issue remains how to involve both Palestinians and Israelis in such a negotiation.

Two critical ingredients have been missing from this negotiation: (1) The Palestinian National Charter gives Israel the impression that there is no Palestinian commitment to make peace between Israel and the Palestinian people. Continuing terrorist attacks reinforce the Israeli impression. (2) The Israeli policy of placing settlements in the West Bank gives Arabs the impression that there is no Israeli commitment to accept the Palestinian Arab homeland they seek.

What opened the door wide to peace between Egypt and Israel were President Sadat's dramatic visit to Jerusalem and Israel's response. More than words, Sadat demonstrated Egypt's recognition of Israel and readiness for peace and normal relations. With the promise of peace, Israel negotiated withdrawal of both military forces and civilian settlements from Sinai.

By making peace between Israel and the Palestinian people look possible, the Palestinians could open the way to the next steps toward peace. An unambiguous declaration of Palestinian readiness to make peace would not require them to give up a negotiating chip because they could condition it on a reciprocal Israeli commitment.

An Israeli initiative to produce a negotiation could also have important results.

How the Palestinians would organize themselves for negotiation would be part of the Palestinian position. Both the Palestine Liberation Organization and leaders in the West Bank and Gaza would play critical roles in crystallizing that position.

There is no substitute for negotiation. That is why efforts must be redoubled to find a basis for negotiation which can involve both Israelis and Palestinians. Europeans could play an important role—provided their objective is engaging both sides in negotiation. Only a negotiated agreement can change the situation on the ground.

To scrap the Camp David framework would be unwise, even though it has not accomplished all we wanted. It was hammered out on the anvil of political realities as far as it could go. It was approved by the Egyptian and Israeli parliaments. Its approach is realistic.

The problem is not to start over but to build from Camp David a negotiating process that will engage Palestinians and other Arabs with Israelis in practical moves toward peace.

Neither a Palestinian settlement nor an Arab-Israeli peace will alone assure stability in the Middle East. Neither will assure adequate oil supply. Neither will stop the Soviets. Peace is not a panacea. The Arab-Israeli conflict is not the only conflict or cause of instability in the Middle East.

It is equally true, however, that deadlock and utter lack of hope for the Palestinians will virtually assure instability and prolonged war against Israel. Continuing deadlock can gradually force moderates into the rejectionist camp. It can lead to further conflict. It can, in part, determine the political shape of the Middle East for the rest of this decade.

Whatever else we may need to do, moving the Arab-Israeli conflict toward resolution is a key to our strategic position in the Middle East. Peacemaking is power. When the US shows its power as a peacemaker, its position in the world is strengthened.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, April 9, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 10

9:00 a.m.

Foreign Relations

To hold hearings on the nomination of John J. Louis, Jr., of Illinois, to be U.S. Ambassador to the United Kingdom of Great Britain and Northern Ireland.

4221 Dirksen Building

9:30 a.m.

Labor and Human Resources

To resume hearings on proposed authorizations for fiscal year 1982 for health professions block grants and preventive health block grants.

4232 Dirksen Building

10:00 a.m.

Budget

Business meeting, to continue markup of the proposed first concurrent budget resolution for fiscal year 1982 setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.

6202 Dirksen Building

Foreign Relations

To resume hearings on proposed legislation authorizing funds for fiscal year 1982 for foreign assistance programs, receiving testimony from administration officials on foreign assistance to Africa.

4221 Dirksen Building

10:30 a.m.

Judiciary

To hold hearings on S. 114, establishing criteria for the imposition of the death penalty for Federal crimes.

2228 Dirksen Building

APRIL 20

10:00 a.m.

Judiciary

To hold hearings on S. 816, to limit the ability of foreign governments to sue for damages for antitrust violations in U.S. courts.

2228 Dirksen Building

APRIL 21

8:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony on Navy/Marine Corps procurement, operations, and maintenance programs.
1223 Dirksen Building

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for Forest Service programs, the Office of the Federal Inspector for the Alaska Natural Gas Transportation System, and the Pennsylvania Avenue Development Corporation.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings on proposed authorizations for housing programs.
5302 Dirksen Building

9:30 a.m.
Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the International Communication Agency, Arms Control and Disarmament Agency, and the Federal Trade Commission.
S-146, Capitol

10:00 a.m.
Appropriations
District of Columbia Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the government of the District of Columbia.
1224 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on S. 761, authorizing a national program to encourage dam safety, and to review the Federal role in State water planning and research assistance.
4200 Dirksen Building

Judiciary
To hold hearings on proposed legislation, making a defendant liable only for damages caused by sales and proportionate portion on damages attributable to sales by a nonconspirator.
2228 Dirksen Building

Labor and Human Resources
To hold hearings to request certain records from the Department of Labor.
4232 Dirksen Building

10:30 a.m.
Armed Services
Sea Power and Force Projection Subcommittee
Closed business meeting, to begin mark up of S. 815, authorizing funds for fiscal year 1982 for military procurement programs of the Department of Defense.
224 Russell Building

1:00 p.m.
Appropriations
*State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for programs under its legislative jurisdiction, receiving testimony from public witnesses.
S-146, Capitol

Labor and Human Resources
To resume hearings on alleged sex discrimination in the workplace.
4232 Dirksen Building

2:00 p.m.
Armed Services
Preparedness Subcommittee
Closed business meeting, to resume markup of S. 815, authorizing funds for fiscal year 1982 for military procurement programs of the Department of Defense.
212 Russell Building

Environment and Public Works
Water Resources Subcommittee
To continue hearings on S. 761, authorizing a national program to encourage dam safety, and to review the Federal role in State water planning and research assistance.
4200 Dirksen Building

Select on Ethics
Business meeting, to consider further the proposed revisions to the Senate Code of Official Conduct.
6226 Dirksen Building

APRIL 22

8:00 a.m.
Governmental Affairs
To hold oversight hearings on the activities of the U.S. Postal Service, and to receive a report from the Postmaster General.
3302 Dirksen Building

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of the Secretary of Energy.
1114 Dirksen Building

*Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Legal Services Corporation, Federal Communications Commission, American Bar Association and the Commission on Civil Rights.
S-146, Capitol

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To continue hearings on proposed authorizations for housing programs.
5302 Dirksen Building

9:30 a.m.
Appropriations
Agriculture, Rural Development, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Food and Drug Administration, and the Commodity Futures Trading Commission, and for the Agricultural Marketing Service, Federal Grain Inspection Service, Office of Transportation, and the Agricultural Cooperative Service, of the Department of Agriculture.
1223 Dirksen Building

Appropriations
*HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Environmental Protection Agency
1318 Dirksen Building

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed legislation authorizing funds for the National Science Foundation.
235 Russell Building

Labor and Human Resources
To hold hearings on proposed legislation authorizing funds for certain health maintenance organizations of the Department of Health and Human Services.
4232 Dirksen Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for NATO infrastructure/European construction programs.
1224 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To continue hearings on S. 761, authorizing a national program to encourage dam safety, and to review the Federal role in State water planning and research assistance.
4200 Dirksen Building

2:00 p.m.
Environment and Public Works
Water Resources Subcommittee
To continue hearings on S. 761, authorizing a national program to encourage dam safety, and to review the Federal role in State water planning and research assistance.
4200 Dirksen Building

APRIL 23

8:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony on Navy/Marine Corps manpower and reserve programs.
1223 Dirksen Building

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Heritage Conservation and Recreation Service, and the Indian Health Service, Department of the Interior.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To continue hearings on proposed authorizations for housing programs.
5302 Dirksen Building

Judiciary
Separation of Powers Subcommittee
To hold hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception, S. 583, limiting the jurisdiction of the Federal courts in matters relating to abortion, and Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, proposed constitutional amendments providing for the protection of unborn children.
1202 Dirksen Building

9:30 a.m.
Appropriations
Agriculture, Rural Development, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Farmers Home Administration and the Rural Electrification Administration of the Department of Agriculture, and the Farm Credit Administration.
1318 Dirksen Building
Judiciary
Agency Administration Subcommittee
To hold hearings on S. 890 and S. 684, bills to provide for congressional review of proposed Federal agency rules.
235 Russell Building
Judiciary
Security and Terrorism Subcommittee
To hold hearings to explore the direction and support tactics of terrorism.
2228 Dirksen Building
Labor and Human Resources
Aging, Family and Human Services Subcommittee
To hold hearings on proposed legislation authorizing funds for certain social services block grants.
4232 Dirksen Building
*Special on Aging
To hold oversight hearings on the implementing of the Older Americans Act.
5110 Dirksen Building
10:00 a.m.
Appropriations
District of Columbia Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the government of the District of Columbia.
1224 Dirksen Building
*Energy and Natural Resources
*Energy Regulation Subcommittee
To hold hearings on proposed amendments relating to off-gas provisions (Sec. 301a), and on all aspects of the Powerplant and Industrial Fuel Use Act (Public Law 95-620).
3110 Dirksen Building
Environment and Public Works
Water Resources Subcommittee
To continue hearings on S. 761, authorizing a national program to encourage dam safety, and to review the Federal role in State water planning and research assistance.
4200 Dirksen Building
Governmental Affairs
To hold hearings on S. 591, to provide incentives for the Federal Government in their debt collection efforts.
3302 Dirksen Building
2:00 p.m.
Select on Ethics
Business meeting, to consider further the proposed revisions to the Code of Official Conduct.
6226 Dirksen Building

APRIL 24

9:00 a.m.
Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To continue hearings on proposed authorizations for housing programs.
5302 Dirksen Building
Judiciary
Separation of Powers Subcommittee
To continue hearings on S. 158, establishing a congressional finding and declaration that human life begins at conception, S. 583, limiting the jurisdiction of the Federal courts in matters relating to abortion, and Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, proposed constitutional amendments providing for the protection of unborn children.
1202 Dirksen Building
9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on miscellaneous tax measures, S. 408, 436, 598, and 867.
2221 Dirksen Building
Judiciary
Courts Subcommittee
To hold hearings on proposed legislation to create Federal judgeships.
2228 Dirksen Building
10.00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee
To continue hearings on proposed amendments relating to off-gas provisions (Sec. 301a), and on all aspects of the Powerplant and Industrial Fuel Use Act (Public Law 95-620).
3110 Dirksen Building

APRIL 27

8:00 a.m.
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold oversight hearings on the activities of the Senior Executive Service of the Office of Personnel Management.
357 Russell Building
9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Science Foundation.
235 Russell Building
*Judiciary
To resume hearings on S. 114, establishing criteria for the imposition of the death penalty.
2228 Dirksen Building
10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on proposed legislation authorizing funds for the National Transportation Safety Board.
6226 Dirksen Building
Governmental Affairs
Permanent Subcommittee on Investigations
To hold oversight hearings on alleged fraud and abuse in the operation of home health care services.
3302 Dirksen Building
Small Business
To hold hearings to examine the Small Business Administration's contracting procedures and personnel policies.
424 Russell Building
1:00 p.m.
Finance
Oversight of the Internal Revenue Service Subcommittee
To hold oversight hearings on recent IRS regulations under the Internal Revenue Code relating to family farms and other family businesses.
2221 Dirksen Building

APRIL 28

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the National Endowment for the Arts and the National Endowment for the Humanities.
1114 Dirksen Building
9:30 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings to review major banking and consumer protection laws, focusing on Federal financial regulators.
5302 Dirksen Building
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on proposed legislation authorizing funds for the hazardous materials transportation program, the natural gas pipeline safety program and the hazardous liquid pipeline safety program.
235 Russell Building
Labor and Human Resources
Labor Subcommittee
To hold oversight hearings on the implementation of the Davis-Bacon Act.
4232 Dirksen Building
10:00 a.m.
Appropriations
District of Columbia Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the government of the District of Columbia.
1224 Dirksen Building
Governmental Affairs
To hold hearings on S. 10, to establish a Commission on More Effective Government.
3302 Dirksen Building
Labor and Human Resources
Education Subcommittee
To hold hearings to review certain educational programs.
5110 Dirksen Building
Small Business
To continue hearings to examine the Small Business Administration's contracting procedures and personnel policies.
424 Russell Building
2:00 p.m.
Appropriations
*Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of the Secretary of the Treasury.
S-126, Capitol
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 306, authorizing funds for fiscal year 1982 for the construction, operation, and maintenance of specified hydroelectric powerplants at various existing water projects.
3110 Dirksen Building
Select on Ethics
Business meeting, to consider further the proposed revisions to the Senate Code of Official Conduct.
6226 Dirksen Building

APRIL 29

8:00 a.m.
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To resume hearings on the U.S. Postal Service proposal to expand the present ZIP code system to a 9-digit ZIP code.
5110 Dirksen Building

9:00 a.m.
Commerce, Science, and Transportation
Business meeting on pending calendar business.
235 Russell Building

9:30 a.m.
Appropriations
*HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the National Consumer Cooperative Bank, and the Consumer Product Safety Commission.
1318 Dirksen Building

Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Commission on Security and Cooperation in Europe, Small Business Administration, and the Federal Maritime Commission.
S-146, Capitol

Labor and Human Resources
Aging, Family and Human Services Subcommittee
To hold oversight hearings on the implementation of the Economic Opportunity Act.
457 Russell Building

Labor and Human Resources
Labor Subcommittee
To continue oversight hearings on the implementation of the Davis-Bacon Act.
4232 Dirksen Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for Middle East/rapid deployment force (RDF) construction programs.
1224 Dirksen Building

Governmental Affairs
To hold hearings on pending nominations.
3302 Dirksen Building

Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold joint hearings with the House Subcommittee on Human Resources of the Committee on Post Office and Civil Service on the use of consultants by the Federal Government.
311 Cannon Building

Judiciary
To hold oversight hearings on the implementation of the Copyright Act of 1976, focusing on provisions relating to cable television.
2228 Dirksen Building

Labor and Human Resources
Education Subcommittee
To continue hearings to review certain educational programs.
6226 Dirksen Building

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for conservation and solar energy programs of the Department of Energy.
1114 Dirksen Building

Appropriations
Military Construction Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for Middle East/rapid deployment force (RDF) construction programs.
1224 Dirksen Building

Environment and Public Works
Transportation Subcommittee
To hold hearings on S. 841, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways, and on other related measures.
4200 Dirksen Building

APRIL 30

8:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the Defense Establishment, receiving testimony on Navy research and development programs.
1223 Dirksen Building

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the National Park Service, Department of the Interior.
1114 Dirksen Building

9:30 a.m.
Appropriations
*HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the National Science Foundation.
1318 Dirksen Building

Banking, Housing, and Urban Affairs
International Finance and Monetary Policy Subcommittee
To hold hearings on proposed authorizations for fiscal years 1982 and 1983 for the Export Administration Act, and proposed authorizations for fiscal year 1982 for the international affairs programs of the Treasury Department.
5302 Dirksen Building

Judiciary
To hold hearings on S. 255, to encourage American innovation by restoring the patent system as it affects certain products subject to premarket testing by the Federal Government.
2228 Dirksen Building

Labor and Human Resources
Handicapped Subcommittee
To hold hearings on proposed authorizations for fiscal year 1982 for the developmental disabilities program.
4232 Dirksen Building

10:00 a.m.
Appropriations
District of Columbia Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1982 for the government of the District of Columbia.
1224 Dirksen Building

Environment and Public Works
Transportation Subcommittee
To continue hearings on S. 841, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways, and on other related measures.
4200 Dirksen Building

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the multilateral development banks of the Department of the Treasury.
S-126, Capitol

Governmental Affairs
Federal Expenditures, Research, and Rules Subcommittee
To hold hearings on S. 30, to require each Federal agency to pay interest on contract payments more than 30 days overdue.
3302 Dirksen Building

Select on Ethics
Business meeting, to consider further the proposed revisions to the Senate Code of Official Conduct.
6226 Dirksen Building

MAY 1

9:30 a.m.
Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Office of Secretary of State, and for the administration of foreign affairs.
S-146, Capitol
